Retrospective accounting and periodic reporting.—States now have the option of using future or prior month's income in determining eligibility and benefits for all or part of their food stamp caseload. The Committee bill would continue this option to choose between prospective and retrospective accounting until October 1983, at which time retrospective accounting would become mandatory. Requiring food stamp recipients to regularly report their circumstances (e.g., income, household size) is now optional with the States. The Committee bill would continue this option until October 1983, at which time periodic reports on household circumstances would be required. In both the retrospective accounting and periodic reporting provisions, exceptions and waivers are allowed for categories of households where serious hardship would result or there is a need to conform to the AFDC program's accounting and reporting system.

Medical and dependent-care deductions.—The Committee bill would repeal liberalizations (scheduled to be implemented in fiscal year 1982) of the limits on how much a household may deduct from its income for food stamp purposes if it has medical or dependent-care expenses. Present law requirements would be retained: (1) medical expenses of the elderly and disabled would continue to be deducted to the extent they exceed $35 per month; and (2) dependent-care expenses related to employment would continue to be deducted up to a limit of $115 per month (adjusted for inflation beginning in July 1983) whether claimed separately or in combination with any shelter expense deduction.

Strikers.—Households with members on strike would be denied eligibility for food stamps. However, if eligible prior to the strike, a household would retain its eligibility, but its benefits could not increase as a result of income lost because of the strike.

Work requirements.—Household disqualification, if the primary wage earner has voluntarily quit a job without good cause, would be extended to include those already receiving food stamps (only applicants are now disqualified under this rule) and the period of disqualification for voluntarily quitting a job would be lengthened from 60 to 90 days. Household members not otherwise exempt from work registration would be required to register for work after the youngest child they are caring for reaches age 6; present law allows caretakers to delay registration until the child is age 12. Households in which a member is exempt from food stamp work registration because the member is subject to another program's work registration requirements would automatically lose food stamp eligibility if the member fails to fulfill the alternate work registration rules.

Workfare programs.—States and localities would be allowed to establish workfare programs under which food stamp work registrants could be required to perform public service work arranged by the State or locality in order to retain food stamp eligibility. The number of hours of work required would be calculated by dividing a household's monthly benefit by the minimum wage rate.

Pro rating first month benefits.—An applicant household's first month's benefits would be pro rated according to when in the month the household applied. At present, applicant households are given a full first month's allotment without regard to the date of application.

Expedited benefits.—Rules governing expedited issuance of benefits to very poor applicants would be tightened so as to ensure that households given expedited service actually have few, if any, resources to call on.

Collection of overpayments.—The collection of overissued benefits, whether the result of fraud, misrepresentation, or other causes, would be improved. In cases of fraud or misrepresentation, the household would have to repay double the value obtained as the result of a violation. State agencies would be required to collect other types of overpayments, although limits would be placed on the rate at which collection can occur. Further, States would share 25 percent of nonfraud collections, in addition to the present 50 percent share of collections in cases of fraud or misrepresentation.

Penalties.—The penalty of disqualification would be extended to include, not only cases of fraud and violation of Federal law and regulations, but cases of misrepresentation and violation of State law. Disqualification periods would be lengthened to 6 months for the first offense, 1 year for the second offense, and permanent disqualification for the third offense. Household benefits would not be allowed to increase because a household member was disqualified. Mandatory minimum prison sentences would be required after the first conviction for a criminal offense under the Act, but work restitution would be allowed. Courts would be allowed to add up to 18 months to any regular disqualification period when a criminal offense was found.

Use of unemployment insurance and social security information.—The Committee bill would require that, in verifying food stamp eligibility and benefits, States ask for and use available information collected by unemployment insurance agencies or the Social Security Administration. The date by which unemployment insurance agency information should be available to State food stamp agencies would be moved up to January 1982 from January 1983. Social Security account numbers would be required for all household members, not just adults and those with earnings as under present regulations.

Appropriations authorized.—The Committee bill would authorize appropriations under the Food Stamp Act of 1977 up to the amounts set out below:

	Present law	Committee bill
Fiscal year:		
1981	$9,739,276,000	$11,480,000,000
1982	0	10,870,000,000
1983	0	11,290,000,000
1984	0	11,325,000,000
1985	0	11,840,000,000

The amounts authorized by the Committee bill include appropriations necessary to fund a food assistance block grant in Puerto Rico, as required by title VII of the Commitee bill.

OTHER SIGNIFICANT PROVISIONS

Household consolidation.—The committee bill would change certain provisions of present law that allow some households to split artificially into several "food stamp households." Nonelderly parents and their children would be required to apply as one household; "informal" boarders would not be eligible as separate households.

Drug addicts and alcoholics.—Drug addicts and alcoholics residing in treatment programs would no longer be eligible for food stamp allotments.

Sponsored aliens.—For 3 years after entry, legally resident aliens who entered the country with an affidavit of support from a sponsor would have a proportion of the sponsor's income and assets attributed to them in determining food stamp eligibility and benefits.

Outreach and bilingual requirements.—Federal funding of food stamp "outreach" activities designed to encourage participation would be prohibited. States would no longer be required to provide bilingual staff and materials, but could do so at their own option.

Excluded income and resources.—The Committee bill would make clear that only a Federal law can exclude income of resources from food stamp eligibility and benefit calculations. Energy assistance payments would be excluded if identified as energy assistance by Federal law.

Eligible stores.—Food stores where alcoholic beverages are served for consumption on the premises would no longer be authorized to accept food stamps.

Cash change.—The committee bill would remove the requirement in present law that cash change be given in food stamp purchases.

Mail issuance.—States would be held liable for losses from the mail issuance of food stamps, to the extent losses exceed 1 percent. The Department of Agriculture would be given authority to set liability standards for mail issuance of authorization to participate documents and could bar mail issuance of food stamps where it jeopardizes program integrity, or is not cost effective.

Alaskan benefits.—A special higher benefit level would be authorized for rural areas of Alaska.

Counting food stamp benefits.—The Food Stamp Act prohibitions against counting food stamp benefits as income in other programs or adjusting benefits in other programs because of the receipt of food stamps would be removed by the Committee bill.

Notices.—Food stores approved to accept food stamps would be required to post notices giving information on how to report observed cases of food stamp abuse. All food stamp applications would have to contain a notice that the information provided will be subject to verification by Federal, State, and local agencies.

Change of residence.—The Committee bill would remove the requirement that eligibility for food stamps be continued for 60 days when a household moves to another political jurisdiction.

Restoring improperly denied benefits.—No more than 1-year's worth of food stamps could be restored upon finding an improper denial of benefits.

Replacing food stamp allotments.—Restrictions would be placed on replacing lost, destroyed, or misplaced food stamp allotments.

Adjusting benefits.—The Committee bill would allow State agencies to promptly reduce or terminate benefits, without meeting advance notice requirements, if a recipient household has provided, in writing, information that clearly requires such an action.

Recertification notices.—The requirement that State agencies notify recipients as to when their eligibility certification will expire immediately before the last month of certification would be removed.

Disclosure of information.—The Committee bill would require that information provided by food stamp recipients be made available to law enforcement officials investigating food stamp violations.

"Cash-out" pilot projects.—Existing pilot projects involving the payment of food stamp benefits in cash to elderly households and households composed of recipients of Supplemental Security Income (SSI) assistance would be authorized to continue through fiscal year 1985. New authority would be added to operate pilot projects involving the payment of food stamp benefits in cash to households where all members are recipients of Aid to Families with Dependent Children (AFDC).

Title V

Title V of the Committee bill would extend authority to operate commodity distribution programs—including the Commodity Supplemental Food Program and programs for Indian reservations, outlying territories, elderly nutrition projects, institutions, summer camps, and disaster relief—through fiscal year 1985. Criminal penalties would be stipulated for misuse of federally donated commodities.

Title VI

Title VI of the Committee bill would ease existing rules allowing certain States to "cash out" food stamp benefits for SSI recipients, in order to permit the continued availability of this option.

Title VII

Title VII of the Committee bill would lower food stamp income eligibility limits in Puerto Rico to 55 percent of those used for the continental United States from October 1, 1981, through March 31, 1982, and beginning in April 1982, convert the food stamp program in Puerto Rico into an $825 million per year block grant for food assistance.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE addressed the Chair.

Mr. HELMS. Mr. President, I yield as much time to the distinguished Senator from Kansas as he may require.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. I thank the distinguished chairman for yielding.

I wish to touch on just a few highlights in a general way, and then as we get into the different amendments I will be participating in the debate on some of those amendments.

I wish to express my support for the legislation now before us, as is, without any additional changes, and I know there are changes that are probably going to be coming from different directions.

Mr. President, as chairman of the Subcommittee on Nutrition, I would like to express my overall support for S. 1007, as reported from the Agriculture Committee. This legislation represents a strong consensus of committee support for changes in the food stamp program that will simultaneously target benefits to truly needy Americans, while achieving major reductions in program expenditures. The committee has acted responsibly in endorsing a bill that goes beyond the President's request in cuts for fiscal year 1982 by close to $400 million. Over the next 4 years, the changes incorporated into this legislation will achieve savings of about $8.6 billion for this program. This total will exceed the President's budget request, as well as the assumptions contained in the Senate-passed first concurrent resolution for fiscal year 1982.

In its deliberations, the committee not only fulfilled a major responsibility to the American taxpayer, but it is important to emphasize that this legislation has also fulfilled a major responsibility to needy low-income Americans. S. 1007 has been carefully designed to minimize the impact of the President's budget cuts on the poor people of this country. The Senator from Kansas had supported most of the administration's original proposals, with the exception of the school lunch offset provision which would have decreased a family's food stamp allotment if the children received a free school lunch. Such a proposal would primarily have hurt low-income families with several children.

At the outset, I think we should lay to rest the notion that somehow this program is designed to help those not in need of assistance.

Of all the households affected by this proposal, about 87 percent, or 2.15 million families, have gross incomes below the poverty line. USDA statistics indicate that about 43 percent of food stamp households with gross incomes below 50 percent of poverty would have suffered a benefit loss of about $12 per school child per month.

I might add that this particular amendment which was supported and proposed by the administration was overwhelmingly defeated in the committee by a vote of 14 to 3.

RESTORATION OF DIGNITY AND INTEGRITY TO PROGRAM

Mr. President, S. 1007 constitutes a strong effort on the part of the committee to restore an image of dignity and integrity to the food stamp program. The Senator from Kansas is pleased that nearly all of the provisions from S. 997, S. 1016, and a later package of amendments to the administration's bill were accepted by the committee.

The legislation before us has incorporated almost all of the provisions of S. 1016, introduced by the Senator from Kansas, along with a majority of provisions of the chairman's bill, S. 1006. All the major problem areas cited in testimony by witnesses before the committee have been addressed by this legislation in an effort to tighten up on potential loopholes in the program.

Some of the provisions intended to tighten up on fraud and abuse include tougher penalties for fraud and misrepresentation; limitations on mail issuance in areas where high losses have been prevalent; limiting the restoration of wrongfully denied benefits; improved recovery techniques for collecting overpayments; restrictions on expedited services; limitations on the replacement of destroyed coupons; a tightening of the definition of "household" to avoid payment of unnecessary benefits; mandatory matching of food stamp records with those of other programs; and improved access of law enforcement officials to program records.

We had a lot of testimony that these were areas that needed addressing; they were addressed by the chairman's proposal and by the bill introduced by this Senator and a number of Senators on both sides of the aisle.

In addition to major initiatives enacted in 1979 and 1980, these provisions give USDA and State agencies the necessary tools to strengthen program management and integrity, along with already existing authority in the law.

It has always been difficult to be poor, and I would suggest, having heard the statements about how much the cost of this program has increased—and the Senator from Kansas was here at the inception of the program, and it was the idea of the late and beloved distinguished Senator from Minnesota, Senator Humphrey—that there have been problems with the program. These problems have been addressed. There have been abuses in the program, and we have attempted to address these.

But I would say, as I have indicated from time to time in the committee deliberations, that I consider the food stamp program to be more or less of an economic barometer. In good times, when inflation rates are low and interest rates are low and people are working, the program costs are much less. But in times such as the times right now, when the economy is uncertain and unemployment is high and inflation is high, the program costs are higher.

I would suggest to those people—and there is certainly room to find fault with any program administered by the Federal Government, and the food stamp program is no exception—that there are still some who abuse it, and there will continue to be some who abuse it after we tighten up the program. But I suggest there are some in every walk of life who abuse something, some program, or whatever.

So we can talk about slashing and cutting the food stamp program maybe another $1 billion, another $2 billion, another $3 billion, or another $4 billion, but we must consider the impact on the people the program may benefit.

I recognize that most of the audiences that we address as we travel around our States or in political rallies could care less about the food stamp program. Not many recipients of the food stamp program show up for fund-raisers for political candidates, so it is a good place to attack the food stamp program and to indicate what a waste it is. But I suggest there are millions of Americans who, without the food stamp program, would be in deep difficulty, as would their families.

So we have done what we were asked to do. We have looked at the program, we have taken strong initiatives in our com-

mittee—and many times with the unanimous support of the committee, sometimes without—to save as much money as the President requested, and more. I just hope we do not get into some contest on the floor, without regard to the beneficiaries of this program, to see who can cut the most—or who can cut back another $500 million or $1 billion in the food stamp program.

It has always been difficult to be poor, but rapidly deteriorating economic conditions have made poverty circumstances extremely difficult to cope with in recent years.

It seems to me, if we have the program, we have an obligation to make certain it works. We have an obligation to eliminate waste and fraud and abuse wherever we can. But I think we have made the decision long before the food stamp program, in the so-called commodity program, to somehow address the nutritional needs of low-income Americans.

So I just suggest that we are going to continue oversight of the food stamp program. There is no doubt in this Senator's mind that next year and the year following there will be other areas we will find that should be tightened up. There have been unnecessary, in some cases, wholesale abuses of the program. These abuses should not be tolerated.

But, at the same time, I think we must focus on those who do not abuse the program, those who have a need for the program, and those who would suffer without the program. They are in the great majority, and we can cite the horror stories in some cases, but it seems to me our responsibility as a Congress is clear.

President Reagan has said a number of times we have this "safety net" to protect the truly needy. I hope in our cuts, which were rather extensive in the Senate Committee on Agriculture—as I have indicated, more than $8 billion over the next 4 years—we will do what the President wants to do—to reduce Federal spending where possible without impacting, without affecting, the truly needy. I believe we have accomplished this in the Senate Committee on Agriculture.

I would just conclude my opening statement by indicating my support for S. 1007. In my view the bill represents a commendable effort on the part of the Committee on Agriculture to agree, as we did, to make constructive changes in the program. This bill will target food stamp benefits to the neediest individuals within our society by setting new eligibility requirements and making significant improvements in the management and administration of the program.

There will be amendments offered—and I do not quarrel with anybody who wants to offer an amendment—to make further reductions in benefits to low-income Americans. It seems to me that some of those may be offered in a way to get at fraud and abuse and waste in the program. But I think the best way to do that is to address the areas of fraud and abuse—not a wholesale cutting of benefits to some who may be in the truly needy category.

So, in my view, it seems to me our obligation is still pretty much the same.

There are a lot of misconceptions about the food stamp program. There are a lot of myths about the food stamp program. It is suggested by some that those of us from farm States support the food stamp program for merely political reasons for the farmers' benefit, and, if they benefit, we just march right down the line and vote for anything that may benefit America's farmers.

That is a myth. I cannot recall very many farmers asking me to support the food stamp program.

I do, however, think that it is a very worthwhile program. By and large over the years, it has worked well. We have had changes made by different administrations in the program in an effort to tighten up the program. These efforts have been bipartisan in nature, and I hope that will continue. I am certain it will continue under the chairmanship of the distinguished Senator from North Carolina.

But we have our differences, and we hope to debate those differences on the Senate floor. Then we hope to have a record vote, if one is necessary, to indicate whether we are going to reinstate the purchase requirement, to indicate whether we are going to require an offset of some poor child who receives a free lunch—if we are going to deduct that from their food stamp benefits—and perhaps other amendments.

But in the final analysis, whether there is any change or not on the Senate floor, we have accomplished the mandate of the President. We have exceeded the mandate of the President and the Office of Management and Budget, and I believe we have done a good job in our committee.

I hope the amendments to further reduce benefits will not be approved—that we can go about the business of seeing that the program is properly administered, and then, if we find it necessary to do further tightening in the outyears, we can do this in committee.

I thank the chairman again for yielding, and I yield back the remainder of my time.

Mr. HELMS. I thank the Senator.

Mr. HUDDLESTON. Mr. President, will the Senator yield me time?

Mr. HELMS. I will be glad to yield on my time.

Mr. HUDDLESTON. Mr. President, today we consider S. 1007, the Food Stamp and Commodity Distribution Amendments of 1981. On the whole, I believe this bill is a responsible approach to reforming the food stamp program, although I do have some reservations about the severity of benefit reductions in several areas.

Through this bill, the Committee on Agriculture, Nutrition, and Forestry would achieve food stamp savings far in excess of those proposed by the President and assumed under the budget reconciliation procedure. In the next 3 years, this bill would achieve $700 million more savings than required by reconciliation. Over the 4-year life of the bill, it would reduce overall food stamp expenditures by $8.6 billion, compared to current law.

In addition, S. 1007 comprehensively addresses problems of fraud and abuse in the food stamp program. New tools are provided to Federal, State, and local administrators to manage the program more efficiently and close several costly loopholes which now exist.

With this bill and the major accountability reforms enacted in 1979 and 1980, Congress has done its job in tightening the administration of this program. The challenge now is for program administrators to aggressively implement the changes we have made.

By and large, I believe the committee has designed the benefit reductions in such a way that needed assistance would be continued to poor Americans.

However, it would be impossible to design savings that satisfy the targets in the budget resolution without hurting some people. Under this bill, every food stamp recipient, including the elderly and disabled, would suffer some loss in benefits. About 1 million persons would be eliminated from the program.

Provisions in S. 1007 that reduce the earned income deduction from 20 to 15 percent cause me concern. I also have reservations about our decisions to delay cost of living increases in each of the next 3 years and to freeze deductions for 2½ years. These proposals will undoubtedly lower the purchasing power of many persons who are hard pressed to make ends meet now. However, I believe these proposals are preferable to others which were before the committee.

I am pleased that the committee rejected proposals to restore the purchase requirement, count school lunches and energy assistance against food stamps, raise the benefit reduction rate, lower the income eligibility limits below 130 percent of poverty, and freeze deductions permanently.

I do not believe these proposals represent sound policy, and I intend to oppose these and any other floor amendments that would reduce benefits below the levels proposed in S. 1007.

The committee has been diligent, thorough, and responsible in its work on food stamps. I intend to support the committee bill.

I ask unanimous consent that a summary of S. 1007 be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF MAJOR PROVISIONS OF S. 1007—FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981

S. 1007, as amended by the Committee, would extend and amend the Food Stamp Act of 1977. Federal budget savings are expected to total $1.855 billion in fiscal year 1982, rising to over $2 billion annually in later years.

Titles I through III would—

(1) limit food stamp eligibility to households with gross monthly incomes of 130 percent of the nonfarm income poverty guidelines prescribed by the Office of Management and Budget;

(2) delay the inflation adjustments for food stamp monthly allotment levels until April 1982, July 1983, and October of each year thereafter;

(3) freeze food stamp deduction levels at their 1981 amounts until July 1983 (with indexing to occur again in July 1983 and in October of each year thereafter);

(4) reduce the amount of household earnings deducted from income in establishing benefits from 20 to 15 percent;

(5) require States, beginning in October 1983, to base eligibility and benefits on households' prior month's income (retrospective accounting);

(6) require food stamp recipients to regularly report on their household circumstances (such as income and household size) in order to receive benefits;

(7) repeal liberalizations of the limits on how much a household may deduct from its income for food stamp purposes if it has medical or dependent-care expenses;

(8) deny households with members on strike from being eligible for food stamps unless the household was eligible prior to the strike;

(9) extend household disqualification (if the primary wage earner has voluntarily quit a job without good cause) to include those already receiving food stamps, lengthen the period of disqualification for voluntarily quitting a job from 60 to 90 days, and require household members not otherwise exempt from work registration to register for work after the youngest child they are caring for reaches age six rather than age twelve;

(10) allow States and localities to establish workfare programs under which food stamp work registrants could be required to perform public service work arranged by the State or locality in order to retain food stamp eligibility;

(11) prorate first-month benefits according to when the household applies;

(12) tighten rules governing expedited issuance of benefits to very poor applicants;

(13) require households to repay double the value of benefits received fraudulently or through misrepresentation, and require State agencies to collect other types of overpayments;

(14) extend the penalty of disqualification to include fraud, violation of Federal or State laws and regulations, and misrepresentation, and lengthen disqualification periods to six months for the first offense, one year for the second offense, and permanent disqualification for the third offense; and

(15) make administrative improvements to tighten program operations by improving verification techniques, tightening eligibility for boarders and family units, making drug addicts and alcoholics residing in treatment programs ineligible, restricting benefits to aliens, eliminating Federal funding for outreach, removing the requirement for cash change in food stamp transactions, and lifting the prohibition on counting food stamp benefits in other programs.

Title IV would authorize appropriations of $11,480,000,000 for fiscal year 1981, $10,870,000,000 for fiscal year 1982, $11,290,000,000 for fiscal year 1983, $11,325,000,000 for fiscal year 1984, and $11,840,000,000 for fiscal year 1985.

Title V would extend authority to operate commodity distribution programs through fiscal year 1985 and stipulate penalties for misusing federally donated commodities.

Title VI would ease existing rules allowing certain States, primarily California, to cash out stamp benefits for SSI recipients by paying higher SSI cash benefits.

Title VII would lower food stamp income eligibility limits in Puerto Rico, to 55 percent of those used for the continental United States from October 1, 1981, through March 31, 1982, and, beginning in April 1982, convert the Puerto Rico food stamp program into an $825 million per year block grant for food assistance.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. I appreciate the comments and the opening statements. I would like to refer to a matter mentioned by the distinguished Senator from Kansas, the chairman of the Nutrition Subcommittee, in which he referred to the bipartisan nature of efforts on food stamps.

That has marked the progress of the food stamp legislation throughout the years. A number of distinguished Senators in the past, Senator Humphrey, who was mentioned here this afternoon, Senator Aiken, my predecessor from Vermont, Senator DOLE, Senator McGovern, and others have worked so hard on this legislation.

And it has not been an ideological, monolithic combination of Senators. It has gone across the whole ideological spectrum. It has gone across geographic boundaries in this country. They have worked together on a program, which seems to be the first one to be subjected to political rhetoric when that season comes upon us, a season which now I guess is like the Christmas shopping season and lasts around the year. And it is unfortunate sometimes in listening to the political rhetoric because it obscures the facts. The facts are, in the richest, most powerful Nation in the world, we have hunger, and we have malnutrition. And that, Mr. President, is something that this country cannot look at with pride.

We can talk about safety nets or great societies or new frontiers or fair deal and new deal and anything else, but the fact remains in the richest, most powerful Nation in the world, hunger and malnourishment exist.

I am willing to bet that any one of us could go into virtually any community or any little town in this country with within 20 or 30 minutes find some very severe and shocking examples of hunger and malnourishment. I know we could walk 15 or 20 minutes from right where we are, here in the Nation's Capital, in one of the wealthiest areas of the world and certainly of this country, and find hunger and malnourishment.

I hate to admit it, but we could do it in my own State and in States represented by all 100 of us.

What is the food stamp program? The food stamp program, like some of the other programs, whether they are WIC or school lunch programs or others, are steps taken by a nation with some social conscience in trying to eradicate hunger and malnourishment. And the Nation, Mr. President, quite frankly, is finally beginning to show some success. In the WIC program, certainly the percentage of healthy babies, and healthy mothers has gone up; in the school lunch program, we see where it has made it possible not only for youngsters to learn but also to be healthy while learning.

And I know in my own State, a State where we have very, very proud people, and probably one of the strongest work ethics in the country, a very conservative State—at the risk of sounding partisan, a very Republican State—I talk to an awful lot of people every week when I am back home who are on food stamps, who are working, who are trying to make ends meet, but say that the only way that their children or their parents or members of their family could eat or the only way that they could skip a smaller number of meals each week was because of the food stamp program.

These are the elderly, these are the handicapped, these are the working poor. These are not the people we hear about who drive up in the Cadillac to buy the $300 worth of steaks on food stamps.

In fact, I have had so many references, both as a member of the Nutrition Subcommittee and now as ranking member of the Nutrition Subcommittee, so many people have talked and written to me about the food stamp recipients who drive up in the Cadillacs to receive food stamps all around the country that we started keeping track of them. We figured that there are about 30 percent more Cadillacs than General Motors has ever built now being used by food stamp recipients.

My feeling in that case is that if there are abuses, fine, report these people to the proper authorities.

But, let us talk about who is really receiving them. Seventy-eight percent of the recipients are either children, elderly, disabled persons, or single-parent, heads of households. Eleven percent of them work full time at low-paying jobs. Thirty-four percent of the households contain one or more persons receiving SSI or social security and all recipients of SSI and social security are elderly, blind, or disabled.

Now, over half of all food stamp households have gross incomes of less than $300 a month, $3,600 a year. Over 70 percent have gross incomes below $4,800 a year. Eighty-seven percent have gross incomes below the poverty line.

These are certain points that we ought to look at in this body, a body made up of 100 men and women, representative of our country and containing not a single person who ever goes hungry, except by choice. This is a body made up of people who have never gone hungry, except by choice. So let us stop and think very carefully what we are talking about when we talk about hungry people.

And when we talk about the wealthy on food stamps, let us keep in mind that less than 3 percent of food stamp recipients have gross incomes above $750 a month and almost all of those are households with four or more members. In fact, 93 percent have liquid assets of less than $500, and over half do not even own a car or any other vehicles.

We speak of the generosity of the food stamp benefits, but the average food stamp benefit is now 44 cents per person per meal. Even in the subsidized restaurants of the U.S. Senate, subsidized restaurants used by Senators, members of the press and others who are fortunate enough to get into them, you do not get very far on 44 cents per person per meal.

So I would remind my colleagues that hunger in America is real and hunger in America can and should be removed, should be eradicated. I remind my col-

leagues that this has been a bipartisan effort.

I have the highest praise for the distinguished chairman of the Nutrition Subcommittee (Mr. DOLE). Not only this year, but in years in the past, we have worked together. In fact, I commented on one occasion—I think of it as I sit here and look at my Ronald Reagan tie clip—that I was in the anomalous situation of fighting for President Reagan's budget figures before the Agriculture Committee, fighting to stave off cuts and trying to make sure that the President was able to preserve the safety net that he so eloquently has spoken of and was able to stave off amendments that came from his own party in efforts to cut into his safety net.

Mr. President, we put together not only a bipartisan package, but a package that came in slightly under the President's budget. It is a package which, together with the package passed by the Senate last year, is one that removes those areas of fraud and abuse that we had seen in the past food stamp legislation.

We made a half-billion dollar cut in the food stamp program by removing any possible areas of duplication, of waste, of fraud. We have tightened every single area where there was any possibility of waste or fraud. We have urged OMB, GAO, various other committees, private citizens, and State agencies to come forward if they know of areas where there might be waste or fraud and we would prepare whatever legislation was necessary to cut those out. And we have done that.

If enacted, S. 1007 will result in substantial reductions in food stamp benefits for millions of poor Americans. We have to be aware of that. Every food stamp recipient, including the elderly and disabled, will suffer benefit losses. About 5 percent of current recipients will be eliminated from the program.

We recognize the economic facts of life. Cuts are being made in programs. all of them in the social area, and this is just one of them. Before anybody talks about this being some kind of a runaway, giveaway cornucopia of benefits being thrown from the taxpayers' pockets into the hands of the undeserving, keep in mind that this bill results in substantial cuts.

In fiscal year 1982, this bill would cut benefits by $1.86 billion, an amount which exceeds the President's proposals and the assumptions in the first concurrent budget resolution for fiscal year 1982 by $400 million. In the next 4 years, benefits would be cut over $8.5 billion compared to current law.

It is clear to me that millions of persons who can ill afford any loss of purchasing power would be hurt by this bill. And while I find this thought upsetting, I take some comfort in the thought that things could have been much worse.

Senator DOLE and I were successful in gaining committee acceptance of a package of amendments which redesigned several of the President's proposals, but still achieved the level of savings required in the congressional budget. In addition, we were able to defeat various other proposals which would have had a terribly adverse effect on most participants, especially the elderly and mothers with young children.

Because S. 1007 does cut benefits so substantially and far in excess of what is required in the congressional budget, I intend to oppose all amendments which would make any further benefit reductions. I hope my colleagues will, too. The committee has already reduced benefits more than necessary. Many of these food stamp recipients face major additional reductions in their incomes due to proposed cuts in other programs, such as aid to families with dependent children, medicaid, low income energy assistance, social services, and others.

The combined effect of all of these cuts on the poor could be severe. To reduce food stamp benefits any further would make them bear a disproportionate share of the burden of reducing overall Federal expenditures. It would be contrary to the President's contention that his budget is a balanced package which spreads the burden of benefit reductions fairly among different segments of American society.

PROBLEMS WITH S. 1007—THE CAP

Given the budget guidelines adopted by Congress, I believe the committee did about as good a job as possible in designing program savings so that needed assistance to America's poorest citizens could continue. However, there are problems with this bill.

Perhaps the foremost problem with this bill is that it sets wholly unrealistic spending caps on the program for the next 4 years. If enacted, these caps will result in across the board benefits reductions for all program participants, including the elderly and disabled.

I want to emphasize that it is already clear that the caps requested by the administration and adopted by the committee are inadequate. Contentions by the administration or anyone else that these caps leave room for full benefits to be paid in fiscal year 1982 and afterward are misguided. Based on information available at this very moment, I can tell you that we are programing across the board benefit reductions to begin in fiscal year 1982.

I can already foresee the administration announcing these reductions early next year. Some spokesman will point out that despite the fact that Congress just recently established reasonable spending caps, it is now clear that food stamp expenditures are "running out of control again," and unfortunately, the only way to get them under control is to reduce benefits immediately, nothing could be further from the truth.

Mr. President, I think we ought to have in the RECORD right now that nothing can be further from the truth.

The caps for fiscal year 1982 to fiscal year 1985 are based upon administration cost estimates that were prepared several months ago. These estimates are inadequate for three important reasons.

First, they are obsolete. The administration recently revised its fiscal year 1981 estimate of costs upward by over $500 million based on newly available data on program participation and benefit levels since January 1, 1981. This revised estimate for fiscal year 1981 was utilized by the committee to set the cap for fiscal year 1981. However, when the administration revised its fiscal year 1981 estimate, it did not adjust its estimates for fiscal year 1982 to fiscal year 1985. The result is that the committee's caps for fiscal year 1982 to fiscal year 1985 are inconsistent with its cap for fiscal year 1981. Based on cost data already available, the caps for fiscal year 1982 to fiscal year 1985 should be raised at least several hundred million dollars in each year. I expect that these adjustments will be reflected in the reestimates which ordinarily are sent to Congress in July.

Second, the administration's cost estimates make no explicit allowance for offsetting food stamp costs due to expected cuts in other income security programs. The administration did include a general 2.5 percent margin for error in the caps it proposed and the committee adopted. However, CBO estimates that the cuts proposed by the President—and likely to be enacted by Congress—in programs like AFDC, unemployment insurance, CETA, and others would result in new food stamp costs far in excess of the 2.5-percent margin proposed by the administration.

Third, the administration estimates are based upon the President's economic assumptions, which, by anyone's definition, are optimistic.

Mr. President, there are those of us who think that those economic assumptions, cutting the rate of inflation, cutting the rate of unemployment, are somewhat optimistic.

The food stamp program is so sensitive to economic conditions that even if the President's economic assumptions are only slightly off—and I, for one, like all Americans, hope that they are right, though I do not think they will be—the food stamp costs could be significantly higher than the administration predicts. That is an area where I hope, on the floor, at least, we make some changes.

If, for instance, CBO's more moderate economic assumptions are utilized, food stamp costs would be about $600 million more than the administration predicts in fiscal year 1982, and over $1 billion higher in fiscal year 1983. The "caps" included in S. 107 leave no flexibility whatsoever to deal with the unpredictability of the economy.

Thus, I believe the most important change that must be made in S. 1007 is a revision of its proposed spending ceilings. Without such a change, major benefit reductions will occur in the next year.

OTHER PROBLEMS WITH S. 1007—ENERGY ASSISTANCE, FREEZING DEDUCTIONS, GROSS INCOME LIMITS

I have reservations about several other provisions in the bill, especially because of their effect on Vermonters.

I refer to those in the small world of Northern States.

Mr. President, at the risk of sounding somewhat parochial, let me talk about a problem that is going to face all of us in Northern States, the so-called snow belt.

The committee voted to count all State and local energy assistance payments and

income against food stamp allotments. It did wisely reject an effort to count Federal energy assistance against food stamps.

I do not believe that any payments which are truly for energy costs should be counted against food stamp benefits since they do not provide additional resources for food. Especially this year, when a 25-percent reduction in Federal energy assistance payments is anticipated, State and local governments may have to provide additional funding to fill the gap. It would be unfortunate if our proposed change would force families into the difficult choice of "heat or eat."

In a State like mine, where you can have a week with the temperature never going above 40 degrees below zero, it is a very interesting choice to have to make. Do you starve to death or freeze to death? I think at other times, in other lands, Jonathan Swift would have an interesting discussion on the possibilities available to you there.

At least by continuing to exclude Federal energy assistance payments from income, the committee has not diminished the intended effectiveness of that program. I think it is clear from the committee's explicit rejection of this proposal that it expects that the exclusion would continue to apply even if the Federal energy assistance program is combined with other programs into a block grant to the States. Any energy assistance payments stemming from such a block grant would continue to be excluded.

Related to the discussion of energy assistance is the committee action to freeze the deduction for excess shelter costs until July 1, 1983. In Vermont, this means that most nonelderly and nondisabled food stamp households, since they already receive the maximum shelter deduction, will experience a relative loss in benefits. The deduction freeze means that food stamp allotments would reflect even less accurately the true cost of living in Vermont. The only thing positive I can say about this temporary deduction freeze is that it is preferable to the permanent freeze on deductions proposed by the administration and the chairman.

In addition to freezing the shelter and standard deductions for 2½ years, S. 1007 also modifies the index that would be used in adjusting deductions starting on July 1, 1983. The current index includes homeownership costs. The homeownership component of the Consumer Price Index has been rising far more quickly than the CPI, and appears to distort the overall index. Particularly since no food stamp recipients purchase homes while on food stamps, there is no reason to include the homeownership component of the CPI. S. 1007 provides that the homeownership component be deleted from the indexes used to adjust food stamp deductions starting on July 1, 1983, and that the indexes be appropriately reweighted by the Bureau of Labor Statistics. The reweighting procedures should be similar to those used by the Bureau of Labor Statistics in the alternative CPI, known as CPI–XI, since this alternate CPI also removes homeownership costs.

Another committee proposal which will likely affect Vermont more harshly than other parts of the country is the gross income limit of 130 percent of poverty for most participants. Again, living costs are a critical factor. With the high living costs in Vermont, an income of 130 percent of poverty does not go as far in Vermont as it does in other States with more moderate climates. If a household head is working full time at a low wage job, a gross income of 130 percent of poverty could leave a real disposable income well below poverty once work related expenses, child care costs, and fuel bills are factored in. Similarly, an elderly person could have a gross income over 130 percent of poverty, but have little left once medical and shelter costs are paid. For these reasons, I believe the eligibility threshold of 130 percent of poverty is too low.

RETROSPECTIVE ACCOUNTING

S. 1007 mandates that States use retrospective accounting by October 1, 1983. This requires that eligibility and benefits generally be based on past income.

Retrospective accounting may prove useful in improving the accuracy of benefit determinations, but must be designed carefully to assure that hardships do not result for needy families. S. 1007 does require the supplementation of initial allotments in those cases in which pure retrospective accounting causes serious hardship. This is necessary. A worker may recently have been laid off, or other circumstances may arise in which a sudden income loss has occurred. Since eligibility and benefits would otherwise be based on income received in the 30 days immediately prior to application, a household suffering a sudden income loss might have to wait up to 30 days to receive food stamps if supplementation were not provided. This would be needed, for example, in most cases qualifying for expedited service.

Supplementation would, in some circumstances, be needed for the initial months that a household receives food stamps in order to assure that a household's benefits are not based on income that was terminated or reduced before the household applied for food stamps.

Care must also be taken, in designing retrospective accounting, to assure that after initial application (when benefits are based on income over the preceding 30 days), the lag time between the budget month and the issuance month is not too great. Section 6(c) of the act requires that a household that has timely filed a complete report receive its benefits within 30 days of the end of the month covered in the report, unless the Secretary determines a longer period of time is necessary for administrative reasons. Current rules in AFDC allow a maximum time lag of 45 days, and a similar maximum should be seriously considered for food stamps. A delay of more than 45 days would both work hardship on recipients and compromise the integrity of the retrospective accounting system by lengthening the period of time for which households continue to receive benefits after their income rises.

While prior income would be used in determining benefits, current circumstances could be used for other eligibility and benefit factors. For example, if a baby had been born shortly before a household applied for food stamps, it would be appropriate to count the baby as a part of the household from the time of the application.

PROVISIONS ON NOTICES AND PERIODIC REPORTING

One of the tightening provisions offered by Senator DOLE and me permits States to act immediately to reduce or terminate benefits when this action is based entirely on written information provided by the household, itself. Currently, the State would have to provide the household a notice of adverse action and wait 10 days before it could act to reduce or terminate benefits. In the meantime, an additional month's food stamps could have been sent. Under the new provision, a notice would still have to be provided, but it could be provided as late as the time that benefits would normally be received—and action to reduce or terminate benefits would not be delayed.

This provision does not violate basic rights of due process. It applies only where the adverse action is based entirely on written information provided by the household itself, and does not apply to information provided by a third party. Moreover, under section 11(e)(10) of the Food Stamp Act of 1977, the household would retain its right to request a fair hearing to contest the action to reduce or terminate benefits. If the household's request was timely (for example, within 10 days of the notice) the household would have its benefits reinstated to the old level pending the hearing.

This provision fits in very nicely with the provisions of S. 1007 that mandate retrospective accounting and periodic reporting. Under a periodic reporting system, States will receive many written reports from households that lead to benefit reductions or terminations. If the State had to delay such actions in each circumstance while using a prior notice of adverse action, a substantial amount of savings could be lost.

This provision enables States to act promptly on the information in the periodic report, and to send a notice explaining any adverse action that is based entirely on the report, as late as the date that benefits would normally have been issued. If the household requested a fair hearing in 10 days, benefits would be restored to their prior levels.

In relation to periodic reporting, section 6(c) of the act would continue to require that a household "be afforded prompt notice on failure to file any report timely, or completely, and given a reasonable opportunity to cure that failure (with any applicable time requirements extended accordingly) and to exercise its rights under section 11(e)(10) of this act". If a household failed to file a required periodic report, or filed an incomplete report, the State would notify the household immediately and provide time for the report to be filed and completed. Households would retain their basic hearing rights, so that, for example, if a household filed a report that the State misplaced and the household lost

benefits as a result, the household could seek a hearing to authorize issuance of the lost benefits.

FRAUD DISQUALIFICATION

S. 1007 tightens procedures relating to disqualification for fraud or intentional misrepresentation. Currently, if a person is found by an administrative fraud hearing or a court to have committed fraud, he or she is disqualified from the program and must pay back all benefits improperly received. S. 1007 provides for these procedures to be used for intentional misrepresentation as well as fraud, lengthens the disqualification periods, and requires the household to repay double the amount fraudulently received. As is the case now, the standards for proving fraud or misrepresentation should be the same for both administrative and court procedures. These changes should encourage States to conduct more administrative fraud hearings and to prosecute more violators. Since an alleged perpetrator of fraud must be found guilty at an administrative fraud hearing or in court for these stringent penalties to be imposed, the provisions of S. 1007 that encourage more aggressive State activities in these areas are most welcome.

EXPEDITED SERVICE

S. 1007 substantially tightens eligibility for expedited service. Currently, any household that has zero net income, or any household that is destitute under USDA regulations, must receive food stamps within 2 or 3 days. Under S. 1007, eligibility for expedited service would be limited to those households that have income of no more than $85 in the month of application and that also have less than $100 in available liquid resources. One exception is made—for destitute migrant and seasonal farmworker households. The destitute household rule in current regulations (which defines circumstances in which destitute households qualify for expedited service and prescribes special procedures for computing their benefits) would be retained for migrants and seasonal farmworkers due to the special hardships that these households encounter when they move to a new area with the migrant stream or when they are between jobs.

S. 1007 thus limits the number of households that will qualify for expedited service. With these restrictions on the numbers of households eligible for expedited service, the Secretary will be better able both to serve those remaining eligible for expedited service in the 2- to 3-day period and to provide better service to other households—while also reducing errors.

The Secretary will need to look carefully at how to integrate the expedited service requirements with the requirement to prorate the first month's benefits. If a penniless household applied on the 26th of a month and was eligible for expedited service, it would make little sense to provide it immediately with only 4 days of food stamps and then make the household wait up to 30 days for any further stamps. The sort of severe hunger situation that could result is exactly what the Food Stamp Act and the expedited service provisions are designed to prevent. The Secretary needs to establish procedures whereby households who are eligible for expedited service (and continue to remain eligible for food stamps after the month of application) can receive sufficient food stamps so that they do not experience periods of hardship during which their families have no food.

BOARDERS

The committee closed a loophole in current law by eliminating boarders from the food stamp program. If persons pay room and board for their meals, they do not need food stamps since they already receive meals. These persons would not be able to apply for stamps themselves. In addition, under current law a member of an eligible household could try to declare himself a boarder and apply separately in order to receive additional benefits. S. 1007 eliminates persons who pay compensation in return for being served meals. These persons would not be able to apply either by themselves or as part of another household. They, and their income and resources, would be entirely separate and would not affect the eligibility or benefit levels of others who may reside in the household but are not boarders.

VOLUNTARY QUIT

The committee made two changes to add more teeth to the provisions that disqualify households containing a member who has voluntarily quit a job. First, the disqualification would extend to persons receiving food stamps at the time they quit a job, as well as those that quit a job and then apply for stamps. Second, the disqualification period would be extended from 60 to 90 days. Any person quitting a job without good cause will make his entire household ineligible for 90 days, unless he becomes exempt from the work requirements or takes another full-time job before the 90 days is up. This will serve as a strict penalty, assuring that those who can work, do work.

WORKFARE

Workfare projects will become a feature of the food stamp program for those States or political subdivisions within a State desiring to operate them. Food stamp recipients will be required to accept work offered by a State or local jurisdiction in order to participate in the program.

Our bill provides for five exemptions from workfare participation. States are given authority to exempt other categories of persons. An individual who may not be exempt under our criteria could be exempt under the State's standards. For example, a person may be physically fit for employment in general and thus not exempt from workfare, but due to a back injury cannot work at any job involving standing for long periods of time or lifting. The workfare project may involve outdoor work in the county park. This individual should not be required to participate in the project at risk to his or her health. Thus a State's exemption criteria could include a definition of incapacity to perform a particular job.

The disqualification period for failing to comply with workfare requirements without good cause has been increased from 1 to 6 months. Before the disqualification is imposed, however, the agency would be required to review the circumstances surrounding the individual's failure to comply with any aspect of the workfare program. There may be justifiable reasons for the individual's failure to comply, making it unfair to impose such a severe penalty in such situations. The individual's illness, the illness of another household member, a household emergency, the unavailability of public or private transportation, or inability to pay for it, are just a few of the valid reasons for an individual's failure to comply with workfare requirements.

Of course, if the individual became exempt from workfare participation, his or her obligation to participate in workfare immediately ceases. Also, an individual disqualified from the program for failure to comply with a workfare assignment could cure that disqualification by returning to the workfare site to work off his or her workfare obligation.

Once the individual has been disqualified, the remaining household members will not be allowed to receive increased food stamp benefits. This provision is similar to the effect on household benefits when a member has been found guilty of fraud. We recognize that the remaining household members, often children, the elderly, or a spouse, have no control over the behavior of the disqualified member. Yet they may suffer because of the individual's disqualification, though of course they should not benefit either. The Secretary in implementing this provision should provide that the remaining household members receive some food stamp benefits. They should not become ineligible for benefits because of the individual's disqualification. The Secretary should devise a middle ground between prorating the disqualified member's income, which may result in an increase in household benefits, and applying all of the disqualified member's income to the household when the member may not in fact be contributng any income to the household at all.

ALIENS

Another area where the committee tightened the program is in its treatment of sponsored aliens. For 3 years after entry, legally resident aliens who entered the country with an affidavit of support from a sponsor would have a portion of the sponsor's income and assets attributed to them in determining food stamp eligibility and benefits. The sponsor's income that would be deemed available would be income, as defined in section 5(d) of this act, that exceeds 130 percent of the poverty line—in other words, income over the new food stamp gross income limits. Assets deemed available would be those assets, as defined in section 5(g) of this act and the regulations issued pursuant to that section, that exceed $1,500—or in other words, assets that exceed the food stamp assets limit for nonelderly households.

EFFECTIVE DATE OF THESE AMENDMENTS

Except for the funding authorizations for the food stamp program, which take effect immediately upon enactment, we hope the Secretary will act quickly to

implement these amendments to benefit from the cost saving features, as well as the added controls on fraud, waste, and abuse. However, as was the case concerning our treatment of any claims arising under the food stamp act of 1964 and still pending at the time of passage of the Food Stamp Act of 1977, we intend a similar treatment of claims now pending. That is, pending proceedings under the Food Stamp Act of 1977, as amended through 1980, should be disposed of pursuant to the applicable provisions of the law in effect prior to the enactment of these 1981 amendments. The liabilities of any household now participating in the program should be resolved under present regulations.

CONCLUSION

There are various other provisions of the bill, such as the elimination of strikers, which I have fully addressed in my additional views on S. 1007 in Senate Report No. 97–128. I believe that it will be important for the Congress to carefully reexamine this year's work on food stamps before too long. Particularly with the major benefit reductions we are approving, we need to be especially sensitive to the potential hardship to the poor.

Mr. HELMS. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, just for the record, there are a few arithmetical assumptions in the food stamp program that need to be understood. First of all, we are contemplating something in the neighborhood of $12 billion for the food stamp program for the ensuing year. That is a pretty expensive neighborhood, particularly when we consider that all of the farm programs combined cost $3.5 billion.

The Senator from North Carolina hears frequent comment about how expensive the farm bill is. I read in the media that the farmers of America are getting a free ride from the taxpayers, but I seldom, if ever, hear or see in the media any breakdown of the farm bill itself stated in terms of costs. That is one of the reasons that I did all I could to insist that the food stamp section be stripped off of the farm bill so that, hopefully, it can stand on its own feet and be assessed as a program and not obfuscate the cost of the farm program.

I listened with interest to the eloquent comments of my friend from Kansas. One of the statements that he made—and certainly, he made all statements in good faith—was that unemployment is a prime ingredient in the increased participation in the food stamp program. I think the record ought to show that unemployment is not, in fact, the primary reason. The elimination of the purchase requirement is the primary reason for the increase in participation in the food stamp program. The Congressional Budget Office indicates that 70 to 80 percent of the increased participation in the food stamp program has been due to the elimination of the purchase requirement.

I have a chart which, momentarily, I shall ask to have printed in the RECORD, a chart indicating the unemployment rates and the corresponding food stamp participation increases since the elimination of the purchase requirement. This chart shows that while unemployment has gone up and down, the food stamp participation has known only one course, and that has been upward.

Mr. President, there is going to be an amendment to restore the purchase requirement, excluding the elderly and the disabled, because this Senator and others feel that it is only fair to the working taxpayers of this country, who have to pay a percentage of their income, whatever it is, for their food, that this legislation similarly require that those who receive food stamps pay a percentage of their income.

If that income is zero, then, obviously, they will pay nothing. If the income is up in the $11,000 bracket, which is the maximum, as I understand it, for a family of four, then, obviously, simple fair play would dictate that a percentage of that $11,000 which the food stamp family receives should be used to pay for the food stamps.

I do not think we ought to dismiss what some call horror stories in terms of the abuse of the food stamp program, and I am not prepared to put a precise figure on the cost of fraud and waste and mismanagement. But I rather imagine that it far exceeds the figures that the most avid proponents of the food stamp program acknowledge it to be.

However, whatever it is, Mr. President, this Senator feels that all waste and abuse and mismanagement should be eliminated. Surely, we owe this to the taxpayers of this country, and it is not hardhearted to say that the food stamp program should not be allowed to function as a second currency in America, which it is today in many areas of the country. It should not be allowed that there be excess "free food stamps" for people to buy automobiles, television sets, and a hundred other things that are not food by any means, using food stamps.

As to this business of unemployment being the primary cause of the increase in participation of the food stamp program, the pay requirement was eliminated in 1977, effective December 1978 and January 1979. At that time, the unemployment rate, seasonally adjusted was 5.9 percent. Participation in the food stamp program was 15.8 million. The following December 1979, the unemployment rate, seasonally adjusted, was still 5.9 percent; and—what do you know?—the participation in the food stamp program had shot up to 20,100,000 participants.

As Senators will note if they look at this table, in March 1981, the unemployment rate was 7.3 percent, and the participants in the food stamp program numbered 23 million. That figure is subject to adjustment, but the reliability factor is plus or minus 1½ percentage points.

I ask unanimous consent to have the table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

	Percent [1]	Percent [2]
1978:		
December	5.9	15.8
1979:		
January	5.8	17.3
February	5.7	17.9
March	5.7	18.5
April	5.8	18.5
May	5.8	18.4
June	5.7	18.2
July	5.7	18.4
August	5.9	19.0
September	5.8	19.2
October	5.9	19.4
November	5.8	19.7
December	5.9	20.1
1980:		
January	6.2	20.4
February	6.0	21.2
March	6.3	21.5
April	6.9	21.6
May	7.6	21.5
June	7.5	21.7
July	7.6	21.9
August	7.6	22.1
September	7.4	22.0
October	7.6	*22.2
November	7.5	*21.9
December	7.4	*22.2
1981:		
January	7.4	*22.5
February	7.3	*22.9
March	7.3	*23.0

[1] Unemployment rate, seasonally adjusted.
[2] Participation in food stamp program.

*Reliability factor plus or minus 1½ percent.

Mr. HELMS. Mr. President, I invite the attention of Senators who may read the RECORD in connection with this discussion to take a look at page 16 of the committee report. I believe it is important for Senators to look at the figures of what we are not doing with this bill in terms of the outyears.

It is true enough that the savings achieved by the bill do meet the reconciliation requirements for fiscal years 1982 through 1984, as assumed in the first concurrent budget resolution, Senate Concurrent Resolution 19.

Having said that, I am greatly concerned about the outyears beyond 1984, because we do not begin to meet the target for savings, and what we are doing is delaying the agony if we do not tighten up the outyears in terms of spending on this program. We are talking about a shortfall of $385 million for fiscal 1985 and $478 million for 1986.

My own study of the bill reveals to me that the primary cause of these tapered savings is that several of the bill's major cost saving provisions expire during fiscal years 1983 and 1984 and that, of course, causes the increased spending in the outyears to which I have referred—fiscal year 1985 and fiscal year 1986.

Thus, the savings we are talking about are only temporary, running over the next 3 fiscal years; and we may sincerely regret, 2 or 3 years from now, that we did not go ahead and bite the bullet and set up the kind of policies with this legislation that we should have.

If Senators will refer to page 166 of the committee report, they will see that I endeavored to outline this situation there.

The provisions that the committee made on a temporary basis which concern me most are those which originally had provided for a freeze on the standard deduction, which is presently $85 per month, and the excess shelter/dependent-care deduction, which is presently $115 per month.

The Reagan administration had recommended that these deduction levels be made permanent. However, the committee voted to keep these constant only until July 1, 1983, at which time indexing would be resumed, with consequent increased costs.

I know it is boring to look at figures and look at projections, but one of the many mistakes that have been made in Washington, D.C., is that we have put a band-aid on something one day, but did not treat the wound. We found out a year or two later that it had festered and was in an aggravated state. I say to you, Mr. President, that one of the major fiscal problems of Federal Government is this business of indexing.

It is all very comfortable to sit or stand here on this floor and say we are going to index this so no one will get hurt. The problem with that is that we are hurting the country, we are hurting the poor most of all, and we have endangered the very economic stability of this country by such foolishness as that.

So I say that indexing is far and away the most dangerous political exercise in which this Congress has engaged certainly during the time that I have been here in terms of fiscal responsibility. It is not fiscal responsibility. It is fiscal irresponsibility. Frankly we have snookered many millions of Americans by using that band-aid approach and taking the view of "sufficient unto the day is the evil thereof."

We have just about run out the string, Mr. President, because in this Government if we do not—by whatever mechanism we choose to adopt in terms of taxes and in spending—restore fiscal responsibility, we will not restore fiscal stability, because you cannot spend more, you cannot commit more, than your income as an individual or as a family or as a Government and survive very long.

I was discussing a moment ago the temporary freeze on the standard deduction and for excess shelter/dependent care, and so forth. The cost associated with these deductions when they are resumed will be $396 million in fiscal year 1985, for example.

Just one little flick of the pen and we have spent $396 million in fiscal year 1985, and we have hidden it. We have put it behind us, and we say we do not have to worry about it any more, so forget it. But the poor guys and ladies who are in this Senate and in the House of Representatives when that appropriations bill comes up several years hence will rue the day that we so cavalierly made that commitment.

I firmly believe that one of the greatest weaknesses of the legislative process is well-intentioned shortsightedness. It is not that anyone is evil who engages in this kind of budgetary legerdemain; it is just a matter of being shortsighted and wanting to do what Davy Crockett said we could do, spend somebody else's money for what we perceive to be the impassioned purpose.

That is a long way of saying that this Senator sees no reason for us to decide now that we should resume indexing of these deductions to which I referred in July 1983. I think we should make the freeze permanent and then face up to the question at that time as to what additional relief if any this Senate and the House of Representatives respectively wish to vote. If a future Congress decides to adjust the deduction levels, so be it. But these automatic increases, Mr. President, are dragging this Nation down in terms of fiscal stability.

I do not criticize my committee which is composed of some of the finest Senators who ever sat in this body, and I am devoted to them and have great affection for them, but I must confess that the committee reported a bill that simply postpones the day of reckoning, and one of the recommendations that I am going to make on this floor is that the deductions be frozen permanently as recommended by the administration.

Mr. President, I ask unanimous consent that a table be printed in the RECORD at this point showing the baseline, the amount proposed for reconciliation, the amount reconciled in S. 1007, and the difference.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985	1986
Baseline:[1]					
Estimated authorization levels	12,304	12,599	12,947	13,262	13,414
Estimated outlays	12,298	12,598	12,946	13,261	13,413
Amount proposed for reconciliation:[1]					
Budget authority	−1,458	−1,971	−2,327	−2,507	−2,690
Budget outlays	−1,458	−1,971	−2,327	−2,507	−2,690
Amount reconciled in S. 1007:[2]					
Budget authority	−1,855	−2,153	−2,450	−2,149	−2,212
Budget outlays	−1,855	−2,153	−2,450	−2,149	−2,212
Difference:					
Budget authority	+397	+183	+123	−358	−478
Budget outlays	+397	+183	+123	−358	−478

[1] Figures from Rept. No. 97-28, to accompany S. Con. Res. 9, Second Concurrent Budget Resolution, fiscal year 1981.

[2] Estimates by Congressional Budget Office.

Mr. HELMS. Mr. President, I reserve the remainder of my time, and I thank the Chair.

Mr. LEAHY. Mr. President, did the Senator from Arkansas seek recognition?

Mr. PRYOR. Yes.

Mr. LEAHY. I yield such time to the Senator from Arkansas as he needs.

Mr. PRYOR. I appreciate my distinguished friend from Vermont yielding to me.

Mr. President, I rise this afternoon to discuss for a few moments this bill which is before the Senate at this time, because I think it represents what I call a historic change in the direction of the food stamp program. I do not think ever in this program's history has the Committee on Agriculture, of which I am a member, made more of an effort to make reductions in spending or to curtail error, waste, fraud, and abuse in this program.

I am not here this afternoon, Mr. President, to say that this bill is perfect. We have worked long and hard on this piece of legislation, and I have stood with many on the committee seeking further reductions in the food stamp program, but I think we have made enough cuts and hope that no additional cuts will be made by this body.

This bill reduces food stamp expenditures by over $8.5 billion during the next 4 years. The administration has stated that it expects to save an additional $180 million a year through administrative action. Total reductions would, therefore, exceed some $9 billion.

In the recently adopted budget resolution, the Committee on Agriculture, Nutrition, and Forestry was directed to achieve food stamp savings of $1.5 billion in fiscal year 1982, $2 billion in fiscal year 1983, and $2.3 billion in fiscal year 1984.

Mr. President, S. 1007 actually exceeds these totals. It goes a step further by saving an additional $400 million in fiscal year 1982, an additional $180 million in fiscal year 1983, and an additional $130 million in fiscal year 1984.

Mr. President, I supported, as I have stated, many of the cuts that have been fashioned by the committee. I believe them to be justified. But I question the wisdom of making additional cuts. My fear is that, in further pruning the branches, we might endanger the tree itself.

(Mr. MURKOWSKI assumed the chair.)

Mr. PRYOR. S. 1007 already contains a battery of provisions to restrict eligibility and reduce the costs of this program. I would like to discuss just a few of these provisions and will give a brief description of each.

First, all households with gross incomes over 130 percent of the poverty line would be eliminated. Thus a million persons would be dropped from food stamp rolls.

Second, in Puerto Rico, income limits would be cut so that they are 65 percent of the income limits in the United States. All households over this level would be terminated. Then, on April 1, 1982, the Puerto Rico food stamp program would be converted into a block grant funded at 75 percent of current levels.

This, Mr. President, was my amendment in the committee. It is going to save us over a quarter of a billion dollars alone.

Third, cost-of-living adjustments would be provided every 15 months for the next 3 years instead of every 12 months.

Fourth, all households with a member on strike would be eliminated unless the household was receiving food stamps before its member went on strike.

Fifth, households with earned income would have 15 percent of their earnings disregarded—to compensate for taxes and work expenses—instead of 20 percent, as currently provided. Since more income would be counted, benefit levels would be reduced and costs would decline.

Sixth, households would have benefits based on income during a prior month, thereby improving the accuracy of benefit computations and reducing losses through errors.

Seventh, households would no longer receive a full month's benefits for the month in which they apply. Instead, benefits would be provided only from the date of application through the end of the month.

Eighth, States will now have the option, Mr. President—and I think this is a key feature and it is one that was discussed at great length by the members of the Senate Committee on Agriculture—of establishing workfare programs in which food stamp recipients would be required to work in return for their food stamp benefits.

Ninth, for 3 years after entering the country, legal aliens who entered the country with an affidavit of support from a sponsor would be ineligible for food stamps if the sponsor had sufficient income or resources to support them.

Tenth, food stamp deductions, now adjusted annually in accordance with the Consumer Price Index, would be frozen at their current levels for 2½ years. After that time, homeownership costs—the most rapidly rising part of the index—would be excluded from future adjustments so that deductions would rise at a slower rate.

Eleventh, all benefit liberalizations scheduled to take effect in fiscal year 1982 would be repealed, including a repeal of provisions to expand the child care deduction and the medical deduction.

Twelfth, if a person voluntarily quit a job at any point, his or her household would lose food stamps for 90 days.

Thirteenth, program costs are capped for fiscal year 1981 and for each of the next 4 fiscal years.

Mr. President, in addition to these deletions, S. 1007 also tightens up substantially on error and fraud.

First, households that receive illegitimate benefits, whether through error or fraud, would have to pay them back. This would be enforced by deducting overpayments from future benefits.

Second, penalties for fraud would be stiffened and extended to cases of misrepresentation as well as fraud. Mandatory prison sentences would be required for any second offense.

Third, social security numbers would be collected from all recipients, and States would be required to detect unreported income sources.

Fourth, States would also be held liable for excessive losses due to issuance of food stamps through the mail.

Mr. President, these provisions result in substantial reductions in food stamp costs and tighten program operation. The committee bill not only reflects every provision offered by the administration to reduce error and fraud, but also contains a number of additional provisions offered by members of the committee.

As it now stands, the bill more than meets the requirements of the budget resolution. It meets the wishes of the American public for a more efficient and less costly food stamp program.

We need to be careful not to go overboard in our determination to cut this program. The truly needy, the elderly, and the poor—those who get an adequate diet only because of the food stamp program—must be protected against excessive or arbitrary reductions. And we must avoid losing this crucial sense of equity by making further benefit reductions at this particular time.

I yield back the remainder of my time, Mr. President, to the Senator from Vermont.

Mr. LEAHY. I thank the Senator from Arkansas for his, as always, extremely good, extremely comprehensive, statement. He has touched on so many points that I will not repeat them all, but certainly he has emphasized, and emphasized very well, the fact that we worked extremely hard in the committee to make cuts.

We are really faced with two things in this, Mr. President, or two choices in this program. We can either have a program or not have a program. It is that simple. We can go and make massive other cuts in the program and, having done that, we would so decimate the program that we would be far more honest if we said that we were going to get rid of it, and are not going to abolish malnourishment and hunger in this country; that we are not going to take a very positive step to get rid of hunger and malnourishment in this country. Or we can say we acknowledge hunger and malnourishment in this country, and the food stamp program is one of the steps that could be taken to eradicate it and we will do everything posible to make it as good a step as possible, a step that reflects our concern, a concern shared by Republicans and Democrats, that the taxpayers' money must be spent wisely. After all, each one of us is also a taxpayer as are our families.

The distinguished chairman of our Senate Committee on Agriculture, my dear colleague from North Carolina, has said that maybe we should have bitten the bullet and set up better procedures.

I submit to him that that is exactly what we have been doing for the last year and a half. We have been working very, very hard on this. I was here as part of the debate, as were Senator DOLE and others, Senator HUDDLESTON and others, last year when we went through a very lengthy exercise in cutting out substantial amounts of money from the food stamp program and substantially tightening procedures.

We have talked about what this program might cost if we pass S. 1007 as it is here today in the outyears. Well, let us just take a look at that. Certainly nobody on this Hill, Republican or Democrat, has accused President Reagan of runaway generosity in social programs. Nobody has assumed that OMB Director Stockman has opened the barn door and let the financial horses loose on social programs. So let us just take a look at the program that President Reagan and Mr. Stockman proposed in food stamps, and let us take a look at what we have done with it.

I submit indeed we did bite the bullet. In fact, by the time reauthorization rolls around before this body, with the projections we have here, we will have saved $350 million more than the amounts recommended by President Reagan and by his OMB Director.

So I submit we started with the barebones budget, as described by President Reagan, a safety-net budget as described by President Reagan, a carefully honed budget as described by President Reagan, and we actually cut it further.

A couple of other things we should talk about. One is the elimination of the purchase requirement. Certainly, that has brought about increased participation. But a large part of that increase was debated on the floor of this Senate and debated on the floor of the other body and it was intended. It was anticipated and it was intended and one of the things that a majority of the Members of both bodies, the House and the Senate, Republican and Democrat, voted for was that increased participation. It was to be paid for by other changes in the law—raising the benefit reduction rate, lowering eligibility requirements. These things paid for the increased participation.

Mr. President, I would point out something that should be of note to each one of us who has any significant rural areas within our constituency, that the increase in participation has been greatest in rural areas. Elimination of the purchase requirement has brought rural areas into a participation rate far greater than it had been before. An argument could be made that putting the purchase requirement back on would hurt rural areas far more than anywhere else.

The fact that in rural areas the increase was five times as great as in most urban areas, accounts overall for most of the increase.

I realize the rural areas do not have the political clout that the urban areas do, but, as a Senator from a very rural

State, I intend to fight for them on that question.

We should also point out that there have been a number of economic changes since the elimination of the purchase requirement was implemented. Two are obvious to every person in this country—higher inflation and higher unemployment.

Food prices and inflation alone has caused over half the increase in food stamp costs in the past few years.

I would point out, on the question of fraud and abuse, that when we held hearings just a few years ago on the question of elimination of the purchase requirement, the testimony at that time was that one of the greatest areas of fraud, one of the greatest areas of abuse in the food stamp program, was being done by a number of large banks that took the money from the food stamp purchase requirement and, instead of turning it over immediately to the Government, as they were supposed to as depositories, they would use it for several days as a constant float of money and would end up getting enormous sums of taxpayers' money interest free that they could loan out to their own customers. The millions of dollars involved there was one of the most significant areas of fraud in the food stamp program. That was eliminated when we eliminated the purchase requirement, that and, of course, the elimination of substantial administrative costs.

There are a number of other areas that we could talk about, but I suspect most of them have been debated back and forth in the committee. A number of them are referred to in my own statement, the distinguished chairman's statement, the statement of the distinguished Senator from Kansas, the statement of the distinguished Senator from Arkansas, and there will be others.

I know that our distinguished chairman (Mr. HELMS) has suggested that it is perhaps time to move to some amendments. I tend to agree with him on that.

I yield to the distinguished Senator from North Carolina.

Mr. HELMS. Mr. President, I thank my friend from Vermont. I yield to the distinguished Senator from Idaho (Mr. SYMMS).

Mr. SYMMS. I thank the Senator for yielding.

UP AMENDMENT NO. 139

(Subsequently Numbered Amendment No. 63)

(Purpose: To reinstate the purchase requirement for food stamps)

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. SYMMS) proposes an unprinted amendment numbered 139.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 39, between lines 17 and 18, insert the following new section:

PURCHASE REQUIREMENT

SEC. 108. (a) Section 3(b) of the Food Stamp Act of 1977 is amended by inserting before the period at the end thereof "and any amount to be paid by such household for such allotment".

(b) Section 7(b) of the Food Stamp Act of 1977 is amended by striking out the third and fourth sentences.

(c)(1) Section 8 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsections:

"(d) Notwithstanding any other provision of law, households, other than households containing a member who is sixty years of age or over or who receives supplemental security income benefits under title XVI of the Social Security Act or disability payments under title II of the Social Security Act, shall be charged" for the allotments issued to them, and the amount of such charge shall represent a reasonable investment on the part of the household, but in no event more than 30 per centum of the household's income, except that—

"(1) allotments may be issued without charge to households with an income of less than $30 per month for a family of four under standards of eligibility prescribed by the Secretary; and

"(2) the Secretary shall provide a reasonable opportunity for any eligible household to elect to be issued an allotment less than the allotment authorized to be issued to such household under subsection (a) of this section.

The charge to be paid by any eligible household electing to exercise the option described in clause (2) of the preceding sentence shall be an amount which bears the same ratio to the amount which would have been payable under this subsection for an allotment issued to such household under subsection (a) as the allotment actually issued to such household bears to the allotment that would have been issued to such household under such subsection.

"(e)(1) Funds derived from the charges made for allotments shall be promptly deposited, in a manner prescribed in the regulations issued pursuant to this Act, in a separate account maintained in the Treasury of the United States for such purpose. Such deposits shall be available, without limitation to fiscal years, for the redemption of coupons.

"(2)(A) The Secretary shall by regulation prescribe the manner in which funds derived from the distribution of coupons (charges made for allotments) shall be deposited by coupon issuers. Such regulations shall contain provisions requiring that coupon issuers promptly deposit such funds in the manner prescribed by the Secretary, except that such regulations shall, at a minimum, require that (i) such deposits be made at least weekly, and (ii) upon the accumulation of a balance on hand of $1,000 or more, such deposits be made within two banking days following the accumulation of such amount.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of violating the regulations issued under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(3)(A) Coupon issuers receiving funds derived from the distribution of coupons (charges made for allotments) shall be deemed to be receiving such funds as fiduciaries of the Federal Government, and such coupon issuers shall immediately set aside all such funds as funds of the Federal Government. Funds derived from the distribution of coupons (charges made for allotments) shall not be used, before the deposit of such funds in the manner prescribed by the Secretary, for the benefit of any person, partnership, corporation, association, organization, or entity other than the Federal Government.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of violating subparagraph (A) of this paragraph shall be fined not more than $10,000 or a sum equal to the amount of funds involved in the violation, whichever is the greater, or imprisoned not more than ten years, or both, except if the amount of such funds is less than $1,000, then such issuer shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(4)(A) The Secretary shall by regulation require that upon the deposit, in the manner prescribed by the Secretary, of funds derived from the distribution of coupons (charges made for allotments), coupon issuers shall immediately send a written notice to the State agency, accompanied by an appropriate voucher, confirming such deposit. In addition to such other information deemed by the Secretary to be appropriate, such regulations shall require that such notice contain—

"(i) the name and address of the coupon issuer;

"(ii) the total receipts of such coupon issuer derived from the distribution of coupons (charges made for allotments) during the deposit period;

"(iii) the amount of the deposit;

"(iv) the name and address of the depository; and

"(v) an oath or affirmation signed by the coupon issuer or, in the case of a corporation or other entity not a natural person, by an appropriate official of the coupon issuer, certifying that the information contained in such notice is true and correct to the best of such person's knowledge and belief.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of failing to provide the notice required under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(C) Any coupon issuer, or any officer, employee, or agent thereof, who knowingly provides false information in any notice required under subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than ten years, or both.

"(5)(A) The Secretary shall by regulation require each coupon issuer at intervals prescribed by the Secretary, but not less often than monthly, to send to the Secretary, or his designee, a written report of the issuer's operations during such period under the food stamp program. In addition to such other information deemed by the Secretary to be appropriate, the regulations shall require that the report contain—

"(i) the name and address of the coupon issuer;

"(ii) the total receipts of the coupon issuer derived from the distribution of coupons (charges made for allotments) during the report period;

"(iii) the total amount of deposits made by the issuer of funds derived from the distribution of coupons (charges made for allotments) during such period;

"(iv) the name and address of each depository receiving such funds from such issuer; and

"(v) an oath or affirmation, signed by the coupon issuer, or in the case of a corporation or other entity not a natural person, by an appropriate official of the coupon issuer, certifying that the information contained in the report is true and correct to the best of such person's knowledge and belief.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of failing to provide any report required under subparagaph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(C) Any coupon issuer, or any officer, employee, or agent thereof, who knowingly provides false information in any report required under subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than ten years, or both.

"(6) The Secretary may by regulation require State agencies to provide periodic reports to the Secretary, or his designee, containing a consolidation of the respective coupon issuer's notices to such State agencies at such intervals as the Secretary in his discretion deems appropriate.

"(7) The Secretary and the United States Postal Service shall jointly arrange for the prompt deposit of funds collected by the United States Postal Service on behalf of a State from charges made for coupon allotments.".

(2) The heading for section 8 of such Act (7 U.S.C 2017) is amended to read as follows:

"VALUE OF COUPON ALLOTMENT AND CHARGES TO BE MADE".

(d) Section 15(a) of such Act is amended by inserting "purchase by and" before "issuance".

(e)(1) Section 18(a)(1) of such Act is amended by inserting after the second sentence the following new sentence: "Such portion of any such appropriation as may be required to pay for the value of the coupon allotments issued to eligible households which is in excess of the charges paid by such households for such allotments shall be transferred to and made a part of the separate account created under section 8 (d)(1) of this Act.".

(2) Section 18(b) of such Act is amended—

(A) by striking out the first sentence and inserting in lieu thereof the following: "In any fiscal year the Secretary shall limit the value of coupons issued which is in excess of the value of coupons for which households are charged, to an amount which is not in excess of the portion of the appropriation for such fiscal year which is transferred in accordance with subsection (a) of this section to the separate account referred to in such subsection."; and

(B) by adding at the end thereof the following new sentence: "If the Secretary determines that any of the funds in such separate account are no longer required to carry out the provisions of this Act, such portion of such funds shall be paid into the miscellaneous receipts of the Treasury.".

(f) The amendments made by this section shall become effective on January 1, 1983.

On page 52, line 9, insert ", as amended by section 108," after "1977".

On page 52, line 12, strike out "(c)" and insert in lieu thereof "(e)".

Mr. SYMMS. Mr. President, with passage of the food stamp amendments in 1977 to the food stamp program, with that overall package came the elimination of the so-called purchase requirement. The purchase requirement was the requirement which required food stamp recipients to purchase a portion of their monthly food needs in order to receive food stamps.

As a Member of the other body at the time, I fought the idea of what we called then "free" food stamps. We thought that the "free" food stamps would end up costing the taxpayers billions and billions of dollars in not having the program carry out its original intention, which was intended by the food stamp program in the inception to be a program that was based upon the fact that it was going to provide an adequate, nutritious diet for the recipients of the program.

Now, at the time, and in the debate in the other body, there was a great furor about it. Some of the predictions that I made, saying that this program will cost $5 or $6 billion within 2 years, were called erroneous.

Well, Mr. President, I was wrong all right, because I was wrong on the conservative side. It did not cost $6 billion. It is up to $11 or $12 billion that the program is costing.

I would say that the number of people have gone up astronomically. I am going to get into this in just a few moments.

Consequently, as a result of that little bit of history, I would like to place before this body an amendment to S. 1007 to reinstate the purchase requirement to the food stamp program.

If one studies the history of this program and goes clear back to when it first started as a trial program, the original intention of the food stamp program, Mr. President, was to have the States share in the costs. Before it ever got through the House of Representatives and the Senate the first time, the Congress had, in its wisdom, decided the States should not share in the cost of the program. That would have provided a great deal of discipline to the program. The second part of the discipline was that the recipient would share in the cost of the program.

Then, in 1977, that was removed from the program and, hence, the lid has been taken off the program, so to speak, and it is an open invitation to the public to come in and get the free food stamps and the program has gotten out of hand.

Now, what my amendment will essentially do is return the program to the pre-1977 guidelines, with one very important distinction, and that is that the elderly, blind, or disabled recipient will not be required to purchase their food stamps. They and the most truly needy recipients with the lowest incomes would continue to receive food stamps without having to meet the purchase requirement.

Now, in 1977, Mr. President, we predicted that the elimination of the purchase requirement would not only increase participation in the program, but that it would most benefit those eligibles who had the highest income, and those who had to pay the most for their food stamps. The poorest recipients did not then, nor will they now under my amendment, have to purchase a share of their food stamps. This prediction, unfortunately, Mr. President, was frighteningly accurate. Participation at that time in 1977 was 15 million people; a mere 2½ years later, it is nearing 23 million people.

We also predicted that the elimination of the purchase requirement would transform the program from a nutrition program into a general income supplement by freeing up the money that households would otherwise spend for food. It is now clear that that prediction has also come true. Quoting the Congressional Budget Office:

> Rapid price increases have resulted in low and lower-income families choosing to reallocate their limited incomes so as to select those commodities which are subsidized and thereby continue to maintain their real purchasing power in the non-subsidized goods. Since the elimination of the purchase requirement, the food stamp program has become more of a direct income transfer program, directly substitutable for non-food purchases.

I know that the day that passed on the floor of the House of Representatives it was reported on the national news that night. People were interviewed and they as much as said that. They said now they would be able to spend more of their income on other things that they would choose to spend it on and less on food because they no longer had to come up with that commitment to the family budget to purchase food as was the intention of this program back in the late 1960's when it started.

The CBO also noted that:

> Re-establishing the purchase requirement would decrease substitution, and increase the effectiveness of the transfer in increasing food purchases. It still remains unclear if increased food purchases, however, means improved nutritional status.

The General Accounting Office has also assessed the impact of Congress' elimination of the purchase requirement:

> The program effect was that the food stamp program no longer served to require households to set aside sufficient resources to be able to obtain nutritious diets. It became an effort to supplement family income in the hope that households would wisely use enough non-food coupons resources for food.
>
> It also was partially responsible for the large influx of households into the program and the resulting steep escalation of program costs.
>
> In addition to emphasizing the food stamp program as a nutrition program rather than an income supplement program, reinstatement of the purchase requirement could be expected to help control and possibly reduce program costs to the extent that households would drop out of the program or would be discouraged from participating.

They told us in 1977 that elimination of the purchase requirement would curb illegal abuse of the program, which had some factual basis in that food stamp vendors were eliminated.

But it is also likely that the perceived value of food stamps by participating households would decrease, since they would pay nothing for them, and that the potential for trafficking and other illegal activity would increase.

Although quality control was disbanded during implementation of the new program, and as such we do not really have any quality control data to quote, the USDA's Office of the Inspector General has revealed several illegal trafficking schemes in the program that was to reduce abuse.

The most recent, and largest example of such fraud came forth only last year, when the IG revealed details of "Arabscam," the biggest illegal trafficking scheme in the history of the program.

In short, our greatest fears over the elimination of the purchase requirement have come true.

What are those fears? The fact that there is going to be more abuse; that the program is running rampant; that

instead of 1.5 million people on the program we have 23 million people on the program; we have 1 out of every 10 Americans receiving them, and the program in place would allow a number much greater than that to get on. They are advertising it and making the word known.

Not only that, but we lost the discipline of the program. We lost the adequate, nutritious diet, Mr. President, that this program used to have, which was one of the virtues of the program, that the people who received the stamps were guaranteed an adequate, nutritious diet. That is no longer the case.

Just go back and study the CONGRESSIONAL RECORD and the legislative history on this, Mr. President. You will note that in the House at that time, once the purchase requirement passed the other body the then chairman of the House Committee on Agriculture amended the bill to remove the words and the language from the legislation that made any reference to adequate, nutritious diet.

There could be no misconception about this program, that it was to become an income transfer program and no longer a program aimed at guaranteeing Americans who receive the benefits of this program an adequate, nutritious diet.

It is simply not good policy to allow this program to burgeon at the levels that it has over the past few years since the elimination of the purchase requirement. The Carter administration admitted that at least 3.5 million new participants in the program came about as a result of this action, and the CBO has attributed fully 70 to 80 percent of the growth in the program to the elimination of the purchase requirement.

As I mentioned earlier, my amendment would not apply to the blind, elderly, or the disabled. It would also not apply to the lowest income participants, which represent 20 percent of the current food stamp caseload.

They would be exempt because their incomes are below the lowest income scale used to determine the amount of the recipient's purchase contribution.

Thus the amendment would reinstate the purchase requirement for some 55 percent of current recipients. These households are all households with income, and they should be required to allot some of their disposable income to the purchase of food as a condition of receiving their food stamps.

That point has been raised by Republicans and Democrats alike, and I think no one said it any more eloquently than Representative Leonor Sullivan, who was an acknowledged author of the food stamp program. She said:

> No one—no one—should receive food stamps free, no matter how small their income. That was another mistake made in 1970. They should be required to pay something for the food stamps—whatever they can afford to spend for food out of their limited income, even if it is only 50 cents or $1 for a month's food.
>
> Otherwise, and this is now the case in some situations—the stamps are considered a kind of "funny money" which are merely handed over as a gift from some mysterious source and do not have to be regarded as something you work for and buy. Anything handed over free in that fashion, whether it be food stamps or anything else, invites cheating and abuse.
>
> I am proud to be known as the author of the Food Stamp Acts of 1959, 1964, 1967, and 1968. The 1970 act was a mistake which needs repair. This Congress has failed since 1970 to follow through in removing the faults in the program, because of great controversy over what those faults are.
>
> I hope that the next Congress can look at the legislation with less passion and more care and reasonableness and put the program back on the track, so that only those clearly in need of this food assistance may receive it and all those who do need it can qualify for it. No more and no less.

Mr. President, I urge the adoption of my amendment, and note that it is not opposed by the administration although it is not a part of their recommendations. In closing, I would like the administration's comments on the issue to become a part of this record. I am quoting Deputy Assistant Secretary of Agriculture John Bode:

> Had the present administration been in office in 1977 when the purchase requirement was eliminated, we would not have supported that proposal. The purchase requirement greatly improves the nutritional character of the program and has a stabilizing effect on the program costs.
>
> However, because of some administrative concerns we did not include implementation of the purchase requirement in our legislative package.
>
> The administration feels the administrative costs associated with reimplementation are negligible relative to the budgetary savings that would follow establishment of the purchase requirements, but the administration takes no position.

Mr. President, I ask my colleagues to support this amendment, which I think is worthy of the support of this body.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the distinguished Senator from Idaho for his amendment.

Mr. President, I ask the Senator from Idaho if he would be willing to agree to a certain technical modification of his amendment, correcting an error made in the drafting process. We have already discussed this with the Senator and he understands the modification. It is in numbering the paragraphs.

Mr. SYMMS. Mr. President, I am happy to accept the modification.

The PRESIDING OFFICER. The amendment is so modified.

The modification reads as follows:

> On page 1, line 13 strike "(d)" and insert "(C)".
>
> On page 2, line 19, strike "(e)" and insert "(d)".

Mr. HELMS. Mr. President, as the Senator from Idaho (Mr. SYMMS) has stated, his amendment involves the partial reinstatement of the purchase requirement offered by the chairman of the Committee on Agriculture, Nutrition and Forestry, a proposal that was defeated in the committee by a vote of 10 to 7.

Mr. President, I think it should be emphasized again that this amendment excepts the elderly, the blind, and the disabled. They are exempted from the requirement which would be reinstated January 1, 1983, under the gentleman's amendment.

More than perhaps any other reform which was before the committee, the purchase requirement promises the best hope for achieving long-term program stability which is so imperative in this program which has grown astronomically since the elimination of the purchase requirement in 1979.

The amendment which the chairman offered in committee would reinstitute the purchase requirement exactly as it was in effect before its elimination with the Food Stamp Act Amendments of 1977 (effective January, 1979) with one exception: the elderly, blind, and disabled would not be required to purchase their food stamps; they would continue to receive food stamps without being required to pay a purchase requirement."

The introduction of "free food stamps" into the program beginning in 1979 is the single greatest cause for the tremendous growth in participation.

Mr. President, I ask unanimous consent that a table showing the steady climb in participation since the elimination of the purchase requirement be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Monthly food stamp participation

January 1979	17,292,943
February 1979	17,9[illegible],457
March 1979	18,456,986
April 1979	18,530,748
May 1979	18,343,842
June 1979	18,213,315
July 1979	18,396,987
August 1979	19,013,408
September 1979	19,308,801
October 1979	19,371,107
November 1979	19,660,970
December 1979	20,068,500
January 1980	20,373,892
February 1980	21,161,561
March 1980	21,478,656
April 1980	21,559,552
May 1980	21,527,178
June 1980	21,640,264
July 1980	21,853,641
August 1980	22,055,173
September 1980	21,989,686
October 1980	22,169,469
November 1980	[1] 21,843,864
December 1980	[1] 22,148,850
January 1981	[1] 22,416,051
February 1981	[1] 22,814,880

[1] Subject to revision.
Source: U.S. Department of Agriculture.

Mr. HELMS. Opponents of the purchase requirement have frequently contended that the rapid growth in program participation is not primarily due to the elimination of the purchase requirement. They have sought to justify program participation by pointing to higher than usual unemployment since January, 1979.

While it is true that unemployment has been somewhat higher since January 1979, the increase in unemployment does not adequately explain the rapid increase in program participation.

However, the monthly growth in food stamp participation, from 15.9 million in December of 1978 to 23 million in 1981—a growth of 7.1 million participants, or

over 3 million households in a little over 2 years.

During the same period of time, the number of people unemployed rose by only 1.4 million.

Thus it should appear obvious that the elimination of the purchase requirement is the primary factor in this Mount Everest-like increase.

The Department of Agriculture during the Carter administration admitted that elimination of the purchase requirement was responsible for the addition of at least 3.5 million new participants. The Congressional Budget Office estimates that 70–80 percent of the growth since 1979 can be attributed to the elimination of the purchase requirement.

The Department has noted that the average income levels of participating households remained nearly the same before and after the elimination of the purchase requirement. This would indicate that there were few differences in the economic status of the households before or after elimination of the purchase requirement. It demonstrates that simply making the food stamps available "free" made them more attractive to households who had previously decided not to participate.

The Congressional Budget Office noted last year that increased food stamp participation seemed to have occurred because during inflationary times:

> Low- and lower-middle income families choose to reallocate their limited incomes so as to select those commodities which are subsidized and thereby continue to maintain their real purchasing power in the non-subsidized goods. Since the elimination of the purchase requirement, the food stamp program has become more of a direct income transfer program, directly substitutable for non-food purchases. Hence, the propensity to participate in the program increases with relatively high rates of inflation in non-food, but still basic items.

The elimination of the purchase requirement has been cited by many as removing the nutritional focus of the program.

The Congressional Budget Office has made the following appraisal of reinstating the purchase requirement on nutritional impact:

> It is not possible to accurately assess the impact of reinstating the purchase requirement on the nutritional status of food stamp households. It is generally agreed, however, that a food stamp program containing a purchase requirement is likely to be more effective in increasing food purchases per dollar distributed among participants than one without such a requirement.
>
> Re-establishing the purchase requirement would decrease substitution, and increase the effectiveness of the transfer in increasing food purchases. It still remains unclear if increased food purchases, however, means improved nutritional status.

The General Accounting Office also substantiated the impact of eliminating the purchase requirement:

> The program effect was that the Food Stamp Program no longer served to require households to set aside sufficient resources to be able to obtain nutritious diets. It became an effort to supplement family income in the hope that households would wisely use enough non-food coupons resources for food. It also was partially responsible for the large influx of households into the program and the resulting steep escalation of program costs.
>
> In addition to emphasizing the Food Stamp Program as a nutrition program rather than an income supplement program, reinstatement of the purchase requirement could be expected to help control and possibly reduce program costs to the extent that households would drop out of the program or would be discouraged from participating.

American taxpayers simply cannot afford providing "free food stamps".

The restoration of the purchase requirement which the chairman offered in committee and which the gentleman from Idaho (Mr. SYMMS) now offers would exempt the elderly, blind, and disabled. The Congress has expressed special concern in 1977, and subsequently, that these groups may have had lower participation rates than other groups of participants.

Additionally, I agree with the Senator that these groups constitute the "truly needy" which we have been especially concerned with protecting. Excluding such households would exempt approximately one quarter of the current food stamp households.

It should also be stressed that those at the lowest income scale would also be exempt from the purchase requirement. Those whose net incomes are below $115 per month would be totally exempt. Depending on the total level of deductions that a household might claim it is possible that some households with net incomes up to $230 per month would also be exempt.

The Department of Agriculture and the Congressional Budget Office estimate that these lowest income participants represent 20 percent of all current participating households and would be exempt from the purchase requirement.

Thus we are speaking of reinstating the purchase requirement for approximately 55 percent of the current food stamp caseload. These are households with income, and they should return to the system of putting up part of that income to purchase their food stamps.

The Congressional Budget Office has indicated that households subject to reinstatement of the purchase requirement are likely to be larger (3.4 members compared to an overall average of 2.8 members) and have larger benefit levels, and a greater proportion receives AFDC or general assistance benefits (70 percent compared to 40 percent for the whole caseload).

While the purchase requirement did present some opportunities for abuse, its elimination has simply increased such opportunities. We have exchanged the possibility of abuse among several thousand eligibility workers and banks handling purchase requirement money for the possibility of abuse among 23 million recipients many of whom see the benefits as involving no investment of their own and are more willing to traffick in food stamps—using them to buy major nonfood items. Indeed, the Acting Inspector-General Robert Magee told the committee it was his observation that trafficking in food stamps has been on the increase since the elimination of the purchase requirement.

It should be noted that the proposed amendment contains the antifraud safeguards which the Congress had enacted before the elimination of the purchase requirement to improve program accountability.

The administrative paperwork did not decrease noticeably as had been expected after the elimination of the purchase requirement, because the increased caseload resulting from elimination of the purchase requirement totally offset any anticipated administrative savings. The General Accounting Office has stated about reinstatement:

> Additional administrative costs would result, but in all probability they would be offset by the slower growth in overall program costs.

It has been suggested that the food stamp program may be a likely candidate for a future block grant. The reestablishment of a purchase requirement would present the States with a stabilized program in the event of a block grant some years hence.

It was noted, especially by opponents, that the administration had not proposed reinstatement of the purchase requirement. However, the administration's position was stated by Deputy Assistant Secretary John Bode:

> Had the present Administration been in office in 1977 when the purchase requirement was eliminated, we would not have supported that proposal. The purchase requirement greatly improves the nutritional character of the program and has a stabilizing effect on the program costs. However, because of some administrative concerns we did not include reimplementation of the purchase requirement in our legislative package.
>
> The Administration feels the administrative costs associated with reimplementation are negligible relative to the budgetary savings that would follow establishment of the purchase requirements, but the Administration takes no position.

Deputy Secretary Richard Lvng had stated the same point earlier in his testimony before the committee.

It seems fairly clear that the main reason reinstatement was not recommended was because it would take some "lead time" to implement while the Office of Management and Budget was primarily interested in initiating immediate reductions. However, this reform holds great promise for long-term savings.

Mr. President, it is eminently reasonable to expect some food stamp recipients to put forward a percentage of their incomes to purchase the food stamp coupons which they have received free in the past 2 years, and I commend the gentleman for his amendment.

Mr. HELMS. Mr. President, I reserve the remainder of my time.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. Mr. President, I yield to the Senator from Kansas such time as he requires.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. HELMS. Will the Senator yield?

Mr. DOLE. I yield.

Mr. HELMS. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. I thank the Senator from Kansas for yielding.

Mr. DOLE. Mr. President, it has been correctly stated that this amendment was discussed in the Agriculture Committee. The vote was relatively close. The vote was 10 to 7.

I have listened with interest to the distinguished Senator from Idaho (Mr. SYMMS). I find myself here supporting the administration in opposition to restoring the purchase requirement.

Deputy Secretary Lyng, in his testimony before the committee, stated the administration did not favor restoration of the purchase requirement because such a move would unquestionably raise administrative costs and complicate administration, thereby increasing error rates.

I assume that is still the position of the administration.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. SYMMS. I thank the Senator.

I might point out to my distinguished chairman of the Finance Committee that Assistant Secretary Mary Jarratt at that time was a staff employee of the House Agriculture Committee and wrote all the arguments for the then minority leader of the Subcommittee on Agriculture that handled the legislation.

I cannot imagine that Ms. Jarrat's position has changed, and the administration's position. She certainly is the spokesman for the administration on this issue. I should be very surprised if her position had changed on that.

(Mr. CHAFEE assumed the chair.)

Mr. DOLE. I shall be happy to have her views. I guess if the administration now has a different view, I should be happy to have those. We cannot seem to get any views out of the administration, very honestly.

In fact, I think it would be very helpful to a Republican Senate if, in fact, we had the administration's position on the bill before us. It is my understanding that they do not oppose it. I hope that, by the time we vote tomorrow, the Secretary of Agriculture will indicate his support for the bill as it is before us at this time or, if not, to point out areas where he believes that the Senate should make some changes. If anybody happens to be around from the administration in this area, it would be helpful to us, as we discuss this proposal, to know their position.

I understand that they are under some pressure not to get involved in this debate, but, as far as this Senator is concerned, the administration does not wish to restore the purchase requirement. If, in fact, they have another view, that view should have been expressed at the hearing. If not, it should be expressed at this time.

Mr. SYMMS. If the Senator from Kansas will yield further, in all fairness to the Senator from Kansas, I have not had any contact with the administration on this subject. I only know that the Assistant Secretary of Agriculture, Mary Jarratt, has been very helpful to this Senator, when he was a Member of the other body, on this subject. I have not discussed it with them recently, so I do not want to leave the wrong impression on the floor at this time.

Mr. DOLE. I understand that, Mr. President. I have no quarrel with Ms. Jarratt. I do not think she was confirmed at the time we were discussing this in public, and she did not participate in the debate. If she has a view now and would care to share it with us, it would be helpful.

In spite of that, Mr. President, this is an argument that certainly has two sides. My own efforts in this area began, I guess, in 1975 or 1976. (As I recall, I might add that I voted against the first food stamp program.) However, we did eliminate the purchase requirement in 1977. I believe the result has been the reduction of administrative costs and paperwork. We have had an effort, as I have indicated, to restore the purchase requirement except for the elderly and disabled. I think there is some question in the administration of the program as to whether, if we have a partial restoration of the purchase requirement, we would have, in effect, a dual program. This is strongly opposed by State and local food stamp administrators.

Mr. President, it should be made clear again that the Committee on Agriculture did comply with the President's request. We made sufficient cuts in the food stamp program—not only to meet the President's request, but we exceeded the President's request. It has been suggested here that we are going after "high income food stamp recipients." But if we adopt this proposal, the Congressional Budget Office estimates that nearly 3 million low-income persons would no longer participate because they could not afford to buy their food stamps. After all, this was the intent of the amendment to eliminate the purchase requirement in the first place.

These 3 million people are poor and meet all the food stamp eligibility requirements. These are the people that the President has indicated he wants to protect with the so-called safety net, the "truly needy." Again, as far as this Senator knows, the President has not indicated that we ought to restore the purchase requirement. No one in the Department of Agriculture has indicated that we ought to restore the purchase requirement. That does not mean we cannot offer the amendment. The amendment was offered in the committee, and the amendment was defeated.

Mr. President, we are going to cut the costs of this program by over $8 billion in the next 4 years. The bill tightens the eligibility requirements for food stamps. If the purchase requirement is restored, poor families that meet the new standards, who are now clearly in need, will be forced out of the program. About 90 percent of those forced out will be families with gross incomes below the poverty line. That line is not $11,000. That line is $8,450 for a family of four. I do not think there are many who may be reading the RECORD or who may be listening to this debate in their offices would think that $8,450 for a family of four is a great deal of money.

It seems to me we ought to make certain which group we are aiming at when we talk about the restoration of the purchase requirement. I happen to live in a rural State. Kansas does not participate to much of an extent in the food stamp program, but there was a 61-percent increase, as I recall, because we have many rural areas in my State—a 61-percent increase in participation because we eliminated the purchase requirement.

Mr. President, I am going to have printed in the RECORD a table showing the State, the number of people, and the percentage of participation between November 1978 and November 1979. That includes the 50 States and the District of Columbia. This chart will reflect that, in rural States, by and large, the increase was rather dramatic. I shall cite just a few examples:

In the State of Indiana, an increase of 74 percent; in the State of New Mexico, an increase of 59 percent; in the State of Louisiana, an increase of 46 percent; in the State of Missouri, 54 percent; Montana, 55 percent; Nebraska, 52 percent; North Dakota, 62 percent; South Dakota, 78 percent; Wyoming, 72 percent; Idaho, 53.8 percent.

I cite these States, Mr. President, because, by and large, they are known as rural States. Many of the truly needy live in rural America. They were, in effect, bypassed by the program because of the purchase requirement. They did not have the upfront money to participate in the program.

Participation in the most rural areas, according to estimates by USDA, increased 42 percent. Participation in the largest, most urban areas increased only 8 percent. So the elimination of the requirement clearly benefited those in rural areas. In absolute numbers, rural areas outstripped urban areas. Nearly half the new entrants were from the smallest, most rural States, while only about one-fifth were from the largest most urban States. In the Southeast, there was the greatest increase in participation—nearly 32 percent; Mountain Plains, almost 32 percent; Southwest, almost 31 percent. The smallest increase was in New England—about 7 percent.

As I understand the amendment, it would exempt the elderly and disabled. The majority of households that participated once we eliminated the purchase requirement had gross incomes of less than $300 monthly, or $3,600 on an annual basis. That is gross income. If you pay any bills at all out of that gross income, you are going to have very little left. The majority of the recipients are the elderly, the disabled, and the children of one-parent families. I hope, Mr. President, that before we indicate that, for some reason, we need to restore the purchase requirement, we fully understand whom it may impact upon.

The purchase requirement would be a greater barrier to participation by poor families now than it was prior to the 1977 Food Stamp Act.

If the purchase requirement is restored, administrative costs and complexities would increase substantially. We would have to make arrangements with thousands of private issuance agents across the country to accept, account for, and transmit billions of dollars a year in cash accepted from recipients in return for food stamps. States would incur further costs, because they would have to operate dual issuance systems—one for the elderly and disabled, and another for all other households.

Both the National Governors Association and the National Council of State Public Welfare Administrators oppose this amendment.

I believe there is also a good indication that fraud would increase. The single largest area of fraud in the food stamp program prior to the elimination of the purchase requirement was the mishandling of millions of dollars of cash by private food stamp issuance agents. This caused a major scandal in 1976. Some issuance agents failed to transmit cash collected from recipients. Other agents held the cash for a period and used it to make money for themselves, before transmitting it. This abuse ended when the purchase requirement was eliminated.

Critics of eliminating the purchase requirement argued in 1977 that if a household that previously had to spend $40 to buy $100 in food stamps now simply received $60 in food stamps instead, it would not spend the full $100 on food.

That argument was made, and there was concern as to whether or not that was accurate. They were indicating by this that we, in effect, would defeat the nutritional purpose of the program or would undermine that purpose.

This was a theory, which has now been proven to be incorrect by actual experience. The U.S. Department of Agriculture conducted major nationwide food consumption surveys before and after the elimination of the purchase requirement. The data from the surveys conclusively shows that after the elimination of the purchase requirement, food stamp households were still spending more on food than the maximum food stamp allotment they would have received if the purchase requirement had been retained.

The contention that the elimination of the purchase requirement has undermined the nutritional purposes of the program is factually wrong. In fact, it appears that eliminating the purchase requirement has strengthened the nutritional impact of the program because it has enabled several million low-income persons who were always eligible and in need of food stamps—but never before able to participate—to enter the program and increase their food consumption.

We can argue from now until the end of the week on what we are going to do to save money under this program. We spent a great deal of time in the Senate Agriculture Committee trying to decide where we would save money. We voted on elimination of the purchase requirement, and it was defeated. Now we are back on the Senate floor with another amendment which would do pretty much the same thing.

I have no quarrel with those who want to reduce the cost of the program. We have done that. We have carried out the President's mandate. But I suggest that before we strike, we should know who the target is. In this program, the target group will be the poorest of the poor—3 million Americans, the truly needy, the ones for whom President Reagan indicated he would provide a safety net.

The President of the United States may not be aware of the amendment, but if he were, I hope he would indicate that he does not support the amendment. He has made a commitment to the American people. There are some who already have indicated that that commitment has been broken, so far as social security and medicaid and other areas are concerned, in which it was found necessary to consider reducing benefits because of spending reductions.

On the other hand, the President wants to get a handle on the budget. We want to reduce Federal spending, and he proposed certain cuts in the food stamp program. We have met our goal on those cuts; we have exceeded those cuts.

Those who want to restore the purchase requirement, in my view, are as concerned as this Senator about the food stamp program and about the poor, but I believe there may be some misinformation around. If we want to eliminate 3 million of the poorest of the poor in the food stamp program, this is not the way to do it.

Perhaps it is hard for us to understand. We live a fairly comfortable life in the Senate of the United States, and everybody who works for the Federal Government lives a fairly comfortable life. It may be hard to understand that some people do not have enough money, if we have the purchase requirement, to receive the benefits, but that was the case time after time. That is the judgment we are asking the Senate to make.

In consideration of our efforts to meet the President's objectives to tighten up the program as it should be tightened up, to spare no program, I suggest that adopting the amendment of the Senator from Idaho, however well intentioned the amendment is, would be a move in the wrong direction.

Mr. President, I ask unanimous consent to have printed in the RECORD material showing what effect reinstitution of the purchase requirement would have on rural areas, the administrative problems it would cause, and the table I referred to earlier indicating how participation increased in rural States, such as Idaho, Nebraska, Wyoming, and States in the Midwest and Southeast.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REINSTATING THE PURCHASE REQUIREMENT
EFFECT ON RURAL AREAS

Although we do not have data specifically on the effect of reinstating the purchase requirement, it is reasonable to assume that such a reinstatement would have the effect of undoing many of the positive impacts of the elimination of the purchase requirement. EPR led to a number of changes in food stamp participation, especially in rural areas.

Participation in the Food Stamp Program has historically been low in rural areas. After the implementation of EPR a significant number of the new participants came from rural areas.

In the year following EPR, food stamp participation in the smallest, most rural project areas increased nearly 55 percent, compared to only 11 percent in the largest, most urban project areas.

Of the nationwide increase in participation following EPR, 42 percent occurred in the most rural areas while 20 percent occurred in the most urban areas.

The greatest participation increases took place in the Southeast, Southwest and Mountain Plains regions, all of which contain predominantly rural States.

States with predominantly rural populations experienced the greatest growth in participation following EPR. Alabama, Indiana, South Dakota, Virginia, and Wyoming all had increases in excess of 70 percent. Arizona, Delaware, Kansas, Nevada, North Dakota and South Carolina experienced increases of between 60 and 70 percent.

A list of the increases in food stamp participation in the year following EPR, by State, is attached.

ADMINISTRATIVE ISSUES IN THE RESTORATION OF THE PURCHASE REQUIREMENT

Even a partial restoration of the purchase requirement could not be implemented before January 1983. Restoration would require the mobilization of an entire accountability superstructure that has been dismantled on the Federal and State level.

The over one dozen accountability forms would have to be redesigned and reissued.

New staff would have to be hired on the State and local level to monitor cash flows.

States would be required to totally redesign their issuance systems.

States which have installed mail issuance systems would probably have to dismantle them and return to local issuance offices.

States would have to enter into negotiations with issuance agents for the collection of the purchase requirements and the distribution of stamps.

Issuance costs would rise substantially because of the need for extra accounting and additional safeguards for cash.

State computer systems would have to be extensively reprogrammed to allow for purchase requirements, including variable purchase requirements. In addition, a separate system would need to be created for the elderly and disabled, who would not be subject to a purchase requirement.

Even with a monitoring system, it is expected that cash losses and error would increase seriously. For example, in the last year of the purchase requirement, the government lost several millions of dollars in the State of Illinois alone.

If the purchase requirement is restored only for those participants who are not elderly or disabled, States and the Federal government would face the problem of running what will be essentially two separate food stamp programs.

Separate issuance records, computer programs, and files would have to be maintained.

Separate reporting systems would have to be installed for each type of client.

Change in food stamp program participation and benefits received between November 1978 and November 1979, 50 States and the District of Columbia

Source: Program records, Food and Nutrition Service, USDA.

Mr. DOLE. Mr. President, I thank the Senator from Vermont for yielding time.

Mr. LEAHY. Mr. President, in keeping with the efforts I have made to support the Reagan administration throughout this matter, I will adopt once more the position of the Reagan administration, which is, of course, in opposition to the amendment by the distinguished Senator from Idaho.

I will quote a little from the statements of the administration when asked about reinstituting the purchase requirement. To put everything in perspective, the amendment of the distinguished Senator from Idaho would reinstate the purchase requirement.

This question was asked of the administration during hearings on the appropriations bill:

Question: I assume one of the options considered by the Reagan administration was reinstitution of the purchase requirements. What would be the impact of such a proposal, both on recipient and in dollar terms, and why was it rejected as an option.

The administration, in expressing their opposition to reinstituting the purchase requirement—in effect, in opposition to the amendment before the Senate—said:

The administration is not proposing to reinstate the purchase requirement because it would be an expensive burden on State agencies. Without a purchase requirement, only one issuance transaction per household per month is needed. With a purchase requirement, since many households are unable to pay the total at one time, multiple issuances would be needed. Issuance agents' fees are based on the number of transactions and so with a purchase requirement, State agencies' issuance costs would be substantially higher.

They go on to say:

Cash requires more careful security since cash on hand makes issuance offices more prone to thefts. Also contributing to increased security costs would be the substantial increase in the volume and value of coupons . . .

They said:

In addition to these costs, State agencies would incur increased accountability and reporting requirements.

They also said:

Finally, with a purchase requirement, the low cost and convenience for States and recipients of direct mail issuance is lost.

They went on to say:

For these reasons and because it would cause hardship to some households, the administration believes that the purchase price for food stamps should not be reinstituted.

Mr. President, at a time when we are doing our best to cut down the cost of State and local government, at a time when we are doing our best to get the Federal Government off the backs of State and local governments, at a time when we are trying to cut down bureaucracy and red tape, and so forth, this amendment, in one significant area, would put the Federal Government back on the backs of the State and local governments, increase bureaucracy, increase the administrative costs, increase areas of abuse, increase possible thefts.

If, indeed, we are concerned that food stamp coupons may become a second currency in this country—and I, for one, hope that will not happen—if we reinstitute the purchase requirement, by definition, we substantially increase the number of food stamp coupons in the country because every household of the same size ends up with the same number of food stamp coupons. They just pay different amounts for them. Ergo, more food stamp coupons in circulation.

Prior to elimination of the purchase requirement there was widespread fraud among vendors who collected cash from recipients' unused food stamps. The GAO investigation found large numbers of these vendors either failing to transmit some of the costs to the Federal Government or, as I said earlier, holding the cash for a while and using it to earn money before sending it to the Federal Government.

In fact, the problem reached the proportion of a national scandal in 1976 when irregularities involving millions of dollars in cash purchase requirements were uncovered.

The difficulties of dealing with this problem were immense. Can you imagine, Mr. President, when we eliminated the purchase requirements we eliminated 14,000 separate issuance points, many of them in private homes, collecting money from recipients in return for food stamps?

The distinguished Senator from Kansas has also so well stated a point that is of utmost importance certainly to me, to my constituents in Vermont and to any other rural area, and that is rural participation became a reality only with the elimination of the purchase requirement.

There are two significant areas where we see the increases: rural areas and the elderly. Are we going to cut them back off?

I, for one, agree with the administration in this regard.

We can eliminate paperwork, cut down bureaucracy, decrease fraud, eliminate waste, cut down costs, and we can do all of that by rejecting the amendment before us. I hope that we do.

Mr. President, how much time do I have remaining on this amendment?

The PRESIDING OFFICER. The Senator has 5 minutes and 52 seconds remaining.

Mr. LEAHY. Mr. President, how much time is remaining to the proponents of the amendment?

The PRESIDING OFFICER. Seventeen minutes and 57 seconds.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum and I ask unanimous consent that the time be equally divided similar to what we have already done several times this afternoon.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I am prepared to yield back the remainder of my time on this amendment.

Mr. HELMS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the amendment will be put off until 3 p.m. tomorrow.

The Senator from North Carolina is recognized.

Mr. LEAHY. Mr. President, will the Senator yield for a parliamentary inquiry?

Mr. HELMS. I yield.

Mr. LEAHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. Mr. President, am I correct in understanding, although we yield back our time on this amendment, that under the unanimous-consent agreement there is before each vote that is stacked tomorrow 10 minutes equally divided?

The PRESIDING OFFICER. Not the first vote.

Mr. LEAHY. I see.

The PRESIDING OFFICER. Only the succeeding votes.

Mr. LEAHY. I thank the Chair. I appreciate that.

Mr. HELMS. Mr. President, I will assure the Senator if he needs time before the first vote we can arrange that.

UP AMENDMENT NO. 140

(Subsequently Numbered Amendment No. 64)

(Purpose: To eliminate the requirement to periodically adjust the amount of the standard deduction and the excess shelter deduction)

Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 140.

Mr. HELMS. Mr. President, I ask unanimous consent that a reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 33, beginning with line 17, strike out all down through line 7 on page 34 and insert in lieu thereof the following:

"(2) striking out the second sentence; and"

On page 34, line 16, beginning with "adjusted", strike out all down through "June 30," in line 4 on page 35.

Mr. HELMS. Mr. President, I shall not be long in discussing this amendment because I have already alluded to it earlier in the debate.

This amendment would eliminate the automatic indexing of deductions.

Mr. President, the committee bill, S. 1007, suspended the annual indexing of the deductions until July 1, 1983, at which time indexing will be resumed using a version of the CPI that does not include homeownership costs. Deductions will remain frozen at present levels until that time, $85 per month for the standard deduction and $115 deduction for excess shelter/dependent care costs.

The administration had recommended that automatic indexing of deductions be eliminated entirely. This amendment would simply implement the administration's view.

Mr. President, I might say for the record in that general connection that the distinguished Senator from Kansas and I believe the distinguished Senator from Vermont as well emphasized that the administration did not request restoration of the pay requirement.

I say for the record that the administration has assured me that they will be delighted if further savings can be achieved in this bill.

But back to the indexing question which this amendment addresses. The resumption of indexing in July 1983, which of course will be in fiscal year 1983, even with a version of the CPI excluding homeownership costs, will result in resumed spending in the outyears covered by the bill in rather substantial amounts.

Let me state them.

Mr. President, I ask unanimous consent that the table be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[By fiscal years, in millions of dollars]

	1982	1983	1984	1985
Standard deduction		58	112	332
Excess shelter/dependent care deduction		18	32	64
Both		76	144	396

Mr. HELMS. I thank the Chair.

Furthermore, the Congressional Budget Office indicates that using the CPI excluding homeownership costs will not result in any savings. "No change in cost is attributed to the change in the indexes that would be used to make adjustments. It is very unlikely under current economic assumptions that removing the homeownership component from the indexes will cause them to increase at rates lower than those indexes currently used." That was the CBO Cost Estimate, May 28, 1981.

Because other savings items in the bill expire over the course of the bill, permanent changes to achieve savings should be made wherever possible to insure long-term savings.

Automatic indexing has proven exorbitantly expensive in numerous Federal programs. Congress always has the option to consider increasing these amounts in the future, but automatic indexing of deductions should be eliminated.

Benefit levels are already indexed under the committee bill, so benefits will be increased. Indexing deductions only multiplies the increase in benefits to recipients.

Since the standard deduction does not actually represent any specific costs which would increase with inflation, there is no logical reason for indexing it automatically or by specific statute.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. I thank the Chair.

I reserve the remainder of my time.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I also have to oppose this amendment, as I did when similar discussions were held in the Senate Committee on Agriculture.

If we could assume a zero rate of inflation starting today, no adverse change in the economic picture in this country, no increase in costs of basic necessities, I would be perfectly willing to accept this amendment. But those are assumptions we cannot make or will not make.

Freezing the standard deduction and the excess shelter deduction at today's levels would institute a decline in the assistance food stamp recipients actually receive as their costs of living rise. Utility costs, for example—included in the excess shelter deduction—are not frozen. In fact, they are anything but. Anybody in this Chamber has only to compare their utility bills of today with their utility bills this time next year; whether it is at a cost of kilowatt hours used, the cost of the fuel burned, whatever it is, wood, oil, gas, electricity; it has gone up.

I mentioned earlier this afternoon, Mr. President, that I come from a State where you sometimes have 40-degrees-below-zero weather, and it will stay like that for days on end. Someone once joked that in Vermont we have 10 months of winter and 2 months of poor sledding. That is not so. It is only 1 month of poor sledding. But it is cold, and it is in North Dakota and it is in Oregon, and it is in Washington State. It is in upstate New York, as it is in a lot of other States.

When you look at the terrible killer heat waves we had last year, you have the opposite end of the thermometer reading, again resulting in the raising of shelter and energy costs.

As these necessary expenditures increase, believe me, when it is 20 below, 40 below, 10 below zero, energy costs are a necessary expenditure. They are not luxuries at all. As such necessary expenditures increase, food stamp recipients would find themselves having fewer of their own dollars to spend for food. Freezing deductions would only make worse the declining situation of food stamp recipients, who have already lost considerable ground to inflation. And they are being cut substantially in this legislation.

Food stamp households are currently allowed a monthly standard deduction of $85 per household. They are also allowed a deduction for the amount by which their shelter costs exceed 50 percent of their net incomes, up to a maximum of $115 a month. The standard deduction and the $115 maximum on the shelter deduction are currently adjusted once a year to keep pace with inflation.

The committee bill freezes these deductions for 2½ years (until July 1, 1983). It also changes the index used to adjust these deductions after the freeze ends (by removing homeownership costs from the index) so that the deductions rise at a slower rate. We put the brakes on, we put them on considerably. We are cutting back at a much faster rate than inflation is going up. This would mean that if a poor family's heating costs rose sharply in future years and left the family with less money for food, there would be no adjustment in the household's food stamp benefits, despite the loss in disposable income.

According to administration figures, the amendment would hurt nearly all food stamp households in all parts of the country, including the poorest.

Mr. President, as I said, I will oppose this amendment.

I am happy to yield to my distinguished colleague from Kansas, the chairman of the Subcommittee on Nutrition.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I will be very brief. I want to thank the chairman for his efforts to move along with

the amendments. It seems to me we are making progress.

These are issues that have been debated—and this is one that was debated—in the committee. We finally worked out a compromise in an effort to save enough money to meet the requirements set out. I think both Senators more or less explained the amendment. It just happens that some of us are on one side and some are on the other.

Food stamp households are currently allowed a monthly standard deduction of $85 per household. They are also allowed a deduction for excess shelter costs. The shelter deduction equals the amount by which shelter costs (including utilities) exceed 50 percent of the household's net income, up to a maximum of $115 per month. The standard deduction, and the $115 maximum on the shelter deduction, are now adjusted once a year to keep pace with inflation.

The committee bill freezes the food stamp standard deduction and the maximum allowable shelter deduction at the current levels for 2½ years. After that time, homeownership costs (the most rapidly rising part of the CPI) would be excluded from the index for future adjustments, so that the deductions would rise at a slower rate. That change is permanent.

These changes save about $900 million over the next 4 years. The amendment to freeze the deductions permanently goes much further, and would adversely affect nearly all food stamp households, including the elderly and disabled.

USDA's figures show that 86 percent of all food stamp households—about 6 million households—would be adversely affected. The large majority of those affected have gross incomes below the poverty line. Again the poverty line is $8,450 for a family of four. It is not $11,000. It is a much lower figure. Substantial numbers of households in all regions of the country would be adversely affected.

A permanent freeze on deductions is not justified. Heating costs and the costs of other necessities borne by low-income families are expected to rise in coming years. If the deductions are frozen permanently, then households on fixed incomes who face increased fuel bills—and have decreased funds available for buying food—would be allowed no increase in deductions and no adjustments in food stamp benefits to reflect their loss of disposable income.

The committee bill freezes both the standard deduction and the shelter/dependent care deduction for 2½ years, or until July 1, 1983. Both deductions are currently indexed for inflation once a year.

The proposal would freeze these deductions permanently. This would mean that if family's heating costs rose sharply in future years and left the family with less money for food, there would be no adjustment in the household's food stamp benefits, despite the loss in disposable income.

Department of Energy and census reports indicate that the percentage of income spent by low-income households on energy rose from 25 percent to 32 percent from 1978 to 1980. DOE reports also indicate that less than one-third of the increase in energy costs incurred by low-income households over the past 3 years has been offset by the low-income energy assistance program. A failure to adjust the shelter deduction for inflation would thus result in a significant loss in food purchasing power for many low-income families.

The 1977 act provided for the standard deduction to replace a variety of itemized deductions that were allowed under the prior law. If it is frozen, food stamp allotments will not reflect the fact that increases in a variety of expenses are decreasing the disposable incomes that participants have left for food.

Under current law, the standard deduction of $85 per month and the upper limit on the shelter deduction of $115 per month are indexed for inflation once a year. It is estimated that they would rise to $90 and $125, respectively, in fiscal year 1982.

So we have had some discussion of heating costs and costs of other necessities. If, in fact, the President's economic program works—as I believe it will—if in fact the spending cuts and the tax reductions, fewer regulations, and a better monetary policy all have an impact by 1983, this may not be a factor. I hope that the rate of inflation will be slowed to the point that indexing would be eased, because I share the general views expressed by the distinguished chairman that we are in great difficulty because so many Federal programs are indexed. I suggest that this is one reason why the President must succeed in his efforts to turn this country around economically.

But, having said that, it seems to me that Congress is going to meet every year, so far as I know, and we have the opportunity to change anything in the food stamp program. This Senator certainly believes there should be a constant review of the food stamp program, and, as chairman of the Nutrition Subcommittee—and, hopefully, chairman at that time or prior to that time—I would certainly be prepared to take another look at the entire program before the expiration of the 4-year program.

So I will oppose the amendment. As far as this Senator knows, there was not any committee vote on this amendment. It was part of a package of amendments offered. In an effort to satisfy the budget requirements, in my view, we were able to accommodate those requirements, as indicated a number of times, and I think we took responsible action. Maybe some would disagree, but I hope the amendment will not be affected.

I thank the distinguished Senator for yielding.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, this amendment would save $76 million in fiscal year 1983, $144 million in fiscal year 1984, and $396 million in fiscal year 1985.

I agree with the Senator from Kansas that unless things change markedly around this place, the Congress will be in session in each of the years during which the budgets will be considered for fiscal years 1983, 1984, and 1985, which is precisely the reason the amendment ought to be adopted.

If we leave the bill as it is, nothing will be done probably, to change the automatic indexing but at least this amendment will require the Senate and the House to take a look at this business of indexing.

Now, I am not going to repeat my earlier remarks about indexing and the catastrophic effect it has had on the fiscal situation in this Government and, therefore, in this country. But if for no other reason, Mr. President, we need the fiscal discipline of this amendment to require, first, the Committee on Agriculture, Nutrition, and Forestry to look at this question in each of those fiscal years and to take whatever action may be deemed appropriate at that time.

If we do not do it, we are going to pass up the opportunity to save the $76 million in fiscal year 1983, the $144 million in fiscal year 1984, and the $396 million in fiscal year 1985.

Mr. President, I cannot stand here this afternoon and tell you what the inflation rate is going to be tomorrow or next month or next year; nor can I say to the Senator from Kansas that it will or will not be necessary to take a look at this indexing business. I think it will be absolutely essential and imperative that we do. But surely Senators must agree that we owe it to the taxpayers to discipline ourselves. We should not fail to address this issue and thus let the money flow out across the country like Tennyson's brook.

Now we are talking about fiscal years 1983, 1984, and 1985. We have already had it frozen now through July 1, 1983. What on Earth is wrong with saying to curselves, "We are going to take a look at this thing, and we are going to do what is right at the time when it is necessary to do something."

Now I say again I know how this place operates. What we do not have to do we do not do, particularly in terms of saving the taxpayers' money. Yet this is a commonsense amendment.

Mr. President, I join Senator LEAHY and Senator DOLE in being pleased that we have at least done a little bit toward reducing the cost of this food stamp program. The perspectives vary. They think it is a very great deal; I think it is a modest amount. And I think the arithmetic is on my side when you look at the enormous cost of this program.

I wrote down several years ago and have carried around in my wallet the progressive increase in the cost of the food stamp program. When it began in 1964, it was more or less a pilot program, and it had 386,255 participants, costing $30,478,640; $30½ million, roughly.

By 1975, there were 18,614,956 participants, costing $4,300,000,000. And that just happened to be an increase as of 1975 of 14,000 percent.

In 1964, 1 citizen in 552 received food stamps; in 1975, 1 in 13; in 1981, 1 out of every 10.

Now, Mr. President, I am doing the arithmetic in my head, but the increase in the cost of programs since 1964, as of now, is something like 31,000 percent. And if we do not do something about it,

it is going to go the Lord knows how high.

So, I say again that I am grateful for small favors in terms of what the committee sent to the floor, but we did not do enough.

And I do not care whether the administration recommended this or recommended that. The question is: What do we recommend? How much money are we willing to save? How much work are we willing to do to tighten up this program? How fair are we willing to be with the working taxpayers of this country, who, after all, are footing the bill? We are not doing it.

You can talk about generous Senators and generous Members of the House of Representatives, but it is not our money that we are spending; it is the money of the taxpayers of this country. They have got a right to expect us to be as frugal and fair with them as we are with anybody else.

But this food stamp program, in terms of cost, is unprecedented in terms of welfare programs. I genuinely and sincerely believe that the changes that the committee has recommended, helpful as they may be, are nonetheless insufficient to meet the gravity of the situation that confronts us.

One of the chief flaws of the bill as reported from the committee, as I have mentioned before, is that the savings to be achieved diminish after the next few years, such that in fiscal year 1985 the committee bill will save $358 million less than anticipated under the President's recommendations. So let us not go too far in saying that the committee conformed with what the President wanted or what the administration recommended. We are talking about $385 million less, over the period covered by this bill, than the administration sought to achieve in savings.

One of the greatest weaknesses, I say again, in this Congress is the tendency to focus on the immediate situation to the exclusion of long-term implications of legislative decisions and to achieve savings by pushing costs of programs off into future years.

We are in precisely that position, Mr. President, with the social security program. Oh, it was so easy in this Chamber to come in and vote aye to increase the benefits and increase the number of participants in the social security program, all great sport, particularly before an election.

Franklin Roosevelt was never regarded, I suppose, as a hardcore conservative, but he gave us a bit of advice about social security at the time he signed the bill into law. He said, in effect, we must never allow this program to become a political football.

That is precisely what Congress did. The Congress played politics with social security every election year, and any Senator who is honest with himself will admit it. We are doing the same thing with the food stamp program. We must not require anyone to pay anything. We must index. We must just shovel it out. Otherwise, the Washington Post may call you a hardhearted old Senator tomorrow morning.

But you know what I think a hardhearted Senator is, Mr. President? I think he is a fellow who, with reckless abandon, votes aye to increase benefits, to delay the agony of making the hard decisions in those outyears, and to seek to be portrayed in the media as a kind, generous, and compassionate Member of Congress.

The only thing wrong with that, Mr. President, is that it is not our money. It is the money that we extract from that hard-working taxpayer who goes to work every morning to produce.

As for this particular amendment, the changes adopted by the committee do save what we say is the requisite amount of money in fiscal years 1982 through 1984. But several of the major reforms adopted by the committee essentially expire during fiscal years 1983 and 1984.

I say again, this results in increased spending in the outyears. It may very well be that in those outyears we, as a Senate, will want to adjust it, but I think we ought to impose upon ourselves, Mr. President, the discipline of having confronted the question. Otherwise, it will roll through without a murmur, without a question, mainly because nobody is looking.

So this indexing business is deceptive. It is so simple, it takes care of everything, and sufficient to the day is the evil thereof. Let us not worry about the outyears.

It is a dangerous game we play with the stability of the country. It is not a worthy game that we play in terms of our responsibility as Senators.

The freeze on deductions adopted by the committee terminates on July 1, 1983, at which time indexing will be resumed, albeit with a minor revision excluding the homeownership component of the Consumer Price Index.

The administration had urged, as I said earlier, that these deductions be frozen permanently.

There would be minimal adverse effects on food stamp households by mandating that the standard deduction remain at $85 and the excess shelter/dependent care deduction remain constant at $115 beyond July 1, 1983. Households would receive about $2 per month less for each $5 indexed increase which would have occurred. Deductions no longer impact on eligibility because a gross rather than a net income test has been adopted by the committee. Even though the standard deduction and the excess shelter/dependent care deduction would be stable under the administration's recommendation, benefits would continue to change in accordance with the inflation rate since the thrifty food plan will continue to be indexed.

Indeed, indexation of the standard deduction has been especially questionable from its inception in the Food Stamp Act of 1977 and has been made more questionable by the addition of new deductions. The standard deduction was originally recommended to replace numerous specialized deductions and exemptions that existed prior to the 1977 reforms. These included a work allowance, mandatory work expenses such as Federal, State, or local income taxes, social security taxes, mandatory retirement payments, mandatory union dues, medical expenses, child care, tuition, and mandatory fees, support and alimony payments, shelter costs and unusual expenses connected with a disaster or casualty.

However, Mr. President, Congress, rather than implementing a straight standard deduction, as the administration had proposed, instead, reduced its amount somewhat and added several special deductions. These deductions represented expenses for some of the very items which the standard deduction was supposed to replace. A $75-per-month deduction for combined expenses resulting from excess shelter costs and dependent care expenses was established; it has since been indexed to the present level of $115. A 20-percent earned income deduction was also added. And most tuition costs were designated as "exclusions," with the same effect as a deduction.

Since 1977, even more deductions have been added on top of the standard deduction, including: the exclusion of low-income energy assistance payments and a medical deduction for the elderly, blind, and disabled. With the establishment of these other deductions, there is no real basis for continuing to index the standard deduction, in particular.

Automatic indexing of what is now an $85 (originally $60) standard deduction might make sense if it really were a replacement for former "itemized" deductions. The deductible expenses it replaced would have increased with inflation, and automatically indexing the standard deduction to the Consumer Price Index would have represented increased expenses (due to inflation). However, because the standard deduction does not replace former itemized expense deductions, it only serves as a device to increase benefit levels and should not be indexed. Continued automatic indexing of the $115 ceiling on shelters and dependent/care expense deductions is also questionable; it simply increases the food stamp programs subsidization of nonfood costs.

For these reasons, it seems to me reasonable to maintain all deductions at their present levels as the administration had recommended. Automatic increases through indexing of deductions should be eliminated. Congress can reevaluate each deduction level on a case-by-case basis in future years if it finds that the Federal budget can afford increased subsidies.

Savings from another provision also end with fiscal year 1984. During fiscal years 1982, 1983, and 1984, there is a 3-month lag in updating the thrifty food plan so that by 1984, indexing will be done in October each year, rather than January, to correspond to indexing in other major Federal programs such as social security.

While the 3-year/3-month delay is an acceptable cost-savings reform, as far as it goes, the savings from the provision will expire at the end of fiscal year 1984. This will result in the resumption of $250 million in spending annually.

As a result, Mr. President, I feel that

additional permanent changes in the food stamp program are needed to effect long-term savings and stability in the program. The real key to the budget control that the President has recommended is that long-lasting savings be accomplished. In addition to the need for a permanent freeze on the deductions mentioned above, I believe that other, permanent changes need to be made in the program, such as the elimination of automatic indexing.

Mr. President, I reserve the remainder of my time.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. HELMS. I will yield to the Senator. If we do not have enough time on the amendment, I will yield time from the bill.

Mr. DOLE. Mr. President, I have listened with interest to the distinguished Senator from North Carolina. I do not quarrel with a thing he said, except that the one group that does not have any lobbyists around the Capitol are the people for the most part in the food stamp category. This Senator has been in the Congress over 20 years and I can understand. Certainly, every group has the right to have someone represent them in the Halls of Congress, in committee hearings and deliberations.

Poor people are very easy targets, because nobody is going to be around to object. No one is going to rush in here to protect the poor people. Maybe there will be an editorial or two in the paper after it is over. It is a very difficult judgment to make.

Some people in this country have problems that others do not have. Some have disabilities, some have less income, and some have other special problems.

It just seems to me that we have an extraordinary obligation to make certain that we do not spend a nickel more than necessary in any of these so-called, as some would call them, giveaway programs.

We consider many other programs. I will not get into every program, but we will have a number of them before the Senate before the year is over. In the Senate Finance Committee, we have just considered a whole host of cuts in AFDC and medicaid benefits and other benefits that affect people on welfare. This Senator is not afraid to stand up and suggest we ought to make cuts that would restore some semblance of responsibility in the Federal Government.

Mr. President, it is particularly difficult when we are dealing with low-income Americans. I would hope we just do not march in and have somebody say "Well, it is a food stamp bill, and I will cut the food stamp program anytime." There are some who would cut the food stamp program anytime—cut it in half, cut it in quarters, repeal it altogether.

If that is done, then, of course, we are going to have more costs in the welfare program, and I am not certain what the final savings would be.

It seems to me, Mr. President, that when we freeze deductions, we hurt the poorest food stamp households the most. Freezing deduction levels means that every household in the program loses the same $5 or $10 increase in deductions that would have occurred without the freeze. That $5 or $10, as I have indicated before, may not mean much to so-called higher-income food stamp households—if you can classify anybody properly in the program as a higher-income food stamp household—but it means a lot to food stamp recipients whose total income may be only $150 or $200 a month. In effect, freezing the deduction levels imposes a type of regressive tax on food stamp households, hurting the poorest the most, since everyone loses the same absolute dollar amount.

There is nothing fair about it at all, Mr. President. That was why, in our package, we agreed to do it part of the way to make up the savings. We did not have any easy choices. I just suggest that we are dealing with people who are not represented very well in the Halls of Congress. They may not be represented at all. We have a number of alternatives: one, we can keep cutting and cutting, as we may have to do in the outyears; we can act responsibly, as we have done in the committee; we can meet the President's requirement, as we have done in the committee. We have exceeded the requirement of the Budget Committee; we have exceeded the President's request. We are doing what we can to protect the so-called truly needy—the safety net that the President outlined a number of weeks ago.

If, in fact, we find that we did not go far enough in the food stamp reductions; if, in fact, we find there is still more fraud or more abuse or more waste; or if, in fact, we find that there are people in the food stamp program—and there will always be some—but if, in fact, there are a great number who might be classified as greedy rather than needy, this is one Senator who will pledge to my colleagues on both sides of the aisle that we shall take whatever action is appropriate.

But let us keep our eye on the target, as the Senator from Kansas said before. The target in this case is the poorest people in the program. Maybe those are the ones we ought to attack, because they cannot do anything to us, anyway. The Senator from Kansas disagrees. They are not going to vote. They are not going to contribute. They are not going to be in our offices. They do not have anyone to talk with except people at the local level. Those at the local level have indicated to us that some of the changes being proposed would not be in the interest of the people they serve.

Mr. President, there is no one who has any corner on hardheartedness around here. If, in fact, indexing is a problem, as the Senator from North Carolina has pointed out, we are in trouble, because about 74 percent of Federal programs are indexed. In the Finance Committee we are in the process of taking a look at all programs that are indexed, and someday, we are going to take action. But I hope we are going to take it all at once.

On the other hand, I have enough confidence in President Reagan's program that I hope this indexing will not be the problem that it has been in the past 10 to 12 years. The Senator from North Carolina correctly stated that we are facing near bankruptcy in social security because of indexing, and because of the formula itself—because it overindexes. That is the problem. Indexing itself, I think we could subscribe to. Overindexing we could not. So we changed the formula, in 1983 in this case, to exclude housing, because that would overindex the system. However, we do have some serious problems, and we are going to be dealing with social security changes in the Finance Committee.

I guess—well, I am not going to guess at this point, because that is a rather explosive issue—we are looking at indexing, even though the President made a campaign promise. That is because one thing we want to preserve is the integrity of the social security system, and we are going to do that on a bipartisan basis in the House and the Senate.

Mr. President, I do not have any other expression on this particular amendment. I am happy to yield the floor.

Mr. LEAHY. Mr. President, I am perfectly willing—have the yeas and nays been ordered on this amendment?

The PRESIDING OFFICER (Mr. HAYAKAWA). The yeas and nays have been ordered.

Mr. LEAHY. I thank the Chair.

Mr. President, I am perfectly willing to yield back my time.

Mr. HELMS. I yield back my time, Mr. President.

The PRESIDING OFFICER. The votes on amendments will occur tomorrow.

Mr. BAKER. Mr. President, it is 6 o'clock or a little after. It is clear we are not going to be able to finish this bill today. In a few moments, I should like to propose a period for the transaction of routine morning business and go out until the morning at about 10 and go back on this bill at about 10:30. I wonder if that is generally agreeable to the managers.

Mr. LEAHY. It is certainly agreeable to the minority.

Mr. HELMS. Mr. President, I say to my distinguished majority leader that I am confident that the Foreign Relations Committee hearing tomorrow morning will be finished by 10:30 or shortly thereafter. I assure the majority leader that I shall be here as quickly as I can following that.

Mr. BAKER. I thank the Senator.

Would it be possible to lay down an amendment tonight?

Mr. LEAHY. I know of none on this side, Mr. President, I might have mentioned to the majority leader that, if it will help things tomorrow, I suspect that on most of the amendments coming up, I shall not be using the time allotted to me. I also suspect that it will not be necessary to use all the time that I have on the bill. So I shall be making every effort on this side to be yielding back as much time as possible to keep us on track.

Mr. BAKER. Mr. President, I thank the Senator. That is characteristic of his good cooperation and I am personally grateful for it, as I am sure all Members of the Senate are.

We have a problem of sorts—if you will

pardon the expression, it is a high-class problem—that we have a time certain to vote on passage not later than 7 p.m. So if we are going to accommodate the amendments and still extend the time available for debate, we shall be hard put. But I appreciate the statement of the Senator from Vermont.

Mr. HELMS. If the majority leader will yield, it is my hope and, to a somewhat lesser degree, my anticipation that we shall be able to substantially cut down on the time required for this. I hope we could vote at maybe about 5 o'clock. I shall work to that end with the Senator.

Mr. BAKER. Mr. President, I appreciate that. The Senator from North Carolina is very generous, and as always, very cooperative.

If we have an amendment we can lay down now, we can be prepared for that tomorrow, then I am prepared to make arrangements to go out.

Mr. HELMS. If the Senator will yield, I am advised that the distinguished Senator from Idaho (Mr. McCLURE) has an amendment which he, as I understand it, would like to have as the first order of business. Would it be almost the same if unanimous consent were obtained for his amendment to be submitted early tomorrow morning?

Mr. BAKER. Fine.

Mr. LEAHY. Reserving the right to object, Mr. President, and I shall not object, which amendment is that, so I can be prepared to speak on it?

Mr. HELMS. It relates to energy assistance.

Mr. LEAHY. I have no objection, Mr. President.

Mr. BAKER. Mr. President, if I understand the arrangement, then it is agreeable that an amendment to be offered by the Senator from Idaho (Mr. McCLURE), dealing with counting Federal energy assistance as income, would be the pending amendment in the morning. Since the Senator from Idaho is not here, but I am assured by the manager of the bill that that is satisfactory to him, I now ask unanimous consent that when the Senate returns to consideration of this bill tomorrow, the McClure amendment I have just described be the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, not to extend longer than 15 minutes, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF CHARLES Z. WICK

Mr. HAYAKAWA. Mr. President, Mr. Charles Z. Wick, a fellow Californian, was confirmed yesterday, June 8, to be Director of the U.S. International Communication Agency. I would like to take this opportunity to express my pleasure in his confirmation.

Mr. Wick has served the people of California for over 30 years, and was honored during the recent Los Angeles bicentennial celebration as one of the outstanding "Men of Achievement."

He holds a degree in music, as well as a Ph. D. in law, and has served as president and chief executive officer of Wick Financial Corp., and of Mapleton Enterprises. He has been a member of the board of trustees of the John Thomas Dye School in Los Angeles; cochairman of the advisory committee to the School of Performing Arts of the University of Southern California; and a member of the support group board of directors for the Harvard Preparatory School of Los Angeles. He was a director of the National Council on Aging, a member of the Los Angeles County Mental Health Association's board of governors, and chairman of the Los Angeles County mental health campaigns in 1965.

Mr. President, Charles Wick is an energetic, committed, dedicated, and able individual. He will bring these qualities to his new assignment. I wish him well.

Thank you, Mr. President.

A FATHER'S STORY

Mr. PACKWOOD. Mr. President, a little over a week ago, I watched this Senate pass the most restrictive abortion legislation ever to be agreed upon by Congress.

Despite numerous protests, a bill was passed to cut off abortion funding for all poor women unless their life is endangered.

No exception for rape. No exception for incest. No exception when a fetus is known to be severely deformed.

No exceptions.

Abortion is not an easy subject to talk about. I know of no woman who is comfortable with the thought of having an abortion.

But the fact remains, a woman chooses to have an abortion because there is a compelling reason to do so.

Mr. President, Friday's Washington Post contained an article which, I think, says it all. "A Father and Sen. Helms" is a tragic, personal, poignant story of one family's personal experience with abortion.

I offer this article to all my colleagues who think abortions should be outlawed in this country. I ask unanimous consent that this article be printed in the RECORD immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A FATHER AND SENATOR HELMS

(By Tom Braden)

I have been wondering whether to tell you a personal story that seems to me to have general implications. This is one of those sad family stories that normally you don't find fathers talking about in public, or even very much with close friends.

But I picked up the newspaper the other day to read that a Senate committee had voted to abolish payments for abortions for the poor, even when the pregnancies are the result of rape.

Now this was not a question of cutting the budget. Abortion costs for poor women who are raped do not amount to a large sum. Rather it was a question of morality. Republican Sen. Jesse Helms of North Carolina, and the Moral Majority, which follows him around, are convinced that abortion is wrong even when the woman who wants one wants it because she had been raped.

So I don't think it will be very long before Jesse and his friends are going to come after the unpoor.

In this instance, I am not very comfortable about being unpoor. I object to what the Senate committee did. But I have the human instinct to object even more strenuously when I reason that, by the same standard with which the senators dealt with the poor, they will shortly deal with me.

So let me tell you my story.

A few years ago one of my daughters attended an enormous Fourth of July celebration at the Washington Monument. It was a free show with fireworks and flags and entertainment, and, according to the newspaper account, the large crowd behaved well.

But as my daughter strolled alone off the Monument grounds and entered a side street, a car rolled up next to the sidewalk. Three men emerged from it, seized her roughly and, before she could do more than utter a half-stifled cry, put her into the back seat where two more men held her to the floor.

She was tied, gagged and taken to a house, the location of which she cannot now identify. She was kept in the house for the rest of the night during which time she was repeatedly beaten and raped.

The next morning she was blindfolded, driven back to the Monument grounds and shoved out of the car. Eventually sometime about midday, she made her way home.

During the time she was gone, there was, of course, a great deal of worry and anxiety at that home. And I must confess, anger.

Her arrival was followed by various interviews with policemen who tried to be helpful to a hysterical girl. But couldn't be. Because the hysterical girl could only estimate the time she had been in the car, describe the inside of a house and sob out some meaningless first names.

That's really the end of the story. Except, of course, that within a very short time, my daughter knew that she was pregnant.

Now I would like to ask Sen. Helms what he would do if he had been the father of the girl. I know what I did. And I can promise the senator and the Moral Majority and all the shrill voices of the Right to Life Movement, that no matter what law they may pass and how stringent the penalty, I would do it again.

OUTER CONTINENTAL SHELF

Mr. HAYAKAWA. Mr. President, the act which granted the Governors of coastal States a voice in OCS leasing decisions of the Department of the Interior was an important step in developing a balanced approach to our OCS leasing policy. However, I do not believe this law was intended to grant such Governors a tool to halt all attempts to produce oil and gas in our coastal waters. We have been subjected to numerous drilling delays in California in the name of States rights—some quite necessary, but many taken to the extreme, as in the case of the Hondo field in the Santa Barbara Channel. The need to balance State and national interest is crucial, and I would like to recommend the following article to my colleagues in an effort to reemphasize this need.

I ask unanimous consent that the article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STATES' RIGHTS AND SEA OTTERS

Fights over offshore leasing have a new twist these days—states' rights. California Governor Jerry Brown used that argument successfully last week to block a portion of the Reagan administration's first major lease sale. We're bound to hear a lot more of it from environmentalist state and local officials who are losing their allies in the federal administration.

This emphasis is something to be welcomed by those of us who take the federal system seriously. We're always glad to find a new constituency for a states' rights doctrine, which has serious merit once separated from the tar baby of race and segregation. The states are by nature more concerned than a Washington bureaucrat about the local impact of drilling and can add important details in weighing the national interest. So California's lawyers persuaded a federal district court that the Interior Department was wrong in dismissing the state's recommendations on the lease sale, recommendations that would have excluded some tracts to protect the Southern sea otter, the gray whale and the "well-being of citizens of California."

This line of attack actually revives an issue that has historically gone hand in hand with offshore oil development. The second greatest "states' rights" fight of the '40s and early '50s was the "submerged lands" controversy, over control of the newly accessible underwater oil and gas reserves. A 1953 settlement gave the states everything to a three-mile limit, and the feds took the rest of the continental margin, in the area now called the Outer Continental Shelf (OCS). As the Atlantic coast became a drilling target, some Northeast states went to the trenches against leasing, and a 1978 legislative compromise gave coastal governors the right to a say in the Interior Department's OCS decisions. It's this act that Governor Brown is invoking.

But this is the kind of states' rights debate in which the states are trying to influence national policy, not vice versa, so the rest of the country has a right to ask just how well California speaks for the national interest. What most of us want from the lease sale is more oil and gas production. This would increase the nation's wealth, reduce reliance on OPEC and so forth. Since most of us don't live on the California coast, we're admittedly not sensitive to the environmental cost. Yet the last 12 years of anti-drilling agitation on the West Coast have consistently been marked by hysterical exaggeration and disingenuous bureaucratic obstruction.

The anti-leasing movement (and some say the current ecology movement) traces to the famous 1969 blowout in the Santa Barbara Channel, just south of the current lease sale. Ruptures in the channel floor released a total of 33,000 barrels of crude oil, which messed up the beaches and fatally gooed some 3,600 seabirds. Groups across the nation charged the oil companies were permanently destroying the environment. Yet the Santa Barbara Channel started recovering within a year. Today there is no permanent after effect.

What really upsets Santa Barbarans, one learns on visiting this resort town for the very rich, is the view. The channel is a beautiful sight, cradled by coastal mountains with the channel islands looming in the distant haze, until one comes to the line of squat oil platforms. At night they light up like an offshore Vegas strip.

The reaction to the spill forced President Nixon's Interior Secretary to impose a moratorium on production and leasing in the Santa Barbara Channel, but we suspect it was the aesthetic anger which made it so hard to lift the moratorium a full decade later, long after the safety problem was solved. (Ironically, the platform which caused the blowout was allowed to keep pumping all this time, to relieve subterranean pressure.)

Furthermore, state harassment of other nearby development reached ridiculous proportions, often on specious grounds. After a nine-year series of delays recounted below, the Exxon Corporation only this spring brought its OCS Hondo Platform on line, contributing over 30,000 barrels a day to the national supply. But faced with impossible demands from the California Coastal Commission, the company could do this only by abandoning plans for facilities within state jurisdiction. It invested $140 million in developing a totally new Offshore Storage and Treating vessel, so that it could process the oil and gas and load Texas-bound tankers entirely in federal waters.

We're perfectly willing to concede the states a role in federal leasing. We would even welcome compromises that protect legitimate local interests without frustrating access to oil. But the state litigants also ought to show they can think in terms of the broader national interest, and California's recent record is not particularly reassuring.

THE HONDO CHRONICLES

The Hondo field in California's northern Santa Barbara Channel holds an estimated 200 million barrels of oil and is expected to sustain production of 40,000 barrels a day. It was discovered in 1969. A super-sophisticated platform has been in place since 1976. Yet after a $340 million investment, Exxon pumped its first barrel of oil from Hondo only this spring, nine years behind schedule. A brief resume of the delays, based on Exxon sources gives some idea how much the U.S. and California governments have contributed to the domestic energy crisis.

July 13, 1969—Exxon discovers Hondo field.

January 1, 1970—President Nixon signs National Environmental Policy Act, passed in part because of Santa Barbara oil spill. It requires Environmental Impact Statements.

May 3, 1974—Final EIS for Hondo issued by U.S. Geological Survey. It includes onshore and offshore alternatives for treating oil.

May 27, 1975—In referendum, Santa Barbara County voters approve onshore facility to treat Hondo oil.

March 3, 1976—California State Coastal Zone Commission rejects onshore plan, even though beach in question is already site of existing pipeline and marine terminal. It calls for third alternative, a 140-mile pipeline to Los Angeles. Exxon drops onshore plan.

January, 1977—State of California and Santa Barbara County ask Interior Secretary Andrus to revoke approval of offshore plan. After 8-month delay, Secretary Andrus refuses.

September 23, 1977—Environmental Protection Agency tries to bring Offshore Storage and Treatment vessel (OS&T) under Clean Air Act, its first attempt to assert jurisdiction over the OCS.

November 18, 1977—EPA asks Santa Barbara Air Pollution Control District to set requirements for OS&T as if located within Santa Barbara jurisdiction.

February-March, 1978—EPA issues water discharge permit for OS&T. California Air Resources Board challenges it.

May, 1978—Exxon sues EPA over air permits.

June 28, 1978—California sues to require state air permits.

February 21, 1979—U.S. Geologic Survey approves additional exploration wells but demands 90-day completion. Exxon calls time schedule impossible.

July 26 1979—Secretary of Interior Cecil Andrus expresses "extreme displeasure at the pace of exploration to be pursued by Exxon Company, U.S.A. in looking for oil and gas in the Santa Ynez unit," adjacent to Hondo.

August 21, 1979—Federal court rules that Interior, not the EPA, has jurisdiction over the OCS, upholding Exxon.

PROJECTING OUTCOMES TOO SOON

Mr. HAYAKAWA. Mr. President, over 7 months have passed since the national election, when early media projections declared the race for the Presidency over as western voters stood in line to cast their ballots. The biggest loser on that election day was not any single cause or candidate, but the integrity of the American political system.

Fortunately, the cries of outrage have not died down. Concerned Americans from every region of the Nation demand that a solution be found so that every qualified citizen will have the right to cast a meaningful ballot on election day.

A recent article in the Washington Post by Ruth J. Hinerfeld, the president of the League of Women Voters, addresses this concern. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 7, 1981]

PROJECTING OUTCOMES TOO SOON

(By Ruth J. Hinerfeld)

On Nov. 5, 1980, the day after 53.9 percent of all voting-age Americans cast their vote in the presidential election, a steady stream of mail and calls began to flow into the national office of the League of Women Voters. Most of the writers and callers complained that the media's projections of winners more than two and a half hours before polls closed on the West Coast distorted the political process and ran the risk of directly affecting—rather than merely reporting—the outcome.

Early projections on election night are not a new development. The Senate has twice passed legislation to make projections more difficult. The first measure, passed in 1972, provided for an Election Day of 12 hours with all polls closing simultaneously at 11 p.m. EST. The second measure, passed in 1974, prohibited disclosure of presidential election results prior to midnight EST. Both of these measures failed to pass the House.

Neither of these two proposals—or proposals for Sunday elections, with or without 24-hour voting—would fully eliminate the possibility of early projections. One of the techniques used to project elections—exit polling—has become so sophisticated that it is possible for projections of national election results to be based on early morning interviews of a few thousand exiting voters in sample precincts. Using exit polls, projections can be made, regardless of when the polls close, which day the election is held or whether or not election officials are required to withhold the results of an election.

Recently, the League, the Committee for the Study of the American Electorate and 30 other national organizations wrote to all major networks, wire services and broadcast groups asking them to refrain voluntarily from projecting winners in any given election before all polls are closed in the appropriate area. By this we mean that we do not object to the projecting of results in statewide races when polls are closed in that state; this practice can do no harm. We do object however, to the practice of projecting statewide results if polls are still open in that state. Further, on presidential election night, the media should report the official results in the presidential race in each state and should not project presidential results when polls are still open.

Our request for voluntary restraint is based on our abiding belief in the freedom of the press and its role as a cornerstone of American democracy. We do not believe that any news agency should refrain from full and fair reporting of actual and final counts when they become available. But projections, no matter how they are derived, are not the same as actual results and can have the effect of influencing those results.

A commonly used argument against voluntary restraint is that we cannot isolate projections of victory from other Election Day 1980 happenings and prove conclusively that projections had an adverse impact on voter turnout. President Carter's concession speech at 6:45 p.m. PST certainly didn't encourage people to vote in the presidential race. But it is possible that Mr. Carter would not have conceded the election when he did had the networks not begun to project the Reagan victory so early.

The burden of proof should be on those who say early projections have no effect on election outcome or voter turnout. Indeed, it is difficult to argue persuasively that projections didn't have an impact on several 1980 contests that were decided by margins ranging from 25 to 800 votes.

To date, the response to our request for voluntary restraint has not been favorable. If the media do not agree to refrain voluntarily from projecting results, it may become necessary for Congress to weigh the value of votes lost due to disillusionment with the system against the costs of legislative solutions that attempt to address the problem.

Our call for voluntary restraint in no way diminishes our zeal for increased registration and facilitation of the elections process. We not only have to get people to register, we also must have them believe their vote counts.

NOMINATION OF CHESTER CROCKER

Mr. HAYAKAWA. Mr. President, I would like to express my gratitude to my colleagues for overwhelmingly approving the nomination of Chester Crocker to be Assistant Secretary of State for African Affairs. Unfortunately I missed the vote earlier this afternoon because I was at the White House luncheon for President Lopez Portillo of Mexico.

Dr. Crocker first came to my attention when Ian Smith was attempting to reach an internal settlement in Rhodesia and I was impressed with his views on the subject. Since that time we have had opportunities to discuss many of the issues facing Africa.

In his article, "African Policy in the 1980s," which appeared in the Washington Quarterly, Dr. Crocker defines the great challenges and opportunities for this new administration. He does not oversimplify the problems yet he proposes concrete solutions.

Mr. President, I am convinced that President Reagan has selected the right individual for this job, and I am looking forward to hearing Dr. Crocker's report on the prospects for a Namibian settlement when he and Judge Clark return from southern Africa.

Thank you, Mr. President.

TENTH SPECIAL MESSAGE OF THE PRESIDENT—MESSAGE FROM THE PRESIDENT RECEIVED DURING THE RECESS—PM 59

Under the authority of section 1014(a) of the Congressional Budget Act of 1974, the Secretary of the Senate on June 8, 1981, during the recess of the Senate, received the following message from the President of the United States, together with accompanying documents; which, pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Environment and Public Works, and the Committee on Labor and Human Resources:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four proposals to rescind a total of $114.1 million in budget authority previously provided by the Congress. The rescission proposals affect programs in the Environmental Protection Agency and the National Endowment for the Arts and Humanities. These proposals are a part of my continuing effort to help reduce government spending.

The details of the rescission proposals are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *June 8, 1981.*

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

ENROLLED BILLS SIGNED

Under the authority of the order of the Senate of June 4, 1981, a message from the House of Representatives was received on June 5, 1981, stating that the Speaker has signed the following enrolled bills:

H.R. 2156. An act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended; and

H.R. 3512. An act making supplemental and further continuing appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

Under the authority of the order of the Senate of June 4, 1981, the enrolled bills were signed by the President pro tempore (Mr. THURMOND), on June 5, 1981, during the recess of the Senate.

MESSAGE FROM THE HOUSE

At 2:29 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 3467. An act to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes; and

H.R. 3567. An act to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

HOUSE BILLS PLACED ON THE CALENDAR

The following bills were read twice by unanimous consent, and ordered placed on the calendar:

H.R. 3467. An act to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes.

H.R. 3567. An act to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1338. A communication from the Acting Secretary of Agriculture, transmitting, pursuant to the request of the Senate, a study of certain school nutrition programs administered by the Department; to the Committee on Agriculture, Nutrition, and Forestry.

EC–1339. A communication from the Clerk of the U.S. Court of Claims, transmitting, pursuant to law, a copy of the court's judgment order for the plaintiffs in the case of the three affiliated tribes of the Fort Berthold Reservation v. The United States; to the Committee on Appropriations.

EC–1340. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a study relative to exclusion of pension cost-of-living increases from rent charges in HUD-assisted rental housing programs; to the Committee on Banking, Housing, and Urban Affairs.

EC–1341. A communication from the Secretary of the Treasury, transmitting, pursuant to law, a report entitled "The Economic Viability of Depository Institutions"; to the Committee on Banking, Housing, and Urban Affairs.

EC–1342. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Changes in Natural Gas Prices and Supplies Since Passage of the Natural Gas Policy Act of 1978"; to the Committee on Energy and Natural Resources.

EC–1343. A communication from the Secretary of Agriculture and the Secretary of the Interior, transmitting, pursuant to law, a report on certain activities under the Youth Conservation Corps Act; to the Committee on Energy and Natural Resources.

EC–1344. A communication from the Executive Director of the Advisory Commission on Intergovernmental Relations, transmitting, pursuant to law, a copy of a completed study of certain federal, state, and local government role relationships; to the Committee on Finance.

EC–1345. A communication from the Secretary of State, transmitting, pursuant to law, a report on the professional development programs under the personnel system of the Foreign Service Act; to the Committee on Foreign Relations.

EC–1346. A communication from the Assistant Legal Adviser for Treaty Affairs, transmitting, pursuant to law, copies of international agreements, other than treaties, entered into by the United States within the

previous sixty days; to the Committee on Foreign Relations.

EC–1347. A communication from the Director of the United States Office of Personnel Management, transmitting a copy of proposed legislation to remove statutory pay grade levels for certain Federal employees; to the Committee on Governmental Affairs.

EC–1348. A communication from the Administrator of the General Services Administration, transmitting, pursuant to law, a report on certain Federal agency travel practices and expenses; to the Committee on Governmental Affairs.

EC–1349. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the provision of emergency assistance of $5 million to El Salvador and the provision of emergency military assistance of $20 million to El Salvador; to the Committee on Foreign Relations.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–169. A concurrent resolution adopted by the Legislature of the State of Texas; to the Committee on Armed Services:

"SENATE CONCURRENT RESOLUTION

"Whereas, United States Air Force plans call for a sheltered road-mobile basing system for the M–X missile system, and currently under consideration are plans for either full basing in Nevada/Utah or a split basing in Nevada/Utah and Texas/New Mexico; and

"Whereas, A decision to adopt the split-basing mode would require the relocation of approximately 500 families and would require United States Air Force acquisition of many acres of hghly productive land in Texas which would be unlikely to be reclaimed for agricultural purposes; and

"Whereas, An amendment to the Department of Defense Supplemental Appropriations Act, Section 2.02(b), June 27, 1979, states that it is the sense of Congress that the basing mode for the M–X missile should be restricted to location on the least productive land available that is suitable for such purpose; and

"Whereas, The January 19, 1981, Department of Defense M–X Split Basing Report to Congress states that there exists a relative balance in the environmental impact between the two alternatives, while also stating that the split-basing mode would require the additional expenditure of $3.475 billion over the cost of the full-basing mode; now, therefore, be it

"Resolved by the Senate of the State of Texas, the House of Representatives concurring, That the 67th Legislature respectfully request that the Congress do not adopt the split-basing mode for the deployment of the M–X missile system; and, be it further

"Resolved, That the Secretary of State forward copies of this resolution to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives, Senator Lloyd Bentsen, Senator John Tower, and all members of the Texas delegation of the United States House of Representatives with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America."

POM—170. A concurrent resolution adopted by the Legislature of the State of New Hampshire; to the Committee on Commerce, Science, and Transportation:

"A RESOLUTION

Whereas, the United States Federal Energy Regulatory Commission now regulates the cost of purchase power in intrastate sales of electricity among New Hampshire generating and distributing utilities and holds its hearings in Washington, D.C.; and

Whereas, the New Hampshire public utilities commission now regulates all other components of the rates charged by New Hampshire generating utilities to New Hampshire distributing utilities in intrastate sales of electricity; and

Whereas, the public utilities commission is the regulatory agency which should regulate all components of electric rates because the public utilities commission is a geographically more convenient forum for all potential participants at a hearing regarding local utility rates, including New Hampshire consumers who may wish to present their views at such a hearing; and

"Whereas, the complexity of variable local conditions, including the financial condition of in-state utilities and local environmental and economic conditions make local regulation more appropriate; now, therefore, be it

"Resolved by the House of Representatives, the Senate Concurring: That the Congress of the United States is hereby urged to pass legislation that permits state, rather than federal, regulatory agencies to determine the utility rates in intrastate sales when the generating, transmitting and distributing utilities are totally located in the state, and

"That copies of this resolution be forwarded to the President of the United States, the President of the United States Senate, the Speaker of the United States House of Representatives and the Administrator of General Services of the United States."

POM–171. A resolution adopted by the Oregon Guides and Packers, Incorporated, opposing the use of the competitive bid and prospectus method of issuing outfitter permits in any form for land or river use; to the Committee on Energy and Natural Resources.

POM–172. A resolution adopted by the City Council of Grover City, California, in support of H.R. 1765 to amend the Powerplant and Industrial Fuel Use Act of 1978; to the Committee on Energy and Natural Resources.

POM–173. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Foreign Relations:

"HOUSE JOINT RESOLUTION NO. 1024

"Whereas, Approximately six hundred American prisoners of war returned home from the Vietnam War in 1973; and

"Whereas, There are two thousand five hundred American servicemen still unaccounted for; and

"Whereas, Reports have been received from a number of other countries and throughout the world which show evidence that many of the missing American servicemen are alive and are being held prisoner; and

"Whereas, Following the end of the French Indo-Chinese War, French prisoners were held for many years by the North Vietnamese following the end of hostilities; and

"Whereas, Because of the presence of several military establishments in Colorado, including the United States Air Force Academy, Fort Carson, Lowry Air Force Base, Peterson Air Force Base, and the North American Air Defense Command (NORAD), many of these missing servicemen may be residents of or otherwise have strong ties to the State of Colorado; now, therefore, be it

"Resolved by the House of Representatives of the Fifty-third General Assembly of the State of Colorado, the Senate concurring herein:

"That these men not be forgotten and that the Congress of the United States is hereby respectfully petitioned to initiate immediate action to identify and seek release of these prisoners by the use of both private and public agencies, be it through national or international auspices.

"Be it further resolved, That copies of this Resolution be transmitted to the presiding officers of each state legislature in the United States, to each member of Congress from the State of Colorado, to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to the President of the United States."

POM–174. A joint resolution adopted by the Legislature of the State of Colorado; to the Committee on Environment and Public Works:

"HOUSE JOINT RESOLUTION NO. 1013

"Whereas, the Governor and the Fifty-third General Assembly of the State of Colorado recognize that this state has an abundance of energy and mineral resources but not enough water to support their development; and

"Whereas, the United States government, prior to the time Colorado became a state, provided by acts of Congress for the disposition of waters in the area which is now Colorado according to the local customs, laws, and decisions of the courts; and

"Whereas, by the local customs, laws, and decisions of the courts, the waters of the natural streams of Colorado were disposed of pursuant to the doctrine of appropriation without any reservation or exception, and this method of disposition was incorporated in the Constitution of the State of Colorado and approved by the act enabling Colorado to become a State of the Union; and

"Whereas, the federal government has laid claim to thousands of acre feet of water and has claimed thousands more acre feet which are still to be quantified, all of which are waters of the State of Colorado; and

"Whereas, the stability of the economy, the property values, and the continued peace, prosperity, and development of much of the United States is dependent on a continued recognition of the supremacy of state water laws and the property rights which have been derived and settled thereunder; and

"Whereas, the acts of some departments of the executive branch of the federal government claiming special rights to water on behalf of the federal government outside the established laws of the State of Colorado have created doubt about the sanctity of the appropriation doctrine as it has existed continuously even prior to Colorado's statehood and have thus jeopardized property and human rights protected by such appropriation doctrine; now, therefore, be it

"Resolved by the House of Representatives of the Fifty-third General Assembly of the State of Colorado, the Senate concurring herein, That this Fifty-third General Assembly urge the Congress of the United States to enact legislation so clear and unambiguous as to be incapable of evasion by either executive order or judicial interpretation which would require every agency, permittee, licensee, and employee of the federal government, as a condition precedent to the taking or use of any water, to acquire a right to the use thereof in conformity with the substantive law of the State of Colorado or of the state involved and with its procedures relating to the control, appropriation, use, or distribution of such water and to define water affected by such legislation to include all water originating on federally owned or controlled lands which contribute to flowing or moving surface or ground waters.

"Be It Further Resolved, That copies of this Resolution be sent to the President of the United States, the Secretary of the De-

partment of Agriculture, the Secretary of the Department of Defense, the Secretary of the Department of the Interior, the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States and to each member of the congressional delegation from the State of Colorado.

POM-175. A resolution adopted by the Upper Northeast Coordinating Council of Washington, D.C.; supporting the enhancement and not the circumvention of the Home Rule Charter; to the Committee on Governmental Affairs.

POM-176. A petition from a citizen of New York, New York, requesting full debate by the Senate of the United States before any funds for a nuclear arms race are authorized, appropriated, or expended from the U.S. Treasury; ordered to lie on the table.

POM-177. A petition from a citizen of Balstrop, La., urging support for efforts to deregulate health care and to vote for repeal of PSRO and UR programs; to the Committee on Finance.

POM-178. A petition from a citizen of Balstrop, La., congratulating the House Subcommittee on Health of the Ways and Means Committee for their recommendation to repeal PSRO by the end of fiscal year 1983; ordered to lie on the table.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works, with amendments:

S. 63. A bill to amend the Clean Air Act to provide compliance date extensions for steelmaking facilities on a case-by-case basis to facilitate modernization (Rept. No. 97-133).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Special Report entitled "First Monetary Policy Report for 1981" (Rept. No. 97-134).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary:

Robert A. McConnell, of Arizona, to be an Assistant Attorney General.

David L. Russell, of Oklahoma, to be U.S. Attorney General for the Western District of Oklahoma, for the term of 4 years.

Francis Anthony Keating II, of Oklahoma, to be U.S. District Attorney for the Northern District of Oklahoma for the term of 4 years.

By Mr. PERCY, from the Committee on Foreign Relations:

Carleton S. Coon, Jr., of New Hampshire, a Foreign Service Officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States to the Kingdom of Nepal.

CARLETON S. COON, JR.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Carleton S. Coon, Jr.

Post: Ambassador to Nepal.

Contributions, amount, date, donee.

1. Self, none.

2. Spouse, Jane A. Coon, none.

3. Children and spouses names: William, Howard, Katharine, Elizabeth, Ellen, Richard, none.

4. Parents names, Carleton S. Coon, Lisa D. Coon, Mary G. Salmeir, none.

5. Grandparents names, none.

6. Brothers and spouses names, Charles A. Coon, none.

7. Sisters and spouses names, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

CARLETON S. COON.

Ronald Dewayne Palmer, of Maryland, a Foreign Service officer of Class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States to Malaysia.

RONALD D. PALMER

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Ronald D. Palmer.

Post: Malaysia.

Contributions, amount, date, donee:

1. Self, Ronald D. Palmer, none.

2. Spouse, Euna S. Palmer, none.

3. Children and spouses names, Derek Palmer, none; Alyson Palmer, none.

4. Parents names, Ethel Roberts Palmer Sims, none.

5. Grandparents names, deceased.

6. Brothers and spouses names, none.

7. Sisters and spouses names, none.

I have listed above the names of each member of my immediate family including their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.

Craig A. Nalen, of Florida, to be President of the Overseas Private Investment Corporation.

(The above nominations, reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. PERCY. Mr. President, from the Committee on Foreign Relations, I also report favorably a Foreign Service nomination list which appeared in the RECORD and was received on May 20, 1981, and ask unanimous consent, to save the expense of reprinting them on the Executive Calendar, that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

Richard E. Lyng, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation.

Frank W. Naylor, Jr., of California, to be a Member of the Board of Directors of the Commodity Credit Corporation.

Mary Claiborne Jarratt, of Virginia, to be a Member of the Board of Directors of the Commodity Credit Corporation.

(The above nominations, reported from the Committee on Agriculture, Nutrition, and Forestry with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

John V. Byrne, of Oregon, to be Administrator of the National Oceanic and Atmospheric Administration.

Bernard J. Wunder, Jr., of Virginia, to be Assistant Secretary of Commerce for Communications and Information.

(The above nominations, reported from the Committee on Commerce, Science, and Transportation with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

ORDER FOR FURTHER REFERRAL OF NOMINATION OF K. WILLIAM O'CONNOR

Mr. BAKER. Mr. President, I ask unanimous consent that if and when the Committee on Labor and Human Resources reports the nomination of K. William O'Connor to be Inspector General of the Community Services Administration, it then be referred to the Committee on Governmental Affairs for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR BILLS (S. 1337) TO BE FURTHER HELD AT DESK

Mr. BAKER. Mr. President, I ask unanimous consent that S. 1337, a bill to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska, presently being held at the desk, be held at the desk until the close of business tomorrow, pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. MATHIAS (by request):

S. 1346. A bill to amend the Coastal Zone Management Act of 1972: to the Committee on Governmental Affairs.

By Mr. HEINZ (for himself, Mr. DOLE, Mr. LONG, Mr. DURENBERGER, Mr. BENTSEN, Mr. BAUCUS, Mr. SCHMITT, Mr. LUGAR, and Mr. HATFIELD):

S. 1347. A bill to amend the Internal Revenue Code of 1954 to extend for 1 year the credit against tax for employment of members of targeted groups; to the Committee on Finance.

By Mr. SASSER (for himself, Mr. BAKER, Mr. BUMPERS, Mr. PRYOR, Mr. PELL, and Mr. PACKWOOD):

S. 1348. A bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds; to the Committee on Finance.

By Mr. MATHIAS:

S.J. Res. 87. Joint resolution to authorize and request the President to designate September 13, 1981, as "Commodore John Barry Day"; to the Committee on the Judiciary.

By Mr. BOREN (for himself, Mr. NICKLES, Mr. ABDNOR, Mr. ANDREWS, Mr. BAUCUS, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CANNON, Mr. CHILES, Mr. CRANSTON, Mr. DECONCINI, Mr. DENTON, Mr. DIXON, Mr. DODD, Mr. DURENBERGER, Mr. EAGLETON, Mr. FORD, Mr. GARN, Mr. HEFLIN, Mr. HEINZ, Mr. INOUYE, Mr. JOHNSTON, Mr. KENNEDY, Mr. LAXALT, Mr. LEVIN, Mr. LONG, Mr. LUGAR, Mr. MATSUNAGA, Mr. LEAHY, Mr. PRYOR, Mr. RIEGLE, Mr. SARBANES, Mr. STENNIS, Mr. THURMOND, and Mr. WILLIAMS):

S.J. Res. 88. Joint resolution designating the week commencing June 14, 1981, as "National Softball Week"; considered and passed.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. MATHIAS (by request):

S. 1346. A bill to amend the Coastal Zone Management Act of 1972; to the Committee on Governmental Affairs.

ADDITION OF THE DISTRICT OF COLUMBIA AS A COASTAL STATE TO THE COASTAL ZONE MANAGEMENT ACT

● Mr. MATHIAS. Mr. President, at the request of the District of Columbia government, I am introducing legislation which would include the District among the States eligible to participate in the Coastal Zone Management Act.

The Mayor of the District, in his letter to the President of the Senate, points out the city's goal of revitalizing its waterways and waterfront properties. Participation in the CZM program by the District would aid in this effort.

I ask unanimous consent that the bill and a letter from District of Columbia Mayor Marion Barry to Vice President BUSH to be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1346

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 304 of the Coastal Zone Management Act of 1972 (Public Law 92-503; 86 Stat. 1280) is amended in the last sentence by striking out "and" and inserting after "American Samoa" the following: ", and the District of Columbia".

THE DISTRICT OF COLUMBIA,
Washington, D.C., May 13, 1981.

Hon. GEORGE BUSH,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I have the honor of submitting for the consideration of the 97th Congress a draft bill, "To amend the Coastal Zone Management Act of 1972 to include the District of Columbia within the definition of a coastal state".

The Coastal Zone Management Act of 1972 sec. 304(3) defines "coastal state" to mean a state of the United States in, or bordering on, the Atlantic, Pacific, or Arctic Ocean, the Gulf of Mexico, Long Island Sound, or one or more of the Great Lakes. For the purposes of this title, the term also includes Puerto Rico, the Virgin Islands, Guam, and American Samoa. The enclosed draft bill would amend section 304(3) to include the District of Columbia within the definition of coastal state.

Originally, it was not contemplated that coastal areas would include other than states bordering the Ocean. However, since that time the definition has been expanded to include other than salt water coastlines such as the Great Lakes. Vermont has been interpreted to be a coastal state. Additionally, Guam and American Samoa have been included in the definition of "coastal state", which indicates expanded acceptance by The Office of Coastal Zone Management that these areas have legitimate coastal concerns of their own.

The Coastal Zone Management Act established a program of Federal grants to assist states in the development and implementation of programs aimed at more rational management of the Nation's coastal resources. The inclusion of the District in the definition of coastal state would result in the District applying the policies and procedures of an approved state coastal management program.

The policies are four-fold:

Increased protection of valuable, natural coastal resources;

Better management of development in coastal areas in order to avoid or mitigate losses to life and property, and to give priority to water-dependent uses;

Enhanced access to and enjoyment of the amenities of the coastal zone; and

Better coordination of governmental activities at all levels in order to make government more responsive to the public, and more efficient and effective in its delivery of services.

I am committed to revitalizing the District's waterways and waterfront properties. The District has the potential to become a significant recreational and commercial port. Inclusion in the Coastal Zone Management Act would provide the District the needed assistance to revitalize the waterfront areas of the city.

I urge the Congress to take prompt and favorable action on the enclosed draft bill.

Sincerely,

MARION S. BARRY, JR.,
Mayor.●

By Mr. HEINZ (for himself, Mr. DOLE, Mr. LONG, Mr. DURENBERGER, Mr. BENTSEN, Mr. BAUCUS, Mr. SCHMITT, Mr. LUGAR, and Mr. HATFIELD):

S. 1347. A bill to amend the Internal Revenue Code of 1954 to extend for 1 year the credit against tax for employment of members of targeted groups; to the Committee on Finance.

REAUTHORIZATION OF TARGETED JOBS TAX CREDIT

● Mr. HEINZ. Mr. President, today I am introducing legislation, cosponsored by Senators DOLE, LONG, DURENBERGER, BENTSEN, BAUCUS, SCHMITT, LUGAR, and HATFIELD, to reauthorize the targeted jobs tax credit for 1 additional year. Without congressional action, this program which helps many disadvantaged individuals secure permanent private sector jobs will expire at the end of this calendar year.

I believe a 1-year reauthorization is warranted, based on the oversight hearing on this tax credit I chaired on April 3, as chairman of the Senate Finance Subcommitee on Economic Growth, Employment, and Revenue Sharing. I submit this legislation with the support of the National Urban League, the U.S. Chamber of Commerce, and the National Alliance of Businessmen, plus over 65 inner-city teenagers who have written my office, asking for extension of the act.

HOW THE PROGRAM WORKS

Beginning in 1978, members of seven groups with substantially higher unemployment than the national average were made eligible to benefit from a special employer tax credit program. This is how the credit works. Under the program, three economically disadvantaged groups—youths between the ages of 18 and 24, Vietnam veterans under the age of 35, and ex-convicts—along with general assistance recipients, SSI recipients, the handicapped who have been vocationally rehabilitated, and cooperative education students between the ages of 16 and 18, receive vouchers from local Federal Government offices, jointly determined by the Treasury and Labor Departments. During the interviewing process, these vouchers are presented to prospective employers to indicate that those who hire these workers will qualify for a tax credit. Since the tax credit lowers the cost of employing these individuals, it provides employers with financial incentive to hire them.

The credit equals 50 percent of the first $6,000 in wages paid in the first year of employment and 25 percent of the first $6,000 paid in the second year. However, creditable wages may not be simultaneously deducted in determining taxable income. For large corporations, therefore, the maximum credits of $3,000 and $1,500 must be reduced by 46 percent to reflect this offset provision, leaving a net reduction in labor costs of $1,620 and $810 for the first and second years of employment.

Of course, knowing the dollar amounts alone is not significant. What is significant is the percentage reduction in after-tax wage rates an employer pays to hire a targeted individual. For corporate employers, this usually turns out to be 21 percent in the first year, 10 percent in the second year, and nothing in the third.

As table 1 makes clear, most targeted jobs tax credit workers have low-skill entry-level jobs.

TABLE 1.—TARGETED JOBS TAX CREDIT PROGRAM CERTIFICATIONS ISSUED

[Regional totals as of Sept. 30, 1980]

	Distribution by wage			
	Less than $4	$4 to $4.99	$5 to $5.99	$6 and over
National	129,362	20,335	7,998	8,096

Percent of total	78.0	12.3	4.8	4.9

Note: Wages under minimum wage are not provided due to reporting problems. Instead, the total under $4 is provided.

Source: USES Office of Program Review, Department of Labor.

Mr. HEINZ. Seventy-eight percent of targeted employees earned less than $4 an hour. While the Labor Department data does not break out specifically those who earned the minimum wage of $3.35 an hour, it is reasonable to assume that a percentage not significantly lower than 78 percent did receive that wage.

This conclusion is buttressed by another table which I ask to insert at this time, documenting that 83 percent of those certified under the targeted jobs tax credit program come from only two categories of youths, those economically disadvantaged between the ages of 18 to 24 and those between 16 and 18 years of age enrolled in a cooperative education program at their high school.

WHY THE CONCEPT IS SOUND

The question naturally arises: Does it make sense to pay corporations a 21-percent and a 10-percent subsidy to hire disadvantaged and unskilled youth at the minimum wage for 2 years? The answer, I believe, is yes.

For an annual cost of $300,000,000 the TJTC offers greater employment opportunities to those workers who have the most difficulty finding a job. Since over 200,000 workers are certified now, the subsidy comes to $1.500 per worker. This is a far lower cost than alternative Federal programs, such as CETA. And unlike many other programs it generates private sector work experiences. Since four out of five jobs are in the private sector this is the type of training that can provide both secure employment and long-term career advancement.

Another reason for doing so is simply a matter of equity. Government policy is now making it difficult for youths without experience to find work. Although the minimum wage is $3.35 an hour, it costs at least 12 percent more than this, or $3.75, to employ an individual at the minimum wage, due to social security, unemployment, and workers' compensation payroll taxes. Many young people who are looking for their first job cannot convince an employer that they are worth $3.75 an hour. In these cases, the Government is crowding out their jobs by stacking new costs on top of a minimum wage hurdle that in itself can be difficult to overcome. The effect of the tax credit is to temporarily lower these barriers while the young worker acquires the skills to become productive enough on his own to justify a total wage cost of $3.75. This equity argument takes on additional meaning in view of the shocking unemployment rate of economically disadvantaged youth.

Another reason Congress should extend its life is for a financial reason: It helps lower the deficit. High unemployment among youths who are from economically disadvantaged families cost the Treasury money by driving up spending under income security programs. On the other hand, employed youths no longer draw payments from the Treasury, but contribute to it by paying taxes. This joint financial benefit continues years after the tax credit no longer applies; there is more than a little anecdotal evidence suggesting that youths who cannot find their first job eventually stop trying, and permanently enter the underground economy. Their earnings through adulthood go unreported, and untaxed as well.

A thoughtful analysis would surely show that over time the Treasury receives more than its $300 million back, in the form of lower social safety net spending and enlarged tax receipts.

The best reason, however, for extending the targeted jobs tax credit program is to provide a way for the economically disadvantaged to put their foot on the first rung of the economic ladder by providing job opportunities that otherwise would not exist. For targeted individuals, the program means the chance to establish self sufficiency, independence, and self-esteem that follows from acquiring and holding a permanent private sector job. This is the sort of calculation that defies a dollar-and-cents analysis. Rather, it asks what sort of Government and society we want. Are there times when we should try to create ways for people to escape from poverty and join the economic mainstream of the country? Unequivocally, I say there are.

NEEDED IMPROVEMENTS IN TJTC AND CONCLUSION

At the April 3 hearing, I learned of three problems that should be resolved to make this desirable program run even better.

First, the failure of the Treasury Department to issue final regulations is lowering employer response. Without fi-

nal regulations, a witness from the Labor Department told me, businessmen fear raising their chances for an IRS audit. Two years have elapsed since the credit was authorized. The Treasury, now that it is aware of this concern, has no valid reason for allowing it to continue.

Second, program performance can be improved by changing local funding formulas for local State employment offices that often administer the program. Presently, employment offices have many tasks and objectives that compete for staff time. Achieving these objectives favorably affects the amount of funds the Department of Labor provides, but securing placements under the targeted jobs tax credit program does not. This has naturally dulled the enthusiasm of local administrators. Better incentives must be created, and I am sure the Labor Department can provide them.

Third, when the credit was placed into effect in 1978, it contained one provision that has generated controversy—the issue of retroactive certifications. Right now, employers may claim the credit for employees they have hired without knowledge of their eligibility status. They may even do so for employees that have been terminated years ago, but it is clearly abusive, and the Congress should consider steps to end it. One way would be to limit the time for filing for the credit to 30 or 60 days after the first day of employment. My colleagues on the Senate Finance Committee and I have discussed these needed improvements, and we will address them when we actually get down to markup, together with the need to make eligible CETA workers who have recently lost their jobs because of Federal funding reductions in the CETA program.

As President John F. Kennedy said, "a rising tide lifts all boats." That is only true for the people who have the boats. But when it comes to marketable skills, too many people are left to sink or swim because they don't have the skills. The targeted jobs tax credit gives these people the chance to get on board.

To conclude, Mr. President, I believe the Congress should proceed with due dispatch to approve an extension of the targeted jobs tax credit program while addressing itself to ways that it can be made even better. For equitable, financial, and humanitarian reasons, this credit should continue as part of our Nation's laws.●

● Mr. DOLE. Mr. President, I am cosponsoring the legislation introduced today by Senator HEINZ which would renew the targeted jobs tax credit for 1 year. The present credit expires on December 31 of this year. Congress originally chose to sunset this program in order to review its effectiveness after a fair trial.

The Reagan administration has indicated that it opposes renewal of the present targeted jobs credit, because it has not been proven to be an effective incentive for employment. I agree with that. But I also believe that the concept merits further consideration, and time is short in this legislative session, conconfront this year. Accordingly, I have sidering the major issues Congress must agreed to cosponsor this renewal legislation to indicate my belief that the program deserves attention and ought to be reworked, if at all possible, before the expiration date.

Mr. President, Congress has experimented with the idea of tax incentives for employment for some years. Prior to 1978, we had the new jobs cerdit, which was supposed to increase employment during an economic downturn. By most accounts that particular tax credit was not a success. In 1978, we approved the targeted jobs credit, which is designed to increase hiring of certain groups that have particular employment problems: The economically disadvantaged, the handicapped, and others. Now preliminary reports indicate that this program has not been as efficient or as effective as we had hoped.

A major part of the problem is the ability of employers to take advantage of the tax credit for people they already hired—this is an issue that must be addressed if we are to continue the program. In addition, there is some question whether the groups that benefit from the credit have been well chosen, and whether the program has been properly administered. Addressing these concerns should be a precondition for any continuation of the program.

It may be that, after thorough examination, we will conclude that the targeted jobs credit is not workable. Thanks to the efforts of Senator HEINZ, we are beginning to focus on the problems. But the basic concept of providing employment in the private sector through tax incentives is a worthwhile one, and it should be given an opportunity to be reworked before it is summarily abandoned. In June reports are due to the tax-writing committees from the Labor Department and the Treasury Department concerning their experience with the targeted jobs credit. I hope that the Reagan administration will contribute to the debate over employment incentives, and I hope that we can work out an effective proposal that will help direct the hardcore unemployed to meaningful jobs in the private sector. I think we will agree that releasing private initiative is the best way to stimulate employment. Our job is to find the best way to go about it, and this program deserves another look.●

By Mr. SASSER (for himself, Mr. BAKER, Mr. BUMPERS, Mr. PRYOR, Mr. PELL, and Mr. PACKWOOD):

S. 1348. A bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds; to the Committee on Finance.

MORTGAGE SUBSIDY BONDS

● Mr. SASSER. Mr. President, I am today introducing S. 1348, a bill to amend the Internal Revenue Code of 1954 in order to promote much-needed changes in the Mortgage Subsidy Bond Tax Act of 1980.

In the 96th Congress, I offered legislation, S. 2917, that would have provided for sensible limitations on the issuance of mortgage revenue bonds but which also would have let State and local governments set the terms for issuance of these mortgage bonds. By the terms of my previous legislation, 10 percent of all existing mortgages could have been in the form of mortgage revenue bonds. This would have prevented a massive shift away from savings and loan institutions in the issuing of mortgages, but at the same time would have permitted States and localities with sound mortgage bond programs to issue such instruments.

My own State of Tennessee has been a progressive leader in the issuance of mortgage bonds. The Tennessee Housing Development Agency (THDA) since its inception has issued some $460 million in tax-exempt bonds. These bonds have helped with the construction of almost 15,000 homes throughout the State, all mortgages which have been financed through local financial institutions.

Tennessee local governments also have pressed forward with this program as well. Shelby County, Tenn., has marketed some $200 million in bonds, resulting in the construction of nearly 4,000 dwellings. And presently some 13 Tennessee counties are prepared to issue several hundred millions in mortgage bonds.

Mr. President, the reason for the popularity of the mortgage revenue bond program is obvious. It helps reduce the high interest rates which are choking the life out of the Nation's housing market.

As a recent editorial in the Nashville Banner noted—statewide housing starts in Tennessee have dropped by about 16,000 units annually since 1978, and most of this decrease has been due to high interst rates.

One way of putting more credit into a slumping housing market, Mr. President, is through a sound mortgage bond program. Before the adoption of the Mortgage Subsidy Bond Act of 1980, State and local governments nationwide issued some $13.6 billion in mortgage revenue bonds. But with the adoption of these amendments, the mortgage revenue bond market has all but dried up. Mortgage revenue bond issues are down 55 percent during the first quarter of 1981, and they threaten to go even lower unless we make suitable amendments to the Mortgage Subsidy Bond Tax Act of 1980.

Mr. President, when the Congress passed that legislation last year, it did not intend to shut down the mortgage bond program completely. S. 1348 provides for a number of technical amendments to the Mortgage Subsidy Bond Tax Act of 1980 that will not change the intent of the act. S. 1348 will remove various technical problems with the act and thereby let State and local governments begin to issue qualified mortgage bonds, without undue fear that such bonds will lose their tax-exempt status.

Mr. President, I urge the finance Committee to hold hearings on S. 1348 so that the Congress can remove current impediments to the orderly functioning of the mortgage bond market in Tennessee and elsewhere in the country.

Mr. President, I ask unanimous consent that the text of S. 1348 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1348

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REQUIREMENTS FOR MORTGAGE SUBSIDY BONDS.

(a) GOOD FAITH.—Subparagraph (B) of section 103A(c)(2) of the Internal Revenue Code of 1954 (relating to mortgage eligibility requirements) is amended to read as follows:

"(B) GOOD FAITH EFFORT TO COMPLY WITH MORTGAGE ELIGIBILITY REQUIREMENTS.—An issue which fails to meet one or more of the requirements of subsections (d), (e), and (f) and paragraphs (2) and (3) of subsection (j) shall be treated as meeting such requirements if—

"(i) the issuer in good faith attempted to meet all such requirements before the mortgages were executed, and

"(ii) any failure to meet the requirements of such subsection and paragraphs is corrected within a reasonable period after such failure is first discovered."

(b) RELIANCE ON COVENANT.—Paragraph (2) of section 103A(c) of such Code is amended by adding at the end thereof the following new subparagraph:

"(D) COVENANT AS TO COMPLIANCE.—For purposes of this subsection, unless the Secretary has published notice of an issuer's failure to comply prior to the sale of a qualified mortgage issue, a covenant by an issuer as to its good faith compliance with the requirement of subsections (d), (e), (f), (g), (h), (i), (j), (k), and (l) subsequent to the date of issuance may be relied on by the holder of any obligation which is a part of any issue which was a qualified mortgage issue as of its issue date."

(c) OWNERSHIP INTEREST.—Paragraph (1) of section 103A(e) of such Code (relating to prior residency requirements for mortgagors) is amended to read as follows:

"(1) IN GENERAL.—An issue meets the requirements of this subsection only if each mortgagor to whom financing is provided under the issue certifies as to the fact that such mortgagor either (A) had an ownership interest in a prior residence which an appropriate State or local official has certified does not meet the minimum property standards established for the areas by the State or local government with respect to sanitation, heating, major structural deficiencies or overcrowding, (B) had an ownership interest in a prior residence which can no longer continue to be occupied on a permanent basis due to natural disaster or governmental action, or (C) had a present ownership interest in a principal residence of such mortgagor at no time during the 3-year period ending on the date the mortgage is executed. For purposes of the preceding sentence, the mortgagor's interest in the residence with respect to which the financing is being provided shall not be taken into account."

(d) PURCHASE PRICE REQUIREMENTS.—Paragraphs (2) and (3) of section 103A(f) of such Code (relating to purchase price requirements for residences financed with proceeds of a qualified mortgage issue) are amended to read as follows:

"(2) AVERAGE AREA PURCHASE PRICE.—For purposes of paragraph (1), the term 'average area purchase price' means, with respect to any residence, the average purchase price of single family residences (in the statistical area in which the residence is located) which were purchased during the most recent 12-month period for which sufficient statistical information is available. The determination under the preceding sentence shall be made as of the date on which the commitment to provide the financing is made (or, if earlier, the date of the purchase of the residence). An issuer shall not be required to compute such average area purchase price more than twice during any 12-month period.

"(3) SEPARATE APPLICATION TO NEW RESIDENCES AND OLD RESIDENCES.—For purposes of this subsection, the determination of average area purchase price need not include residences which are not typically financed through a normal real estate mortgage loan (such as a residence to be located on land occupied under a lease having a term less than 15 years or a residence which is normally financed as personal property) and may be made separately with respect to—

"(A) residences which have not been previously occupied, and

"(B) residences which have been previously occupied."

(e) EFFECTIVE MORTGAGE RATE.—Subparagraph (A) of section 103A(i)(2) of such Code (relating to the effective rate of interest on mortgages made from the proceeds of a qualified mortgage issue) is amended to read as follows:

"(A) IN GENERAL.—An issue shall be treated as meeting the requirements of this paragraph only if the excess of—

"(i) the effective rate of interest on the mortgages provided under the issue, over

"(ii) the yield on the issue,

is not greater than 1½ percentage points."

(f) YIELD COMPUTATIONS.—

(1) Clause (iv) of section 103A(i)(2)(B) of such Code (relating to the effective rate of mortgage interest) is amended to read as follows:

"(iv) PREPAYMENT ASSUMPTION.—In determining the effective rate of interest, it shall be assumed that the mortgage prepayment rate will be the rate set forth in the most recent mortgage maturity experience table published by the Federal Housing Administration for the State (or, if available, the area within the State) in which the residences are located."

(2) Subparagraph (C) of section 103A(i)(2) of such Code is amended to read as follows:

"(C) YIELD ON THE ISSUE.—For purposes of this subsection, the yield on the issue shall be determined on the basis of—

"(i) the issue price (within the meaning of section 1232(b)(2)), and

"(ii) expected maturities for the bonds which are consistent with the assumption required under subparagraph (B)(iv) and the expected use of such funds to pay or redeem bonds or finance additional mortgages."

(g) RESERVE INVESTMENTS.—Paragraph (3) of section 103A(i) of such Code (relating to nonmortgage investments) is amended—

(1) by striking out subparagraph (B) and inserting in lieu thereof the following:

"(B) EXCEPTION FOR TEMPORARY PERIODS.—Subparagraph (A) shall not apply to—

"(i) proceeds of the issue invested for a temporary period until such proceeds are needed for mortgages, and

"(ii) temporary investment periods related to debt service.", and

(2) by adding at the end thereof the following new subparagraph:

"(D) LOSS NOT REQUIRED.—Nothing in this paragraph shall require the disposition of any investment in such manner or at such time as will result in a loss which is in excess of the amount which would otherwise be available at such time to be paid or credited to mortgagors as provided in paragraph (4)(A)."

(h) PROGRAM COMPLIANCE.—Subsection (i) of section 103A of such Code (relating to arbitrage requirements of qualified mortgage issues) is amended by adding at the end thereof the following new paragraph:

"(6) PROGRAM COMPLIANCE.—

"(A) ISSUES COMBINED.—Two or more qualified mortgage issues of a single issuer may be treated as a single issue for purposes of determining compliance with this subsection. In such event the yield on the included issues and on the related mortgage and nonmortgage investments shall be computed on a joint basis.

"(B) RESERVES AGAINST LOSSES.—In determining the amount of earnings or income derived from nonmortgage investments, the cost of funding and maintaining a reasonable reserve against losses on investments may be taken into account. A modified cash or accrual basis of accounting may be adopted for such purposes as to both mortgage and nonmortgage investments.

"(C) CREDITS.—An issuer may, in its discretion, allocate such credits or payments between persons eligible therefor with respect to any qualified mortgage issue at the time such amounts were received or at the time of distribution and change the basis for any such allocation from time to time."

(i) MORTGAGE ASSUMPTIONS.—Paragraph (3) of section 103(A)(j) of such Code (relating to restrictions on assumptions of mortgages financed with the proceeds of a qualified mortgage issue) is amended to read as follows:

"(3) CERTAIN REQUIREMENTS MUST BE MET WHERE MORTGAGE IS ASSUMED.—An issue meets the requirements of this subsection only if a mortgage with respect to which owner-financing has been provided under such issue may be assumed only if the requirements of subsections (d), (e), and (f), are met with respect to such assumption. The requirements of such subsections need not be met, however, in connection with the assumption of any mortgage which is insured by the Federal Housing Administration or guaranteed by the Veterans' Administration."

(j) ENERGY IMPACTED AREAS.—Paragraph (1) of section 103A(k) of such Code (relating to targeted area residences) is amended by striking out "or" at the end of subparagraph (A), by striking out the period at the end of subparagraph (B) and inserting in lieu thereof ", or", and by adding at the end thereof the following new subparagraph:

"(C) an area designated as impacted by increased production of coal, uranium, oil, gas, or other energy-related materials which meets the criteria set forth in section 601(a) of the Powerplant and Industrial Fuel Use Act of 1978 with respect to areas impacted by increased coal or uranium production."

(k) TARGETED AREAS.—Paragraph (3) of section 103A(k) of such Code is amended to read as follows:

"(3) AREA OF CHRONIC ECONOMIC DISTRESS.—For purposes of paragraph (1), the term 'area of chronic economic distress' means an area of chronic economic distress designated by the State as meeting the standards established by the State for purposes of this subsection, provided that areas of chronic economic distress may not exceed 25 percent of the geographic area within the State."

(l) STATISTICAL AREAS.—Paragraph (4) of section 103A(l) of such Code (defining statistical area) is amended by adding at the end thereof the following new subparagraph:

"(E) COMBINED AREAS.—To the extent applied consistently with respect to a qualified mortgage issue, the term 'statistical area' may mean two or more other statistical areas treated on a combined basis."

(m) REPEAL OF REGISTRATION REQUIREMENTS.—

(1) AMENDMENT OF SECTION 103A.—

(A) Paragraph (1) of section 103A(j) of such Code is hereby repealed.

(B) Subparagraph (C) of section 103A(c)(2) of such Code is amended by striking out ", and paragraph (1) of subsection (j)".

(2) AMENDMENT OF SECTION 103(b).—Subparagraph (A) of section 103(b)( ) of such Code is amended by striking out "if each obligation issued pursuant to the issue is in registered form and".

SEC. 2. EFFECTIVE DATE.

The amendments made by this Act shall take effect as if included in the amendments

made by the Mortgage Subsidy Bond Tax Act of 1980.●

● Mr. BUMPERS. Mr. President, I am pleased to join as a cosponsor of S. 1348, which will amend the Mortgage Subsidy Bond Tax Act of 1980.

Mortgage subsidy bonds, also called mortgage revenue bonds and mortgage bonds, are State and local bond issues, the interest on which is exempt from Federal taxation, and the proceeds from which are used to finance single-family home mortgages.

The issuing authority does not back the bonds in any way; payment to bondholders is provided by repayment of the mortgages, mortgage insurance, and reserve funds set up with a portion of the bond proceeds. The bonds have thus become quite popular with localities; they began issuing mortgage subsidy bonds in 1978 and their use has grown rapidly since then. Through December 1980, tax-exempt housing bonds have been issued in 49 States, Puerto Rico, and the District of Columbia. Only the State of Washington did not sell a mortgage bond issue, because the State constitution prohibits it.

The increased use of the relatively new mortgage finance instrument, particularly by local governments, was accompanied by concerns over the potential revenue losses to the U.S. Treasury, and generated the fear that mortgage subsidy bonds would become the predominant form of single-family mortgage finance, drive up the interest rate on other tax-exempt bonds, have a negative impact on mortgage lenders who do not participate in the programs, and create inequities between assisted home buyers and lower income renters who have traditionally been the beneficiaries of tax-exempt housing finance.

As a result, 13 bills were introduced in the 96th Congress that attempted to address some or all of these concerns by denying tax exemption to bond issues that did not meet the requirements of the respective bills.

On March 26, 1980, the House passed H.R. 5741, the Mortgage Subsidy Bond Tax Act of 1979. Though seven related bills were introduced in the Senate, no action was taken by the Senate on either H.R. 5741 or the Senate bills.

In an effort to force a resolution of the mortgage bond issue the House Ways and Means Committee inserted the provisions of H.R. 5741 into the reconciliation bill, H.R. 7765, as a measure to raise revenues.

The details of the mortgage bond bill were finalized during meetings of conferees from the House Ways and Means Committee and the Senate Finance Committee, inserted in title XI, subtitle A, of the omnibus reconciliation bill, cited as the Mortgage Subsidy Bond Tax Act of 1980, and signed into law on December 5, 1980.

The Mortgage Subsidy Bond Tax Act of 1980 amends section 103 of the Internal Revenue Code of 1954 to deny a tax exclusion of the interest earned on mortgage subsidy bonds issued after April 24, 1979, except qualified mortgage bonds and qualified veterans' mortgage bonds. Qualified mortgage bonds are tax-exempt if they are issued before January 1, 1984.

After that time, all new issues of mortgage revenue bonds will be taxable, except issues of qualified veterans' mortgage bonds.

To be a "qualified mortgage bond," a bond must be part of an issue issued before January 1, 1984. The bond issue must meet specific requirements in the following areas: First, financing must be limited to acquisition of principal residences; second, financing can only be provided to new homeowners; third, the purchase prices of the homes financed cannot exceed specific limits; fourth, the total amount of bonds issued cannot exceed certain limits; fifth, a specified portion of the financing must be for residences in targeted areas; sixth, certain arbitrage restrictions must be met; seventh, only new mortgages may be financed; and eighth, assumptions of subsidized mortgages must meet certain requirements.

When Congress placed these limitations on State and local mortgage subsidy bond programs last year, it virtually shut down the mortgage subsidy bond market.

Mr. President, I have no quarrel with many of the changes that were imposed. Abuses existed in the program and changes needed to be made.

Mr. President, I do not believe Congress intended to prevent States and local governments from being able to issue bonds for single-family housing. Our Nation's housing industry is in a crisis caused by unprecedented high interest rates that show no signs of abatement.

Given the critical contribution the homebuilding industry makes to the economy, it is imperative to alleviate this present situation. The consequences for the American home buyer are simply that almost no person will be able to purchase their own home.

Since 1979, when the Federal Reserve Board further tightened controls on credit, housing prices and interest rates have hit record levels. Those too young to join the housing boom of the early seventies—or who chose to wait—have suddenly found they can no longer afford the price of admission.

How much has the cost of home ownership gone up compared with other prices? From 1977 through 1979, the overall Consumer Price Index rose by a combined annual total of 31.9 percent. Costs of homeownership—home purchase price, mortgage interest costs, property insurance and taxes, maintenance and repair—in the same period rose 47.1 percent.

The housing-price spiral did slow slightly in 1980, but by that time the history of price increases had made downpayments a formidable obstacle. A standard 29-percent downpayment on a $90,000 house, for example, came to $18,000 last year.

The baby-boom generation which hit the housing market just as the economy faltered led to a decline in construction startups on new housing. This in turn drove up the cost of homes.

All of this has occurred at a time when the demand for housing on the part of the baby-boom generation is still rising. The Harvard-Massachusetts Institute of Technology Joint Center for Urban Studies predicts that this demand will not peak until 1985, when a million new households are expected to enter the homebuying market. The combination of high demand for housing and uncertainty over interest-rate trends has convinced most housing-market observers that the era of cheap housing for young families is past.

Without a successful mortgage subsidy bond program, there are virtually no alternatives in place to provide relief for the key housing problem of the 1980's—affordability for the first-time buyer.

The use of these bonds enables thousands of people to purchase their own homes, create jobs in the construction industry, and expand the local economy. The mortgage subsidy bond program is less costly to the Federal Government than any other similar type of direct Federal housing relief.

Without the mortgage bond program in Arkansas, the housing industry would have been at a standstill. The Arkansas Housing Development Agency has issued $300 million in tax-exempt bonds since April 1978. These bonds have provided mortgage loans for 7,311 residences throughout the State.

In Arkansas 25 local governments have issued $619,100,000 in bonds which have provided mortgage loans for 14,710 residences.

Without the mortgage bond program, there would not have been any housing construction in Arkansas. The high interest rate policy of the Federal Reserve combined with our constitutional usury limit virtually made housing money unavailable. The provision of the omnibus banking bill that exempts residential mortgage loans from the State usury limit has not had a positive effect on the availability of housing because of the sustained high interest rates on mortgages.

Mr. President, I requested the Arkansas Housing Development Agency to survey the mortgage lenders in Arkansas. The survey revealed that mortgage lending has sharply declined.

I also requested the latest available statistics about housing starts in Arkansas. According to a survey of 68 selected building permitting areas in the State, housing starts in 1980 were 21 percent below those in 1979. The projected figures for 1981 indicate that housing construction will be 39 percent below 1980 and 52 percent below 1979.

A sound mortgage subsidy program is essential for a strong housing industry. Since the enactment of the Mortgage Subsidy Bond Act, no bonds have been issued under the new act despite the efforts of several States to comply with the new requirements. It appears the procedures for qualification of the bonds are not workable.

S. 1348 provides for a number of technical amendments to the Mortgage Subsidy Bond Tax Act of 1980 that will not change the intent of the act.

The amendments are as follows:

TECHNICAL AMENDMENTS PROVIDED BY S. 1348

COMPLIANCE TEST

Under Section 103A(c)(s)(B) of the Code, a mortgage bond issue that qualifies for tax-exempt status must meet a compliance test requiring, among other things, that at least 95 percent of the proceeds of the issue went into mortgages satisfying all of the requirements of the Act. This test poses a substantial risk to bondholders that events occurring long after the issuance of the bonds could result in loss of tax exemption. Moreover, the events in question could even be outside the control of the issuer. For example, if too many subsidized mortgages were improperly assumed by subsequent homebuyers (an area difficult to police), the tax exemption of the bonds might be impaired years after issuance.

Sections 1(a) and 1(b) of this bill remedy this problem by allowing bondholders to rely upon the issuer's good faith covenant to allow all of the requirements, accompanied by a correction of any discovered non-complying loans within a reasonable period.

NEW HOMEOWNER REQUIREMENT

Section 103A(e)(1) requires that mortgages be made only to homebuyers who have not owned a home during the preceding three years. This absolute requirement does not take into account the needs of individuals presently in substandard housing, or who have lost their homes involuntarily.

Section 1(c) of this bill remedies this problem by including, along with new homebuyers, persons who are residing in substandard housing or who have lost homes because of natural disasters or governmental action.

PURCHASE PRICE REQUIREMENT

Section 103(f)(1) requires that the purchase price of a residence financed from a qualified mortgage bond issue may not exceed 90 percent of the "average area purchase price," which is defined as the average purchase price of single-family residences in the area during the most recent 12-month period for which information is available.

Section 1(d) of this bill retains this requirement but clarifies two points about its application. First, the issuer is not required to compute the average area purchase price more often than twice in any 12-month period. This eliminates the potentially burdensome problem of recomputing the average every time new data is published, which could be monthly or more often. Second, Section 103A(f)(3) is amended to remove mobile homes from the data base for the purchase price calculation. The inclusion of mobile homes otherwise would skew the average purchase price substantially in comparison to traditional single-family housing.

ARBITRAGE LIMITATION

Section 103A(i)(2) requires that the effective interest rate on the mortgages may not exceed the yield on the bonds by more than 1 percent, and specifies the manner in which "effective interest rate" and "yield" are to be calculated in addition, investment of reserve funds is restricted, and the issuer is required to rebate to mortgagors (or pay to the federal government) any net profit from investments derived from the bond issue.

Sections (1)(f) and (1)(g) of this bill permit the spread on interest rates between the bonds and the mortgage loans to be no more than 1.5 percent, which was the rate permitted by the Treasury regulations in effect prior to passage of the Act. In addition, these sections would clarify the manner in which "yield" and "effective interest rate" are to be calculated by defining those terms more precisely. Finally, a new Section 103A(i)(2)(D) would be added, which would assure that issuers would not be required to liquidate reserves and realize net investment losses to satisfy the abritrage restrictions.

Section 1(h) of this bill would further add a new Section 103(A)(i)(6), which would permit issuers with ongoing housing programs to comply with the arbitrage restrictions by combining two or more qualified bond issues. This would enable issuers to respond more flexibly to differing financial markets at the time the respective issues were marketed. This section would also permit issuers to maintain a reasonable reserve against investment losses that may result from the periodic liquidation of reserve funds, and would give the issuer discretion to determine the manner in which rebates are to be made to mortgagors.

MORTGAGE ASSUMPTION RESTRICTIONS

Section 103A(j)(3) requires that mortgages may be assumed only if the new homeowner requirement, the principal residence requirement, and the purchase price requirements are met by the party assuming the loan. This provision conflicts with existing FHA and VA policy regarding FHA insured and VA guaranteed loans, because such restrictions on assumptions are not permitted.

Section 1(i) of this bill removes this conflict by providing that the assumptions restrictions do not have to be met in the case of FHA and VA loans.

TARGETED AREAS

In the case of residences located in "targeted areas," the new homeowner test is not applicable and the maximum purchase price is 110 percent of the average area purchase price rather than 90 percent. In addition, at least 20 percent of bond proceeds must be made available to finance homes in targeted areas for at least one year, subject to limitations. "Targeted area" is defined in Section 103A(k)(1) as a qualified census tract or an area of chronic economic distress. The latter term is further defined as an area of chronic economic distress meeting State standards and approved by the Secretaries of Treasury and HUD.

Sections 1(j) and 1(k) of this bill amend these provisions by adding areas impacted by energy production to the targeted area definition, and by removing the requirement of Cabinet approval of distressed areas. To prevent abuse, no more than 25 percent of the State may be designated as a chronically distressed area.

DEFINITION OF STATISTICAL AREA

Section 103A(1)(4) defines the term "statistical area," which is used throughout the Act. Section 1(l) of this bill permits issuers to combine statistical areas when done on a consistent basis.

REGISTRATION REQUIREMENT

Section 103(j)(1) now requires that all qualified mortgage subsidy bonds must be issued in registered form on and after January 1, 1982. Section 1(m) of this bill repeals this requirement, which conflicts with the traditional marketing practices for municipal debt.

Mr. President, delaying the adoption of these amendments will prolong a critical situation for the housing industry in this country. I urge the Senate Finance Committee to hold hearings as soon as possible on this legislation and report it favorably to the Senate.

Mr. President, I ask unanimous consent that the survey conducted by Arkansas Housing Development Agency surveying mortgage lenders in Arkansas and a survey of 68 selected building permitting areas in the State be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SURVEY OF MORTGAGE LENDERS IN ARKANSAS CONDUCTED BY ARKANSAS HOUSING DEVELOPMENT AGENCY

First National Mortgage Company: One of the leading FHA/VA lenders in the state has closed 3 of its 5 branch offices. It has laid off at least 10 employees. Its production is down at least 80 percent from last year (the first 5 months of the year). It normally processes and closes 150 to 200 loans per month and they are down to 25 per month at present.

Charles F. Curry Company: Its volume has decreased by 83 percent over last year. It has laid off 2 of its 5 employees since this time last year.

Commercial National Mortgage: The number of loans are down 70.2 percent from last year. The dollar amount of loans is down 72.7 percent from last year. It is presently looking at its offices and work load for reductions wherever possible.

Worthen First Mortgage Company: There has been a 75-percent reduction in originations and closings of loans since May 1980. It has not laid anyone off, but unless rates drop dramatically, it does foresee a reduction in work force.

Lomas & Nettleton: Its volume is down 50 percent to 75 percent from the first 5 months of last year compared to the first 5 months of this year. It normally has at least $4 million of market rate loans in process. It now has a million dollars of market rate loans in process. Two of its five employees have been laid off since January 1, 1981.

Boyle Mortgage Company: It has laid off ⅓ of its employees in the Arkansas office. There has been an 80-percent decrease in mortgage loans compared to the same 5 months last year.

Block Mortgage Company: There has been a 50-percent reduction in loans closed over the same period last year (first 5 months of year). It expects a reduction in its work force in the near future.

VA: In 1980 the volume of loans closed through VA was down 50 percent from 1979 in Arkansas. The Arkansas VA office is placing present employees in other busier areas but there has been no reduction in employment in the VA office.

FHA: From January to May of 1980 FHA processed 1,133 loans. From January to May of 1981 they processed 1,060 loans. This is not a large reduction because 435 of the 1981 loans were the FHA-235 loans. Also at least 400 of the 1981 loans were bond issue loans. If it were not for the FHA-235 loans and the bond issue loans, there would have been a 95-percent reduction from the same period last year.

A SUMMARY OF 68 SELECTED BUILDING PERMITTING AREAS FOR THE PERIODS 1979 AND 1980 (TOTALS) AND THE 1ST 2 MO OF 1981

[Prepared by the Arkansas Home Builders Association, April 1981]

Permitting jurisdiction—County: City	1979	1980	January and February 1981
Arkansas: Stuttgart	93	118	2
Ashley: Crossett	16	16	4

[1] Not available.
[2] Adjusted 1981 total: 2,394.

Note: 1980 compared to 1979: —21 percent; adjusted 1981 compared to 1979: —52 percent; adjusted 1981 compared to 1980: —39 percent. This summary covered political subdivisions in 44 of the 75 counties in Arkansas, or 59 percent of all counties of the State. ●

● Mr. PRYOR. Mr. President, with the development of housing bonds as a tool for financing single-family homes came widespread abuses, which the 96th Congress quite properly corrected with the restrictions included in last year's budget reconciliation bill.

Unfortunately, those restrictions went a bit too far. Meant to tighten up eligibility requirements and limit the overall level of such issues, the restrictions have instead put a complete stop to the housing bond program across the country.

With interest rates at record levels, the homebuilding industry is languishing, and we need to act immediately to get this program producing again before the building season is behind us.

The legislation which Senator SASSER is offering today is the bare minimum necessary to get this program off dead center. It does not relax eligibility requirements or increase the revenue loss to the Treasury. It merely removes several technical requirements which have proved to be unrealistic and obstructive.

I urge my colleagues to support this bill and to take action on it at the earliest possible moment. We cannot afford to prolong the current crisis in the homebuilding industry, which is so important to the overall health of our national economy. Early passage of this legislation would be a helpful step toward the recovery of that industry.●

ADDITIONAL COSPONSORS

S. 243

At the request of Mr. CHAFEE, the Senator from Georgia (Mr. NUNN), the Senator from Michigan (Mr. RIEGLE), the Senator from Indiana (Mr. LUGAR), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Oklahoma (Mr. NICKLES), and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of S. 243, a bill to amend the Internal Revenue Code of 1954 to increase the allowable contributions to individual retirement plans and to allow employees a deduction for savings contributions to employer retirement plans or to individual retirement accounts.

S. 408

At the request of Mr. CHAFEE, the Senator from Illinois (Mr. PERCY), the Senator from Maine (Mr. MITCHELL), the Senator from Oklahoma (Mr. NICKLES), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 408, a bill to amend the Internal Revenue Code of 1954 with respect to the income tax treatment of earned income of citizens or residents of the United States earned abroad, and for other purposes.

S. 550

At the request of Mr. PACKWOOD, the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 550, a bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition.

S. 808

At the request of Mr. MATHIAS, the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 808, a bill to amend title 5, United States Code to promote public safety by encouraging the employment of highly qualified air traffic controllers by establishing a salary classification system providing compensation commensurate with responsibility, by establishing a reasonable maximum number of weekly work hours, and by establishing a special retirement plan, and for other purposes.

S. 811

At the request of Mr. DOLE, the Senator from Indiana (Mr. QUAYLE), the Senator from Utah (Mr. GARN), the Senator from Colorado (Mr. ARMSTRONG), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 811, a bill to amend the Powerplant and Industrial Fuel Use Act of 1978 to permit local distribution companies to continue natural gas service to residential customers for outdoor lighting fixtures for which natural gas was provided on the date of enactment of such act, and for other purposes.

S. 814

At the request of Mr. NUNN, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 814, a bill to improve the administration of criminal justice with respect to organized crime and the use of violence.

S. 861

At the request of Mr. PACKWOOD, the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of S. 861, a bill to amend the Social Security Act to provide for a 6-year demonstration program of comprehensive community-based noninstitutional acute and long-term care services for the elderly and disabled.

S. 862

At the request of Mr. ARMSTRONG, the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 862, a bill to amend the Potato Research and Promotion Act.

S. 888

At the request of Mr. PACKWOOD, the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 888, a bill to provide effective programs to assure equality of economic opportunities for women and men, and for other purposes.

S. 895

At the request of Mr. MATHIAS, the Senator from Ohio (Mr. GLENN), the Senator from Maryland (Mr. SARBANES), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Colorado (Mr. HART) were added as cosponsors of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other provisions for an additional 7 years, and for other purposes.

S. 905

At the request of Mr. PRESSLER, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 905, a bill to require the inspection of imported meat and meat food products, to require the grading of meat and meat food products, to require the Secretary of Agriculture to establish a labeling system for meat and meat food products, and for other purposes.

S. 922

At the request of Mr. BOREN, the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Kansas (Mr. DOLE), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Wisconsin (Mr. KASTEN), the Senator from Louisiana (Mr. LONG), the Senator from Georgia (Mr. MATTINGLY), the Senator from Oklahoma (Mr. NICKLES), the Senator from Arkansas (Mr. PRYOR), the Senator from Mississippi (Mr. STENNIS), the Senator from Idaho (Mr. SYMMS), the Senator from Virginia (Mr. WARNER), the Senator from North Caro-

lina (Mr. EAST), and the Senator from South Dakota (Mr. ABDNOR) were added as cosponsors of S. 922, a bill to amend the Farm Labor Contractor Registration Act of 1963, as amended, and for other purposes.

S. 1030

At the request of Mr. MCCLURE, the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 1030, a bill to protect firearms owners' constitutional rights, civil liberties, and rights to privacy.

S. 1120

At the request of Mr. KASTEN, the Senator from Alabama (Mr. HEFLIN) was added as a cosponsor of S. 1120, a bill to reduce the amount of funds available to an agency unless the agency has reduced the waste, fraud, and abuse to the maximum extent feasible or demonstrates that no waste, fraud, or abuse exists in the administration of programs, and for other purposes.

S. 1131

At the request of Mr. DANFORTH, the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1215

At the request of Mr. PROXMIRE, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1230

At the request of Mr. CRANSTON, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 1230, a bill to provide for the minting of commemorative coins to support the 1984 Los Angeles Olympic games.

S. 1235

At the request of Mr. D'AMATO, the Senator from South Carolina (Mr. THURMOND) and the Senator from Iowa (Mr. JEPSEN) were added as cosponsors of S. 1235, a bill to exempt certain matters relating to the Central Intelligence Agency from the disclosure requirements of title 5, United States Code.

S. 1310

At the request of Mr. CHAFEE, the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1310, a bill to amend the Internal Revenue Code of 1954 to provide certain community development, employment, and tax incentives for individuals and businesses in depressed areas.

S. 1328

At the request of Mr. MOYNIHAN, the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of S. 1328, a bill to amend the Federal Water Pollution Control Act to delete the limitation on the use of public treatment works grants for treating, storing, or conveying the flow of industrial users into treatment works.

SENATE JOINT RESOLUTION 10

At the request of Mr. HUDDLESTON, the Senator from Missouri (Mr. DANFORTH) and the Senator from New Mexico (Mr. SCHMITT) were added as cosponsors of Senate Joint Resolution 10, a joint resolution to establish a Commission on Presidential Nominations.

SENATE JOINT RESOLUTION 62

At the request of Mr. DOLE, the Senator from Pennsylvania (Mr. SPECTER), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Oregon (Mr. HATFIELD) were added as cosponsors of Senate Joint Resolution 62, a joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981, as "National Cystic Fibrosis Week."

SENATE JOINT RESOLUTION 74

At the request of Mr. MATHIAS, the Senator from South Dakota (Mr. ABDNOR), the Senator from New Jersey (Mr. BRADLEY), the Senator from Colorado (Mr. ARMSTRONG), and the Senator from Ohio (Mr. GLENN) were added as cosponsors of Senate Joint Resolution 74, a joint resolution designating the week of October 4 through October 10, 1981, as "National Diabetes Week."

SENATE RESOLUTION 134

At the request of Mr. PRESSLER, the Senator from Florida (Mr. CHILES), the Senator from Oklahoma (Mr. NICKLES), the Senator from Maryland (Mr. SARBANES), the Senator from South Carolina (Mr. THURMOND), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of Senate Resolution 134, a resolution expressing the sense of the Senate with respect to continued access of the Rural Electrification Administration to the Federal Financing Bank.

SENATE RESOLUTION 144

At the request of Mr. KENNEDY, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of Senate Resolution 144, a resolution to offer strong support for diplomatic efforts to resolve the current crisis in Lebanon, and to protect the right of Lebanese Christian and other communities to live in freedom and security.

AMENDMENT NO. 58

At the request of Mr. CRANSTON, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of amendment No. 58 intended to be proposed to S. 921, a bill to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes.

AMENDMENT NO. 59

At the request of Mr. CRANSTON, the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Maryland (Mr. SARBANES), the Senator from Vermont (Mr. LEAHY), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of amendment No. 59 intended to be proposed to S. 921, a bill to amend title 38, United States Code, to extend authority to provide hospital care and medical service.

AMENDMENT NO. 60

At the request of Mr. MOYNIHAN, the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of amendment No. 60 intended to be proposed to S. 1274, a bill to amend title II of the Clean Water Act, and for other purposes.

SENATE RESOLUTION 150—RESOLUTION OPPOSING EFFORTS BY THE UNITED NATIONS EDUCATIONAL, SCIENTIFIC, AND CULTURAL ORGANIZATION TO ATTEMPT TO REGULATE NEWS CONTENT AND FORMULATE RULES AND REGULATIONS FOR THE OPERATION OF THE WORLD PRESS

Mr. QUAYLE (for himself, Mr. HEFLIN, Mr. LUGAR, Mr. MOYNIHAN, Mr. ARMSTRONG, and Mr. HUDDLESTON) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 150

Whereas the First Amendment to the Constitution of the United States upholds the principle of freedom of the press;

Whereas Article 19 of the Universal Declaration of Human Rights states that "everyone has the right to freedom of opinion and expression; this right includes the freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media regardless of frontiers";

Whereas the signatories to the Final Act of the Conference on Security and Cooperation in Europe concluded in 1975 in Helsinki, Finland, pledged themselves to foster "freer flow and wider dissemination of information of all kinds", and to support "the improvement of the circulation of, access to, and exchange of information";

Whereas the Constitution of the United Nations Educational, Scientific, and Cultural Organization itself is committed to "promote the free flow of ideas by word and image"; and

Whereas a free press is vital to the function of free governments: Now, therefore, be it

Resolved, That (a) the Senate of the United States of America strongly opposes efforts by the United Nations Educational, Scientific, and Cultural Organization to attempt to regulate news content and to formulate rules and regulations for the operation of the world press.

(b) The Senate also opposes efforts by some countries to further control access to and dissemination of news.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the Secretary General of the United Nations and to the Director General of the United Nations Educational, Scientific, and Cultural Organization.

Mr. QUAYLE. Mr. President, today I am submitting a resolution for myself, Mr. HEFLIN, Mr. LUGAR, Mr. MOYNIHAN, Mr. ARMSTRONG, and Mr. HUDDLESTON.

Basically, this resolution opposes efforts by UNESCO to attempt to regulate news content and formulate rules and regulations for the operation of world press.

Mr. President, for the past decade the United Nations has gone from an international forum for the discussion of ideas, and the peaceful airing of differences, to a massive public relations operation for the so-called Third World nations and Soviet bloc mischiefmakers.

The most recent example of this is the attempt by the United Nations Educational, Scientific, and Cultural Organization (UNESCO) to establish a system which would "license and protect" journalists.

The words and phrases which are being used in this blatant attempt to legitimize the suppression of the news are representative of an Orwellian nightmare of paranoid proportions.

UNESCO wants a "New World Information Order," to offset the damage done by Western media as they have "dominated and victimized" the Third World.

Mr. President, I would ask what would be a new world information order? Does everybody have to check with UNESCO and those licenses to decide whether the information he wants to disseminate fits their purviews of what should be in the interest of the people?

UNESCO would "correct" this so-called imbalance by defining "appropriate criteria to govern truly objective news selection."

It is censorship at the least. It is not yet "1984," Mr. President, but it is close. In this age of tight budgets, and severe cutbacks in domestic programs, our contribution to UNESCO might easily be declared unnecessary.

In 1980, the United States donated $49 million to UNESCO. If a portion of that contributed to the establishment of a "New World Information Order," then it was not money well spent.

Of all the rights provided for in our Constitution, none has had a more profound effect than the first amendment which provides for freedom of the press.

It is highly probable, Mr. President, that without the first amendment, none of the other individual freedom amendments would ever have been adopted.

In our "enlightened age" it would appear that, if anything, UNESCO should be protecting the rights of a free press to present the facts and analyses of events wherever they occur in our shrinking world.

Neither UNESCO nor any other organ of the United Nations should be, in any way, involved in activities which would restrict the freedom of the press.

Mr. HEFLIN. Mr. President, I rise to offer my unqualified support for this sense of the Senate resolution condemning the United Nations Educational, Scientific, and Cultural organization's (UNESCO) "New World Information Order" and I am honored to be among the original cosponsors of this resolution.

The New World Information Order advocated by UNESCO, which calls for the licensing of journalists and the drafting of a "code of conduct" to govern news reporting in Third World nations falls nothing short of a shabby and totally unacceptable attempt to place the shroud of censorship on international journalism.

Further, attempt by an international organization to control the free flow of information very possibly could be part of an insidious plot by the Soviet Union to insure that their actions in the Third World do not come under international scrutiny.

Mr. President, I wholeheartedly support this resolution to condemn this UNESCO plan. Further, I endorse assistant Secretary of State for International Organization Affairs Elliot Abrams' "implied threat" that the United States—which is by far the major contributor to UNESCO—may resign from the organization if this proposal to invoke censorship of journalism is adopted.

One of the fundamental freedoms enjoyed by the American people is the freedom of the press. I believe the need for such a freedom cannot be questioned. In my opinion, Thomas Jefferson summed it up best when he told newly elected President George Washington in 1792 that—and I quote:

> No government should be without censors—and where the press is free, no one will.

While our military might has protected this Nation from attack, it has been the freedom of the press that has kept the United States a democracy and a great Nation made up of free people.

This UNESCO proposal becomes of paramount importance when you consider that many of the Third World nations involved do not share our principle of freedom of the press. These nations—as well as the Soviet Union—do not have a free press to serve as the nation's watchdog or censor.

If this UNESCO proposal goes into effect, the interests of the free world will suffer while the interests of the Soviet Union and others who are dedicated to the denial of freedoms will be greatly served.

By imposing a code of conduct or restrictions on newsreporting from the mineral- and oil-rich Third World, UNESCO will be aiding and abetting the Soviet Union in its expansionist activities. If the shroud of official government censorship is lowered over international journalism, the Soviet Union's actions will never be scrutinized by the international community.

Mr. President, this attempt to deny Western journalists access to information inside developing nations would lead to a cloak of secrecy within the Third World that would be against the best interests of the people of the United States or the free people from around the world.

SENATE RESOLUTION 151—RESOLUTION RELATING TO TAX CUT FOR SMALL AND INDEPENDENT BUSINESSES

Mr. KENNEDY (for himself, Mr. NUNN, Mr. BUMPERS, Mr. GLENN, Mr. FORD, Mr. SARBANES, Mr. RANDOLPH, Mr. DODD, Mr. DIXON, Mr. BURDICK, and Mr. HUDDLESTON) submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 151

Whereas the President and the Congress must act together to address the serious economic problems before the Nation;

Whereas small and independent businesses have contributed substantially in the past to America's economic prosperity;

Whereas such businesses are an important national resource for innovation in the economy; and

Whereas Congress is likely to enact substantial tax reductions for the business sector this year: Now, therefore, be it

Resolved, That it is the sense of the Senate that at least 15 percent of any business tax cut enacted by this Congress should be specially designed for small and independent businesses.

SMALL BUSINESS PROVISIONS IN THE BUSINESS TAX CUT

Mr. KENNEDY, Mr. President, I rise to submit along with Senators NUNN, BUMPERS, GLENN, FORD, SARBANES, RANDOLPH, DODD, BURDICK, HUDDLESTON, and DIXON a Senate resolution stating that at least 15 percent of the business tax cut this year should be specially designed for small business.

Our chief legislative priority in this session of Congress is to deal effectively with the Nation's serious economic problems. We must work to bring inflation, unemployment, and high interest rates down, and to encourage investment and productivity by the business sector. At long last, we must restore prosperity to our economy and make the United States, once again, the strongest and most productive economy in the world.

In this effort, it is essential to secure the full participation of the small and independent businesses of the Nation. In recent years small businesses have accounted for nearly half of our total output, they have produced almost half of the innovation and they have created the vast majority of new jobs.

This record demonstrates the substantial contribution small business can make in our economic recovery effort. With the proper encouragement, small business can assist in increasing our productivity, in putting Americans back to work, and in winning the fight against inflation.

Unfortunately, small business has been handicapped in its ability to wage the war for economic recovery. For the critical problems facing the economy—inflation and high interest rates—are particularly stifling to the small business sector.

In my own State of Massachusetts and across the Nation, small businesses are faced with rising costs of energy, labor and materials, and the inability to secure the necessary capital resources to meet their needs.

This year, Congress will enact substantial tax incentives for business. I believe that small business must be fairly included in any such incentives. If not, we will risk losing the considerable contribution small business can make in our economic recovery.

Over the last several years, the tax committees in Congress have devoted increasing attention to the problems of small business. And they have recognized that the tax code must be amended to account for the particular problems of the small business sector.

Last year, these efforts culminated in the Tax Reduction Act of 1980, which included a number of provisions specially designed for small business, representing a 13 percent share of the busi-

ness tax cut in 1982. These provisions enjoyed strong bipartisan support in Congress and broad support in the small business community. I believe that this year we must build on the precedent set by the Finance Committee and we must once again incorporate provisions that are specifically designed to assist small businesses.

Mr. President, we are at the critical stages of the debate on the business tax bill. Unfortunately, as of yet, there has been virtually no recognition of the importance of small business in either of the two administration tax proposals. Not one of the small business provisions included in the Finance Committee bill last year was included in either of the Administration bills.

There is still time to give small business its proper place in the enactment of tax incentives. And, I believe we must do so or we will forsake the assistance of the most vital sector of our economy in the economic recovery efforts we have undertaken.

I urge my colleagues to support this resolution, stating that at least 15 percent of any business tax cut enacted by this Congress should be specially designed for small and independent business. This will help insure that small business is given the tools it needs to put this Nation on the road to economic recovery.

● Mr. NUNN. Mr. President, I am pleased to join in introducing this resolution speaking to the need for small business to receive a fair share of this year's tax bill.

Small business, which provides over 80 percent of the new jobs in the economy, needs to have specific capital formation and retention tax provisions targeted to its needs so that it can fully participate in the economic recovery. The two-edged sword of inflation and high interest rates is having a devastating effect on small business. Soaring interest rates in particular are undermining the ability of small firms to survive and are forcing an increasing number of independent enterprises toward bankruptcy. Targeted tax cuts are necessary to provide relief from these twin evils. Such cuts are essential for these concerns to effectively compete and contribute to our Nation's economic growth.

Earlier this year, I joined in introducing S. 360, the Omnibus Small Business Capital Formation Act, a comprehensive measure which would assist small firms with their capital retention and formation efforts, and with improved business continuity. Its provisions would provide small business with an equitable share of the tax bill. The Finance Committee recognized the importance of several of these provisions and included them in the tax bill reported last year. Three of the key provisions provide for a corporate tax rate reduction, accelerated and simplified depreciation, and estate tax relief.

Reducing corporate taxes was the top recommendation of the White House Conference on Small Business and a high priority of the witnesses testifying before the Small Business Committee. It is the fairest, most direct means of permitting small business to retain the internally generated capital necessary for productive investment in new plant and equipment. Reducing corporate taxes and further graduating those taxes by broadening and increasing the number of brackets is an important step in providing small concerns with targeted tax relief.

Accelerated depreciation and faster cost recovery would do more than anything else as a general revitalizer of the business community.

Estate tax relief would compensate for the inflation which is artificially distorting the value of estates by making them appear more and more valuable while taxes in turn are taxing away a bigger and bigger piece of the estate. The estate tax law of today seriously imperils the transfer of family businesses and farms from one generation to the next and needs to be reformed to insure the integrity of family-owned farms and businesses.

Other provisions in the bill to promote productivity growth and fight inflation include an increase in the used qualified property tax credit ceiling, an increase in the accumulated earnings credit, capital gains rollover, cash accounting and an incentive stock option.

Since 1975, Congress has enacted $2 billion of small business tax cuts and the nation has reaped tremendous benefits. Since then, small business has created more than 12½ million new jobs.

I hope that the Finance Committee, when weighing what needs to be included in this year's tax bill, gives serious consideration to the provisions on the Omnibus Small Business Capital Formation Act and other provisions targeted to aid small business. I am confident that if the committee does and small business receives a fair share of this year's tax bill, it will continue to make a strong contribution to our nation's economic recovery.●

AMENDMENTS SUBMITTED FOR PRINTING

CONTRACT HOSPITAL AND MEDICAL CARE IN PUERTO RICO AND THE VIRGIN ISLANDS

AMENDMENT NO. 61

(Ordered to be printed and to lie on the table.)

Mr. CHAFEE (for himself, Mr. CRANSTON, Mr. DANFORTH, Mr. DOLE, Mr. HEINZ, Mr. ANDREWS, Mr. BIDEN, Mr. BOSCHWITZ, Mr. CHILES, Mr. DECONCINI, Mr. DODD, Mr. DURENBERGER, Mr. EXON, Mr. GOLDWATER, Mr. HART, Mr. HATFIELD, Mr. HUDDLESTON, Mr. KENNEDY, Mr. LEAHY, Mr. MATSUNAGA, Mr. MELCHER, Mr. MITCHELL, Mr. MOYNIHAN, Mr. PELL, Mr. PRYOR, Mr. RANDOLPH, Mr. RIEGLE, Mr. SARBANES, Mr. SASSER, Mr. SCHMITT, Mr. TSONGAS, and Mr. WILLIAMS) submitted an amendment intended to be proposed by them to the bill (S. 921) to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes.

VIETNAM-ERA VETERANS' READJUSTMENT COUNSELING PROGRAM

● Mr. CHAFEE. Mr. President, today, I am submitting an amendment to the proposed Veterans' Programs Extension and Improvement Act of 1981 (S. 921), which is expected to reach the floor of the Senate later this week.

The purpose of this amendment is simple. It provides for a 3-year extension—through September 30, 1984—of eligibility for the Vietnam-era veterans readjustment counseling program, also known as Operation Outreach.

This program provides readjustment counseling to Vietnam-era veterans suffering from various readjustment problems, and operates 91 Vet Centers across the Nation.

I am pleased to be joined in this effort by Senator CRANSTON, ranking minority member of the Senate Veterans' Affairs Committee, and by over 30 distinguished colleagues from both sides of the aisle. Our proposal is identical to the provision which passed in the House on June 2d by a vote of 388 to 0.

Mr. President, available data strongly supports such a 3-year extension. A major recent independent study, testimony from mental health professionals in the VA and outside, and testimony from veterans' organizations at the April 30 hearing of the Senate Veterans' Affairs Committee, all suggest that a 3-year extension would be optimal.

Perhaps most notable are the findings of the congressionally mandated study on Vietnam-era veterans, "Legacies of Vietnam: Comparative Adjustment of Veterans and Their Peers," prepared by the Center for Policy Research, Inc., for the VA pursuant to section 304(b) of the GI Bill Improvement Act of 1977 (Public Law 95-202) and submitted to the Congress on March 20, 1981. The study findings substantiate that the continuing readjustment problems of Vietnam-era veterans are more complex, more long-lasting (delayed stress may become symptomatic 10 or more years after the end of a combat tour), and more widespread than many may have previously believed. More time will thus be necessary to provide assistance in connection with the readjustment problems of veterans who served during the long and very divisive Vietnam conflict.

I believe there are a number of other compelling reasons why a 3-year extension should be provided:

Although the VA's authority to provide readjustment counseling became effective on October 1, 1979, many of the Vet Centers have been in operation for less than 1 year, and have not yet been able to provide their unique service to troubled Vietnam-era veterans due to initial start-up problems, a Government-wide personnel freeze, lack of adequate resources, and insufficient time to establish credibility with clients and working relationships with other community organizations.

Dr. Arthur Arnold, the chief of psychiatry at the Bay Pines VA Medical Center in Tampa, Fla., Dr. Steven M. Sonnenberg, chairman of the Committee on Federal Government Health Services of the American Psychiatric Association,

and John R. Smith of the Department of Psychology at Duke University, all stated that a 3-year extension of the application period would provide a more effective time frame with respect to the availability of the readjustment counseling program for Vietnam-era veterans.

The Veterans of Foreign Wars, the Disabled American Veterans, and the Vietnam Veterans of America recommended during the April 30 hearing that a 3-year extension, such as our amendment provides, would be optimal from the standpoint of giving the program the stability it needs to operate efficiently and effectively.

Dr. Jack Ewalt, the VA's Director of Mental Health and Behavioral Sciences, testified that nothing had changed his view, expressed during the committee's January 25, 1979, hearing on the original enabling legislation, that a 5-year eligibility period was needed.

Extending the application period 1 year longer than the Veterans' Affairs Committee has recommended is estimated by CBO to cost only $26.9 million in fiscal year 1984, a very modest sum in comparison to the benefits that this program provides and the strong message of caring and support that we can send to Vietnam veterans across the Nation by putting the Congress squarely behind a 3-year extension.

In my judgment, the readjustment counseling program has been well-received by both Vietnam-era veterans and the communities in which Vet Centers are located. The program is a visible and meaningful symbol of our determination to provide assistance to those Vietnam-era veterans who still need help. At a time when the military is plagued with manpower problems, and the All-Volunteer Force is facing increasing challenges in recruiting adequate numbers of qualified personnel, we must meet our obligations to the veterans of the last war.

I urge my colleagues to support this amendment when it comes to the floor.

Mr. President, I ask unanimous consent that the text of the amendment be printed in the RECORD. I also ask unanimous consent that a news article from the Stars & Stripes, and from the Newport (R.I.) Daily News be printed in the RECORD.

There being no objection, the amendment and articles were ordered to be printed in the RECORD, as follows:

On page 3, strike out lines 6 through line 8 and insert in lieu thereof the following:

(1) by striking out "or two years after the effective date of this section" and inserting in lieu thereof "or by September 30, 1984"; and

---

[From the Stars and Stripes, June 4, 1981]

HOUSE PASSES VIETNAM VETERANS LEGISLATION

The House of Representatives unanimously voted 388 to 0 Wednesday and passed a comprehensive legislative package addressing many Vietnam veterans' needs.

The legislation would authorize VA hospitals to give priority medical treatment to Vietnam veterans whose condition is determined by VA physicians to be associated with exposure to Agent Orange.

The Bill also expands the scope of the VA's Agent Orange studies to include other health care detriments that may be affecting Vietnam veterans such as herbicides known as blue, white and pink, as well as the results of the controversial experiments conducted with the antimalarial drug Dapsome.

The legislation would also provide for a three-year extension of Operation Outreach, the VA's psychological readjustment program operating out of 91 storefront centers across the country. In a May 28 letter, Dr. Donald Custis, Acting Administrator of the VA, assured concerned veterans of the President's support for the Outreach program's funding "with a proposed budget of $26 million for FY 1982 as opposed to only $12 million expended in FY 1981."

Custis further emphasized that "The President wants you to know that he is specifically committed to keeping the Outreach Centers funded and open when Congress authorizes and appropriates funds for this program." (See Guest Editorial).

Included in the legislative package is a provision for a two year delimiting date extension for VA OJT programs and secondary education training for veterans with less than a high school education. This initiative, however, will have little impact on many of the most needy and deserving combat veterans who have high school educations but were displaced from good jobs they had held such as auto workers, and steelworkers, and now have no hope for new jobs commensurate with their abilities, aspirations, and the financial needs of their families.

The legislation also establishes a $25 million program within the VA to provide direct or guaranteed business loans for veterans, allowing graduated payments starting with low monthly amounts and increasing over the years commensurate with a person's earning capacity.

An extension of the Veterans Readjustment Civil Service Hiring Authority Program which allows a veteran to be hired noncompetitively up to a GS–7 position was also included. A recent independent study for the VA confirms that as many as 500,000 Vietnam veterans are in need of the type assistance provided by the Outreach Centers.

"It has been a long battle, and it is not yet over," said Rep. Tom Daschle (D-SD). "Pending the outcome of Air Force, VA and Center for Disease Control studies, the issue of compensation must also be addressed."

The Democratically controlled House vote becomes a key test for President Reagan and the Republicans when it reaches conference with the Senate. The Senate Veterans' Affairs Committee, acting under the President's direction, has already rejected the provision providing an OJT delimiting date extension and priority treatment for Agent Orange victims in VA facilities.

President Reagan and the new VA Administrator nominee Robert Nimmo should have several weeks to study the House action and an opportuntiy to re-evaluate their positions on the Agent Orange dilemma and the employment issues affecting Vietnam veterans; a chance to clearly demonstrate the President's concern, commitment and willingness to address the substantive needs of this group of U.S. veterans.

[From the Newport Daily News, Mar. 23, 1981]

COUNSELOR HELPS VIETNAM VET LEARN TO SHED LAST VESTIGES OF WAR

(By R. E. Reimer)

When the telephone rang at 4 a.m., Wayne Smith awoke with fear. The caller was a Vietnam veteran threatening suicide.

More than 10 years after serving in Vietnam, the terrified vet was still reliving the horrors of combat. Flashbacks of the time he shot a 14-year-old Vietcong in self defense haunted him. Fortunately, through Smith's efforts, the man was admitted to a Veterans Administration hospital.

Smith receives many such calls. He's a psychological counselor for the Vet Center in Pawtucket, and it's his job to provide readjustment counseling for troubled Vietnam veterans.

After 18 years of involvement, the United States officially withdrew from Vietnam in 1975. Nationwide there are nearly 3 million people who served in the Asian conflict.

Unlike any war in U.S. history, the Vietnam war was highly unpopular, controversial and long. Unlike its previous "conventional" wars, the U.S. was faced with an enemy that used guerrilla warfare tactics. And unlike the warriors of World War I and II, fighters in Vietnam returned home defeated and few were greeted with a hero's welcome.

"We're taught while growing up not to kill," Smith said. "Normally in war killing is sanctioned by the country to legitimize death." But that sanction never came because protest against the war severely divided this nation, he said.

"Most of the Vietnam veterans volunteered to fight and believed in the war's purpose. But now they feel that the American society never supported their efforts."

While America tries to forget Vietnam, Smith said it's estimated that almost 50 percent of Vietnam vets are still experiencing "post traumatic stress disorder."

Smith said research on Vietnam veterans shows that one in four are clinically depressed, 70 percent still have nightmares of the war and 40 percent were divorced within six months of their return. Almost half of the vets are unemployed.

"It's estimated that 66,000 Vietnam vets have died since the war, mostly from single car accidents or suicide," Smith said.

"Many vets still actively relive their experiences in the war. They haven't gotten past the phenomenon of delayed stress. What's needed is for them to understand the Vietnam experience, come to terms with it and then proceed with the future."

Smith criticized the image television and the media has created of the Vietnam vet. It's typical to see a drug-crazed vet wielding a gun while the police hunt him down "before he destroys all of Los Angeles," he said.

Smith wants to change that image through his work with the Vietnam Era Veterans Readjustment Counseling program. The statewide program offers counseling for the 17,000 Vietnam veterans in Rhode Island.

On April 2, Smith will conduct a seminar at the Newport Training Institute on post traumatic stress disorder for the Vietnam veteran. The Training Institute at 174 Bellevue Ave. is the educational branch of the Newport County Community Mental Health Center.

The seminar is open to Vietnam veterans, their families and professionals. Because seating is limited, the Training Institute will accept registrations by telephone.●

RECOVERY OF CERTAIN HEALTH COSTS, PROGRAM OF ASSISTANCE TO STATE MEDICAL SCHOOLS, AND STUDY OF VETERANS EXPOSED TO AGENT ORANGE

AMENDMENT NO. 62

(Ordered to be printed and referred to the Committee on Veterans' Affairs.)

Mr. CRANSTON submitted an amendment intended to be proposed by him to the bill (S. 636) to clarify the Veterans' Administration's authority to recover certain health-care costs, to extend the period of availability of funds committed under the Veterans' Administration program of assistance to new State medical schools, to authorize expansion of the scope of an epidemiological study

regarding veterans exposed to agent orange, and for other purposes.

VETERANS' ADMINISTRATION/DEPARTMENT OF DEFENSE SHARING OF MEDICAL FACILITIES

Mr. CRANSTON. Mr. President, I am today submitting, for appropriate reference, an amendment to S. 636, a VA health-care measure pending in the Veterans' Affairs Committee. The legislation in the amendment would be cited as the "Veterans' Administration and Department of Defense Medical Sharing Act."

This measure, which is substantively identical to a measure reported by the House Committee on Veterans' Affairs on May 19, 1981, addresses two distinct but interrelated issues involving the health-care resources of the Veterans' Administration and the Department of Defense: First, the potential for greater sharing of these resources during peacetime so as to yield increased efficiency in the Federal health-care sector, while continuing to recognize and respect the separate missions of the two agencies; and, second, the appropriate role for the VA's health-care system as a back-up to the medical resources of the Department of Defense in the event of armed conflict when U.S. military casualties might overwhelm DOD's ability to provide the needed care.

Mr. President, the Committee on Veterans' Affairs has a hearing scheduled for June 17 on the issues addressed by this measure, and a bill, S. 266, that was introduced by my good friend, the Senator from Illinois (Mr. PERCY), and deals with the first of the two issues I mentioned above—the sharing of resources during peacetime—will be before the committee at that time. I also understand that another measure, dealing with the appropriate wartime relationship between VA and DOD may be introduced shortly for committee consideration at that hearing.

I am submitting this measure today because, unlike S. 266 and what I understand of the other measure that may be introduced shortly, it proposed changes to title 38 of the United States Code, the codified U.S. statutes dealing with veterans' benefits and the VA. I believe that this is the appropriate place to locate the type of changes contemplated by the various measures, and I therefore want the committee to have a full opportunity to consider this approach and the proposals in the House-reported bill at its upcoming hearing, and at the markup meeting scheduled for June 25.

Mr. President, I want to note that, in submitting this measure today, I am not taking a position on any of the many questions related to the two VA–DOD sharing issues, including the most fundamental issue of whether there is even a need for further legislation in these areas or whether, alternatively, what is needed here is greater flexibility on the part of the two agencies in their dealing with one another. I intend to consider very carefully the views of all witnesses at the June 17 hearing, as well as those of any other interested parties, on these issues.

Mr. President, I ask unanimous consent that the text of the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Add at the end of the bill the following new section.

SEC. 5. (a) This section may be cited as the "Veterans' Administration and Department of Defense Medical Sharing Act".

(b) Section 5011 of title 38, United States Code, is amended—

(1) by inserting "(a)" before "The Administrator";

(2) by striking out "or for the transfer" and all that follows through "care for veterans,";

(3) by striking out "and domiciliary beds below the number established or approved on June 22, 1944" and inserting in lieu thereof ", domiciliary, and nursing home beds below the number established or approved under section 5010 of this title"; and

(4) by adding at the end the following:

"(b)(1) It is the sense of the Congress that there are opportunities for greater sharing and coordination of the medical resources of the Veterans' Administration and the Department of Defense which, if achieved, would be beneficial to both veterans and to members of the Armed Forces on active duty and which could result in reduced costs to the Government. Accordingly, the Administrator and the Secretary of Defense shall direct that the Chief Medical Director of the Veterans' Administration and the Assistant Secretary of Defense for Health Affairs, respectively, form an interagency committee to maintain oversight of opportunities for sharing of medical resources of the Veterans' Administration and the Department of Defense and to make recommendations to the heads of their respective agencies with respect to the sharing of those medical resources.

"(2) In addition to such other duties as may be assigned to them in order to carry out this subsection, the Chief Medical Director and the Assistant Secretary of Defense for Health Affairs (hereinafter in this section referred to as the 'Assistant Secretary') shall regularly—

"(A) assess the opportunities for sharing of existing medical resources between the Veterans' Administration and the Department of Defense;

"(B) keep the other apprised of plans for any additional medical facilities planned by their respective agencies (including the location of new facilities and the acquisition of major new medical equipment) with regard to the impact of such plans on opportunities for interagency shading;

"(C) review the existing capabilities of the Veterans' Administration and of the Department of Defense with respect to direct health care (including support and administrative services) in order to identify opportunities for sharing that will not adversely affect the quality of, or the established priority of, care provided by either the Veterans' Administration or the Department of Defense; and

"(D) recommend to the Administrator and the Secretary of Defense policies and procedures designed to maximize the sharing of the medical resources of the Veterans Administration and the Department of Defense.

"(3) In carrying out the duties prescribed by this subsection, the Assistant Secretary shall consult regularly with the Surgeons General of the Army, Navy, and Air Force.

"(4) The Chief Medical Director and the Assistant Secretary may each carry out their respective functions under this subsection through any other official designated for such purpose.

"(c) Not later than one year after the date of the enactment of this subsection, and after considering the recommendations of the Chief Medical Director and the Assistant Secretary submitted under subsection (b) of this section, the Administrator of Veterans' Affairs and the Secretary of Defense shall jointly establish guidelines for the sharing of medical resources by health care facilities of the Veterans' Administration and the Department of Defense. Such guidelines shall include provisions for the following:

"(1) The director, in the case of a health care facility of the Veterans' Administration, or the medical or dental officer in charge, or the contract surgeon in charge, in the case of a health care facility under the jurisdiction of the Department of Defense may enter into cooperative sharing agreements with health care facilities of the other agency. Under any such agreement, an individual entitled to direct health care in a facility of one agency may be provided medical care at the facility of the other agency.

"(2) Each agreement entered into pursuant to paragraph (1) of this subsection between the head of a facility of the Veterans Administration and the head of a facility of the Department of Defense shall explicitly define the health care to be provided pursuant to such agreement. Services to be shared may include any medical resource, but the resources to be shared shall be negotiated and agreed upon by the heads of the facilities entering into the agreement.

"(3) Each such agreement shall ensure that the availability of direct health care to individuals who are not primary beneficiaries of the providing agency shall be on a referral basis and shall not, as determined by the directors or commanding officers participating in such arrangements, adversely affect the range of services, quality of care, or priority access for services of the primary beneficiaries of the providing agency.

"(d)(1) Whenever a beneficiary receives medical services from a providing agency other than the providing agency for which such beneficiary is a primary beneficiary, the providing agency shall be reimbursed for the cost of the services provided based on any costing methodology agreed upon by the Administrator and the Secretary of Defense that is based on the cost of the services provided.

"(2) Any reimbursement under paragraph (1) of this subsection shall be credited to the appropriation and to the facility that provided the services.

"(e) The Administrator and the Secretary of Defense shall submit an annual joint report to Congress, to be submitted at the time the President' Budget for the next fiscal year is transmitted, with regard to—

"(1) the guidelines prescribed pursuant to subsection (c) of this section;

"(2) the opportunities for interagency sharing determined under subsection (b)(2) of this section;

"(3) the interagency sharing agreements entered into by health care facilities of the Veterans' Administration and the Department of Defense;

"(4) the activities of the Veterans' Administration and the Department of Defense under such interagency sharing agreements;

"(5) other interagency activities directed toward maximizing the efficient use of Federal health resources during the preceding fiscal year;

"(6) the progress of Federal interagency medical resource sharing during the preceding fiscal year;

"(7) the interagency coordination of Federal health resources planning;

"(8) other major Federal activities to increase interagency sharing of Federal medical resources; and

"(9) such legislative recommendations as they consider appropriate to facilitate interagency sharing of health care resources.

"(f) For the purposes of this section:

"(1) The term 'direct health care' means health care provided to a beneficiary in a facility operated by the United States Government.

"(2) The term 'beneficiary' means a veteran

who is entitled under this title to health care in Veterans' Administration facilities or a member or former member of the Army, Navy, Air Force, or Marine Corps who is entitled to medical and dental care under section 1074 of title 10.

"(3) The term 'providing agency' means the Veterans' Administration or the Department of Defense.

(4) The term primary beneficiary', with respect to the Veterans' Administration, means a veteran who is entitled under this title to health care in Veterans' Administration facilities, and, with respect to the Department of Defense, means a member or former member of the Army, Navy, Air Force, or Marine Corps who is entitled to medical and dental care under section 1074 of title 10.

"(5) The term 'medical resource' means medical care resources and medical care support resources.

"(g)(1) Notwithstanding any other provision of this title, during a period of war, or a period of national emergency declared by the President or the Congress which involves the use of the Armed Forces of the United States in armed conflict, the Administrator, when authorized to do so by the President, may give a higher priority to the furnishing of hospital care, nursing home care, and medical services under chapter 17 of this title to members of the Armed Forces on active duty, as authorized by this section, than to any other group of persons eligible for such care and services with the exception of veterans with service-connected disabilities.

"(2)(A) The Administrator may contract with private facilities for the provision by such facilities of hospital care and medical service described in subparagraph (B) of this paragraph during a period described in paragraph (1) of this subsection in which the President has authorized the Veterans' Administration to furnish priority medical care and services to members of the Armed Forces on active duty.

"(B) Hospital care and medical services referred to in subparagraph (A) of this paragraph are—

"(i) hospital care needed to treat a condition for which a veteran is receiving medical services under subsection (f) or (g) of section 612 of this title, in any case in which delay in furnishing such hospital care would, in the judgment of the Administrator, be likely to result in deterioration of that condition; and

"(ii) hospital care or medical services for the treatment of a medical emergency which poses a serious threat to the life or health of a veteran eligible for such care or services under chapter 17 of this title, if Veterans' Administration facilities are not capable of furnishing the care or services required because of the furnishing of care and services to members of the Armed Forces under paragraph (1) of this subsection.

"(C) The Administrator shall prescribe regulations to govern contracting under this paragraph.

"(D) The authority of the Administrator to enter into contracts under this paragraph is subject to the availability of appropriations for that purpose.

"(3) The cost of any care or service provided by the Veterans' Administration under paragraph (1) of this subsection shall be reimbursed to the Veterans' Administration by the Department of Defense at such rates as may be agreed upon by the Administrator and the Secretary of Defense and are based on the cost of the care or service provided. Amounts received under this paragraph shall be credited to appropriations available to the Veterans' Administration facility which provided the care or service.

"(4) The Administrator and the Secretary of Defense may, without further review of such requests within the executive branch, submit requests to Congress (A) for relief from applicable personnel ceilings or other administrative restrictions, when such relief is needed in order to carry out this subsection, or (B) for appropriations to carry out this subsection.

"(5) Within 30 days after an authorization by the President under paragraph (1) of this subsection for the Veterans' Administration to provide priority hospital care and services to members of the Armed Forces on active duty (or as soon after the end of such thirty-day period as is reasonably practicable), the Administrator shall submit to the Committees on Veterans' Affairs of the Senate and House of Representatives a report of the Administrator's plan for the allocation of facilities and personnel in order to provide such care and services.

"(6) During a period of war or national emergency described in paragraph (1) of this subsection, the Secretary of the military department concerned, upon the recommendation of the Administrator, may relieve any officer or employee of the Veterans' Administration whose duties concern the furnishing of care and services under chapter 17 of this title from any obligation to perform active military service which such officer or employee would otherwise be required to perform.".

(c)(1) The heading of such section is amended to read as follows:

"§ 5011. Sharing of Veterans' Administration and Armed Forces facilities".

(2) The item relating to such section in the table of sections at the beginning of chapter 81 is amended to read as follows:

"5011. Sharing of Veterans' Administration and Armed Forces facilities.".

(d) The Administrator of Veterans' Affairs shall enter into an agreement with the Secretary of Defense not later than one hundred and eighty days after the date of the enactment of this Act under which the Administrator and the Secretary shall agree to pursue planning activities and to establish procedures and guidelines under which subsection (g) of section 5011 of title 38, United States Code, as added by subsection (b), may be carried out.

FOOD STAMP ACT OF 1981

AMENDMENT NO. 63

(Ordered to be printed.)

Mr. SYMMS proposed an amendment to the bill (S. 1007) to amend the Food Stamp Act of 1977 to restrain food stamp program spending, to increase State agency flexibility, to focus benefits toward the most needy, to extend appropriations authority, to amend the Agriculture and Consumer Protection Act of 1973, and to extend and improve the commodity distribution programs, and for other purposes.

AMENDMENT NO. 64

(Ordered to be printed.)

Mr. HELMS proposed an amendment to the bill S. 1007, supra.

NOTICES OF HEARING

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will hold a business meeting to consider various legislative and administrative items on Friday, June 12, 1981. The meeting will take place in room 301, Russell Senate Office Building at 10:30 a.m.

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Budget Committee will meet on Friday, June 12, 1981, at 11 a.m. in room 6202 of the Dirksen Senate Office Building to compile and report an omnibus reconciliation bill.

SUBCOMMITTEE ON RURAL DEVELOPMENT, OVERSIGHT AND INVESTIGATIONS

Mr. ANDREWS. Mr. President, as chairman of the Senate Agriculture Subcommittee on Rural Development, Oversight, and Investigations, I wish to announce that hearings have been scheduled to review what the energy needs of agriculture, rural America, and the food and fiber processing industry would be in times of energy shortages. Currently, the Emergency Petroleum Allocation Act which expires in September contains provisions for agricultural priorities, and these oversight hearings will aid in determining what new authorities should be enacted to insure that the energy needs of agribusiness are met.

The hearings will be held on Tuesday, June 16, and Thursday, June 18, beginning at 9:30 a.m. in room 324, Russell Building. Officials of the U.S. Department of Agriculture and the U.S. Department of Energy have been invited to testify on June 16. Representatives of farm organizations, cooperatives, and the food processing industry have also been invited to testify.

Anyone wishing further information should contact Denise Alexander of the Agriculture Committee staff at 224–0014.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Committee on Energy and Natural Resources.

On Tuesday, June 16, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, the committee will hold a hearing to consider the following nominations: Daniel N. Miller, Jr., of Wyoming, to be an Assistant Secretary of the Interior for Energy and Minerals; Richard Mulberry, of Texas, to be Inspector General, Department of the Interior; Shelby T. Brewer, of Maryland, to be an Assistant Secretary of Energy for Nuclear Energy; and J. Erich Evered, of Nevada, to be Administrator, Energy Information Administration.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. Charles Trabandt of the committee staff at 224–7141.

SUBCOMMITTEE ON PUBLIC LANDS AND RESERVED WATER

Mr. WALLOP. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Public Lands and Reserved Water.

On Wednesday, June 17, beginning at 10 a.m., the subcommittee will hold a

hearing on S. 842, the RARE II Review Act. Testimony will be received from the Honorable GARY HART, of Colorado; Max Peterson, Chief, U.S. Forest Service; John B. Crowell, Assistant Secretary for Natural Resources and Environment, Department of Agriculture; and representatives of the American Forestry Association, the Society of American Foresters, the National Audubon Society, the Sierra Club, the Wilderness Society, the National Forest Products Association, the American Recreation Coalition, the Independent Petroleum Association of America, and the National Cattleman's Association.

On Wednesday, June 24, beginning at 10 a.m., the subcommittee will hold a hearing on S. 146, S. 187, S. 188, S. 512, S. 634, S. 656, S. 763, S. 764, and S. 794, bills which include miscellaneous land conveyances, studies, boundary changes, and exchanges.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Public Lands and Reserved Water, Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

The subcommittee will hold workshops on the issue of public land acquisition and alternatives on Thursday, July 9 and Friday, July 10, beginning at 10 a.m.

All of the above-mentioned meetings will be held in room 3110 of the Dirksen Senate Office Building.

For further information regarding these meetings, you may wish to contact Mr. Tony Bevinetto of the subcommittee staff at 224–5161.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Subcommittee on Energy and Mineral Resources.

On Friday, June 12, beginning at 2 p.m. in room 6226 of the Dirksen Senate Office Building, the subcommittee will hold a hearing on S. 1343, a bill to amend the Energy Policy and Conservation Act to modify the oil acquisition program of the strategic petroleum reserve in order to decrease the cost of acquisition to the Government for oil to be stored in the reserve, and for other purposes.

On Thursday, June 25, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building, the subcommittee will hold a hearing on S. 859, to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

On Wednesday, July 8, beginning at 9:30 a.m. in room 3110 of the Dirksen Senate Office Building, the subcommittee will hold a hearing on S. 1073, to amend section 21 of the Mineral Leasing Act of 1920.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Subcommittee on Energy and Mineral Resources, Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding these hearings, you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224–4236.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, June 9, to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Thursday, June 11, to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate today at 2 p.m. to consider the Clean Air Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Tuesday, June 9, to mark up the budget reconciliation legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Wednesday, June 10, to hold hearings on Federal aid to highways legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Tuesday, June 9, to consider S. 1120, the Waste Fraud, and Reduction Act of 1981.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent for the Committee on the Judiciary to meet in executive session during the session of the Senate today to consider budget reconciliation matters with respect to S. 951. Department of Justice authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to meet during the session of the Senate on Tuesday, June 9, at 3 p.m., to consider death penalty legislation and committee nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Water Resources of the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Friday, June 12 at 2 p.m., to consider national water resources policy.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON TRANSPORTATION

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Transportation of the Committee on Environment and Public Works be authorized to meet on Wednesday, June 10 at 2 p.m., to consider highway legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CONGRATULATIONS TO MARILYN COURTOT ON APPOINTMENT AS ASSISTANT SECRETARY OF THE SENATE

● Mr. PACKWOOD. Mr. President, I rise today to congratulate Marilyn Courtot on her appointment as the Assistant Secretary of the Senate. Bill Hildenbrand is to be commended for his promotion of this recognized professional, who is widely known and respected throughout the Senate for her innovative efforts to modernize the operations of the Office of the Secretary, particularly by appropriate use of the technologies of automation and micrographics.

Marilyn comes to this position thoroughly prepared. While trained initially as a librarian, she entered the field of computer technology early in her career. She worked for a number of years at IBM as a computer programmer and later as a systems analyst. She was able to combine these backgrounds when she joined the staff of the Library of Congress in 1971. Soon she was detailed to the Senate Committee on Rules and Administration where she participated in the formation of the newly established Office of Public Records, assisted in the early development of the Senate's Micrographics Center, and designed a prototype records management system for Senate committees.

As a result of her efforts on these projects, Marilyn joined the staff of the Secretary of the Senate as Administrative Director in 1973 and in this capacity has continued her work to make the varied activities of this Office more efficient and responsive to the needs of the Senate. Her appointment as Assistant Secretary is based on this outstanding record of accomplishment.

In professional organizations Marilyn has also been quite active, earning particular recognition for her work in the field

of micrographics. A member of the National Micrographics Association since 1972, she currently serves on the board of directors and as treasurer for this association. She also has represented the Senate on several technical committees and at conferences both here and abroad and has received numerous awards.

In addition, she has helped to organize a number of conferences to promote greater appreciation and utilization of modern information technology; among such conferences have been those of the National Micrographics Association, the White House Conference on Libraries and Information Services, and the Federal Office Automation Conference. Marilyn also serves on a task force of the National Commission on Libraries and Information Sciences, as an editorial board member for the publication "Law and Computer Technology," and represents the U.S. Senate at meetings of the American National Standards Institute.

I personally am very pleased with this appointment and am confident that Marilyn Courtot's wide experience, dedicated service, and record of achievement will continue to benefit the Senate during her tenure as Assistant Secretary of the Senate.●

HIGH INTEREST RATES HURTING OUR ATTEMPT TO BALANCE THE BUDGET

● Mr. SASSER. Mr. President, rising interest rates are posing a serious problem for the American economy and our efforts to balance the Federal budget by 1984.

As the table attached to my statement indicates, we are consistently underestimating the interest rate outlays of the Federal budget.

The administration's March 1981 budget submission states that interest rate outlays in the 1981 budget will be $64.5 billion. In 1982, such outlays are estimated at $77.2 billion and they are estimated to rise to $82.5 billion by 1983.

These interest rate outlays are on the low side, Mr. President, due to the administration's unrealistic interest rate assumptions which have been rejected by the House and Senate Budget Committees. In the conference report on the first concurrent budget resolution, interest rate outlays are estimated to about $80 billion in 1981, nearly $86 billion in 1982, and about $90 billion in 1983.

And if we used interest rate projections offered by Senator HOLLINGS in the Senate Budget Committee markup on the first budget resolution, interest rate outlays could reach $100 billion by 1983. These projections were based on nonpartisan Congressional Budget Office economic assumptions.

The differences in these interest rate projections should cause us grave concern.

If interest rates do not drop as projected by the administration, interest rate outlays will be underestimated by as much as $45 billion between now and 1983.

This fact alone should draw the attention of the Congress to the need to get interest rates down as soon as possible.

The high level of interest rates prompted by the Federal Reserve Board's current monetary policies are having a major budgetary impact on our efforts to keep the budget under control. So in the months ahead let us carefully consider the impact of high interest rates, not only on the economy as a whole, but also on our efforts to bring in a balanced budget at the earliest possible date.

I submit for the RECORD a table reflecting "Comparative Interest Rate Outlay Projections for 1980–83."

COMPARATIVE INTEREST RATE OUTLAY PROJECTIONS, 1981–83

[Dollar amounts in billions]

Source of estimate	Fiscal year interest, 1981	Rate outlay estimate, 1982	1983
President Reagan's budget submission for March 1981	$64.5	$77.2	$82.5
House Budget Committee, First Concurrent Budget Resolution	79.0	81.8	83.6
Senate Budget Committee, First Concurrent Budget Resolution	79.5	89.5	93.7
Conference report on First Concurrent Budget Resolution	79.5	85.7	90.2
Senator Hollings' reestimates based on Economic Assumptions	79.1	92.1	99.1
Difference between administration estimate and the Hollings interest rate estimates based on CBO economic assumptions	[1] −14.6	[1] −14.9	[1] −16.6

[1] Underestimate. ●

LEFTIST TERRORISM IN EL SALVADOR

● Mr. JEPSEN. Mr. President during the period October 1979 to the present, the five guerrilla groups which now comprise the Farabundo Marti National Liberation Front (FMLN), whose actions are coordinated by an executive board called the United Revolutionary Directorate (DRU), have been responsible for thousands of violent deaths in El Salvador. Not only have they killed members of El Salvador's army and security forces, but they have carried out "executions" of peasants who cooperate with the government in land reform or who refuse to collaborate with the guerrillas. They have killed bus drivers, businessmen, civilian government officials, and foreign diplomats. Juan Chacon, a leader of one of the five guerrilla groups, announced in a public statement in Managua on July 19, 1930, that his group alone had inflicted over 2,000 casualties on the government side since January 1, 1980. Each week the guerrillas carry out bombings, occupations of farms, villages and buildings, kidnapings and assassinations, as well as coordinated attacks on military outposts and patrols. Since the failure of their "final offensive" in January 1981 they have sought to destroy the country's infrastructure by bombing electrical installations, bridges, and communications facilities.

The following list is a compilation of specifically attributable violent acts carried out by the left primarily against the noncombatant civilian population. It is illustrative, rather than comprehensive, but it clearly is representative of the violence that characterizes leftist subversion in El Salvador today.

1979

October 16 (one day after the coup)—Leftist members of ERP took over with machine guns the suburb of Mejicano, encouraging people to armed insurrection.

November 30—San Francisco, Morazan—Justice of the Peace assassinated.

November 30—San Esteban, Catarina—Citizen shot during occupation of village.

December 6—Entre Rios—Crop dusting airport attacked. Planes destroyed, watchman killed.

December 14—Nejapa—fifty guerrillas seize town, take hostages. Mayor assassinated.

December 14—San Salvador—Businessman assassinated.

1980

January 10—Chalatenango—guerrillas take village on or about December 26, 1979—assassinating seven.

March 26—San Salvador and other locations—40 bombs planted around country in banks and other buildings—three killed.

March 30—San Salvador—leftists disrupt funeral of Archbishop Romero by firing into crowd—27 killed.

April 8—El Carmen, Cuscatlan—seven members of four families shot for not cooperating in subversive activities.

April 18—San Salvador—left violence associated with agrarian reform: 125 peasants killed in two weeks. Other attacks: two assassinations of agrarian reform administrators, four bombings of property, and an attack on security forces guarding one farm.

April 22—San Salvador—Guatemalan Ambassador wounded in assassination attempt.

May 15—San Salvador—Responsibility claimed for 23 violent acts, including assassinations, from April 26 to May 5.

June 11—San Salvador—Nine Christian Democrats assassinated during one week.

June 20—San Salvador—Assassination of two prominent Salvadoran businessmen.

June 24—San Salvador—FARN issued a list of 215 persons which it plans to kill. List includes present and former government officials as well as private citizens.

June 25—San Francisco, Morazan—ANTEL (National Telephone Company) bombed—two killed.

June 26—San Salvador—Two-day general strike. Thirty-five killed, work slowed because of intimidation.

July 2—Llano del Espino, Usulatan—two teachers assassinated.

July 11—San Salvador—100 people occupy Costa Rican Embassy—guard killed.

August 7—Some 1,000 people have fled their homes in Usulatan Department due to guerrilla actions. The FMLN forces have killed some 15 members of the canton patrols.

August 13—A dynamite blast destroyed the office of the mayor in Antiguo Cuscatlan 6 km. southwest of San Salvador.

August 13—Some 160 men in Chalatenango Department stopped buses and kidnapped two relatives of former President Romero.

August 17—Archbishop Rivera criticizes the FPL for the murder of Eduardo Guirola, an industrialist who was kidnapped by the FPL, when his family could not pay the ransom.

August 30—ERP claims 167 operations from August 8 to 15.

September 9—60 peasants executed in San Pedro Perulapan "when they were shot by guerrillas who had held summary trials after charging the peasants with being collaborators of the government."

September 9—30 killed in cantons of Tecoluca, La Esperanza, El Rodeo, and San Francisco, in San Pedro Perulapan Department. The victims were members of the canton patrols.

September 16—ERP claims it conducted the rocket attack on the U.S. Embassy.

September 18—FDR occupies OAS office in San Salvador, holds 12 hostage.

September 20—Extremists were reported to have tried to take over the town of Jutiapa (Cabanas) leaving twelve of the invaders and three townspeople dead.

September 23—Guerrillas entered the town of Guazapa and attacked a restaurant where they killed the owner and stole 4,000 Colones; four guerrillas, one policeman, one watchman, one Treasury Police Inspector, and the restaurant owner were reported killed.

September 23—News reports indicated that workers on coffee farms near Santiago de Maria (Usulutan) have been intimidated by members of guerrilla groups who have threatened the workers with death if they continue working.

September 29—In Chalchuapa (San Miguel) a group of armed individuals sought to take over the central market to divert attention from a second group that was robbing a bank; four people died in the incident.

October 2—Armed men entered Canton Ajilico, set fire to twelve houses and killed one townsman.

October 4—A thirteen-year-old girl was killed in Canton Carolina, Jutiapa (Cabanas) during an attack by guerrillas on the houses of the Cantonal Commander and of a member of the local militia.

October 9—FPL takes credit for the kidnapping and execution of South African Ambassador Archibald Dunn.

October 10—FPL claims the right not to release Ambassador Dunn's body.

October 10—Elements who identified themselves as members of the FPL assassinated Melvin Rigoberto Orellana, secretary of the Executive Committee of the Salvadoran Christian Democratic Party (PDC).

October 14—A group dressed in olive drab and with their faces covered assaulted a bus near Canton Cuchillas, Santiago and Texacuangos (San Salvador) and killed both the driver and the fare collector.

October 14—A group of guerrillas killed a resident of Canton La Herradura (La Paz) in addition to pillaging and vandalizing the town.

October 15—A guerrilla group ambushed a bus near Sonconate setting it afire after forcing the passengers off the bus and robbing them.

October 16—Guerrillas killed three people and injured five others during a raid against the Hacienda La Canoa near Jiquilisco (Usulutan).

October 19—FARN claims responsibility for bombs that rocked the city during the previous night.

October 19—Guerrillas invaded Canton El Paraiso (San Vicente), killing one resident and damaging several houses.

October 20—The Police Chief of Ahuachapan was killed by a group that attacked his car on the road between Santa Ana and San Salvador.

October 21—FMLN claims credit for sabotage against electrical transmission lines, attacks on military posts and other terrorist activities.

October 21—In San Miguel a group reported to be guerrillas entered the house of a miller, forced him and his family outside, set fire to their house and then killed the miller.

October 21—Near Armenia (Sonsonate) three men were found dead with notices claiming they were executed for treason to the FPL (Popular Forces of Liberation).

October 22—The Mayor of San Isidro (Chalatenango) was found dead; he had been kidnapped four days earlier by a heavily armed group.

October 26—Guerrillas machine-gunned a bus in Chalatenango, causing the deaths of two people and injuring seven others.

October 28—The army has reported that fifty persons, relatives of members of the rural military patrol, have been killed in the past few hours in the rural areas of the country.

October 28—A group of about fifteen guerrillas took over Canton Sitio Viejo near Ilobasco (Cabanas) and killed sixteen residents, many of them members of the town's civilian militia.

October 30—Heavily armed men stopped a train in El Cedral, robbed the passengers, and set fire to engine, and one car.

October 31—FMLN announces that guerrilla forces will be sabotaging all public transportation vehicles circulating in San Salvador and in the rest of the country.

October 31—A group of nine road workers and watchmen were killed by guerrillas near Las Viboras on the road to Suchitoto (Cuscatlan).

November 3—The manager of the International Fair, Manual Rivas Rodriguez, was assassinated in San Salvador by a group which included two women. Rivas' wife died later from wounds suffered in the incident. The Popular Liberation Forces (FPL) claimed responsibility for the assassinations.

November 4—FMLN claims credit for the attack which killed Manuel Rivas Rodriguez, manager of the Ninth International Fair, his wife, and an unnamed manager of the Nacional Financiera Bank.

November 6—The owner of Muebles Imperio, Gerardo Castro Linares, was assassinated and two relatives injured as the three drove along a San Salvador street. The assassination of Castro as well as the destruction of his business were carried out because of his refusal to end his participation in the International Fair.

November 7—75 leftists launched the latest attack in Santa Ana in which eight persons died including one nine-year-old boy and two adults who were killed by a rocket that hit their house.

November 7—Dr. Efrain Jovel, the Legal Advisor to the Green Cross and a former Juvenile Court Judge, was assassinated in his car in San Salvador. A sign accusing Jovel of being an enemy of the working class and signed by the FPL (Popular Liberation Forces) was reported to have been found at the scene.

November 11—FPL members entered the offices of the Mayor of Sacacoyo (La Libertad) and, on not finding the Mayor, opted to kidnap his eighteen-year-old assistant.

November 14—According to Monsignor Rivera y Damas, a group of guerrillas entered the town of San Esteban Catarina (San Vicente), kidnapped a group of farmers and killed them.

November 16—One woman was killed and two children injured when a truck carrying members of the Civil Defense Committee for San Cayetano Istepeque (San Vicente) was attacked.

November 16—Colonel Carlos Choto, his wife and two children were burned to death inside their house in San Salvador suburb after a group of about twenty guerrillas, among them several women, attacked their house with weapons and fire and incendiary bombs.

November 18—Guerrillas fired and hurled bombs at a bus travelling near Sensuntepeque (Cabanas) killing one passenger and injuring two others.

December 1—A bus travelling from San Salvador to Suchitoto was assaulted by guerrillas who robbed the driver and then shot him. The guerrillas left pamphlets claiming that there would be other acts in vengeance for the killings of the FDR leaders on November 27.

December 9—In San Salvador Dr. Victor Manuel Moreno, ex-President of INPEP, was abducted by a group of armed men while leaving his house. The newspaper Diario del Mundo received a telephone call attributing the action to the Central Guerrilla Command.

December 12—In San Salvador two British citizens were attacked by unknown gunmen on the street. One of the British subjects was wounded.

1981

January 12—South African reporter Ian Mates was killed and two Americans were wounded when their car struck a leftist land mine near Aguilares, north of the capital.

January 31—A bomb was rolled down a corridor of the Apopa (San Salvador) City Hall; the subsequent explosion injured three municipal police and damaged the building.

February 20—A group of terrorists fleeing from a failed attempt to destroy an electrical installation entered the Tinetti Market, killed one vendor and injured several others.

February 27—At least five people were killed when a bomb exploded at the Ministry of Labor in San Salvador.

March 1—A truck carrying water to Suchitoto (Cuscatlan) was attacked by guerrillas; the driver of the truck was killed in the incident.

March 15—FMLN members reportedly took over the Ana Guerra de Jesus neighborhood in San Vicente and held a meeting during which they warned residents that they would be executed if they did not participate in a takeover of San Vicente planned for the end of the month.

March 17—Guerrillas machinegunned a small truck near Tecapan (Usulutan), killing the driver.

March 23—Guerrillas dressed in olive drab were engaged in stopping buses near San Lorenzo and San Esteban Catarina (San Vicente). They exacted "voluntary contributions" from the passengers and kidnapped a National Guardsman who was on board one bus.

March 25—Six people were injured when a bomb exploded in a Santa Ana roller skating rink.

March 25—Guerrillas attacked a group of peasants working near Canton Coyolito (Cuscatlan). One soldier defending the peasants was injured.

March 26—A car containing bombs and arms in addition to three people exploded on a San Salvador street, killing the three plus a fourth man who was riding past on a motorcycle.

March 27—A powerful car bomb exploded in the San Benito section of San Salvador killing two women who were waiting for a bus and injuring several others. Reportedly the bomb was intended to kill JRG President Duarte, whose car was soon to pass that point.

March 28—Guerrillas dressed in olive drab were engaged in stopping and robbing the occupants of vehicles on the coast ("Litoral") highway near Tepecoyo (La Paz).

March 30—Guerrillas exploded a bomb on a road near Sensuntepeque (Cabanas) and then machinegunned a truck, killing one fourteen year old.

March 30—Guerrillas entered the town of Nuevo Eden de San Juan (San Miguel) and shot the postmaster.

April 6—A bomb exploded at the home of a Justice of the Supreme Court, Rafael Rodriguez.

April 8—Guerrillas killed the owner and injured the driver of a fuel tanker truck near La Riena (Chalatenango).

April 11—Two people were injured when terrorist blew up the Astor Theater.

April 12—Guerrillas took Caserio Guarnesia near Texistepeque (Santa Ana) and shot one resident who refused to cooperate in giving them food and funds.

April 12—Guerrillas reportedly attacked a civil defense patrol in Canton El Chile, San Juan Nonualco (La Paz) and killed five patrol members.

April 12—Guerrillas reportedly killed two members of the civil defense group in Canton La Esperanza (San Vicente).

April 27—The clandestine Popular Liberation Forces (FPL) today claimed responsibility for the deaths of nine civilian patrol members, the destruction of the communications office and the garrison and the occupation of the Village of Nuevo Eden de San Juan, east of San Salvador.

April 28—Guerrillas invaded Canton Potrero Batres, San Isidro (Cabanas) killed three inhabitants and injured three others.

April 28—Guerrillas assassinate Dr. Carlos Alberto Hidalgo, President of National Lottery and labor leader. Guerrillas stopped his car and shot him four times in the chest.

April 29—Carlos Hidalgo Cuellar, the President of the National Lottery, was assassinated in Mejicanos (San Salvador). The FPL claimed responsibility for the crime, justifying it on the basis that Hidalgo was a dissident Marxist.

April 29—Machine gun toting assailants stole a taxi from its driver near the San Salvador Civic Center. The driver called for assistance from nearby colleagues; their pursuit ended when the assailant machine gunned them, killing one.

April 29—Guerrillas engaged stopping and robbing motorist on the road to Verapaz (San Vicente), shot and killed one victim who refused to cooperate.

April 30—Assailants set fire to the Prensa Grafica newspaper distributorship in Santa Ana. Two people (including one arsonist) suffered gasoline burns and one man was shot by the departing visitors.

April 30—A San Salvador supermarket was bombed.

April 30—One member of the Civil Defense Committee in Canton El Chile, Zacatecoluca was killed by a group of guerrilla attackers.

May 1—Seven people were killed and four injured by a terrorist bomb explosion on the road linking Cinquera (Cuscatlan) and Suchitoto (Cabanas). The dead and injured were part of a group which had refused to join the guerrillas.

May 3—Jose Ernesto Medrano, son of retired General Jose Medrano, was gunned down by leftist terrorist as he was entering a Baptist Church in San Salvador.

May 3—Two people were killed when guerrillas attacked a group of farm workers on the Guajoyo Hacienda in San Vicente.

May 5—A 73-year old lawyer, Jose Valentin Jaimes, was shot to death by hooded men in his office in San Salvador. He was a former judge and legal adviser of the security forces.

May 5—Antonio Fausto Nativi, Justice of the Peace of San Jorge, was shot to death while at home with his family. A group comprised of about 15 or 20 hooded and heavily armed men arrived in his house demanding that Nativi give them his weapons and cash.

May 6—One bomb exploded inside a car near the University of El Salvador and killed three people, two of which have been identified.

May 6—Three people were wounded in a shootout and a bomb explosion on Independence Avenue in Sal Salvador.

May 7—Individuals in a taxi shot to death Hector Manuel Tovar Duque, a 36-year old bus driver, in front of the San Salvador maternity hospital.

May 7—In Santa Ana, 24-year old businesswomen Maria Luisa Quintana was shot to death while alone at home.

May 7—Guerrillas assassinated two peasants and injured three others in Canton El Paraiso near Jiquilisco (Usulutan).

May 8—Carlos Roberto Martinez Guerra was shot to death near Santa Elena after being taken off a bus on the road to Jacuapa by several unidentified men.

May 8—Five individuals who identified themselves as members of a subversive organization killed Ignacio Fuentes, Mayor of Dulce Nombre de Maria, in Chalatenango.

May 10—FMLN guerrillas occupied San Emilio Canton in Tecoluca and held a meeting to ask the townspeople to join their ranks. Afterwards, they kidnapped two members of the town's Civil Defense Force from their homes.

May 11—The body of Carlos Barrientos, a well-known Santa Ana businessman, was found 8 days after his kidnapping.

May 11—Several youths were hanged by terrorists in San Jose, Las Flores, Chalatenango.

May 12—Guerrillas stopped a bus near San Sebastian (San Vicente), robbed the passengers, and kidnapped one lady bus rider.

May 13—In a Villa Victoria town, a group of civilian patrolmen who were patrolling the area clashed with guerrillas from nearby camps. In the clash, one women who assisted the patrolmen was seriously wounded and four patrolmen were killed.

May 13—In Verapaz, San Vicente, the Civil Defense Headquarters was attacked by the guerrillas and two patrolmen were killed.

May 14—Elvira Guadalupe Campos Guerra, a social worker, was kidnapped by unidentified persons who forcibly removed her from her place of work in the Atlacatl neighborhood. The victim is the sister of Col. Napoleon Armando Guerra, who is Salvadoran Ambassador to Israel.●

REPEAL OF THE INDUSTRIAL COST EXCLUSION PROVISION OF THE CLEAN WATER ACT

● Mr. MOYNIHAN. Mr. President, last Thursday, I introduced with Senators D'AMATO and WILLIAMS a bill to repeal a provision of the Clean Water Act known as industrial cost exclusion. This provision was added to the act last year to replace industrial cost recovery, the first and wholly unsuccessful attempt by Congress to place industrial users of public treatment works in a different category from commercial and residential users of such treatment works.

The short history of industrial cost exclusion, or ICE, suggests that unanticipated consequences will negate any savings that might have accrued from the exclusion of industry's share of the costs of a public treatment plant. In public works, a delay in construction during times of high inflation can have a devastating effect on the viability of the plant. Furthermore, the patronage by industry of many of these municipal plants permitted smaller communities in particular to achieve economies of scale which would benefit their residential users. As EPA estimated, the average non-Federal share in an affected community will increase by 60 percent as a consequence of ICE.

Although some industrial waste may contain toxics or other hazardous substances, the bulk of industrial waste can be safely and effectively treated by public facilities. Some pretreatment will still be necessary in particular cases.

While the entire construction grant program is being cut back, it is understandable that some may view industrial cost exclusion as a means to reduce the Federal Government's exposure to future costs. But if the administration's goal is improved water quality, then ICE is an arbitrary means to subvert that goal by delaying the implementation of many treatment facilities throughout the country, particularly those in smaller communities who depend on their industrial users to pay their share of local costs through taxes and user fees.

Had the thrust of the construction grant program not been to centralize treatment facilities and encourage industrial participation in such facilities, my view of the Federal subsidy for industry's water pollution control may have been different. But we are not at the beginning of the program. Indeed, I would hope that we are no less than the middle of it. Now is not the time to inject but a new and potentially costly element to a Federal program I am sure most States and localities wish they would have never seen.

Support for repeal of ICE is broad and includes: The National League of Cities, the National Association of Counties, the Association of Metropolitan Sewerage Agencies, the Water Pollution Control Federation, and the U.S. Chamber of Commerce.

We have introduced the repeal of ICE in two forms: A separate bill S. 1328 as passed by the House of Representatives on May 28, 1981; and an amendment to S. 1274, a bill to amend the entire title II program introduced by Senator JOHN CHAFEE. I would be satisfied if the repeal were to pass in either form by the Senate. Following the Environmental Pollution Subcommittee's hearing on industrial cost exclusion on June 24, 1981, I would hope that consideration of the repeal would follow soon after.●

REGIONAL DISPARITIES ON THE BUDGET

● Mr. RIEGLE. Mr. President, while I have supported the overall restraint in Federal spending being proposed, I have expressed that these restraints should be fair and equitable across regions of our country and sections of our economy. A recent study by the University of Michigan indicates that the budget that is before the Congress could have an adverse impact on the Midwest and is not neutral as is being contended by OMB Director David Stockman. This study by the University of Michigan is graphic evidence of the imbalance, and I submit for printing in the RECORD a news release describing the major findings of the report.

The news release is as follows:

TAX CUT STUDY BY THE UNIVERSITY OF MICHIGAN

ANN ARBOR.—President Reagan's budget reductions will be twice as severe for states with declining economies as for the most rapidly-growing states, a University of Michigan study indicates.

"Because slow growth or declining states tend to be concentrated in the Northeast-Midwest area, there is a clear and severe regional bias to President Reagan's budgetary proposals," the U-M researchers conclude.

They indicate that the administration's budget proposals will have the biggest impact on the states least able to cope with them.

The analysis was conducted by the Center

for Political Studies in the U–M Institute for Social Research. Project director Thomas J. Anton was assisted by James Fossett, Kathryn Jones, Kevin Kramer and John Oppenheim.

The study reveals that although defense spending will increase in low-growth regions, the largest increases in defense expenditures will occur in high-growth areas such as the Pacific or South Atlantic states.

Furthermore, in low-growth states substantial increments in defense spending will be more than offset by very large reductions in spending for commerce and housing credit; education and training, and income security activities, the U–M researchers add.

"In comparison to President Carter's proposals," Prof. Anton explains, "the net loss will be very substantial for states suffering from low growth and high unemployment. Michigan will lose more than $2 billion. New York's loss will exceed $5 billion."

He estimates that "losses to low-growth states in capital infrastructure and social service programs will be proportionately more severe than total losses suffered by these states.

"The study of administration budget proposals for fiscal 1981 and 1982 indicates that in states composing the American Ruhr—New York, New Jersey, Pennsylvania, Ohio, Michigan, Indiana and Illinois—where population and job losses in recent years have created serious economic hardship, the reductions proposed by President Reagan will be particularly severe.

"To some extent the severity of Reagan's reductions in these states arises from proposed cuts in programs for which the location of expenditures is an important policy consideration—that is, grants to state and local governments for the provision of services or the construction and maintenance of capital infrastructure such as streets and sewers. Reductions in such programs, together with reductions in programs that are regionally neutral in intent but biased in impact, concentrate President Reagan's reductions in a few states rather than spreading those cuts evenly across the country.

"This clear imbalance in the distribution of budget reductions is likely to be accentuated by the inability of governments in slower-growing states to continue or replace the activities currently financed with federal funds.

"Governments in growing states, by contrast, are less likely to be affected by these reductions, both because they now receive fewer dollars from these programs and because they generally are under less financial pressure than governments in slower-growing states. Their potential loss is smaller and their ability to replace loss is greater.

"In short, the Reagan budget proposals will have their most substantial impacts on those states which are least able to cope with them. It is a program of focused inequity."

The U–M study, which focuses on changes in the amount of funds available for expenditure rather than actual levels of spending or outlays, details the regional impact this way:

In the Middle Atlantic and East North Central regions, which contain the slowest-growing states with the most severely-pressed governments (Michigan, New York, Pennsylvania, Indiana; Ohio, New Jersey and Illinois), "of the $53.6 billion in 1981–82 reductions in obligations or commitments, approximately $19.7 billion, or over 36 percent, will translate into reduced spending or lending in these two regions.

"By contrast, the Mountain and Pacific states (California, Arizona, Idaho, Utah, Montana and Washington) account for only 18.5 per cent of the proposed reductions. The three Southern regions (states of the old Confederacy, excluding the District of Columbia) are affected by approximately 34 per cent of the administration's proposed reductions for 1981 and 1982.

"In short, while the regional consequences of the administration's reductions are not as pronounced as some have argued, the impact of these proposed changes will be most severely felt in those regions that have experienced the most persistent economic decline and whose governments have experienced the most substantial difficulties in balancing their budgets."

The U–M study suggests that proposed reductions in (1) support for construction or maintenance of infrastructure and economic and community development and (2) support for social services "seem likely to widen the disparities in the relative levels of services and taxes between growing and declining states, since the slower-growing states are already levying taxes at higher rates than faster-growing states and have less taxable capacity than do more prosperous areas."

The report concludes: "Reductions in grant programs thus seem likely to exacerbate existing disparities between rich and poor states in the level of services they provide citizens relative to the taxes they levy. Much prior research has noted that major new investments in infrastructure such as sewers, roads, or bridges are required in declining states, and that governments in these states are responsible for providing education and other social services to relatively high concentrations of disadvantaged groups.

"By reducing levels of support for capital sepnding and social services most substantially in those states which have the least ability to replace these funds from their own resources, the administration's budget seems likely to exacerbate these disparities."●

SUPPORT URGED FOR DUARTE GOVERNMENT IN EL SALVADOR

● Mr. JEPSEN. Mr. President, lately there have been people in the street protesting the aid President Reagan has sent to the Government of El Salvador. The protesters do not believe that we should support a government that has committed some indefensible human rights violations.

I can understand why Americans would want to protest such human rights violations. But I have difficulty understanding why Americans do not protest with equal vigor the worse human rights violations and brutal terrorism committed by El Salvador's Communist led rebels.

The rebels have actually claimed credit for many of these acts. For instance on September 9, 1981. 60 peasants in San Pedro, Perulapan, El Salvador, were murdered by guerrillas who charged that the peasants were collaborating with the government. On May 1, 1981, seven people were killed and four injured by a terrorist bomb explosion on the road linking Cinquera and Suchitoto. The dead and injured had committed the great sin of refusing to join the guerrillas. Perhaps the most outrageous act occurred in December of 1979 when approximately 10,000 Salvadoran women participated in a peace march on the capital. They were demanding an end to terrorism. The rebels firebombed the peace marchers and at least seven were killed.

Mr. President, there have been hundreds of such incidents in El Salvador since the 1979 coup. The State Department has documented many of them. I would like this list inserted into the RECORD at the conclusion of my remarks. It is something that everyone who is helping make American policy in El Salvador should read.

Then they will be in a better position to contrast the bragging the rebels have done about their brutal crimes with the behavior of the Duarte government. Former U.S. Ambassador Robert White addressed this point in his New York Times interview of March 8, 1981:

> No leader of the leftist forces, whether it be (Dr.) Ungo or (Roman) Mayorga or (Hector) Oquili, has ever—and I have asked that they do so publicly—made any effort to stop the leftists from murdering, kidnapping (or) assassinating. The government of Napoleon Duarte (El Salvador's President), on the other hand, and many moderate military officers, have explicitly condemned the excesses of the security forces. They have tried and thrown out a large number of enlisted people and have transferred a number of officers out of the line of command.

Some people have argued that the killings perpetrated by the left and right in El Salvador are the inevitable consequence of a civil war in a society conditioned to violent political acts. These people also argue that if the Communist rebels win, conditions would improve. Human rights would be respected and the peasants would have land. That idealistic picture is absurd. As the Catholic Bishop of Salvador said in his homily of March 8, 1981, the rebels have "maximized their adherence to Marxism"—(Leninism). The Communist societies the rebels idolize (Russia or Cuba) have always shown blatant lack of concern for human rights. Their citizens continually abandon their friends, relatives and possessions in an effort to escape Communist rule. If El Salvador's Communist rebels came to power, could we rationally expect them to set up a government that differed dramatically from the governments of Russia or Cuba?

The answer is, of course, no. This is why the Communist rebels' promise of land for the peasants should not fool us. Such cries are nothing new in Communist revolutions. The Communist revolution in Russia, for example, was built around the slogan "Bread, Peace, Land." The word "land" meant that the Bolsheviks would give land to the peasants. They did this briefly but when the Communists had consolidated their power, then they began to confiscate farmland. In the process millions of Russian farmers were either murdered or forced to relocate in other parts of the Soviet Union.

This is not an irrelevant historical fact. A quick look at the Soviet and Cuban farm systems substantiates that point. Very little land in those countries is owned by those who farm it. We should not delude ourselves into thinking that farmers under an El Salvadoran Communist government would be treated any differently.

From a human rights perspective, the present Government of El Salvador offers the greatest hope for that country today. It is one of the reasons why we should support President Reagan's aid to that Government.

But the support of the Duarte government is important for other reasons as well. Countries all over the world are watching what the United States will do in El Salvador. If we do not fully support the Duarte government, the world will begin to doubt the value of American friendship. Other countries will reason that if we cannot help a centerist government in our own backyard, then we will not be able to protect our friends or our interests in other parts of the world either.

If that determination is ever made, we will lose our friends and our enemies will be tempted to move against American interests everywhere. We should not let our actions in El Salvador give them this encouragement.●

S. 1345—VETERANS' HEALTH CARE ACT OF 1981

● Mr. HEINZ. Mr. President, yesterday, as shown on page 11708 of the RECORD, I introduced the Veterans' Health Care Act of 1981. The text of the bill, which was not printed in yesterday's RECORD, is as follows:

S. 1345

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; AMENDMENTS TO TITLE 38, UNITED STATES CODE

SECTION 1. (a) This Act may be cited as the "Veterans' Health Care Act of 1981".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

MEDICAL CARE FOR VETERANS EXPOSED TO AGENT ORANGE

SEC. 2. Section 610(a) is amended—

(1) by striking out "and" at the end of clause (3);

(2) by redesignating clause (4) as clause (5); and

(3) by inserting after clause (3) the following new clause (4):

"(4) any veteran who served in the Republic of Vietnam during the Vietnam era if a physician employed by the Veteran's Administration (or, in areas where no such physician is available, by a physician carrying out such function under a contract or fee arrangement) determines that such hospital care is necessary for the treatment of a condition that may be associated with exposure while serving in the Republic of Vietnam to phenoxy herbicides and chemicals used as defoliants (including the defoliant commonly known as 'Agent Orange'); and".

EXTENSION OF VIETNAM-ERA VETERANS' READJUSTMENT COUNSELING PROGRAM

SEC. 3. Section 612A(a) is amended by striking out "or two years after the effective date of this section" and inserting in lieu thereof "or by September 30, 1984".

EXPANSION OF SCOPE OF AGENT ORANGE STUDY

SEC. 4. Paragraph (1) of section 307(a) of the Veterans Health Programs Extension and Improvement Act of 1979 (Public Law 96–151; 93 Stat. 1097) is amended to read as follows:

"(1)(A) The Administrator of Veterans' Affairs shall design a protocol for and conduct an epidemiological study of the long-term adverse health effects in humans of service in the Armed Forces of the United States in the Republic of Vietnam during the period of the Vietnam conflict as such health effects may result from exposure to phenoxy herbicides (including the herbicide known as Agent Orange) and the class of chemicals known as the dioxins produced during the manufacture of such herbicides. In conducting such study, the Administrator may include an evaluation of the adverse health effects in humans of such service as such health effects may result from other factors involved in such service, including exposure to other herbicides, chemicals, medications, or environmental hazards or conditions.

"(B) The Administrator shall also conduct a comprehensive review and scientific analysis of the literature covering other studies relating to whether there may be long-term adverse health effects in humans from exposure to phenoxy herbicides (including the herbicide known as Agent Orange) and the class of chemicals known as the dioxins produced during the manufacture of such herbicides. In conducting such review and analysis, the Administrator may include a review and analysis of the literature covering other studies relating to whether there may be long-term adverse health effects in humans from other factors involved in service in the Armed Forces of the United States in the Republic of Vietnam during the Vietnam conflict or in other comparable situations involving one or more of the factors described in the second sentence of subparagraph (A).".

EFFECTIVE DATES

SEC. 5. (a) The amendments made by sections 2 and 3, shall take effect on October 1, 1981.

(b) The amendment made by section 7(a) shall apply with respect to care and services furnished under chapter 17 of title 38, United States Code, on or after the date of the enactment of this Act.●

THE YAMAL NATURAL GAS PIPELINE PROJECT

● Mr. GARN. Mr. President, as my colleagues know, I have been involved for some time in the issue of high technology exports to the Soviet Union and its allies. I have expressed my concern that these exports have been detrimental to the security interests of the West. We and our allies have exported technology to the Soviets which have, in the final analysis, made a direct contribution to the military prowess and interventionist policies of the U.S.S.R.

At this time, the United States and its allies are facing a very serious policy question with respect to the proposed construction of the Soviet's Yamal natural gas pipeline. In this regard, I have received an advanced copy of a forthcoming article, "Soviet Enemy and the Future of the West," to be published in the journal, Policy Review, by the Heritage Foundation. The authors of this article, Messrs. Steven C. Goldman and Wayne A. Schroeder, have succeeded in articulating in a clear and forceful manner the critical security interests at stake in this matter, as well as some potential alternative to Western energy security.

Mr. President, I commend to my colleagues this inciteful analysis, and I ask that the article by Messrs. Goldman and Schroeder be printed in the RECORD.

The article is as follows:

SOVIET ENERGY AND THE FUTURE OF THE WEST [1]

(By Steven C. Goldman and Wayne A. Schroeder)

The United States and the Soviet Union are the two largest energy-producing and -consuming countries in the world. During the last decade, the U.S. witnessed a sharp decline in its relative energy position and became dangerously reliant upon foreign imports. This reliance has had profound political and economic implications and has made us thing of energy in strategic terms. During the 1970s, the Soviets did not experience severe domestic energy problems and remained major exporters of hydrocarbons.

In the upcoming decade, it appears that America's position will remain extremely precarious. But the U.S.S.R. will also begin to experience rapid deterioration of its energy position and it too will be confronted with severe strategic dilemmas. What are the dimensions of this Soviet energy crunch and what are its implications for the future of the West?

In April 1977, the CIA published a major report indicating that the U.S.S.R. was on the verge of a severe oil production crisis and that Soviet petroleum output will peak no later than the early 1980s.[2] Furthermore, the report projected that Soviet oil production would decline from a high of about 12 million barrels/day (MMB/D to 8–10 MMB/D by 1985.[3] Currently, the Soviet Union is the world's largest oil-producing country and has been able to maintain its goal of energy self-sufficiency while exporting to both Council of Mutual Economic Assistance (CMEA) partners and hard currency markets. The Soviet ability to accomplish these objectives would be severely constrained if worst-case projections regarding their petroleum industry were to hold true. A major oil production crisis in the U.S.S.R. would have the most profound consequences, because their coal industry is stagnant, their nuclear program is behind schedule, their renewables program (solar, geothermal, wind) is almost nil, and their only prospective bright spot is the gas industry.

It has been argued that the United States should be alarmed by this prospect for the following reasons:

(7) Soviet politico-military pressures on the Persian Gulf.—An energy-deficient U.S.S.R. might seek to solve its oil shortfall problems by applying increased pressure on the key producing countries in the Gulf, which could lead to direct Soviet military intervention.

(2) World oil market considerations.—Even assuming that Moscow refrains from using military force to obtain oil on concessionary terms, its entry into the world oil market would lead to general supply constraints and upward price pressures.

(3) Allied dependence on Soviet energy.—Our NATO allies are dependent upon Soviet oil and gas imports. In order to promote "strategic supply diversification" outside the Persian Gulf, they are seeking to expand greatly their energy relationship with the U.S.S.R. through the Yamal gas pipeline that will link the major gas fields of Northwest Siberia to Western Europe. Since the U.S. has no well articulated or reasonable energy alternatives to offer our allies, and since we support the concept of "strategic supply diversification," the prospect of a Soviet energy crunch is not comforting. Furthermore, it can be argued that the U.S.S.R. is a more reliable supplier than the Arab oil-producing countries because they have refrained from using the price/supply lever in a political context and have treated energy trade as a largely commercial exchange.

Accordingly, many Western experts have argued that the U.S. should sell energy production equipment and technology to the U.S.S.R. in order to help them develop their energy resources.[4] During the 1970s, Moscow imported large quantities of Western oil and gas production equipment, particularly during the latter half of the decade (see Table 1).[5]

Footnotes at end of article.

TABLE 1.—SOVIET IMPORTS OF WESTERN OIL AND GAS EXPLORATION AND EXTRACTION EQUIPMENT

[In millions of dollars]

	Purchases from the United States	Total purchases from the West
1972	4.6	19.4
1973	4.3	23.5
1974	.5	9.0
1975	49.5	150.1
1976	40.6	226.5
1977	29.3	121.0

Note: These figures do not include turnkey manufacturing equipment.

Source: Office of Technology Assessment, Technology and East/West Trade, p. 239.

There is no doubt that Western equipment and technology plays a key role in the Soviet energy sector. The U.S.S.R. is in need of Western assistance not only to search for new oil but also to maintain current production levels. Most U.S. oil and gas transfers were sales of priority equipment to be used primarily at mature producing fields.[6] Perhaps the most conspicuous energy technology transfer to the U.S.S.R. occurred in 1978 when the Carter administration approved the sale of a Dresser Industries turnkey drill bit factory. Once completed, this sophisticated factory will produce drill bits in sufficient quantity to insulate the U.S.S.R. from the necessity of making further drill bit purchases in Western markets.[7] More recently, the Carter administration signalled its support for the Soviet/West European gas pipeline by approving the sale of Caterpillar pipelayers to the U.S.S.R. for use on this project.[8] Despite the other competitive aspects of U.S./U.S.S.R. relations, it has been U.S policy to support energy development in the Soviet Union in the interest of preserving world peace and maintaining world energy security.

In implementing a liberal export control policy toward the U.S.S.R., American decision-makers uncritically accepted the notion that an energy-abundant Soviet Union is in our best interest. The U.S. has adopted this stance in large measure because American leaders underestimated the broad strategic and security problems associated with the growth of a Soviet energy giant. Unless a potential technology transfer had a direct input into the Soviet military machine, it was not considered as a strategic item. The following written exchange between Senator John Heinz (R-Pa) and former Under Secretary of Defense William Perry pursuant to the 1979 Senate Banking Committee Hearing illustrate this point vividly:

Senator HEINZ. In your view, would it be in the national interest of the United States to provide the technology necessary to facilitate the development of the energy resources of the Soviet Union, insofar as such technology would not have applicability to the military sphere. . . .

Under Secretary PERRY. . . . Strategically . . . , the debate is of limited importance. Substantial additions to Soviet oil production would not necessarily increase Soviet military capabilities directly . . . .[9]

The time has come for us to reconsider this interpretation of a critical issue and to subject the conventional wisdom to closer scrutiny. A multifaceted and compelling case can be made in favor of adopting a restrictive U.S. energy export control policy, and promoting different energy options for our European allies.

In the past, arguments made in favor of restricting U.S. energy exports to the U.S.S.R. have been articulated predominantly in terms of those exports' military utility to Moscow. While this argument indeed has substantial merit, it should be tied in with a series of corollary, supporting arguments concerning the credibility of the Western security guarantee for the Persian Gulf, the negative implications of having U.S. allies dependent upon Moscow for a major portion of their energy supplies, and possibilities for increasing U.S./West European energy cooperation. A macro-political/economic analysis of the strategic implications of energy technology transfer to the Soviet Union will demonstrate that it is in the national security interest of the United States and the West to constrain Soviet energy development during the coming decade while developing an alternative energy security program.

Footnotes at end of article.

HOW IMPORTANT IS SOVIET ENERGY?

Proponents of a liberal export policy maintain that the energy issue is of limited military/strategic importance because the Soviets will always give their defense industry top priority regardless of other considerations. There is no doubt that the Soviet Union considers military priorities before the needs of other sectors, and that the Kremlin has been willing to demand sacrifices from its consumers in order to satisfy the military's almost insatiable demands. However, there is no reason why the U.S. should make the Soviet resource allocation debate easier by selling equipment and technology that the U.S.S.R. has chosen not to develop.

Currently, the U.S.S.R. Defense Minister is in an excellent bureaucratic position to argue in favor of priority allocations of resources and personnel on the grounds that military hardware cannot be purchased in the West—oil/gas production and exploration equipment, on the other hand, is available to the Soviet Union in Western markets. Therefore, given the fact that there are more limited incentives for the Soviets to reallocate resources away from their military sector and into their energy sector, it can be expected that current trends will prevail.

The Soviets have historically been unwilling to reform their economic system to provide for indigenous technological innovation in the civilian sector. While Soviet basic science is quite good, the Soviet economic system, based upon overcentralization and the inefficient principles of socialist planning, has stifled technological innovation at the design and manufacturing stages. The U.S.S.R. has not devoted its limited quality controlled resources to peaceful purposes. They have instead sought out technology and equipment transfers from the West as "quick fixes" which can allow them to maintain current economic priorities and continue their military build-up.[10]

The release of Soviet resources for use in the military sector which otherwise could be tied up in civilian-oriented research and development is a profound consequence of past U.S. technology transfer policies in both the energy and industrial areas. As William T. Lee wrote in Soviet Defense Expenditures in an Era of SALT: Seldom, if ever, has a country been able as the Soviet Union has to persuade the countries against which most of its military build-up is directed to finance so much of it.[11]

U.S. export control policy should be reformulated to make the costs to Moscow for continuing this military build-up increasingly prohibitive. This is not to say that the military will not continue to have first call on Soviet economic resources. Rather, it is meant to force the Kremlin into making difficult judgments as to its long-term priorities. Diversion of Soviet resources toward indigenous energy research and development and away from military expenditure is the first element in this process. Restrictions on badly needed infusions of Western energy equipment and technology will have an impact on Soviet industrial development and overall economic growth. No prudent Soviet economic planner could afford to ignore the political consequences that static or negative economic growth would have on his own position within the Soviet bureaucratic hierarchy. While the Soviet military will continue to be the first priority in Soviet economic planning, it need not have so large or prominent a share. It is in the national security interests of the U.S. to retard the growth rate in Soviet military expenditure by the reasonable means that are available to us.

THE LURE OF THE PERSIAN GULF

The Soviet Union has had a traditional geopolitical interest in the Persian Gulf which transcends the current world energy crisis. Ever since the days of Peter the Great, Russia has sought access to warm water ports in that crossroads region. Given the growing importance of this area to Western economies in recent times, its strategic value to the Soviet Union has certainly increased. Indeed, the political and economic leverage that would be available to Moscow if they could control or "Finlandize" a key portion of the oil producing Near East could be substantial. U.S.S.R. dominance in that region would enable them to tear apart the Western alliance by having the U.S. and its allies compete for Soviet manipulated oil supplies. In short, the Soviets need no domestic energy crisis to be profoundly interested in this area. Although a domestic oil crunch may make the region marginally more attractive, the key issue regarding security of the Gulf must be seen in the context of the credibility of the Western deterrent and not in terms of energy equipment sales.

The Soviet Union has consistently sought to expand its power and influence in areas where Western resistance is perceived to be low and indigenous opposition to be relatively weak. Soviet penetration of the Near East and adjacent areas has been successful where the U.S./Western security network was insufficient. Recent examples include Angola, Afghanistan, Ethiopia, and South Yemen. However, Moscow has traditionally avoided a direct confrontation course with the U.S. or its allies in areas it knows we consider essential to our security—the areas they are fully persuaded we will defend.

Misunderstandings regarding our intentions have yielded sorry results in the past. The most noteworthy example is in the case of Korea when Secretary Acheson noted that the country was outside the U.S. defense perimeter. It did not take long for the Soviets to pick up on this mistake and ask their North Korean puppets to attack the South. Once the Soviets discovered that the U.S. was prepared to defend South Korea, they disassociated themselves from the conflict as quickly as possible and left Kim Il Sung and the Communist Chinese with the task of fighting the United States. On the other hand, incidences of firm U.S. resolve to prevent Soviet or proxy intervention have often been successful. The clearest recent example was in the 1973 October Middle East war when former President Nixon put U.S. military forces on worldwide alert given the prospect of a Soviet intervention. The purpose of the alert was served and the Soviets did not enter into the foray.

Given the strategic importance of the Near East, it is absolutely imperative that the U.S.S.R. does not get the false impression that the oil producing states are soft spots, ripe for probing. Selling the U.S.S.R. energy technology and equipment, with the hope that this may keep it stated, could actually give the Soviets the impression that we are unwilling or unable to defend our vital interests by other means.

U.S. efforts to extract a quid pro quo from Moscow in return for expanded trade and technology transfers have been unsuccessful. This approach has not served to promote East-West interdependence nor has it served to moderate Soviet geopolitical behavior. Instead, we have witnessed a relentless Soviet

arms build-up, Soviet strategic penetration of the Near East and Africa as well as the invasion of Afghanistan. A U.S. decision to retain past export policies will only serve to convince the Kremlin that America is not serious about defending its position in the world when its security interests are threatened. Conversely, a change in our export policies would constitute a firm display of U.S. resolve. The Soviets have limped along under very unfavorable conditions in the past and can face an oil crisis at home if they are persuaded that the costs of imperialist policies in the Persian Gulf are higher than the costs of enduring an energy squeeze which many countries are facing.

APPROACHES TO OPEC

The U.S. should not mislead itself into believing that the oil producing states of the Persian Gulf have any affinity for us. However, rather than meekly accepting a subservient role and earning their contempt as so many Western leaders have done, it should be possible to deal with them on the basis of mutual self-interest: "the enemy of my enemy is my friend." For too long, Western leaders in general, and U.S. officials in particular, have adopted the attitude that the oil producers hold all the trump cards and that the West must passively accept its subordinate position, unable to influence circumstances or events. This attitude must change. It is imperative that the oil-consuming states of the West persuade the oil producing states of the Persian Gulf that cooperation is essential to withstand the common threat. In order to succeed in this diplomacy, we must adopt an activist posture.

First, we should emphasize to the oil producing states that the Soviet Union (whom many of them consider to be a loathsome "godless" regime) represents the chief threat to their security. Western nations have never interfered with their religious practices and have been paying fantastic oil bills without threats or coercion.

Second, we should emphasize that the U.S.S.R. has a strong interest in expanding its power in the region and is already taking advantage of every opening available. Unless the Western countries are able to increase their military deterrent in the region, the day may soon come when the Soviets will feel bold enough to attempt a direct intervention. As Soviet energy problems become more severe, the oil producing Persian Gulf will become an even more attractive target than it currently is. Once under Soviet domination, it will be virtually impossible for anyone to dislodge them. The Afghanistan experience should indeed be sobering.

Third, the Persian Gulf states cannot defend themselves against the U.S.S.R., regardless of the amount of military hardware the West may provide them. The Soviets would easily win any battle against Gulf oil-producing states fighting alone. The only way to deter the Soviet Union is to make it obvious that a confrontation in the Persian Gulf would involve the West.

Fourth, since the oil producing states need the West as much as we need them, it does not make sense for them to adopt pricing policies designed to bankrupt those who are protecting the area from Soviet intervention. If Western economies are in dire conditions, they will not be able to increase military budgets to the extent necessary to deter the looming Soviet threat. Therefore, pricing policies which will undermine Western economies do not serve the long term interests of the oil producing countries. Indeed, it is the health of the Western economies and our ability to pay that gives OPEC oil the value it currently commands.

WILL SOVIET SHORTAGES AFFECT WORLD MARKETS?

The impact of the coming Soviet oil production decline upon the world market should not be dismissed, but neither should it be overstated. The U.S.S.R.'s ability to make substantial oil purchases on the world market will be severely circumscribed because of hard currency shortages and limited quality products for barter. The Soviets will be compelled to cope with their oil problems by reducing their consumption growth and/or reducing exports to their CMEA clients. (By 1985, it can be expected that Soviet oil sales to hard currency markets will be severely curtailed or perhaps eliminated regardless of Western technology transfer policy. Therefore, the direct impact of a Soviet oil shortage on our allies who currently purchase U.S.S.R. petroleum should not be a consideration. Their dependence on Soviet oil will be minimal at that time.[12]

Almost half of Soviet hard currency earnings are currently generated by oil sales. In 1978, the U.S.S.R. sold 1.2 MMB/D for hard currency and received $5.7 billion of total earnings of $13.2 billion. In 1979, the U.S.S.R. reduced its oil sales for hard currency to under 1 MMB/D but increased its earnings to about $9 billion of a total of $19.5 billion receipts.[13] The U.S.S.R. was a price taker rather than a price setter and able to increase its profits due to OPEC price increases. Without this hard currency flow, Moscow's financial position would be severely strained. As they continue to experience problems in their oil industry, the Soviets will be forced to make very difficult allocation choices between domestic consumption, concessionary exports to CMEA partners and exports for hard currency. Under almost any reasonable U.S.S.R. oil production/consumption scenario for the coming decade, it seems clear that the U.S.S.R. will be compelled to phase out oil exports to the West because their domestic requirements and the minimum needs of their CMEA clients will have to come first. Without this hard currency flow, the U.S.S.R. will not be in a favorable position to purchase large quantities of OPEC oil at market prices. Although the Soviets profit from OPEC price increases today, the day will soon come when this will not be the case.

During the 1970s, the Soviet Union increased its oil consumption from 5.15 MMB/D to about 8.6 MMB/D and not once during this period did their annual consumption decline (see Table 2).[14] Since the Soviets do not have a significant private transportation sector (as we do in the United States), their discretionary use of oil is more limited, as is their potential for conservation. Indeed, oil has been primarily used to fuel the Soviet industrial base and provide for the almost theological principle of economic growth. During the 1980s, thes U.S.S.R. will not be able to continue the oil consumption trend established in the previous decade. (If they did, they would consume almost 11 MMB/D by 1985.) Given the limited oil output that they will have available domestically, coupled with their constrained hard currency position, it is quite possible that Soviet oil consumption will not increase at all during the 1980s. Such a scenario will help create substantial economic and social difficulties for the U.S.S.R., a prospect that is not inimical to Western interests.

SOVIET OIL PROSPECTS

The Five Year Plan for 1981–1985, which has recently been released, projects that U.S.S.R. oil production will increase from the present level of about 12.0 MMB/D to 12.4–12.8 MMB/D by 1985.[15] This projection indicates that the U.S.S.R. is expecting a significant deceleration of its oil production growth. (During the 1976–80 period, Soviet oil production increased from 10.39 MMB/D to the 1980 level of about 12 MMB/D.)[16] However, it should be pointed out that the Soviets have not had a good record in recent times of fulfilling their official oil targets. The 1980 target was originally pegged at 12.8 MMB/D but was revised downward to 12.1 MMB/D.[17]

During the next five years, many Western analysts believe that Soviet oil production will peak and possibly decline unless they quicky discover new fields near existing infrastructure. (Inexpensive and easily accessible sources West of the Urals are being rapidly depleted and the Soviets must now look to West Siberia to compensate for the declining output of other regions and provide additional increments to increase overall national production.)[18]

Although the U.S.S.R. may indeed have substantial additional oil resources in West Siberia and elsewhere, it seems likely that major new discoveries will be in permafrost regions and offshore areas. The Soviets have at times referred to Siberia as a "raft floating upon a sea of oil." However, even if this is the case, massive investments and huge front-end capital outlays will be required to exploit this elusive oil treasure chest. The long-term prospects for Soviet oil are uncertain. The prospects for the early and mid-1980s are not good.

TABLE 2

U.S.S.R. oil consumption

[a] Preliminary.

Source: CIA International Energy Statistical Review, March 31, 1981, p. 25.

If we assume that the upper range of the 1977 CIA oil estimate for the U.S.S.R. is accurate (10 MMB/D in 1985) and that the Soviets are able to hold oil consumption at 1980 levels (about 9 MMB/D), this would leave them with an export capacity of about 1 MMB/D. Given the high priority that the Kremlin places on the political reliability of its CMEA partners, most, if not all, of this excess would probably go to them. And this would represent a significant decline in level of oil deliveries the CMEA countries are currently obtaining from the U.S.S.R.[19] As former CIA Director Stansfield Turner noted, "There will be strong pressure to force Europe to share the oil shortage . . ."[20] Other plausible scenarios could be devised in which consumption/production patterns are marginally altered. But in any event, the Soviet oil picture is not bright. The prospects for Eastern Europe are even dimmer, because they are already oil importers.

As noted previously, we do not wish to completely dismiss the impact of the Soviet oil crisis upon the world market. Surely, the Soviets will seek to use their available financial resources to purchase petroleum if the crunch becomes extreme. They will no doubt seek to expand gold and arms sales. However, given the prospect of evaporating oil revenues, it is difficult to envision a scenario in which they will be major competitors with the West for OPEC oil on market terms.

HOW WILL EUROPE COPE?

The six East European CMEA countries (Poland, Bulgaria, Hungary, East Germany,

Footnotes at end of article.

Czechoslovakia, and Romania) are all facing severe energy problems in the 1980s, and the Soviet oil shortage will serve to exacerbate an already critical situation. Eastern Europe has a very limited indigenous energy resource base and, unlike the U.S.S.R., cannot even hope to produce its way out of the current shortage by increasing investments in the energy area. Every East European CMEA country is a net oil importer including even Romania, which currently produces about 80 percent of East European oil.[21]

Although the Soviets will consider concessionary oil exports to Eastern Europe as a high priority, there are limits to the U.S.S.R.'s export capacity. Indeed, if the worst-case projections regarding Soviet oil production are realized, the U.S.S.R. will have no oil for export at all. A decline in Soviet oil deliveries to Europe will create major problems within the U.S.S.R.'s Empire because the rising aspirations of the East European people will not be fulfilled. Tension within the Bloc is clearly in the interest of the United States; we have no desire to see the Eastern European countries remain slavishly dependent upon Moscow; problems in the Empire will keep the Soviets bogged down on "in house" matters, thereby making it less likely that they will have resources to invest in adventurism outside their current sphere of influence.

The West Europeans have to date demonstrated no desire to restrict the growth of energy production in the Soviet Union. Indeed, they are pursuing a course which will greatly increase their dependence upon Soviet natural gas. Currently, the Europeans are negotiating the largest East/West trade deal in history, as they seek to cooperate with the U.S.S.R. in the building of a 6,000 km natural gas pipeline from Northwest Siberia to Western Europe.[22] The total cost of the pipeline may exceed 11 billion dollars and eventually bring at least an additional 40–45 billion cubic meters (bcm) per year of Soviet natural gas into European markets.[23]

The Europeans are anxious to consummate this project because of the business it will create for their energy equipment manufacturing companies and because they are in need of additional energy supplies. The Soviets are naturally anxious to conclude this deal because it will assist them in developing their energy resources and help them earn hard currency from the West, an important consideration especially if oil sales will be declining. But despite these obvious mutual benefits, there are significant dangers inherent in this project sufficient for the U.S. to oppose its completion.

Once the Yamal Pipeline project is consummated, the Soviets will have a major weapon that can and probably will be used to disrupt the NATO alliance. In the near term, it would not be surprising if the U.S.S.R. refrained from using energy for political blackmail; they need European cooperation for the Yamal project. However, long term Soviet reliability is more questionable.

Once our allies become addicted to Soviet gas, the U.S.S.R. can become a price setter rather than merely a price taker. The Soviets will be in a position to demand their price for natural gas because they will have such a large share of the market. Although the West Europeans are surely aware of the dangers implicit in energy dealings with the U.S.S.R., they are forging ahead with this project because they consider energy alternatives to be so limited. Negotiations have at times stalled and the terms are still very much in question; but it is prudent to assume that deal will likely be concluded.[24]

In addition to the possibility of price gouging, the Soviets will be in a position to threaten the West Europeans with strategic supply interruptions (for example, in January and February). Short disruptions of this sort would not seriously damage their hard currency flow. In so doing, the Soviets could persuade West Europeans that policies designed to prevent Soviet adventurism in the Persian Gulf would be unwise. Can we really afford to have our allies "Finlandized" to the extent that they are afraid to cooperate with us in defense of our vital interests? Surely, a policy designed to promote West European dependence upon Soviet gas is reckless in the extreme. Indeed, one could argue that it is more in our interest for the Europeans to be dependent upon Middle East energy; it will give them a stake in defending this vital area against Soviet imperialism.

Unilateral U.S. efforts to constrain Soviet energy development would surely be less successful than a concerted allied effort. Therefore, we must persuade our allies that it is in their best long-term interest to follow the U.S. lead. But the United States cannot persuade the Europeans to reconsider its policy of growing dependence upon Soviet gas unless we can suggest creative and realistic alternatives. Contrary to conventional thinking, these options do exist.

REDUCING EUROPEAN DEPENDENCE

The West European countries involved in the current Soviet natural gas negotiations are as a group heavily reliant upon energy imports—they do not have the requisite resource bases to produce their way out of this dependence. Consequently, they have been willing to accept virtually any potential source which meets the criteria of price competitiveness and supply security. Currently, they believe that Soviet energy meets these criteria and the United States has done almost nothing to persuade them otherwise. But other less vulnerable options do exist if the United States is prepared to reorient its international and domestic energy policies. What follows is a comprehensive plan to reduce European energy reliance upon the U.S.S.R., increase U.S./European energy and economic cooperation, and contribute to the strategic security of the United States.

1. The United States has a coal resource base of approximately 438 billion tons or about 2 trillion barrels of oil equivalent.[25] These reserves are so large that neither production nor exports will be restricted by availability. Currently, the United States is exporting coal to Europe, and the political decisions necessary to expand this trend must be made. If our European allies are to plan their energy futures based upon greatly expanded coal deliveries from the United States, we must make certain that the adequate supplies will be forthcoming.

The federal government, in cooperation with state governments and the private industrial sector, must take the necessary steps to: (a) expand rail infrastructure, (b) improve port facilities, and (c) trim regulations that discourage domestic production. In order to be effective, such a program cannot be pursued on a piecemeal basis or in a half-hearted manner. These efforts must be highly coordinated because they are interdependent. Indeed, if production is increased, there must be assurance that the rail facilities are available to bring the coal to ports which can accommodate the flow of transport vessels.

In addition to decreasing European dependence upon Soviet energy, a major U.S. coal export program will have a positive impact upon our trade balance and help stimulate growth in our economy. The following option would have a similar beneficial impact upon our limping economy.

2. The U.S. synthetic fuel industry is in its infancy and will require massive investments in order to develop. The natural resources necessary for the development of a major U.S. synfuel industry do exist. As in the case of coal, reserves are not a factor constraining development of the industry. We must encourage our European allies to invest in our long term energy resources rather than tie their future to the Kremlin. Such investments will accelerate the development of the industry in the U.S. and provide greater supply security for our allies. We should, therefore, embark upon a campaign to attract European investment in American synfuel plants and guarantee them a share of the liquid product for their markets.

The American and Soviet energy situations are, in many respects, similar: We both have huge resource bases; we both are exhausting our easily accessible and inexpensive supplies; we both must make huge investments to exploit remaining substantial resources. Our allies should help us promote the development of these resources and should think twice before making heavy investments in the U.S.S.R.

The U.S., Japan, and West Germany have a history of multilateral cooperation in the area of synthetic fuel technology development. As it becomes increasingly apparent that the Free World will need synthetic fuels as a part of its energy balance, opportunities for investments in the U.S. industry will increase. These foreign investments should be encouraged, not only because they will assist U.S. energy development but also because they will promote greater strategic security for the West.

3. North Sea—particularly Norwegian—natural gas reserves represent a potential major source of energy for Western Europe in the late 1980s to early 1990s. While current Norwegian policy continues to stress conservation of domestic resources, a concerted effort by NATO members might be persuasive in shifting Norwegian government views. Norway is not likely to invest the capital in developing some of its North Sea gas resources on an urgent basis unless the financial incentives are excellent. The United States should, therefore, urge that NATO as an institution invest in the development of the requisite infrastructure to accelerate North Sea gas production and treat the entire matter as an alliance security issue. Given the potential dangers implicit in the Soviet gas pipeline, the development of alternative supplies is just as much a strategic security investment as military procurement. Such a program would not only benefit Norway by greatly reducing the costs of North Sea gas development but would also have a major psychological impact upon NATO and the Soviets. We would be redefining the way we think about the relationship between energy and security.

4. The advent of the Carter administration ushered in a phase of American withdrawal from the international nuclear electric power community. Although this withdrawal was intended to contribute to non-proliferation of nuclear weapons, all that was accomplished was reduced American influence in a field of growing importance. Indeed, only a country that plays an active role in the international nuclear community can have a meaningful impact upon the developments in the field.

The U.S. must seek to re-enter nuclear export markets in an aggressive manner. The Administration should lend political support to U.S. nuclear industries seeking to market reactors in Western Europe. Furthermore, we should take the necessary steps to provide reliable enrichment services to our customers and seek to reduce European dependence upon Soviet enrichment.

5. Can the United States help Europe improve its access to natural gas sources outside the U.S.S.R.? Options are available that would improve both our own position and that of our allies. A fundamental change in U.S. domestic and international gas policy is long overdue. Currently, we are discourag-

Footnotes at end of article.

ing domestic gas production through price controls and encouraging gas imports by allowing other countries to charge more than our own producers are allowed to receive. Accelerated gas price decontrol should help stimulate domestic production and enable the U.S. to decrease its dependence upon gas imports.

To the extent that the U.S. will still need imported gas supplies, we should emphasize regional trade relations rather than long haul liquefied natural gas (LNG) from Africa and elsewhere. Indeed it makes good political and economic sense to maintain close relations with our Canadian and Mexican neighbors and possibly seek to develop an LNG relationship with Trinidad. By emphasizing proximate trade relations rather than long haul LNG deals, the transportation costs of moving gas would be greatly reduced. Furthermore, if we agree to pay high prices for African LNG, it can be expected that Canada and Mexico will seek to obtain equivalent revenues for the gas they sell us.

African gas is more proximate to our European allies than it is to us and can be an incremental alternative to Soviet imports. There are substantial gas resources in Algeria, Nigeria, and the Cameroon which we should encourage our European allies to purchase. These gas supplies would be less expensive for Europeans to buy than for the United States. Furthermore, by refraining from bidding on African gas, we would both reduce the bargaining leverage of these producers by limiting their potential markets to the European theatre and help to create monopsonistic markets.

In spite of the above, the U.S. government has sought to salvage America's faltering LNG relations with Algeria. (The Algerians stopped deliveries in April 1980 under the El Paso project when the company refused a 200 percent price increase.) The U.S. also has an option to compete against our European allies by seeking to purchase LNG from Nigeria. It makes no sense to compete against our allies for gas which we do not need and cannot afford at a time when those allies need supplies outside the U.S.S.R. and can purchase African LNG at more reasonable rates than we can. In assessing this problem, the Comptroller General of the U.S. issued a major report on December 16, 1980 which stated that:

GAO does not believe importing large amounts of LNG from OPEC countries is in the national interest. LNG imports generally trade oil dependence for gas dependence. It makes little sense to increase U.S. dependence on gas at a time when extraordinary steps are being taken to reduce dependence on oil.

We do not mean to suggest that any one of the above options can replace prespective Soviet energy deliveries to Western Europe. But the Yamal line could not be completed before 1985 at the earliest, and we have sufficient time to take steps that will at least mitigate the political/economic impact of this line should it be completed. It is time for us to propose to our allies that they seek to tie their energy future to our resource base by investing in U.S. coal, synthetic fuel, and nuclear technology and services. We must also demonstrate that we are prepared to reorder our international energy trade patterns to provide more gas to their markets from non-Soviet proximate sources. Taken together as a package, these measures could greatly reduce the dangers implicit in European dependence upon Soviet energy.

Given the critical importance of Soviet energy developments to Western security, the United States cannot afford to adopt a passive or reactive posture. Neither can we be insensitive to the energy needs of our allies by suggesting only negative policies—policies designed to restrict Soviet energy development without any positive supply alternatives. The approach we have suggested is both positive and realistic. If adopted, our program can help revitalize NATO, develop closer ties with the oil-producing countries, accelerate U.S. energy proliferation, develop alternatives to increased European dependence on Soviet gas, and meet the security challenges of the 1980s.

THE 41ST ANNIVERSARY OF THE BALTIC OCCUPATION

● Mr. RIEGLE. Mr. President, June 15 marks the 41st anniversary of the brutal occupation by the Soviet Union of the three Baltic nations. This action was characterized by—to that date unknown—violence, inhumanity, and the following year the forcible deportation of thousands of men and women to Siberia.

These deportations took place under incredibly difficult conditions. Many of the deportees perished from exhaustion, hunger, winter cold, and beatings. We are unable to compile an accurate record or accounting of these events, and can only speculate on the true nature of these crimes against humanity.

Mr. President, the subjugation of the Baltic nations—Estonia, Latvia, and Lithuania—has continued to this day. The Soviet Union remains in political and military control of these nations, and every spark of rebellion or disagreement is promptly extinguished by the Soviet police. As recently as 1979, the 45 signers of the Baltic Memorandum, which called for the abrogation of the Molotov-Ribbentrop Pact, have seen their lives disrupted. Six were arrested, two were committed to psychiatric institutions, two died, another was forcibly resettled, and one escaped to the West. The other

33 wait in fear that each day will bring new arrests.

I strongly believe that the United States should bring the continuing oppression in the Baltic nations to the attention of the world. The Soviet Union has not shown any signs that it will abide by the terms of the Helsinki Agreements, and in fact, the war of attrition that continues in Afghanistan serves to remind us that domination is the primary tool of that government.

June 15 should be a day of recollection for us all; to remember that the blessings of liberty are not guaranteed to all peoples of the world. The Baltic nations have kept their hopes of independence alive through the efforts of their communities in the United States and around the world. I am proud to represent one of the largest Baltic communities in the United States, and know firsthand the contributions that these hard-working and talented people have made to our country.

I share their hopes that their countries will one day be truly independent, and that their families will be able to begin each day free from the shadow of oppression which covers the entire Baltic region.●

COMMENDING THE EFFORTS BY DAIRYMEN, INC. IN INITIATING A PROGRAM TO REDUCE THE SUPPLY OF MILK AND GOVERNMENT OUTLAYS

● Mr. HUDDLESTON. Mr. President while much has been said about current stocks of milk products held by the Commodity Credit Corporation, efforts by milk producers to reduce the flow of milk and thereby reduce Government outlays have been totally ignored.

I would like, therefore, to call to the attention of my colleagues a producer-initiated project to help solve the problems of mounting surpluses by members of Dairymen, Inc., headquartered in Louisville, Ky. I submit for the RECORD the results of their "cull cow" program as an excellent example of what can be done by dairymen working together to bring into balance their shared and common problem of oversupply:

Dairymen, Inc., a milk marketing cooperative, with dairy farmer members in fourteen southeastern states and whose headquarters is located in Louisville, Kentucky, had a problem of too much milk production this spring.

Instead of asking for government assistance, they initiated an innovative, short-range marketing program called the "management efficiency" program designed to cull low-producing cows. As an incentive to encourage each member to cull their herd from March 5 through 31, they offered to pay $100 for each cow their members sold for slaughter after a minimum number was reached.

The results were outstanding. Of the 6,838 members 4,319 or 68.16 percent participated in the program. They culled 22,483 cows which resulted in 3.24 percent of the production taken off the market. The 16.9 million pounds of milk per month represented over 380 tankers of milk that did not have to be moved out of the market area. Instead of paying for hauling with a high energy loss and loss in their milk check, the money flowed back to the dairy farmer owner.

This indeed was a self-help program. It is one of the finest examples of what cooperatives can do to meet a marketing and supply situation. I commend Dairymen, Inc. for their "management efficiency" program.●

U.S. POPULATION

● Mr. PACKWOOD. Mr. President, according to the latest U.S. Census Bureau approximations, the total population of the United States on June 1, 1931, was 229,101,969. This represents an increase of 215,236 since May 1, 1981. During the past month we have added enough people to our population to more than fill the city of Corpus Christi, Tex.

The final count of the 1980 census was 5 million more than what was anticipated. This has made any comparison between 1981 figures and 1980 figures meaningless at this time. I should be able to resume the yearly comparison in October or November.●

SUPPLY SIDE ECONOMICS AND RURAL PEOPLE

● Mr. PRESSLER. Mr. President, along with a number of my colleagues, I am very concerned about a proposal by the Office of Management and Budget to target the Rural Electrification Administration financing system for radical changes. Over 40 Senators have joined in a letter to the President regarding these cuts. I have also recently introduced a resolution, Senate Resolution 134, expressing the sense of the Senate to assure continued access of the REA to the Federal financing bank. An excellent editorial by Bob Feregan recently appeared in the Madison (South Dakota) Leader on the effects of these proposed budget cuts. Mr. Feregan is a very knowledgeable person concerning REA. He is a former Administrator of the Rural Electrification Administration and is now the manager of the administrative services division of the East River Power Cooperative in Madison, S. Dak. For the benefit of my colleagues who wish to acquaint themselves further with this subject, I ask that the text of the article be printed in the RECORD.

The article follows:

SUPPLY SIDE ECONOMICS AND RURAL PEOPLE

In our anxiety about the national economy, we Americans reach out for new economic faith from time to time on which to hang our hopes for a better tomorrow. The current best seller in the popular economic press is Professor Milton Friedman's The Right to Choose, principles of which are being invoked by the administration's "supply side" economists. As their theories are molded in policies and programs, every area of our lives will be affected, whether or not we are interested in economics.

Rural Americans should have special concern today for the effects upon agriculture and related programs as the new theory is applied to them. One example of grand economic theory leading to inconsistent and discriminatory policy is to be seen in the administration's proposals for the Rural Electrification Administration loan programs. The Office of Management and Budget (OMB) under general administration guidelines for reduced spending, has targeted REA loan programs for drastic change. OMB Director David Stockman wants to greatly reduce revolving loan fund levels for distribution systems and to deny entirely power supply cooperatives the access they now have to Federal Financing Bank funding of REA guarantees. The truth is that neither program affects the budget. Both are off budget and require no appropriations by Congress.

At the same time it is proposed that rural electric cooperatives have their basic financing programs radically dislocated, the same supply side economists are asking Congress for more liberalized tax laws and accelerated depreciation for industry, including private utilities. Aside from the question of whether such tax incentives will produce the stimulated plant investment sought (Wall Street has expressed doubt), OMB's narrow interpretation of what constitutes legitimate government action in the market place will reduce the costs of the well-to-do segment of the electric utility industry while greatly increasing the costs of the rural segment serving sparsely settled areas.

In eastern South Dakota, if OMB is successful, rural people will pay a conservatively estimated $278 million in increased electric rates over the next twenty years because of increased interest rates alone. That is an average of about $19 million annually. That is inflationary. That will affect main-street business negatively.

We are pleased that the entire South Dakota congressional delegation has spoken out in favor of retaining the REA loan programs, seeing the reality of the situation through the smoke and clatter of the supply side economic battle going on in Washington. Rural South Dakota and rural Americans will profit from their clear sight.●

METHANOL AS TRANSPORTATION FUEL WOULD SUBSTANTIALLY ELIMINATE NEED FOR U.S. OIL IMPORTS

● Mr. RANDOLPH. Mr. President, I have often stated that the role of synthetic fuels should and will grow as oil prices make them economically competitive. Because synthetics, however, are more expensive than petroleum or petroleum products, the synthetic fuels industry will not emerge or grow on its own. We must now continue to support the strategy developed last year to assure synthetic fuels production is stimulated—thus replacing oil in all manner of existing applications.

One element of that synthetic fuels strategy is the contribution that methanol fuels can make in meeting the energy needs in the private transportation sector. If high-quality, clean-burning fuel made from coal would be commercialized on a large scale, benefits to the Nation would be very great. Cars would be burning fuel derived from domestic resources, manufactured by American workers, and distributed entirely by a national network.

These potential benefits were discussed in an editorial on June 8 in the Washington Post editorial "The Coal-Burning Car." I ask that this editorial and my response to it be printed as part of these remarks.

I would like to bring to the attention of my colleagues the final report of the U.S. National Alcohol Fuels Commission, "Fuel Alcohol and Energy Alternatives for the 80's." This report discusses the benefit of both methanol and ethanol as transportation fuel and details how we

might move toward committing significant segments of our transportation sector to run on both methanol and also ethanol blends.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 8, 1981]

THE COAL-BURNING CAR

An automobile that runs on coal? It exists, and it opens interesting possibilities for further reductions in this country's needs for foreign oil. General Motors has developed experimental cars that burn finely powdered coal in turbine engines. But a solid fuel raises a long string of difficulties—not least of them the pollution inherent in coal. It's a lot simpler to use the coal in liquid form, as methanol, in engines very similar to the present gasoline engines.

Ford and General Motors have both done a lot of work on methanol engines. Ford in particular has carried out repeated demonstrations—in one case driving methanol-powered cars across the country—to persuade people that the idea can actually work. In Brazil, both companies are making cars that run on a closely related fuel, ethanol. The difference between the two alcohols is that ethanol must be made from plant matter while methanol, manufactured from coal, is not a competitor with the food supply.

Methanol is superior, in several respects, to gasoline. Its high octane permits high compression engines and high operating efficiency. It burns clean. It's safer to handle. Racing cars have used it for years. Gasoline became the standard highway fuel simply because, until the 1970s, crude oil was extremely cheap. It's time to reconsider the assumption that cars have to run on gasoline, and only gasoline.

But public policy will strongly influence any transition to another fuel. Methanol now is probably competitive in price with gasoline—if it can be manufactured efficiently. That requires large plants, and, at current interest rates, the nature of the financing will be crucial. The Reagan administration has been ambivalent about the new U.S. Synthetic Fuels Corporation. But this is precisely the kind of undertaking for which the corporation was designed.

A new fuel always runs into the chicken-and-egg question, as the engineers gloomily call it. The oil and chemical companies won't put methanol into service stations until there are cars on the road that use it, and the automobile companies can't sell methanol cars until the fuel is widely available. Diesel passenger cars are on the market only because the heavy trucks created a diesel fuel network, and unleaded fuel is at the pump only because federal law required it.

To say that the market will take care of the transition to a new fuel is merely fatuous. Like unleaded gasoline, the next fuel—whether methanol or another—will probably require a push from the government. With its enormous reserves of coal and its inadequate oil, this country cannot ignore the opportunity to begin shifting American automobiles on to coal-based fuel. It can't be done quickly. But, after two worldwide oil crises and the gasoline lines that they brought, it's hard to think that many Americans would favor a national policy of standing by, hands in pockets, to wait for a third oil crisis, and a fourth.

U.S. SENATE,
Washington, D.C., June 8, 1981.

MS. MEG GREENFIELD,
Editorial Page Editor,
The Washington Post,
Washington, D.C.

DEAR MS. GREENFIELD: The editorial, "The Coal Burning Car," in The Washington Post of June 8, is a constructive appraisal. Your premise that coal must relieve our immediate dependence on foreign-based energy, by replacing oil in existing applications, is valid. We have been justly proud of our mass production and distribution of automobiles for the mobility of people and products.

We have known for many years, however, that mineral resources such as oil are not supplied to any geographical area in unlimited amounts. Today the United States, with its high level of oil imports, is facing the reality that it is one of the "have not" nations where oil is concerned. I recognized this fact as sponsor of the "Synthetic Liquid Fuels Act of 1944" which became law during the Franklin Roosevelt Administration.

During discussion of that legislation I urged that when we are required to turn to coal and oil shale as the chief source of motor fuels in the United States, we should have the process for immediate application. We certainly do not want to panic in emptying our natural petroleum reserves while waiting for satisfactory coal liquefaction methods to be developed.

In 1943, at our hearings, Harold Ickes, Secretary of Interior, demonstrated a motor which operated equally well on regular petroleum gasoline made from coal. The gasoline from coal (methanol) was processed by the Bureau of Mines in a small pilot plant in Pittsburgh, Pennsylvania. Automobiles ran on products produced from this plant on the streets there. Scientists, at that time, tested 15 different domestic coals. They found that each of them could be used to make methanol and other products.

This example serves to illustrate that our automobile manufacturers have, for many years, had the opportunity to develop and use synthetic coal-based liquid technology. It also emphasizes the central point which you have made that transition to another transportation fuel other than gasoline will require participation by the Federal government.

Passage of the Energy Security Act of 1980 sent the message of OPEC that we, again, are encouraging the construction of synthetic fuel plants, not only through subsidy support where needed to assure early commercialization, but through protection against unwarranted regulation and inflationary impacts. It also signals to domestic energy industries that we expect immediate action on synthetic fuels. The President should initiate necessary activities to reach this goal under the Defense Production Act of 1950 as the Synthetic Fuels Corporation is being organized.

It is important now that we do not step backward in our national commitment to synthetic fuels. The President should appoint the final two members of the Corporation Board and provide his personal leadership in the activities of the organization to guarantee its vitality.

A coordinated, balanced syntheic fuels program to produce transportation fuel will serve our Nation well. It will give us the opportunity to use our highest sulfur coal, often unsuitable for direct utilization, to not only produce methanol for personal vehicular transportation, but diesel fuel for our trucking industry, fuel oil for industrial boilers, and chemicals for plastics. Government participation in such projects is not subsidies but represents investment for the security of our future generations.

We need to assure that American industry continues to receive strong signals from Government to begin preparation now, so that methanol and the vehicles to use it will be available when more severe oil import interruptions occur.

Very truly,

JENNINGS RANDOLPH.

INNOVATIVE CHILD ADOPTION PROGRAM IN MICHIGAN

● Mr. RIEGLE. Mr. President, there is no human need more basic than a secure and loving family. Children who are homeless not only suffer, but become vulnerable to psychological stress and problems in adjustment. While we all recognize the importance of finding adoptive parents for homeless children, unfortunately, some children in our country have more difficulty being adopted.

Happily, I am able to report today that an innovative agency in Detroit has been unusually successful during the last 10 years in helping to meet this challenge. The Homes for Black Children agency has explored new directions in placing black children into adoptive families. The excellent work of this organization was recently noted in an article by the Children's Defense Fund Report. I would like to enter that article in the RECORD both to applaud the efforts of this Michigan agency, as well as to bring added focus to the importance of this problem.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DETROIT GROUP BREAKS THROUGH FINDING FAMILIES FOR BLACK CHILDREN

Nationally, black children are far less likely than white children to be adopted. But an innovative agency in Detroit has begun to turn this situation around. In 11 years Homes for Black Children has found adoptive families for 800 black children, all but shattering the myth that "black children are unadoptable." It has placed black children as old as 15 and as many as six siblings together.

In 1969, when Homes for Black Children opened its doors, there were 300 black children in the Detroit area legally free and waiting to be adopted. Today the organization has 153 black families waiting to adopt and only 100 black children on the waiting list. Eleven years ago most of the 300 children who waited were healthy, normal and young—infants or preschoolers. Today "to my knowledge, there are no healthy, normal, young children waiting," says executive director Jacquelynn Moffett. The 100 or so black children on waiting lists now are eight years or older or handicapped or siblings. Before, they might have been written off as unadoptable and relegated to a life without a permanent home.

BREAKING DOWN BARRIERS

Many agencies that write off black children as unadoptable fail to reach out into the black community to find adoptive families. They assume that black families are not interested in adopting and will not respond to an agency's appeals. Further, they impose home ownership, age, fertility, income, and other eligibility requirements that, as Moffett puts it, "don't have a whole lot to do with being a good parent." Homes for Black Children has worked hard to overcome these barriers to black adoptions as well as what agency president Sydney Duncan calls "the minority psychology"—the feeling among black families that social institutions are there to serve others, not them.

Some of the agency's most successful matches have been with families "who are not your middle-class model." One woman who stands out in Moffett's mind is single and illiterate. A traditional agency would have sent her an application and missed her completely. She may not read or write, Moffett says, "but in getting to know her, we learned she had all the pluses," including a Horatio Alger-like

drive and an unusual conscientiousness about her work as a presser for a cleaning business. Her first adoption worked out so well that the agency placed a second, problem child with her—an eight-year-old girl who had been "bounced around" from one temporary home to another. At first, Moffett remembers, "the child just flipped out in the placement," setting fires and fighting with other children. But within a year she has responded to the mother's discipline and love, stopping her bizarre behavior, and the adoption was finalized.

AN AGENCY'S AGENCY

Other private agencies in Detroit have learned from Homes for Black Children's example and found their own adoptive families for black youth. Further, since the 1973 Supreme Court decision more women—black and white—are having abortions or deciding to keep their babies. The result: Homes for Black Children arranges fewer adoptions now than it once did—43 in 1980 as compared with 135 the first year.

Most of its referrals come from other parts of Michigan and from the Wayne County Department of Social Services, which refers children to the private agencies on a rotating basis.

It has become, Duncan says, an "agency's agency" and begun a national effort, funded by the Department of Health and Human Services (HHS), to help other cities launch comparable programs. Most of the HHS money will go directly to agencies in seven or eight cities to help place 100 black children a year with permanent families. Homes for Black Children will select the cities, share with them everything they can bring to bear that will help them reach out to black families, and ensure that the agencies in each city actually identify and plan for individual children before the funding begins, in January 1982. Thus far, five cities are slated to participate: Washington, D.C.; Kansas City, Mo.; Philadelphia; Chicago; and Miami.

THE DREAM: A "TOTAL CARE AGENCY"

Moffett dreams the agency will become a "total care agency"—one that offers the full range of services, from finding adoptive homes for children to helping black families stay together. Today Homes for Black Children devotes three-quarters of its budget and staff to a Black Family Preservation Program for parents who have abused or neglected their children. The Department of Social Services refers some of the parents who participate; others are self-referrals. Most suffer from an "inordinately low amount of self-esteem," Moffett says, adding, "we do whatever works."

For example: For a year a woman in her early 30s with several children seemed barely to respond to counseling. She was hostile to the staff. She lived in inadequate housing but had no desire to move. The turning point came when the staff sponsored a one-day glamor clinic for her and others in the program. The experience made this mother's counseling real to her and transformed her physically and emotionally. "I didn't know that other person was hidden in there," she told Moffett. Within a year, she had moved to new housing, was functioning well, and was able to care for her children without counseling.

There have been other successes as well. Not long ago, Homes for Black Children conducted a pilot program for parents considering putting their children up for adoption. When the pilot program ended, only one of the 10 parents "followed through" with her plan. The agency helps parents find child care, homemakers help, and similar services by "coaching people to advocate for themselves," Moffett says.

Moffett sees fewer and fewer black children growing up in foster homes, group homes, and institutions. In Michigan, Moffett says, the Department of Social Services has begun to take an interest in planning permanent homes for children. Yet nationally, Duncan believes, two problems stand in the way of getting permanent families—their own or adoptive—for black children. The first is the threat of a social services block grant proposed by the Reagan Administration. The block grant would repeal the Adoption Assistance and Child Welfare Act of 1980 (P.L. 96-272), which provides federal money to assist states with adoption subsidies for children with special needs; all families are eligible for the subsidies, regardless of income. "If that gets knocked out of the way," Duncan says, "it would be a step backwards." The law also requires that states provide services to prevent families from breaking up, reunify families, and find adoptive families for children in order to qualify for federal funds. Duncan sees a real movement on the part of states to prepare to qualify and respond to the new law. If it is repealed, the states could revert to business as usual.

The other barrier to permanence: social workers and child welfare officials do not like to make hard decisions about children. They fail to recognize that almost any decision is better than no decision. No decision means the agencies become the parent and the child remains in limbo. Undesirable as that is, Duncan notes, it is often easier than facing a psychotic mother who very much wants to keep her two children and telling her that "she just simply doesn't have it in her insides to care for them." It is easier than finding an alternative for the two children.

Homes for Black Children is funded by the United Way and has a purchase of service agreement with the state of Michigan. For more information, write: Homes for Black Children, 2340 Calvert, Detroit, MI 48206.●

FEDERAL GOVERNMENT CONSULTANT SERVICES

● Mr. PRYOR. Mr. President, over the last 2 years, I have called to the attention of my colleagues the wasteful and unnecessary spending of taxpayer funds on Federal Government consultant services. These activities now cost several billion dollars a year and controls over these expenditures are woefully inadequate. Because of this situation, I have proposed reductions in such expenditures and have introduced with 17 cosponsors, S. 719, the Consultant Reform and Disclosure Act of 1981.

In yesterday's New York Times, Mr. Frank J. Popper discussed the subject of consulting services for the Federal Government in an article entitled "True Tales of Consulting for the Feds." While I may disagree with some of his conclusions, I believe he has presented some very interesting and useful insights into this activity. I therefore ask unanimous consent that this article be printed in the RECORD for the benefit of my colleagues.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHY THERE'S WASTE AND ABUSE—TRUE TALES OF CONSULTING FOR THE FEDS

(By Frank J. Popper)

In its first hours in office, the Reagan Administration ordered Federal agencies to cut their expenditures for outside consultants by 5 percent. The order was in part a reaction to charges, many of them substantiated, of widespread waste and abuse in Federal consulting.

The basic difficulty is that the Federal consulting market contains incentives unlikely to induce good work. Most consulting firms are small, thinly capitalized, often evanescent businesses scrambling to survive in a buyer's market. In any one field, there are many consulting firms and few Federal agencies to hire them. In such a situation the firms inevitably tend to exaggerate their abilities and to promise more than they can deliver.

The agencies are poor at preventing projects from going awry. The contract officers are slow to react to draft products of projects, especially in ways that will allow timely adjustments in the consultants' work. The agencies also lack specific devices to abort projects where the consultant performs inadequately, events outrun the project, or the concept behind the project turns out to be misguided for reasons that are nobody's fault. In early 1973 I was part of a large team examining the environmental and economic impacts of second-home developments in rural areas. But by 1974 the oil embargo and the recession had nearly destroyed the market for distant leisure homes. In 1976 our study was published anyway, and almost no one noticed.

In addition, the Federal paperwork requirements compel consultants to submit frequent, lengthy, often meaningless progress and financial reports whose production and review will interfere with the real work of the projects. The paperwork also slows payments for completed work; at the moment several agencies owe me money for work I finished over three months ago—a tardiness I have rarely experienced with private clients. The slow payments sometimes force hardpressed consultants to dun agencies for payment for past work on a project in order to finance doing the rest of it—an unhappy situation that will not encourage quality work.

The Federal agencies disconcert the consulting firms, too. After a project is awarded, an agency will sometimes alter its subject so drastically as to undo the competitive bidding that was supposed to justify the award in the first place. Recently I was part of a group that received an Environmental Protection Agency contract to analyze the siting of regionally needed but locally objectionable activities such as nuclear-waste and toxic-chemical disposal facilities. After an obscure struggle between two E.P.A. branches, the agency decided that our main assignment would be to do estimates of the future production of toxic chemicals—a very different task, for which another group might have been more qualified.

In another case a black-owned firm received a contract from the Energy Department under a program to encourage minority businesses to enter the energy field. The firm had no energy people on its staff, but its proposal stated that it would hire a former Interior Department subcabinet official to run the project and would engage several subcontractors, including myself. The Energy Department then rescinded the contract. The department, which was having a complex turf fight with the Interior Department over precisely the subjects of our study, said that the black firm lacked energy experience—which the department had known all along, to the point of agreeing to our arrangements to make up for the deficiency.

The consultants must compete ferociously. Perhaps 30 firms will write proposals to do a given project, and 29 will have to absorb the costs of writing the proposal. All the firms have to overbid on projects to cover proposals and other costs of getting business. They also have to provide for unpredictable periods when many employees have no paying work.

The turbulence of the firms' market affects their internal life. The prized employee is not the one who conceives, carries out or supervises publicly useful projects. Instead, it is the one who gets new business—work whose actual performance is often left to others. Another valued employee is the one who routinizes the work by selling what is

essentially the same project to a whole series of agencies.

These deformations do not create good morale in the firms. Turnover is high. Staffers are hired and dismissed with great alacrity as projects come and go and specialties bloom and fade. Almost no one has time, inclination, or reason to acquire deep expertise in their fields. Job security is minimal; one is only as good as one's latest project. Few good livings can be made year after year in Federal consulting.

With a few exceptions such as the Department of Housing and Urban Development, Federal agencies rarely assign their best people to manage consulting contracts. The contract officers often know little about the subject matter of their projects. They tend to issue vague specifications that provoke vague or unfeasible proposals from consultants, who simply cannot tell what the contract officer has in mind.

The contract officers are also enmeshed in paper. In particular, the Federal rules for competitive bidding seem to require endless reviews, concurrences and signatures that will often delay the starting date for even a short, simple project until many months after the specifications said it would begin. When the contract finally does come through, the people in the firm best suited to perform it are often unavailable or overcommitted.

The consulting firms and Federal agencies continually surprise each other in ways that do not exactly advance the public interest. The agencies never understand that the firms value employees who get contracts more highly than those who do them. The contract officers enjoy the intensity with which firms compete, but never grasp its wasteful side.

It doesn't bother them, for instance, if the vagueness of project specifications persuades dozen of firms to submit proposals for a project for which only a few are genuinely qualified. Nor does it bother contract officers that even apparently successful projects can be wasteful. In one peculiarly ill-managed firm we spent over three months writing a proposal for a project that barely lasted six.

It does bother contract officers, however, that after the project is awarded the lucky firm almost seems to lose interest in doing it. Contract officers are often shocked that the credentialed, experienced people the proposal promised never work much on the project. The people who do show up are distinctly second-line. The real job of the first-liners is to get another project.

How can operations of the Federal consulting market be improved? Here's what I would suggest:

When in doubt, have civil servants rather than consultants do projects. This approach may be cheaper and will give the projects' results more long-run influence in the agencies.

Put financial incentives into consulting contracts that will reward rapid, high-quality consulting work and agency review and punish inadequate performance by either party.

Assign more knowledgeable contract officers to projects and tie the officers' advancement to the success of the projects they manage. Also reward them if they can minimize paperwork, move projects expeditiously, and pay consultants on time.

Be willing on occasion to limit competitive bidding. Sometimes it is clear that only a few firms are qualified to bid on a project.

Create ways to abort projects that are obviously not working out.

Consider budgeting a greater portion of agency consulting money for unsolicited proposals, ones that do not respond to agency specifications but nonetheless deal creatively with agency concerns. This policy will tap the firms' inventiveness, which is what they have to offer the Government.●

ORDER OF BUSINESS

Mr. BAKER. Mr. President, there are two items, one on the Executive Calendar and one on the Calendar of General Orders, which are available for passage on this side. I wonder whether the minority leader can advise if they are cleared on his side as well. I refer to Calendar No. 155, S. 1033, on the Calendar of General Orders, and Calendar No. 206, the nomination of Fred J. Villella, of California, to be an Associate Director of the Federal Emergency Management Agency.

Mr. ROBERT C. BYRD. Mr. President, I am authorized to state that clearance has been given on this side with respect to both items.

Mr. BAKER. I thank the minority leader.

CONSENT OF CONGRESS TO AGREEMENT BETWEEN NORTH CAROLINA AND SOUTH CAROLINA ESTABLISHING THEIR LATERAL SEAWARD BOUNDARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 155, S. 1033.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1033) granting the consent of Congress to the agreement between the States of North Carolina and South Carolina establishing their seaward boundary.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. THURMOND. Mr. President, I urge the passage of S. 1033. This bill gives the consent of the Congress to an agreement between the States of North Carolina and South Carolina as to their lateral seaward boundary.

The boundary commission of those two States worked long and hard to reach this agreement, and it was subsequently adopted by the legislatures of both States to their mutual satisfaction. The appropriate agencies of the Commerce Department think this is a good bill and have urged its passage.

Mr. President, the affected States have reached an agreement; the necessary inquiries have been made, and the Committee on the Judiciary has unanimously reported the measure out. Accordingly, I ask that, pursuant to the authority vested in the Congress by article I, section 10 of the Constitution concerning interstate agreements, this measure be acted on affirmatively for the interest of these two States.

The bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1033

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress consents to the agreement between the States of North Carolina and South Carolina establishing their mutual seaward boundary, which agreement was proposed by the joint resolution of the boundary commissions for North Carolina and South Carolina regarding the delimitation of the lateral seaward boundary between the two States, executed January 20, 1978, and was adopted by the States of North Carolina and South Carolina, and which agreement is substantially as follows:

"The lateral seaward boundary between North Carolina and South Carolina from the low-water mark of the Atlantic Ocean shall be and is hereby designated as a continuation of the North Carolina-South Carolina boundary line as described by monuments located at latitude 33 degrees, 51 minutes, 50.7214 seconds north, longitude 78 degrees, 33 minutes, 22.9448 seconds west, at latitude 33 degrees, 51 minutes, 36.4626 seconds north, longitude 78 degrees, 33 minutes, 06.1937 seconds west, and at latitude 33 degrees, 51 minutes, 07.8792 seconds north, longitude 78 degrees, 32 minutes, 32.6210 seconds west, in a straight line projection of said line to the seaward limits of the States' territorial jurisdiction, such line to be extended on the same bearing insofar as a need for further delimitation may arise.".

SEC. 2. Nothing contained in the agreement described in the first section of this Act shall be construed as impairing or in any manner affecting any right or jurisdiction of the United States in and over the region which forms the subject of the agreement.

SEC. 3. The right to alter, amend, or repeal this Act is expressly reserved.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of Fred J. Villella, of California, to be an Associate Director of the Federal Emergency Management Agency.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

FEDERAL EMERGENCY MANAGEMENT AGENCY

The assistant legislative clerk read the nomination of Fred J. Villella, of California, to be an Associate Director of the Federal Emergency Management Agency.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RESUMPTION TOMORROW OF FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate resume consideration of the pending bill, the Food Stamp and Commodity Distribution Amendments of 1981, and the amendment just provided for, at 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR BRADLEY ON THURSDAY

Mr. BAKER. Mr. President, I ask unanimous consent that on Thursday, June 11, the Senator from New Jersey (Mr. BRADLEY) be recognized, under a special order, not to exceed 15 minutes, after the recognition of the two leaders under the standing order and the recognition of Senator NUNN under a special order entered earlier.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and at 6:16 p.m. the Senate recessed until tomorrow, June 10, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate June 9, 1981:

DEPARTMENT OF STATE

Dean E. Fischer, of Virginia, to be an Assistant Secretary of State.

Vernon A. Walters, of Florida, to be Ambassador at Large.

H. Monroe Browne, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to New Zealand, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Western Samoa.

DEPARTMENT OF DEFENSE

Edward J. Philbin, of California, to be Deputy Assistant Secretary of Defense for Reserve Affairs, vice Harold W. Chase, resigned.

George A. Sawyer, of New Jersey, to be an Assistant Secretary of the Navy, vice George A. Peapples, resigned.

DEPARTMENT OF AGRICULTURE

John V. Graziano, of Virginia, to be Inspector General, Department of Agriculture, vice Thomas F. McBride.

NEW COMMUNITY DEVELOPMENT CORPORATION

Warren T. Lindquist, of New York, to be a Member of the Board of Directors of the New Community Development Corporation, vice A. Russell Marane.

DEPARTMENT OF ENERGY

James R. Richards, of Virginia, to be Inspector General of the Department of Energy, vice John Kenneth Mansfield.

COMMUNITY SERVICES ADMINISTRATION

K. William O'Connor, of Virginia, to be Inspector General, Community Services Administration, vice Frankie Muse Freeman.

EXPORT-IMPORT BANK OF THE UNITED STATES

William H. Draper III, of California, to be President of the Export-Import Bank of the United States, vice John Lovell Moore, Jr.

PANAMA CANAL COMMISSION

William R. Gianelli, an Assistant Secretary of the Army, to be a Member of Board of the Panama Canal Commission, vice Michael Blumenfeld.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code. section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Sinclair Lewis Melner, [redacted] U.S. Army.

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force, in grades indicated, under the provisions of section 8284, title 10, United States Code, with a view of designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated, and with dates of rank to be determined by the Secretary of the Air Force.

DENTAL CORPS

To be lieutenant colonel

Freedman, Irving, [redacted].

To be captain

Fairbourn, Dennis R. [redacted].
Stelton, Dennis E. [redacted].

MEDICAL CORPS

To be lieutenant colonel

Fry, Harold H., [redacted].

To be major

Restituto, Norberto R. [redacted].

CHAPLAIN CORPS

To be major

Deimeke, Louis E., [redacted].

The following officer for appointment in the Regular Air Force, in the grade indicated, under the provisions of section 8284, title 10, United States Code, with date of rank to be determined by the Secretary of the Air Force:

LINE OF THE AIR FORCE

To be first lieutenant

Witzel, Robert A., [redacted].

The following persons for appointment as Reserve of the Air Force, in grades indicated, under the provisions of section 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated.

MEDICAL CORPS

To be lieutenant colonel

Asuncion, Hector P. C., [redacted].
Barnes, Robert D., [redacted].
Chapman, Daniel D., [redacted].
Delp, Glenn R., [redacted].
Donovan, William N., Jr., [redacted].
Floyd, John L., Jr., [redacted].
Fox, Charles R., [redacted].
Gage, Thomas P., [redacted].
Gens, John B., Jr., [redacted].
Grande, Donald J., [redacted].
Grant, Lee B., [redacted].
Halvorson, Harold C., [redacted].
Jordan, Henry S., [redacted].
Keller, Harrison B., [redacted].
Kuntz, Daniel J., [redacted].
Montgomery, Michael A., [redacted].
Oshea, John W., [redacted].
Pasto, George N., [redacted].
Roper, Daniel L., [redacted].
Rubinoff, Malcolm, [redacted].
Stonecipher, William C., [redacted].
St. Ville, Joseph M., [redacted].
Torkelson, Leif O., [redacted].
Vizcarra, Catalino C., Jr., [redacted].
Voakes, Verne G., [redacted].
Yockey, Charles C., [redacted].

DENTAL CORPS

To be lieutenant colonel

Hughes, Thomas H., [redacted].
Olive, Kenneth A., [redacted].
Wright, Richard L., [redacted].

The following persons for appointment as Reserve of the Air Force (ANGUS) in the grade indicated, under the provisions of sections 593 and 8351, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated.

MEDICAL CORPS

To be lieutenant colonel

Bell, Richard B., [redacted].
Boben, William R. A., [redacted].
Bullington, Walter G. [redacted].
Dugan, Michael J., [redacted].
Evans, Clifford E., [redacted].
Kwasman, Bertram G. [redacted].
McFarland, James A. [redacted].
Moreland, Robert H., Jr. [redacted].

DENTAL CORPS

To be lieutenant colonel

Rainey, Joseph F., [redacted].

The following officers for promotion in the Air Force Reserve, under the provisions of sections 593 and 8376, title 10, United States Code.

MEDICAL CORPS

Lieutenant colonel to colonel

Alandydy, Manuel S., Jr. [redacted].
Moore, Allen M., Jr., [redacted].
Pumarejo, Ramon A. [redacted].
Rissier, Herbert L., [redacted].
Seth, Suman, [redacted].
Uhrman, Richard A., [redacted].

LINE OF THE AIR FORCE

Major to lieutenant colonel

Burwell, Jack G. [redacted].
Deluca, Robert, [redacted].
Harrington, Gary L. [redacted].
Messersmith, Robert P. [redacted].
Orsini, Joseph A., [redacted].
Smith, Charles E. [redacted].

MEDICAL CORPS

Basinger, Harold P., [redacted].
Bottene, Carlos A. D., [redacted].
Josselson, Arnod R., [redacted].
Joyner, Ira T., Jr. [redacted].
Oliveros, Rene A., [redacted].
Quebral, Merle G., [redacted].
Pangilinan, Arturo P. [redacted].
Roberts, Bertram W. [redacted].

NURSE CORPS

Allen, Ann M., [redacted].
Davis, Dian J., [redacted].
Geiselman, Vivian J. [redacted].
Payne, Margaret L., [redacted].

The following-named officers for promotion in the Regular Air Force, under appropriate provisions of chapter 835, title 10, United States Code, as amended. Officers are subject to physical examination required by law.

LINE OF THE AIR FORCE

Captain to major

Dungan, Donald R., [redacted].

Second lieutenant to first lieutenant

Owens, Bruce E., [redacted].

The following-named Air Force officer for reappointment to the active list of the Regular Air Force in the grade of colonel, Regular

Air Force, under the provisions of sections 1210 and 1211, title 10, United States Code, with active duty grade of colonel, in accordance with sections 8442 and 8447, title 10, United States Code.

LINE OF THE AIR FORCE

Marsh, Paul F. xxx-xx-xxxx.

The following-named Air Force officer for reappointment to the active list of the Regular Air Force, in the grade of lieutenant colonel, Regular Air Force, under the provisions of sections 1210 and 1211, title 10, United States Code, with active duty grade of colonel, in accordance with sections 8442 and 8447, title 10, United States Code.

LINE OF THE AIR FORCE

Fischer, James W. xxx-xx-xxxx.

IN THE AIR FORCE

The following Air National Guard of the United States officers for promotion in the Reserve of the Air Force under the provisions of section 593(a) title 10 of the United States Code, as amended:

LINE OF THE AIR FORCE

To be lieutenant colonel

Maj. David C. Billow, xxx-xx-xxxx.
Maj. Richard R. Browning, III xxx-xx-xxxx.
Maj. Deloris A. Bumpers xxx-xx-xxxx.
Maj. Daryll C. Cameron xxx-xx-xxxx.
Maj. John C. Chester xxx-xx-xxxx.
Maj. Marcus Covington, Jr. xxx-xx-xxxx.
Maj. Patrick L. Dale xxx-xx-xxxx.
Maj. Michael A. Divittorio xxx-xx-xxxx.
Maj. Loren J. English xxx-xx-xxxx.
Maj. Walter R. Ernst, II xxx-xx-xxxx.
Maj. William D. Ferriel xxx-xx-xxxx.
Maj. Ralph E. Fowble, Jr. xxx-xx-xxxx.
Maj. Norman J. Goldstein xxx-xx-xxxx.
Maj. Therman W. Hodge xxx-xx-xxxx.
Maj. David C. Hurlbut xxx-xx-xxxx.
Maj. David W. Keller xxx-xx-xxxx.
Maj. Keith H. Keppen xxx-xx-xxxx.
Maj. Frederick G. Kuhn xxx-xx-xxxx.
Maj. John A. McCormick, xxx-xx-xxxx.
Maj. Joseph P. McGrady xxx-xx-xxxx.
Maj. Ronald H. Morgan xxx-xx-xxxx.
Maj. John E. Perez xxx-xx-xxxx.
Maj. Alan T. Reid, xxx-xx-xxxx.
Maj. Frank D. Rezac, xxx-xx-xxxx.
Maj. Richard W. Serfass, xxx-xx-xxxx.
Maj. Rudolph L. Shipeky xxx-xx-xxxx.
Maj. Willis J. Thayer xxx-xx-xxxx.
Maj. Elton G. Thompson xxx-xx-xxxx.
Maj. Lowell V. Ueland, xxx-xx-xxxx.
Maj. Ronald B. Wetterau xxx-xx-xxxx.
Maj. Lester R. Williams xxx-xx-xxxx.
Maj. Ronald T. Zimmer xxx-xx-xxxx.

JUDGE ADVOCATE

Maj. Stuart A. Brody xxx-xx-xxxx.
Maj. Parker A. Denaco, xxx-xx-xxxx.
Maj. Patrick J. Sampson xxx-xx-xxxx.

MEDICAL CORPS

Maj. Dennis A. Higdon, xxx-xx-xxxx.
Maj. Frederic W. Stearns xxx-xx-xxxx.
Maj. Byron B. Timberlake, xxx-xx-xxxx.

NURSE CORPS

Maj Wilma A. Engstrom, xxx-xx-xxxx.
Maj. Calvin M. Ichinose, xxx-xx-xxxx.

IN THE NAVY

The following-named lieutenant commanders of the U.S. Navy for temporary promotion to the grade of commander in the line, pursuant to title 10, United States Code, sections 5769 and 5791, subject to qualifications therefor as provided by law:

Abler, Ronald J.
Affeld, Richard L.
Airlie, Jack G., Jr.
Aldrich, James H., Jr.
Anderson, Jon E.
Aranyos, John R.
Arey, Sheldon C.
Armitage, Charles E.
Armstrong, Richard C.
Arnold, James L.
Aunchman, Leman J., Jr.
Baker, William D.
Baldy, Mark B.
Balling, Chris M.
Bankert, Harlan R., Jr.
Barker, Joseph H., III
Barry, Robert F.
Bastad, David D.
Batcheller, Peter L.
Bates, John C., Jr.
Bates, Kenneth S., Jr.
Bartholomew, Glenn S.
Baughman, John D.
Beard, Irvin E., Jr.
Beck, Brent W.
Bedinger, Henry J.
Beinbrink, Jeffrey R.
Belden, William E., Jr.
Bellamy, David B.
Bentson, David A.
Bentz, John R.
Bernard, Paul L.
Bettinger, Robert G.
Birchmier, Charles O.
Blankinship, Leslie S.
Bloyer, Stanley F.
Bodenweber, William K., Jr.
Bodie, Jeffrey G.
Bostian, Richard M.
Bowler, Roland T. E., III
Boyd, Robert M.
Boyer, Robert F.
Bradley, Richard J., Jr.
Brandenburger, Robert B.
Branum Richard C.
Breglio, Robert A., Jr.
Brennan, Lawrence M Jr.
Brich, Robert J.
Britton, Max E.
Broadhurst, William T.
Broderick, Donald J.
Brown, Duane L.
Brown, Gerald A.
Bruner, Michael G.
Bryant, Gary W.
Brydges, Richard R.
Bubeck, Richard B.
Buchanan, Charles C., Jr.
Buck, Robert M. Jr.
Buckley, Gerard F.
Bulkeley, Peter W.
Bullock, James W.
Bunch, Gerald D.
Burch, John C.
Burchell, Charles R.
Burgess, Kenneth C.
Burggren, Peter C.
Burns, Joseph M.
Burns, Joseph D.
Burns, William R., Jr.
Burrow, Barry V.
Butterworth, Robert M.
Buttinger, James D.
Calderella, Rocco J.
Caldwell, Ellis A.
Calhoun, William M.
Calnan, Gary S.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 9, 1981:

DEPARTMENT OF STATE

Chester A. Crocker, of the District of Columbia, to be an Assistant Secretary of State, vice Richard M. Moose, resigned.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Fred Joseph Villella, of California, to be an Associate Director of the Federal Emergency Management Agency, vice Frank A. Camm, resigned.

HOUSE OF REPRESENTATIVES—*Tuesday, June 9, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The Lord is my light and my salvation; whom shall I fear? The Lord is the strength of my life; of whom shall I be afraid.—Psalms 27: 1.

Lord, we acknowledge that only a foolish person admits no fears as the paths of life are walked, and we praise Your name that in spite of all that would overwhelm, You are yet our hope and source of daily strength. Help us to develop a desire for reconciliation among peoples and nations that Your perfect love will cast one fear and distrust and we will learn to look to others not with hatred or the desire for advantage, but knowing that by a righteous faith, we may see light and walk in peace. In Your name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. HARTNETT. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HARTNETT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 344, nays 7, present 1, not voting 79, as follows:

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore (Mr. RANGEL) laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
June 9, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 3:45 p.m. on Monday, June 8, 1981 and said to contain a message from the President wherein he transmits the tenth special mes-

sage for fiscal year 1981 under the Impoundment Control Act of 1974.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

FOUR PROPOSALS TO RESCIND THE BUDGET AUTHORITY AMOUNTS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-58)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report four proposals to rescind a total of $114.1 million in budget authority previously provided by the Congress. The rescission proposals affect programs in the Environmental Protection Agency and the National Endowments for the Arts and Humanities. These proposals are a part of my continuing effort to help reduce government spending.

The details of the rescission proposals are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *June 8, 1981.*

CUTS THAT HURT

(Mr. DOWNEY asked and was given permission to address the House for 1 minute.)

Mr. DOWNEY. Mr. Speaker, I must say I am enjoying watching the hubbub over at Treasury between Secretary Regan and his former 10-5-3 lieutenants on the business roundtable.

If we had a dollar for each corporate jet bringing in executives to help get the administration back on track for their tax cuts, the Federal budget would be in surplus. You see, the 10-5-3 plan originated in corporate board rooms, Mr. Reagan bought it lock, stock and barrel, and naturally, it upsets these gentlemen when the President alters their plan without consultation.

I am enjoying watching because it shows how little understanding of the legislative process business continues to have, how shocked the community was that their man, Ronald Reagan, would dare rein them in, and finally, it gives we opponents of 10-5-3 a chance to emphasize its real effect. Simply, it eliminates corporate taxes for some industries and takes other industries down to levels significantly below that of the average family.

I recognize that my views on taxes may seem somewhat old fashioned to many of you born again supply siders, but I just feel somehow that Exxon and A.T. & T.'s tax rate should not be too much lower than that of the average working man; 10-5-3 not only insures lower rates for corporations than for people, it eliminates taxes for a good many industries.

As I look out over the country and see so many people affected by budget cuts—school lunches, student loans, and so forth, it makes me feel good to see that these guys from business can understand too. It hurts to find out that you are going to get a quarter trillion dollars less in tax breaks than you thought you were going to get. Times are hard for all of us.

TERRORIST LEADERS IN WASHINGTON

(Mr. McDONALD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McDONALD. Mr. Speaker, yesterday I was shocked to receive a press release (Information Note No. 3581, June 5, 1981) from the United Nations Center Against Apartheid, announcing a conference on the United States and South Africa held at Howard University and which listed the speakers as including B. Akporode Clark, chairman of the U.N. Special Committee on Apartheid; Oliver R. Tambo, president, African National Congress (ANC); Moses Garoeb, administrative secretary of the South West Africa People's Organization (SWAPO); Representative WILLIAM GRAY, vice-chairman, Congressional Black Caucus; Dr. Robert Cummings, Department of African Studies, Howard University; Canon Robert C. S. Powell, director, African Office, National Council of Churches; and Randall Robinson, director of Transafrica.

It is shocking that two high-level leaders of Soviet-dominated terrorist groups, the African National Congress and South West Africa People's Organization, were permitted to enter the United States and travel without restriction.

While in Washington, Tambo met with some Members of the House and Senate in an effort to lend an aura of credibility to his brutal terrorist organization.

I understand that this Marxist terrorist today plans to visit Atlanta, and lunch with its mayor, Maynard Jackson. That Mr. Jackson, properly occupied with directing a manhunt for the killers of innocent children in his city, should meet with a man who directs the murder of innocent people in South Africa—both black and white—is an affront to decent people.

REPRESENTATIVE BEDELL APPLAUDS REPRESENTATIVE BEREUTER ON O'NEILL MOVE

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, I am extremely pleased that Congressman BEREUTER has decided to actively involve himself in stopping the O'Neill irrigation project in Nebraska—a waste of taxpayers' money which I have been trying to stop for several years. His help will be very much appreciated in our attempt to provide for cost-effective expenditure of taxpayers' hard-earned money rather than voting for funding of a pork barrel water project.

I have been involved in this fight for several years and it appears that we may finally win the battle. If so it will prove that it pays never to give up.

If O'Neill were completed, the taxpayers would foot the bill to the tune of over $4,000 per acre for irrigation of farmland that would realize benefits of only $400 per acre.

With our national effort to eliminate wasteful and unnecessary Government spending, this project is a prime candidate to be halted. We have a great and easy opportunity to save over a third of a billion dollars by scrapping O'Neill, which is less than 2 percent complete. I welcome Congressman BEREUTER's assistance in this effort.

WHO WANTS TO DESTROY ISRAEL?

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SCHUMER. Mr. Speaker, I rise today because so much of a storm has evolved about the Israeli raid on the Iraqi nuclear powerplant. I thought the Members of this body would be enlightened by a couple of quotations. One is from Sadam Hussein on the Bagdad Voice of the People on August 20, 1980. He stated:

> When we reject the Zionist entity's decision to take Jerusalem as its capital, we do not mean that we recognize Tel Aviv as its capital. We consider it a usurper of the territory of Palestine and of other Arab territories. * * * Some people may ask if this decision is the best that can be taken. No, a better decision would be to destroy Tel Aviv with bombs, but we have to use the weapons available until it is actually possible to respond to the enemy with bombs.

That is a quotation from the President of Iraq.

A leading Iraqi paper, Al Tawrah, on October 4, 1980, stated:

> The Iranian people should not fear the Iraqi nuclear which is not intended to be used against Iran but against the Zionist enemy.

I ask you, ladies and gentlemen of this House, to pose an analogous situation. Let us imagine that Mexico were building a nuclear reactor. Let us also imagine that Mexico were a hostile power to the United States, and that its President and leading newspapers had threatened to use their military means to destroy us. Let us imagine that we had tried for a year through diplomatic means to reduce this threat to our very existence, and were unsuccessful. Given that situation, what would the United States do?

I ask the ladies and gentlemen of this House to contemplate this analogy before condemning Israel for its action against Iraq.

CONGRESSMAN GARCIA INTRODUCES COMPANION LEGISLATION TO H.R. 2121, THE SURPLUS SCHOOL CONVERSION ACT

(Mr. GARCIA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, today I am introducing companion legislation to H.R. 2121, the Surplus School Conversion Act, which I introduced earlier this session. H.R. 2121 provides funds to local educational agencies for the renovation of underutilized school buildings. The companion legislation I am introducing today is a result of a recent General Accounting Office report recommending a Federal policy requiring Federal agencies with grant construction programs to consider the use of vacant schools in lieu of new construction.

In this era of twin and sometimes conflicting concerns of economy and environment, I believe this measure makes sense. According to the Catalog of Federal and Domestic Assistance, 24 Federal grant programs in fiscal year 1979 were authorized to provide funding for brick-and-mortar construction projects. Funding authorizations for these programs totaled over $5.8 billion. Many of these programs provide funds for a wide range of construction projects, including social service, health centers, libraries, low-rent housing, police stations, vocational education training schools, recreation facilities, small infirmaries, nursing care homes, and day care facilities.

However, the Federal agencies responsible for administering the programs do not require State and local jurisdictions that request funding for new construction to routinely consider the feasibility of renovating available vacant or underutilized schools to meet their needs. Such a requirement could increase the opportunities for making effective use of vacant schools and result in significant savings to the Federal Government.

Because there may be opportunities for substantial cost savings by using more vacant schools in lieu of new construction, the GAO believes, and I concur, that an evaluation of the feasibility of using such schools should be required before construction funds are awarded to grantees. Also, since the opportunity spans many Federal programs, I believe there should be a Federal policy requiring Federal agencies with grant construction programs to consider the use of vacant schools in lieu of new construction.

BIAGGI REACTION TO ISRAEL ACTION AGAINST IRAQ

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, the administration's condemnation of Israel was unfortunately too hasty when one considers the real and present danger posed to Israel by the Iraq atomic reactor. Our own intelligence reports indicated that the reactor could have been operational within a matter of weeks and could produce offensive weaponry. The Israeli action was more in self defense than an offensive attack which would not be in violation of U.S. law. It is important to consider the fact that Iraq has been at war with Israel and the President of Iraq has threatened to use the nuclear bomb against Israel. A strong and sovereign Israel is critical to a stable Middle East which in turn is vital to our national security. Considering traditional Arab hostility to the very existence of Israel—I maintain that their action was necessary for their own internal security.

REAL ISSUE IN ISRAELI RAID IS PROLIFERATION OF ATOMIC WEAPONS MATERIAL

(Mr. MARKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MARKEY. Mr. Speaker, the real issue is not whether we should condemn or praise Israel for Sunday's attack on the Iraqi nuclear reactor. The real issue is the proliferation of atomic weapons material caused by the export of sophisticated nuclear technology by the United States and Western European countries.

Why should we blame Israel when the real culprits are the French and the Italians who supplied Iraq a country with enough oil to build an oil-fired electricity plant on every oasis in this country with a nuclear research reactor which uses highly enriched uranium which can be converted easily and directly into an atomic bomb?

Before we judge Israel too quickly, Mr. Speaker, we should remember that they are in a state of war with Iraq because Iraq has never agreed to sign the Middle East cease-fire. In addition the President of Iraq has stated publicly that the nuclear reactor and its bomb-grade fuel would be used against Israel. In sum, Israel had its back against the wall, and from their point of view had no alternative but to destroy the Iraqi reactor.

I am introducing today, Mr. Speaker, a sense-of-the-Congress resolution calling on President Reagan to seize this opportunity to completely reexamine U.S. nonproliferation policy and the controls that we required for the export of nuclear powerplants. I hope that all my colleagues will join with me in cosponsoring this resolution and that the failure of the current international nonproliferation policy will be ended and that tighter restrictions and prohibitions on any nuclear exports will be our policy in the future.

THE ONLY QUESTION: ARE THE SOVIET UNION AND CUBA BEHIND WHAT IS HAPPENING IN EL SALVADOR?

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, news stories the last 2 days about the situation in El Salvador raise questions about last February's white paper issued by our State Department.

I am concerned, not by what is in or is not in the newsstories and the white paper, but the effect this might have in diverting our attention from the central issue of what is happening in that Central American nation.

One question can be asked about El Salvador—and only one question need be asked. That is, does anyone seriously doubt that the Soviet Union and its client-ally Cuba are behind what is happening there?

Accuracy is important in anything we do, and I deplore as much as anyone any misstatements or misrepresentations that pop up in any report—whether a State Department white paper, or a newspaper's so-called exposé story that turns out later to be a fraud.

But in reading through the accounts of alleged inaccuracies in the El Salvador white paper, I see nothing to dispute the State Department comment of yesterday afternoon: "We stand by the conclusions of the white paper."

Mr. Speaker, let us not be drawn off the main point by a campaign of nitpicking, and that is: Are the Soviet Union and Cuba behind the effort to expand international communism in El Salvador or not? Of course they are.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 3240 by the yeas and nays; and H.R. 3239, by the yeas and nays.

The Chair will reduce to 5 minutes the time for the second electronic vote.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION AUTHORIZATION

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3240.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. WIRTH) that the House suspend the rules and pass the bill, H.R. 3240, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 369, nays 12, not voting 50, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO FILE REPORT ON H.R. 2330, NUCLEAR REGULATORY COMMISSION AUTHORIZATION FOR FISCAL YEARS 1982 AND 1983

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that the Committee on Energy and Commerce may have until midnight tonight to file a report on H.R. 2330, the Nuclear Regulatory Commission authorization for fiscal years 1982 and 1983.

Mr. Speaker, this unanimous-consent request has been cleared with the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

DEPARTMENT OF JUSTICE APPROPRIATION AUTHORIZATION ACT, FISCAL YEAR 1982

Mr. ZEFERETTI. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 147 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 147

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3462) to authorize appropriations to carry out the activities of the Department of Justice for fiscal year 1982, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from New York (Mr. ZEFERETTI) is recognized for 1 hour.

Mr. ZEFERETTI. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Arizona (Mr. RHODES), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 147 provides for the consideration of H.R. 3462, the Department of Justice Appropriation Authorization Act for fiscal year 1982. The Rules Committee has granted an open rule, allowing 1 hour of general debate to be equally divided and controlled by the chair-

man and ranking minority member of the Committee on the Judiciary.

The rule makes in order a committee amendment in the nature of a substitute recommended by the Judiciary Committee as an original bill for purposes of amendment. Further, House Resolution 147 waives clause 5, of rule XXI, appropriations in a legislative bill, against this substitute.

At the conclusion of the amendment process the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

H.R. 3462 authorizes $2,326,553,000 for the purpose of carrying out most activities of the Department of Justice for fiscal year 1982. In addition to funding various divisions of the Justice Department, H.R. 3462 provides moneys for the Drug Enforcement Administration, the Immigration and Naturalization Service, the Federal prison system, and the FBI.

I am particularly pleased with the Judiciary Committee's decision to restore funds for DEA. Last Friday Congressmen RANGEL and SHAW, cochairmen of the Task Force on Law Enforcement of the Select Committee on Narcotics Abuse and Control, held hearings to examine the problems faced by State and local law enforcement agencies in combating the war on drugs.

Testimony was heard from numerous State and local law enforcement officers. They all stressed the need for the continuance of State and local DEA programs and in particular the DEA task forces. The Judiciary Committee should be applauded for showing the wisdom to restore funds for the local task forces and other vital DEA programs that will assist State and local drug enforcement officials.

As chairman of the Select Committee on Narcotics Abuse and Control, I have become acutely aware of the illicit drug market in our country and the Herculean task DEA has before it. Only through the constant vigilance by agencies such as DEA can we hope to stem the tide of illegal drugs that is presently flooding into the United States.

I urge the adoption of House Resolution 147, so we may proceed to the Justice Department Appropriation Authorization Act for fiscal year 1982.

□ 1315

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 147 provides for the consideration of H.R. 3462, which authorizes appropriations for the Justice Department for fiscal year 1982.

House Resolution 147 grants an open rule, providing 1 hour of general debate to be divided between the chairman and ranking minority member of the Judiciary Committee.

The resolution provides for consideration of the amendment in the nature of a substitute, recommended by the Judiciary Committee, now printed in the bill as an original bill for purposes of amendment. All points of order against the substitute for failure to comply with the provisions of clause 5, rule XXI are waived. This waiver would allow the FBI to utilize the proceeds from certain undercover operations to offset "expenses incurred in such operation without * * *" additional appropriation by Congress.

A motion to recommit with or without instructions is in order.

As reported by a voice vote from the Judiciary Committee, H.R. 3462 authorizes $2.3 billion for the Justice Department for fiscal year 1982. Concern has been expressed because this authorization is $38.8 million more than the administration's request. These additional funds have been authorized for the Drug Enforcement Administration, the Immigration and Naturalization Service, and U.S. marshals, attorneys, and trustees.

As the rule requested will provide us with the utmost freedom in considering this bill, I urge adoption of this resolution so we may proceed to the consideration of H.R. 3462.

Therefore, Mr. Speaker, having no opposition and no requests for time, I reserve the balance of my time.

Mr. ZEFERETTI. Mr. Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. RODINO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3462) to authorize appropriations to carry out the activities of the Department of Justice for fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. RODINO).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SOLOMON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 357, nays 1, not voting 73, as follows:

□ 1330

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3462, with Mr. SWIFT in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill will be dispensed with.

Under the rule, the gentleman from New Jersey (Mr. RODINO) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MCCLORY) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Chairman, the bill, H.R. 3462, provides authorization for appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1982. The bill provides authorization for appropriations for $2.326 billion, approximately $39 million more than the administration requested.

In the process of reviewing the authorization request, each of the subcommittees of the Committee on the Judiciary which has jurisdiction over the various units within the Department of Justice held oversight and authorization hearings. The committee had the benefit of all of these subcommittee recommendations when marking up the bill.

The full committee agreed to authorize each of the units within the Department at the administration's requested levels except for the Immigration and Naturalization Service, the Drug Enforcement Administration and the U.S. Attorneys, Marshals, and Trustees.

The INS authorization level is approximately $25.2 million higher than the administration request. This additional authorization is provided for sorely needed inspection, border patrol, and investigation positions. Because of the tremendous influx of immigrants into the United States, the committee determined this level of authorization to be the absolute minimum necessary to perform adequately the functions assigned to it under the Immigration and Nationality Act. The committee is convinced that the adoption of the cuts proposed by the administration would have a detrimental effect on the enforcement and public service capabilities of the INS. It also feels that the INS is experiencing great difficulties in meeting its current responsibilities. Any personnel or funding reductions would make it even harder for the Service to handle its current tasks and almost impossible to face up to its future responsibilities.

The committee added $3.255 million to the authorization level requested by the administration for the Drug Enforcement Administration. These funds are intended to restore positions in the State and local task forces program which is a key part of the strategy to disrupt the market in illegal drugs by focusing on middle and lower level drug traffickers. This funding will also offer much needed training to local and State police officers in handling drug enforcement cases. The additional funding will also restore cuts in DEA's Office of Compliance and Regulatory Affairs, which is responsible for combating the diversion of legal drugs to the black market.

I would like to point out that while the administration's budget submission proposed elimination of the U.S. Trustees program, the Committee on the Judiciary has determined to maintain the program at its current level of funding. The U.S. Trustee system is a pilot program for which Congress established 10 districts in the system encompassing 18 of the 94 judicial districts. The pilot program will sunset in April 1984 unless renewed, expanded or modified by Congress.

It is the feeling of the committee that, in the absence of the repeal of the statutory obligations of the Attorney General to appoint, supervise and coordinate the U.S. Trustees and because of the short life of the program as enacted, the funding for this program should be continued. This will enable the congressional intent to be carried out and will permit Congress to make the policy decisions related to the expansion, modification, or renewal as contemplated in the Bankruptcy Reform Act of 1978.

Mr. Chairman, I urge the adoption of the bill, which is consistent with our obligations to provide for the administration of justice within the constraints of the current fiscal policy.

□ 1345

Mr. MCCLORY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, first of all, I want to say how delighted I am that we have this measure before us today. This is the first time in recent years that we have had the Department of Justice authorization bill on the floor of the House before the appropriation bill. Thus, it is a landmark piece of legislation that we are considering here today. We are setting an extremely important precedent that I hope will be followed in subsequent years.

I would also like to point out, especially for the Members on my side of the aisle, that the measure that came before the full Judiciary Committee was approximately $70 million above the budget recommendation originally made by the administration.

In the full committee meeting, I offered an amendment to reduce the authorization by $35 million. It is almost unprecedented for a Republican to offer an amendment to reduce the authorization by $35 million and then have it supported unanimously on both sides of the aisle by a voice vote.

Mr. Chairman, I want the Members to know that what we are bringing here is in my view a "barebones" authorization—a Spartan budget—which is something that I think our committee always brings before this body.

The Committee on the Judiciary devoted a substantial amount of time and effort to produce the bill which we are considering today. First, individual subcommittees considered and made recommendations on matters within their respective jurisdictions. The Monopolies and Commercial Law Subcommittee marked up the original version of the bill based on those recommendations.

When the full committee considered this bill, we made every effort to cut authorized appropriations to an acceptable minimum. This was a particu-

larly difficult task because the committee in the past has not authorized appropriations for the Department at luxury levels.

The committee adopted by amendment, which included the administration's figures, except in a few areas experiencing pressing needs. Thus, we added some modest amounts for the Immigration and Naturalization Service, to which the chairman has made appropriate reference. We added $3 million for the U.S. Marshals for service of civil process in which I believe the administration concurs. Finally, we restored funds for Bankruptcy Trustees, which is consistent with the bankruptcy reform law that we passed in 1978.

Another amendment, offered by the chairman of the Subcommittee on Crime, with the support of the ranking minority member, the gentleman from Michigan (Mr. SAWYER), made a slight increase in authorized funds for the Drug Enforcement Administration. Let me emphasize that these were all increases which received substantial bipartisan support.

Mr. Chairman, most of the increases over the administration's figures contained in my amendment relate to the Immigration and Naturalization Service. That is about $25 million. As a member of the Select Commission on Immigration, which recently submitted its final report to the President and to the Congress, I am profoundly aware of the substantial problems that exist in this area.

Our committee will soon undertake the important task of revising the immigration laws in this country to deal with these difficult problems that the President himself has identified on more than one occasion. Indeed I believe the President's announcement, which will come to us in just a few days, will be consistent with the action that the Judiciary Committee has taken in recommending the figure that we have in the Department of Justice authorization bill.

But, legislative changes are not sufficient. We must also adequately staff the Immigration and Naturalization Service, which bears the substantial burden of enforcing our immigration laws, if we are to have any impact. This is particularly true with respect to the crucial role played by the Border Patrol, for which we are authorizing the restoration of positions that were not filled by the last administration.

One amendment adopted by the committee makes a modest increase in authorized appropriations for DEA. As we are all aware, drugs constitute an inextricable part of the overall problem of violent crime in this country. The amendment which our committee adopted would provide funds primarily in the areas of coordination with State and local law enforcement agencies. Such cooperation is vital if we are to effectively combat the drug problem, and I support this increase.

Mr. Chairman, again I believe that our committee has produced an authorization bill for the Department which achieves an appropriate balance between effective law enforcement and spending reductions. Our bill authorizes a small increase over the recommendations of the administration relating to the areas where Members on both sides of the aisle agreed that additional funding was imperative.

I might say that I have sent a detailed communication relating to this bill to the Office of Management and Budget. I have also sent copies to the chairman and the ranking members of the Budget Committee. In that letter, I observed that the increase included in our committee's bill is modest, but its significance, great. I am hopeful that our figures can be reconciled with the administration's budget.

Mr. Chairman, I hope that the vote in support of this legislation will be overwhelming.

Mr. RODINO. Mr. Chairman, I yield 4 minutes to the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Chairman, I am pleased to rise in support of the Department of Justice authorization for fiscal year 1982. As chairman of the Subcommittee on Courts, Civil Liberties and the Administration of Justice—which has oversight responsibility over the Federal prison system, the U.S. Parole Commission, the Office of Legal Policy, the U.S. Marshals, and the Office of U.S. attorneys—I am convinced that each of these entities will be able to satisfy its statutory and policy mandates.

There are two particular issues that I would like to clarify for the record.

In reference to the discussion in the report relating to alternative uses for the Alderson, W. Va., institution, I would like to add a few comments.

The committee has reviewed the study of the Bureau of Prisons Alderson Task Force, and supports one of three components of option 1: That is the use of Danbury, Conn., Satellite Camp as a minimum security camp for women. Presently there are no camps which house women, although several house men. Danbury is also accessible to public transportation and to work and training opportunities. However, the other two components of the option 1 raise serious problems and deserve more careful analysis before any efforts are made to implement them. One would be to convert Alderson to a cocorrectional facility. The committee questions the wisdom of maintaining an institution as remote as Alderson whether as a cocorrectional or single sex institution.

Population pressures and trends, as well as classification levels, should be carefully reviewed before this option is undertaken. Considering the present decline in inmate population, continued use of Alderson may not be necessary. The third component—developing a-150-bed-secure facility for women adjacent to FCI Lexington, Ky., raises the most serious questions. There is no documentation supporting the need for such a facility, and the Bureau of Prisons should carefully review the population trends and the relevant classification characteristics prior to pursuing this component.

It is expected that the Bureau of Prisons will keep this committee informed as it moves to implement any aspect of option 1.

With regard to section 11 of H.R. 3462—which mandates that the Attorney General develop a procedure to insure that no person under the age of eighteen shall be held as a material witness in a Bureau of Prisons or a State or local correctional facility, the primary purpose of which is to provide for the custody of adult offenders—I am pleased to announce that the Department of Justice already has moved forward to enunciate a policy. In a recent letter to me, Deputy Attorney General Edward C. Schmults stated:

Recently, you expressed concern about the conditions of confinement of alien material witnesses who are detained in the San Diego, California, area. You were apparently troubled by reports of overcrowding at the Metropolitan Correctional Center in San Diego and of incarceration of female and juvenile material witnesses at that institution.

As you may be aware, the U.S. Court of Appeals for the Ninth Circuit has ruled that the Sixth Amendment rights of a person charged with alien smuggling are violated if the Government deports any of the material witnesses before the defense counsel has had a reasonable opportunity to interview them. *United States* v. *Mendez-Rodriguez*, 450 F.2d (9th Cir. 1971). Further, experience has taught that many alien witnesses will flee if not incarcerated pending deportation. Thus, the Government is faced with a dilemma in the handling of these witnesses.

I have examined information compiled by my staff that addresses your concerns. I am convinced that the Department has responsibly endeavored to satisfy human rights and legal requirements in the detention of aliens.

The U.S. Attorney's office in San Diego has obtained court approval of a procedure under which detention of each alien material witness is limited to 10 days unless the prosecution or defense specifies within that period that the witness is needed to testify at trial. As a result, most alien witnesses are released to the Immigration and Naturalization Service for deportation within 10 days of the time they were initially apprehended.

With rare exceptions, female and juvenile material witnesses are not incarcerated. After apprehension, such witnesses are transported to the Metropolitan Correctional Center for processing, ordinarily within a matter of hours. Thereafter, they are immediately placed into one of two social service programs contracted for by the U.S. Marshals Service.

Women and young children (generally age 12 and under) are placed at the Salvation Army's "Door of Hope" facility in San Diego. It is a modern structure with private rooms, a dining hall, and recreational equipment. Witnesses lodged at the "Door of Hope" are not under any physical restraint but are asked to provide their personal assurance that they will not flee.

The Salvation Army facility was selected for this program by virtue of the fact that it is the only one in the San Diego area of sufficient size to accommodate all of the female and younger juvenile witnesses. The arrangement between the Marshals Service and the Salvation Army precludes the proselytizing of witnesses. The program was begun on July 9, 1979. From that date through February 1981, a total of 453 women and 255 children have been housed at the "Door of Hope." The average length of stay of these material witnesses has been approximately 12 days.

Older juvenile witnesses are placed in foster homes pursuant to a program developed with Catholic Family Services, San Diego. This program was begun on November 30, 1979. From that time through February 1981, a total of 517 juveniles have received shelter in foster homes. The average stay of these juveniles has been approximately three and one-half days. This is influenced by the fact that a substantial portion of these juveniles were, at the time of their apprehension, unaccompanied by an adult relative and that many defense counsel are willing to stipulate promptly to the release of unaccompanied juveniles.

The only female or juvenile material witnesses who are incarcerated are those who state that they will flee if not confined. Since November 30, 1979, less than 15 persons have been confined on this basis. Two were women and the remainder were older juveniles.

Due to the risk of flight, virtually all alien material witnesses who are adult males are incarcerated. During fiscal year 1979, approximately 3,800 such witnesses were incarcerated in the San Diego area, while in fiscal year 1980 the figure was approximately 2,000. The average length of incarceration per witness was approximately 16 days.

Most of these alien material witnesses are housed in the Metropolitan Correctional Center in San Diego, a modern facility operated by the U.S. Bureau of Prisons. They are segregated from the general population of the institution. While the alien material witness problem has taxed the facilities of the Metropolitan Correctional Center, unreasonable overcrowding is avoided through the transfer of excess witnesses to the INS Detention Center in El Centro, California. Additionally, the Marshals Service is presently negotiating to obtain space in a county detention facility. Finally, a pilot project has been started with the Salvation Army whereby a limited number of adult males, adjudged to be particularly good risks not to flee, are being placed in the "Door of Hope" facility. As of the end of February 1981, 10 male witnesses have participated in this program.

The Department's efforts to ensure the humane treatment of alien material witnesses parallel successful efforts to obtain judicial rulings narrowing the application of the *Mendez-Rodriguez* decision, thereby reducing the number of material witnesses who must be detained. The Government can now proceed immediately with deportation of aliens where the defendant has executed a waiver of his right to call the aliens as witnesses (*United States* v. *Lujan-Castro*, 602 F.2d 877 (9th Cir. 1979)) or where the aliens could not reasonably be deemed to be material to the case (*United States* v. *Gonzales*, 617 F.2d 1358 (9th Cir. 1980)).

I believe that the Department has exhibited sensitivity to the liberties of alien witnesses and their families in discharging its legal obligations to the accused and in the enforcement of the immigration laws. Please advise me if you desire further assistance in this matter.

I might add that I do not consider the world "held" in the bill to encompass the expeditious processing of material witnesses in a correctional facility. Nor does it include brief housing overnight or over a weekend while suitable alternatives are sought. In addition, the amendment does not preclude the use of juvenile facilities to detain juveniles who threaten to flee if not confined.

In conclusion, I urge an "aye" vote on H.R. 3492.

Mr. Chairman, there is only one other question that was raised last year and this year, and I would like to address it, if I may, to the chairman of the committee. That question goes to the matter of Marshals' Service of Process. The question I would like to address to my chairman is this:

Is funding provided in H.R. 3462 for the serving of private process by U.S. Marshals?

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. I yield to the committee chairman.

Mr. RODINO. Yes. In the original 1982 budget request, for the second year in a row, the Department of Justice asked for no funds to perform this activity even though the Department is expressly required by statute to do so. According to the Department, service of process by marshals is a low priority and not sustainable in a tight budget period.

At this time, however, it is clear that many district courts do not have any alternatives. This factor, combined with the fact that taking the Justice Department out of the business of serving civil process requires substantive amendments to title 28, United States Code, caused the committee to reject the Department's proposal. Funding of $3,000,000 was included in H.R. 3462 so that Marshals might continue to service private process where, either for legal or other reasons, no other alternatives are available.

It is the feeling of the committee and my feeling that separate legislation should be introduced to amend the authority to allow the service of private process only where no other alternatives are available. Further, the Attorney General should be granted authority to raise the fees for the service of process. This hopefully will encourage private businesses to provide services in those districts where alternatives presently are not available. This already has been done in the form of H.R. 3580.

Chief Justice Warren E. Burger, on behalf of the Judicial Conference of the United States, has expressed wholehearted support for the committee's position not only because it conforms with the views of the judicial branch but also because it serves the needs of the people.

Mr. KASTENMEIER. Mr. Chairman, I thank my committee chairman, and may I say to the gentleman that I urge an aye vote on this bill.

Mr. RODINO. Mr. Chairman, I yield 3 minutes to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman very much for yielding this time to me.

Mr. Chairman, I rise in strong support of this bill. I would like to extend congratulations to our chairman and to the ranking minority member, the gentleman from Illinois (Mr. MCCLORY), for having shepherded this bill to this point in a very nonpartisan and bipartisan fashion.

Mr. Chairman, the bill before us today, H.R. 3462, the Department of Justice authorization bill for fiscal year 1982, provides $388,602,000 and 10,504 positions for the Immigration and Naturalization Service.

These levels were agreed upon unanimously by the Subcommittee on Immigration, Refugees, and International Law, which I chair, the Subcommittee on Monopolies and Commercial Law, and the full Committee on the Judiciary.

The funding level in the bill before the House today restores 973 positions of the 1,355 proposed to be cut by the administration. The bill increases the administration recommended funding level by $25,226,000.

The bill restores 160 border patrol positions, all of which the administration proposed to cut. It provides additional funding for the border patrol to operate all of the helicopters now available to it and to purchase additional necessary equipment.

My subcommittee recently visited the border area in southern California and was impressed with the competence and professionalism of the border patrol. Yet, the border patrol needs the personnel and funding provided by the bill before us today if it is to patrol our borders adequately.

The bill would also restore several other personnel cuts proposed by the administration: 200 positions in the INS inspections section. Inspectors staff all ports of entry into this country.

Four hundred and three INS investigators are restored. Investigators conduct investigations leading to the apprehension of illegal aliens when they have managed to penetrate the border.

Two hundred adjudicator positions have been restored. Adjudicators handle the more than 30 types of petitions by which individuals seek certain benefits or rights under the Immigration and Nationality Act.

Finally, 10 foreign service posts were restored. These persons are important in the effort to screen refugee admissions properly.

The funding provided in the bill also includes $1 million to continue the design and implementation of a nonimmigrant arrival/departure system for the INS. The INS needs an effective and efficient control over the comings and goings of people who enter this country on a temporary basis. This system is being developed pursuant to authority the Judiciary Committee included in the fiscal year 1980 Department of Justice authorization bill.

A full explanation of the committee actions with regard to INS is found in the committee report on pages 11-21. A table showing the budget and personnel levels can be found on pages 12-13.

Having recently assumed the chairmanship of this subcommittee, I want to thank the other six members who have been active and supportive participants in our work. Developing the committee recommendations for INS was possible only with their diligent work.

I also want to thank Chairman RODINO and Mr. MCCLORY, the ranking member of the full committee for their support.

In conclusion, Mr. Chairman, while my subcommittee and the full committee recognize the need for fiscal austerity in government, each member of the committee—on both sides of the aisle—believes that the funding and personnel levels in H.R. 3462, which were recommended by my subcommittee, are necessary for the proper enforcement of our Nation's immigration laws.

Mr. Chairman, I would again make reference to the trip that our subcommittee took and I would again like to extend to all subcommittee members my appreciation for their very hard work and for the attentiveness they gave to the subject matter.

Our trip illustrated the very great depth of the immigration and refugee problems that we have in America. This bill will help solve some of these problems.

Mr. SAM B. HALL, JR. Mr. Chairman, will the gentleman yield?

Mr. MAZZOLI. I yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Kentucky (Mr. MAZZOLI). I was with him on the trip to California a few weeks ago, and I think it would be a tragic mistake if we did not pass this measure.

There is a great need for the additional people that the gentleman mentioned in the areas that we visited, and I certainly congratulate the gentleman on the position he has taken.

Mr. MAZZOLI. Mr. Chairman, I thank the gentleman from Texas (Mr. SAM B. HALL, JR.).

The gentleman is a very able member of our subcommittee. He is our ranking Democrat, and he was very active on our trip to southern California.

Mr. FISH. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I urge support of H.R. 3462 and wish to comment specifically on the authorization for the Immigration and Naturalization Service. H.R. 3462 modifies some administration proposed cuts in the Immigration Service's budget. These modifications, which add $25,226,000 and restore 973 positions, are essential to permit the Service to meet its responsibilities. The Committee on the Judiciary, although firmly committed to the reduction in Federal spending, concluded that the acute problems of immigration law enforcement could not be addressed within the strictures of the administration's budget.

The Select Commission on Immigration and Refugee Policy, after conducting hearings across the United States, overwhelmingly recommended enhanced enforcement efforts. The Commission supported increasing INS resources not only along the borders and at ports of entry, but also in the interior. Recent INS oversight hearings, conducted by the Subcommittee on Immigration, Refugees and International Law of the House Committee on the Judiciary, confirm that the Immigration and Naturalization Service has suffered from a long period of neglect. The major thrust of H.R. 3462 is not to provide newly authorized positions for the Immigration Service, but rather to restore already authorized and often unfilled positions that the administration proposal would delete.

The restoration of 200 inspector positions is critical to permit the efficient inspection of persons attempting to enter the United States. An estimated 340,000,000 inspections will need to be conducted in fiscal year 1982. The loss of 200 authorized positions would cause inordinate delays at land borders, airports, and seaports; and seriously compromise the capacity of the Immigration Service to uncover fraud.

The restoration of 160 border patrol positions is needed to maintain a credible deterrent to the entry of undocumented aliens. It actually brings authorized strength up to fiscal year 1981 levels. The Immigration Service faces an immeasurably more difficult task in attempting to discover and deport undocumented persons once they reach the interior of the United States. There is no substitute for an adequately staffed border patrol if this Nation hopes to bring its immigration policy under control.

H.R. 3462 also restores 403 investigative and 200 adjudicative positions. A drastic cut in investigative positions would cripple efforts to detect fraud and other violations of our immigration laws and would increase conferrals of immigration benefits based on fraudulent petitions. The restoration of 200 adjudicative positions is necessary to prevent inordinate delays in the dispensation of immigration benefits—delays that can cause severe hardships. Finally, the Judiciary Committee has restored 10 positions to the overseas program to permit adequate screening of refugees in countries of first asylum.

Congress, in the months ahead, will be examining a broad range of proposed reforms in our immigration laws. The Immigration Service during this period of intense congressional study, must have minimally adequate resources. H.R. 3462, by authorizing positions that are essential, commands broad bipartisan support in the Committee on the Judiciary. I encourage the Members of the House to support the enactment of H.R. 3462.

□ 1400

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. FISH. I would be happy to yield to my chairman.

Mr. MAZZOLI. I thank the gentleman for yielding.

I want to just congratulate the gentleman, who is the ranking member of our subcommittee, for his diligence, not just since I have had the privilege of being chairman, but over the years. His observations and his questions and his hard work during our trip to southern California and during these last 6 months have been very helpful to the committee. I think the gentleman would agree with me that a subcommittee has made a good start on this very difficult and mettlesome subject matter.

I would again like to thank the gentleman for his leadership and his assistance.

Mr. FISH. I thank the gentleman from Kentucky very much.

Mr. Chairman, I yield 2 minutes to a member of the committee, the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I just want to comment particularly on the immigration additions to the authorization, because that is where $25 million out of approximately $36 million that is still up in the air lies.

In my opinion, to fail to spend this $25 million in bolstering our ability to

keep illegal aliens out of the country or remove those that are here is totally counterproductive and will cost us far more money, in my opinion, in welfare and various other aids and assistance that we will be required to render. To refuse to restore these positions in that enforcement area will actually be penny wise and pound foolish.

The rest of the additions are small, approximately $3 million added to the Drug Enforcement Administration. I am sure we are all aware of the burgeoning drug problem in the country. It is now estimated to be a $64 billion traffic in itself. Not to have restored this $3 million would have cut down in particular on the ability of DEA to monitor manufacturers of legal hypnotic drugs and various other types of drugs sought for those purposes from getting out into illegal markets and adding to the huge volume of narcotics coming into the country.

So I urge very strongly support for the bill.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. Surely.

Mr. MAZZOLI. I thank the gentleman for his statements and particularly the part about the Immigration and Naturalization Service.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. FISH. Mr. Chairman, I yield 1 additional minute to the gentleman from Michigan.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield further?

Mr. SAWYER. I would be happy to yield.

Mr. MAZZOLI. I thank the gentleman. I just would say that I appreciate what the gentleman from Michigan (Mr. SAWYER) has done, because he has been one of the voices on the Judiciary Committee for the last 2 or 3 years who has been very strong in behalf of the proposition that something must be done with respect to INS. You cannot ask INS to do a job without giving it the wherewithal and the facilities and support.

I hope the House will agree with the committee that today we are making a step in the direction which will enable the INS to do the kind of work which the gentleman very accurately characterizes to be very cost-effective work. It is much less expensive for us to spend this money now than to spend all the other money that must be spent when the people are here wrongfully or overstay their welcome.

Mr. FISH. Mr. Chairman, I have no further requests for time, and I reserve the balance of my time.

Mr. RODINO. Mr. Chairman, I yield 4 minutes to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Chairman, I am not going to repeat much of what has been said about immigration and naturalization. I just want to echo what has been said by my predecessors and tell my colleague, the gentleman from Kentucky, that I feel very secure that immigration and naturalization is in his able hands. I know we will begin to address the myriad of problems that we will be facing in that important area.

I want to direct my few minutes, if I might, to the jurisdiction of the Drug Enforcement Administration, which is part of my responsibility as chairman of the Subcommittee on Crime.

Let me just acknowledge my ranking minority member, the gentleman from Michigan, Mr. HAL SAWYER, who really has offered me the kind of bipartisan support that I think has enabled us to really get some valuable insight into an important area of our Government in a short period of time—that is our work against the illicit traffic in drugs.

Let me just for a minute share with you what is happening to us in this whole area of drug enforcement. It really is disturbing. I did not realize it myself when I first started hearings. I asked the Congressional Budget Office to take a look at the inflation rate over the last few years—in fact since 1978—so I could compare what we have been giving the Drug Enforcement Administration each year since 1978 to do their job. Let me share with you just what has occurred since 1978.

In 1978, we gave the Drug Enforcement Administration $188 million. Using 1978 as a base year, I looked at the 1979 budget for DEA and found the approximate equivalent for 1979 was $178 million.

In 1980, giving effect to inflation, the DEA budget dropped to $165 million in real terms.

In 1981, giving effect to inflation over the years since 1978, the DEA budget dropped to $156 million in real terms.

In 1982, it is projected that they will have, in terms of 1978 dollars, $151 million.

At a time when we have bumper crops coming in from Southwest Asia, we are unable to interdict drugs at the source. We have more licit drugs going into the illicit drug market today than ever. Yet if you take a look at the DEA budget request, we are not really giving them the resources to do their job. The administration's proposed budget cuts in three areas in particular really give us great concern. In the area of State and local task forces it is proposed by the administration that we cut 94 of 208 positions. This is the area that has been the most effective in trying to ferret out the midlevel dealers. This is the area where we work together with the county and the State and the local law enforcement agencies in leveraging their manpower to try to get the midlevel dealers, and where we get a great deal of intelligence information. We are cutting back 94 positions if we accept the budget proposal.

In the area of compliance and regulatory affairs, it is proposed that we cut 47 of 408 positions. We do not have enough manpower right now to do a decent job in trying to stem the flow of licit drugs into the illicit market.

Finally, at a time when we are sending more programs back to the States, we are going to cut the State and local training programs, 9 of 49 positions—almost 20 percent. We should be training more local law enforcement agencies to do a better job in ferreting out drug abuse—not less.

So it was our committee's recommendation to the full committee that we restore a very, very modest $3.2 million in areas where we cannot take cuts. To cut in these particular areas—and the ranking minority member agrees—we are going to really hurt our drug-enforcement efforts in this country.

We are still not giving the Drug Enforcement Administration enough money with the budget approved by the Judiciary Committee to do the job many of us would like to see them do. If we cut these three areas, as proposed by the administration, we are going to make it virtually impossible for the Drug Enforcement Administration to do the job that they are mandated to do.

Mr. Chairman, I just hope that my colleagues will support the Justice Department authorization, H.R. 3462.

As the ranking minority member of the full committee said, we have it down to barebones and it deserves your support.

● Mr. AKAKA. Mr. Chairman, I rise in support of H.R. 3462, the Justice Department authorization bill for fiscal year 1982. I want to commend Chairman RODINO and the members of the Judiciary Committee for their work. I am particularly pleased to support the authorization for the Drug Enforcement Administration which is a full 10 percent of the total Justice Department's budget. The restoration of funds for State and local task force programs is critically important in the fight to crush the illegal drug market in this country.

The 21 task forces now operating have been remarkably successful. These task forces have provided the important link between Federal enforcement and local and State enforcement. Most importantly, the program has provided "buy money" which allows police and prosecutors to build cases against drug dealers. This "buy money" is critical for the continued successful prosecution of major drug dealers.

It is essential that we support that DEA authorization as reported by the committee. Efforts to cut back DEA funding are false savings. The dollars

saved are not worth the misery that we would be condoning. It is no secret that there is a link between drugs and crime. Studies on this link abound. The most recent report released found that 243 Baltimore heroin addicts were responsible for committing almost 500,000 street crimes in 11 years. In Miami, 356 active heroin users committed 118,134 crimes in 1 year. Ninety percent of the Miami heroin users relied on criminal activity as a means of income—only 1 of every 413 crimes they committed resulted in an arrest.

If we are serious about fighting the No. 1 citizen concern in this country, we cannot afford to cut back funding of Federal drug enforcement efforts. Far from cutting back, we should be increasing funding in this area.

A $70 billion illicit drug industry exists in the United States; we should be fighting this with at least the $231.8 million authorized by the committee.●

Mr. RODINO. Mr. Chairman, I merely want to state that the Committee on the Judiciary, by a unanimous vote of Republicans and Democrats, a record vote of 25 to nothing, thought that this bill was a necessary bill—a necessary authorization. I urge the adoption of this measure.

Mr. Chairman, I yield back the balance of my time. I have no further requests for time.

Mr. FISH. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All sides having yielded back the time, the time for general debate has expired.

Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the reported bill as an orginal bill for the purpose of amendment.

The Clerk read as follows:

H.R. 3462

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Department of Justice Appropriation Authorization Act, Fiscal Year 1982".

SEC. 2. There are authorized to be appropriated for fiscal year 1982, to carry out the activities of the Department of Justice (including any bureau, office, board, division, commission, or subdivision thereof) the following sums:

(1) For general administration, including—

(A) the hire of passenger motor vehicles, and

(B) miscellaneous and emergency expenses authorized or approved by the Attorney General, the Deputy Attorney General, the Associate Attorney General, or the Assistant Attorney General for Administration:

$37,653,000.

(2) For the United States Parole Commission for its activities, including the hire of passenger motor vehicles: $6,461,000.

(3) For general legal activities, including—

(A) the hire of passenger motor vehicles,

(B) miscellaneous and emergency expenses authorized or approved by the Attorney General, the Deputy General, the Associate Attorney General, or the Assistant Attorney General for Administration,

(C) not to exceed $20,000 for expenses of collecting evidence, to be expended under the direction of the Attorney General and accounted for solely on the certificate of the Attorney General,

(D) advance of public moneys under section 3648 of the Revised Statutes (31 U.S.C. 529),

(E) pay for necessary accommodations in the District of Columbia for conferences and training activities, and

(F) not to exceed $3,000,000 of which $2,600,000 shall be made available for the investigation and prosecution of denaturalization and deportation cases involving alleged Nazi war criminals:

$127,136,000.

(4) For the Antitrust Division for its activities: $49,566,000.

(5) For the Foreign Claims Settlement Commission for its activities, including—

(A) services as authorized by section 3109 of title 5, United States Code,

(B) expenses of packing, shipping, and storing personal effects of personnel assigned abroad,

(C) rental or lease, for such periods as may be necessary, of office space and living quarters for personnel assigned abroad,

(D) maintenance, improvement, and repair of properties rented or leased abroad, and furnishing fuel, water, and utilities for such properties,

(E) advances of funds abroad,

(F) advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission,

(G) the hire of motor vehicles for field use only, and

(H) the employment of aliens:

$705,000.

(6) For United States attorneys, marshals, and trustees, including—

(A) purchase of firearms and ammunition,

(B) lease and acquisition of law enforcement and passenger motor vehicles without regard to the general purchase price limitation for the current fiscal year,

(C) supervision of United States prisoners in non-Federal institutions,

(D) bringing to the United States from foreign countries persons charged with crime, and

(E) acquisition, lease, maintenance, and operation of aircraft:

$301,520,000.

(7) For support of United States prisoners in non-Federal institutions, including—

(A) necessary clothing and medical aid, payment of rewards, and reimbursements to Saint Elizabeths Hospital for the care and treatment of United States prisoners, at per diem rates as authorized by section 2 of the Act entitled "An Act to authorize certain expenditures from the appropriations of Saint Elizabeths Hospital, and for other purposes", approved August 4, 1947 (24 U.S.C. 168a), and

(B) entering into contracts or cooperative agreements for only the reasonable and actual cost to assist the government of any State, territory, or political subdivison thereof, for the necessary physical renovation, and the acquisition of equipment, supplies, or materials required to improve conditions of confinement and services, of any facility which confines Federal detainees, in accordance with regulations to be issued by the Attorney General and which are comparable to the regulations issued under section 4006 of title 18, United States Code:

$25,600,000.

(8) For fees and expenses of witnesses, including expenses, mileage, compensation, and per diem of witnesses in lieu of subsistence, as authorized by law, including advances of public moneys: $29,421,000. No sums authorized to be appropriated by this Act shall be used to pay any witness more than one attendance fee for any one calendar day.

(9) For the Community Relations Service for its activities, including the hire of passenger motor vehicles: $5,313,000.

(10) For the Federal Bureau of Investigation for its activities, including—

(A) expenses necessary for the detection and prosecution of crimes against the United States,

(B) protection of the person of the President of the United States and the person of the Attorney General,

(C) acquisition, collection, classification, and preservation of identification and other records and their exchange with, and for the official use of, duly authorized officials of the Federal Government, of States, of cities, and of other institutions, such exchange to be subject to cancellation if dissemination is made outside the receiving departments or related agencies,

(D) such other investigations regarding official matters under the control of the Department of Justice and the Department of State as may be directed by the Attorney General,

(E) purchase for police-type use, without regard to the general purchase price limitation for the current fiscal year, and hire of passenger motor vehicles,

(F) acquisition, lease, maintenance, and operation of aircraft,

(G) purchase of firearms and ammunition,

(H) payment of rewards,

(I) not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and to be accounted for solely on the certificate of the Attorney General, and

(J) classification of arson as a part I crime in its uniform crime reports:

$739,013,000. None of the sums authorized to be appropriated by this Act for the Federal Bureau of Investigation shall be used to pay the compensation of any employee in the competitive service.

(11) For the Immigration and Naturalization Service, for expenses necessary for the administration and enforcement of laws relating to immigration, naturalization, and alien registration, including—

(A) advance of cash to aliens for meals and lodging while en route,

(B) payment of allowances to aliens, while held in custody under the immigration laws, for work performed,

(C) payment of expenses and allowances incurred in tracking lost persons as required by public exigencies in aid of State or local law enforcement agencies,

(D) payment of rewards,

(E) not to exceed $50,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on the certificate of the Attorney General,

(F) purchase for police-type use, without regard to the general purchase price limita-

tion for the current fiscal year, and hire of passenger motor vehicles,

(G) acquisition, lease, maintenance, and operation of aircraft,

(H) payment for firearms and ammunition, and for attendance at firearms matches,

(I) operations, maintenance, remodeling, and repair of buildings and purchase of equipment incident thereto,

(J) refunds of maintenance bills, immigration fines, and other items properly returnable except deposits of aliens who become public charges and deposits to secure payment of fines and passage money,

(K) payment of interpreters and translators who are not citizens of the United States and distribution of citizenship textbooks to aliens without cost to such aliens,

(L) acquisition of land as sites for enforcement fences, and construction and maintenance incident to such fences,

(M) research related to immigration enforcement, to remain available until expended, and

(N) payment of expenses relating to the hiring of privately owned horses for official use:

$388,602,000 of which not to exceed $100,000 may be used for the emergency replacement of aircraft upon the certificate of the Attorney General.

(12) For the Drug Enforcement Administration for its activities, including—

(A) hire and acquisition of law enforcement and passenger motor vehicles, without regard to the general purchase price limitation for the current fiscal year,

(B) payment in advance for special tests and studies by contract,

(C) payment in advance for expenses arising out of contractual and reimbursable agreements with State and local law enforcement and regulatory agencies while engaged in cooperative enforcement and regulatory activities in accordance with section 503(a)(2) of the Controlled Substances Act (21 U.S.C. 873(a)(2)),

(D) payment of expenses not to exceed $70,000 to meet unforeseen emergencies of a confidential character to be expended under the direction of the Attorney General and to be accounted for solely on the certificate of the Attorney General,

(E) payment of rewards,

(F) payment for publication of technical and information material in professional and trade journals, and purchase of chemicals, apparatus, and scientific equipment,

(G) payment for necessary accommodations in the District of Columbia for conferences and training activities,

(H) acquisition, lease, maintenance, and operation of aircraft,

(I) research related to enforcement and drug control, to remain available until expended,

(J) contracting with individuals for personal services abroad, and such individuals shall not be regarded as employees of the United States Government for the purpose of any law administered by the Office of Personnel Management,

(K) payment for firearms and ammunition, and for attendance at firearms matches, and

(L) payment for tort claims against the United States when such claims arise in foreign countries in connection with Drug Enforcement Administration operations abroad:

$231,779,000. For the purpose of section 709(b) of the Controlled Substances Act (21 U.S.C. 904(b)), such sum shall be deemed to be authorized by section 709(a) of such Act, for the fiscal year ending September 30, 1982. Of sums authorized to be appropriated for fiscal year 1982 and made available for the purchase of evidence and payment for information (PE/PI), an amount not to exceed $1,700,000 shall remain available for expenditure until October 1, 1983.

(13) For the Federal Prison System for its activities, including—

(A) for the administration, operation, and maintenance of Federal penal and correctional institutions, including supervision and support of United States prisoners in non-Federal institutions, and not to exceed $100,000 for inmate legal services within the system,

(B) purchase and hire of law enforcement and passenger motor vehicles,

(C) compilation of statistics relating to prisoners in Federal penal and correctional institutions,

(D) assistance to State and local governments to improve their correctional systems,

(E) purchase of firearms and ammunition, and medals and other awards,

(F) payment of rewards,

(G) purchase and exchange of farm products and livestock.

(H) construction of buildings at prison camps and acquisition of land as authorized by section 4010 of title 18, United States Code,

(I) transfer to the Health Services Administration of such amounts as may be necessary, in the discretion of the Attorney General, for the direct expenditures by that Administration for medical relief for inmates of Federal penal and correctional institutions.

(J) for Federal Prison Industries, Incorporated, to make such expenditures, within the limits of funds and borrowing authority, and in accordance with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as may be necessary to carry out the program set forth in the budget for the current fiscal year for such corporation, including purchase and hire of passenger motor vehicles,

(K) for planning, acquisition of sites and construction of new facilities, and constructing, remodeling, and equipping necessary buildings and facilities at existing penal and correctional institutions, including all necessary expenses incident thereto, by contract of force account, to remain available until expended, and the labor of United States prisoners may be used for work performed with sums authorized to be appropriated by this subparagraph, and

(L) for carrying out the provisions of sections 4351, 4352, and 4353 of title 18, United States Code, relating to a National Institute of Corrections, to remain available until expended:

$383,784,000.

SEC. 3. Sums authorized to be appropriated by this Act may be used for—

(1) the travel expenses of members of the family accompanying, preceding, or following an officer or employee if, while he is en route to or from a post of assignment, he is ordered temporarily for orientation and training or is given other temporary duty, and

(2) benefits authorized under paragraphs (5), (6)(A), (8), and (9) of section 901 and under section 904 of the Foreign Service Act of 1980 (22 U.S.C. 4081(5) et seq.),

under regulations issued by the Secretary of State.

SEC. 4. (a) Sums authorized to be appropriated by this Act which are available for expenses of attendance at meetings shall be expended for such purposes in accordance with regulations issued by the Attorney General.

(b) Sums authorized to be appropriated by this Act may be used for the purchase of insurance for motor vehicles and aircraft operated in official Government business in foreign countries.

(c) Sums authorized to be appropriated by this Act for salaries and expenses shall be available for services as authorized by section 3109 of title 5, United States Code.

(d) Sums authorized to be appropriated by this Act to the Department of Justice may be used, in an amount not to exceed $35,000, for official reception and representation expenses in accordance with distributions, procedures, and regulations issued by the Attorney General.

(e) Sums authorized to be appropriated for "Salaries and expenses, General Administration", "Salaries and expenses, United States Attorneys and Marshals", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Bureau of Prisons" may be used for uniforms and allowances as authorized by sections 5901 and 5902 of title 5, United States Code.

SEC. 5. There are authorized to be appropriated for fiscal year 1982 such sums as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs.

SEC. 6. Sums authorized to be appropriated by this Act for the salaries and expenses of the Federal Bureau of Investigation may be used in fiscal year 1982 for the purposes described in the second undesignated paragraph under the heading "Federal Bureau of Investigation", relating to the salaries and expenses, of the Department of Justice Appropriation Act, 1973 (86 Stat. 1115; Public Law 92-544).

SEC. 7. (a) With respect to any undercover investigative operation of the Federal Bureau of Investigation which is necessary for the detection and prosecution of crimes against the United States or for the collection of foreign intelligence or counterintelligence—

(1) sums authorized to be appropriated for the Federal Bureau of Investigation by this Act may be used for leasing space within the United States, the District of Columbia, and the territories and possessions of the United States without regard to section 3679(a) of the Revised Statutes (31 U.S.C. 665(a)), section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)), section 305 of the Act of June 30, 1949 (63 Stat. 396; 41 U.S.C. 255), the third undesignated paragraph under the heading of "Miscellaneous" of the Act of March 3, 1877 (19 Stat. 370; 40 U.S.C. 34), section 3648 of the Revised Statutes (31 U.S.C. 529), section 3741 of the Revised Statutes (41 U.S.C. 22), and subsections (a) and (c) of section 304 of the Federal Property and Administrative Services Act of 1949 (63 Stat. 395; 41 U.S.C. 254 (a) and (c)).

(2) sums authorized to be appropriated for the Federal Bureau of Investigation by this Act may be used to establish or to acquire proprietary corporations or business entities as part of an undercover operation, and to operate such corporations or business entities on a commercial basis, without regard to the provisions of section 304 of the Government Corporation Control Act (31 U.S.C. 869),

(3) sums authorized to be appropriated for the Federal Bureau of Investigation by this Act, and the proceeds from such undercover operation, may be deposited in banks or other financial institutions without regard to the provisions of section 648 of title 18, United States Code, and section 3639 of the Revised Statutes (31 U.S.C. 521), and

(4) the proceeds from such undercover operation may be used to offset necessary and reasonable expenses incurred in such operation without regard to the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484),

only upon the written certification of the Director of the Federal Bureau of Investigation (or, if designated by the Director, an Executive Assistant Director) and the Attorney General (or, if designated by the Attorney General, the Deputy Attorney General) that any action authorized by paragraph (1), (2), (3), or (4) of this subsection is necessary for the conduct of such undercover operation.

(b) As soon as the proceeds from an undercover investigative operation with respect to which an action is authorized and carried out under paragraphs (3) and (4) of subsection (a) are no longer necessary for the conduct of such operation, such proceeds or the balance of such proceeds remaining at the time shall be deposited in the Treasury of the United States as miscellaneous receipts.

(c) If a corporation or business entity established or acquired as part of an undercover operation under paragraph (2) of subsection (a) with a net value of over $50,000 is to be liquidated, sold, or otherwise disposed of, the Federal Bureau of Investigation, as much in advance as the Director or his designee determines is practicable, shall report the circumstances to the Attorney General and the Comptroller General. The proceeds of the liquidation, sale, or other disposition, after obligations are met, shall be deposited in the Treasury of the United States as miscellaneous receipts.

(d)(1) The Federal Bureau of Investigation shall conduct detailed financial audits of undercover operations closed on or after October 1, 1981, and—

(A) report the results of each audit in writing to the Attorney General, and

(B) report annually to the Congress concerning such audits.

(2) For the purposes of paragraph (1), "undercover operation" means any undercover operation of the Federal Bureau of Investigation, other than a foreign counterintelligence undercover operation—

(A) in which the gross receipts exceed $50,000, and

(B) which is exempted from section 3617 of the Revised Statutes (31 U.S.C. 484) or section 304(a) of the Government Corporation Control Act (31 U.S.C. 869(a)).

SEC. 8. Section 709(b) of the Controlled Substances Act (21 U.S.C. 904(b)) is amended by inserting ", or deemed by any statute of the United States to be authorized," after "authorized".

SEC. 9. (a) The Attorney General shall perform—

(1) periodic evaluations of the overall efficiency and effectiveness of the Department of Justice programs and any supporting activities funded by appropriations authorized by this Act, and

(2) annual specific program evaluations of selected subordinate organizations' programs,

as determined by the priorities set either by the Congress or the Attorney General.

(b) Subordinate Department of Justice organizations and their officials shall provide all the necessary assistance and cooperation in the conduct of evaluations described in subsection (a), including full access to all information, documentation, and cognizant personnel, as required for such evaluations.

(c) Completed evaluations performed under subsection (a) shall be made available to the Committee on the Judiciary of the Senate, the Committee on the Judiciary of the House of Representatives, and to other appropriate committees.

SEC. 10. During the fiscal year for which appropriations are authorized by this Act, each organization of the Department of Justice, through the appropriate office within the Department of Justice, shall notify in writing the Committee on the Judiciary of the Senate, the Committee on the Judiciary of the House of Representatives, other appropriate committees, and the ranking minority members thereof, not less than fifteen days before—

(1) reprograming of funds in excess of $250,000 or 10 per centum, whichever is less, between the programs within the offices, divisions, and boards as defined in the Department of Justice's program structure submitted to the Committees on the Judiciary of the Senate and House of Representatives,

(2) reprograming of funds in excess of $500,000 or 10 per centum, whichever is less, between programs within the Bureaus as defined in the Department of Justice's program structure submitted to the Committees on the Judiciary of the Senate and the House of Representatives,

(3) any reprograming action which involves less than the amounts specified in paragraphs (1) and (2) if such action would have the effect of making significant program changes and committing substantive program funding requirements in future years,

(4) increasing personnel or funds by any means for any project or program for which funds or other resources have been restricted,

(5) creation of new programs or significant augmentation of existing programs,

(6) reorganization of offices or programs, and

(7) significant relocation of offices or employees.

SEC. 11. The Attorney General shall, by September 30, 1982, develop a procedure to insure that no person under the age of eighteen shall be held as a material witness in a Bureau of Prisons facility or a State or local correctional facility, the primary purpose of which is to provide for the custody of adult offenders.

Mr. RODINO (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEVITAS: Page 22, after line 7, insert the following new section:

SEC. 12. (a) The Attorney General shall, during the fiscal year for which appropriations are authorized by this Act, transmit a report to each House of the Congress in any case in which the Attorney General—

(1) establishes a policy to refrain from the enforcement of any provision of law enacted by the Congress, the enforcement of which is the responsibility of the Department of Justice, because of the position of the Department of Justice that such provision of law is not constitutional, or

(2) determines that the Department of Justice will contest, or will refrain from defending, any provision of law enacted by the Congress in any proceeding before any court of the United States, or in any administrative or other proceeding, because of the position of the Department of Justice that such provision of law is not constitutional.

(b) Any report required in subsection (a) shall be transmitted not later than thirty days after the Attorney General establishes the policy specified in subsection (a)(1) or makes the determination specified in subsection (a)(2). Each such report shall—

(1) specify the provision of law involved,

(2) include a detailed statement of the reasons for the position of the Department of Justice that such provision of law is not constitutional, and

(3) in the case of a determination specified in subsection (a)(2), indicate the nature of the judicial, administrative, or other proceeding involved.

(c) If, during the fiscal year for which appropriations are authorized by this Act, the Attorney General determines that the Department of Justice will contest, or will refrain from defending, any provision of law enacted by the Congress in any proceeding before any court of the United States, or in any administrative or other proceeding because of the position of the Department of Justice that such provision of law is not constitutional, then the representative of the Department of Justice participating in such proceeding shall make a declaration in such proceeding that such position of the Department of Justice regarding the constitutionality of the provision of law involved constitutes the position of the executive branch of the United States with respect to such matter.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, while I believe this amendment is noncontroversial, I think it is, nevertheless, important. Let me explain briefly what it does.

There are occasions in which the Justice Department declines to defend the constitutionality of a U.S. statute in litigation. Even though the Justice Department is initially designated as representing the United States, and Congress has passed a statute, and the President has signed it into law, the Justice Department will, on occasion, go into court and declare that the statute is unconstitutional.

I have great problems with that practice to begin with. The Justice Department should faithfully execute

the laws, not undermine them. But, at the very least, two things should occur when the Justice Department decides that it is not going to defend a statute of the United States. First, they must notify the Congress of the United States so that the Congress can provide counsel to defend the U.S. laws. That is the first thing this amendment would do. It would require notification in the event the Justice Department declines to defend a statute of the United States.

The second thing it does is to require that when the Justice Department decides it will not defend a statute of the United States, it can no longer continue in that proceeding to represent the United States as such, but thereafter the Justice Department will merely represent the position of the executive department, which is all that they will be doing, rather than the position of the United States.

I think it is important that this amendment and this procedure be again written into the law. It was made a part of the authorization legislation during the last two authorizations. I suggest that it be made part of the legislation on this occasion as well.

Mr. Chairman, the amendment I have offered has been contained in the last two authorization bills for the Department of Justice. It provides simply that where the Justice Department determines that it believes a statute is unconstitutional or some other provision of law is unconstitutional and, therefore, either concedes the unconstitutionality of it or refuses to defend the constitutionality of that particular provision, they are required to notify the House of Representatives and the Senate so that the two bodies can then retain counsel and intervene in the proceedings if they so desire to defend the statutes of the United States. In those proceedings, after that notification is made to them, it is then incumbent upon the Justice Department to make clear that their position is simply the position of the Justice Department and the executive branch and is not the position of the United States in those proceedings.

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I would be happy to yield to the gentleman from New Jersey.

Mr. RODINO. The amendment which the gentleman is offering is the same amendment that we have considered before, which we have accepted. There are no changes, as I understand. It presently has been considered as a practice.

I have no objection to it. I support the gentleman.

Mr. LEVITAS. I thank the gentleman.

Mr. FISH. Mr. Chairman, will the gentleman yield to me?

Mr. LEVITAS. I would be happy to yield.

Mr. FISH. The minority has no objection to this amendment.

Mr. LEVITAS. I thank the gentleman.

I simply would like to add this point. This procedure seems to have been working well over the last 3 or 4 years. I would urge that the Judiciary Committee give consideration to enacting the bill which is now in the Judiciary Committee that would make this procedure part of the basic law, so that we do not have to add it to the authorization from time to time. I think it would receive unanimous support both in the committee and on the floor and we could avoid this annual practice of amending the bill.

I simply suggest that it might be a good candidate for a suspension of the rules bill early in the session.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. LEVITAS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. COLLINS OF TEXAS

Mr. COLLINS of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLLINS of Texas: Page 22, after line 7, add the following new section:

SEC. 13. No part of any sum authorized to be appropriated by this Act shall be used by the Department of Justice to bring any sort of action to require directly or indirectly the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education as a result of being mentally or physically handicapped.

Mr. COLLINS of Texas. Mr. Chairman, the support for neighborhood schools, through an end to forced schoolbusing, has been accelerating since passage last session of the Collins amendment to the Justice appropriations bill. Despite the Carter veto of the bill, the American people are demanding an end to forced schoolbusing. We must heed the American people's outcries, and once and for all end this negative, costly and counterproductive forced schoolbusing, and instead direct our efforts toward quality education for all students. That is why I am introducing the following amendment:

No part of any sum authorized to be appropriated by this Act shall be used by the Department of Justice to bring any sort of action to require directly or indirectly the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education as a result of being mentally or physically handicapped.

On November 18, 1981, President Reagan stated that "busing has been a failure." Recent polls show that the American public agrees. Take for example, a Gallup poll, published in February 1981, showing that on a national level, 72 percent oppose busing. Mr. Gallup noted that:

Clearly, much opposition can be explained in terms of objections to the distance children have to be bused and to other factors.

In a poll done by Gallup for Newsweek, results show that 50 percent of the black populations in America believes that forced schoolbusing has caused more difficulties than it is worth.

From year to year the statistics show the negative results of forced schoolbusing. In my hometown, the superintendent of the Dallas Independent School District—under a current forced schoolbusing plan involving 14,000 students in grades 4-8—Linus Wright has termed mandatory busing "the No. 1 thing that disrupts the school systems," and one of the "most detrimental forces in urban school systems." Nineteen eighty-one statistics show that in the DISD, only 29.53 percent of the population is Anglo. Yet, we have extensive busing orders to distribute that 29.53 percent of the population in order to bring about racial balance. According to Wright, "You could distribute every Anglo student in the district (through busing) and still not reach the 75-percent ratio," which is prescribed by the courts. Forced schoolbusing has illustrated the well-documented phenomena of white flight. In school districts across the Nation we see increasing minority populations in the public schools, and white flight, to the point where busing for racial balance is actually causing segregation.

SAT scores have been consistently and dramatically declining since 1964. For the 1979-80 academic year, the average SAT score was 890, compared to 973 in 1964. Overall statistics are equally alarming. For instance, from 1972 to 1980, the number of students scoring over 650 out of a possible 800 points on the verbal section of the SAT dropped 46 percent, with last year's average score being 424. In addition, there has been a 22-percent decline in high marks in the mathematics section of the test, with the average score last year being 466.

Busing was designed to integrate and balance the schools. Yet just the opposite has happened, as Dallas schools have increased in minority students from 38.8 percent in 1968 to 70.5 percent minority in 1980.

Since 1964, when the Supreme Court ruling went into effect, the Court has been involved in more than 500 school desegregation cases. Yet, the language in the 1964 Civil Rights Act states in section 401 that desegregation, "shall not mean the assignment of students to public school in order to overcome racial imbalance." Section 407 further provides that:

Nothing herein shall empower any official or court of the United States to issue any

order seeking to achieve a racial balance in any school by requiring the transportation of pupils or students from one school to another or one school district to another in order to achieve a racial balance.

Yet, counter to this 1964 act and the spirit of the Brown decision in 1954 which ruled wisely and justly that every child in America can and shall be entitled to and must go to their neighborhood schools, we are promoting forced schoolbusing, away from neighborhood schools, to achieve desegregation. The Brown decision also said that no child shall be sent to any school because of race, yet that is exactly the premise upon which forced schoolbusing is based today.

It is clearly time for Congress to act to restore the neighborhood school and the dream of quality education for all our students.

□ 1415

Mr. RODINO. Mr. Chairman, I rise in opposition to the amendment by the gentleman from Texas (Mr. COLLINS).

The Department of Justice is the only executive branch agency which can go to Federal court and, having secured a determination that school officials have engaged in unconstitutional discrimination, seek implementation of a plan to correct such violation. In this manner, the Department seeks to assure that important Federal rights are protected.

This proposed amendment would interfere with the Department's ability to exercise this responsibility, which has been specifically conferred upon it by the Congress (most notably in title IV of the 1964 Civil Rights Act and in the Equal Education Opportunities Act).

It is important to note that the Department has no authority to require busing or any other means of correcting unconstitutional segregation, contrary to the implication of this amendment. The Department's responsibility and authority is limited to presenting relevant facts to Federal courts and, on occasion, suggesting appropriate remedies to a court.

The determination as to whether the facts show a constitutional violation and, if so what remedy is appropriate is made solely by the Federal courts.

The prospect that the Constitution could be violated by recipients of Federal funds and there would be no means for the Federal Government to address such violations raises serious constitutional and policy considerations.

Seventeen years after the passage of the Civil Rights Act of 1964 and a quarter of a century after Brown against Board of Education, unlawfully segregated schools still exist in this country.

The adoption of this amendment would—even if its constitutionality were upheld—seriously interfere with the Justice Department's ability to seek appropriate remedies in those worthy cases where it seeks to insure that the Constitution is upheld.

Mr. Chairman, I strongly urge my colleagues to reject this amendment.

Mr. EDWARDS of California. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to this amendment.

I want my colleagues to know that if we adopt this amendment, we will be setting back the cause of desegregation in this country by 25 years. This amendment has nothing to do with whether busing can be ordered in a particular district through judicial means. Rather, this amendment strikes at the ability of the Department of Justice to bring a case of discrimination in the first place—an issue quite apart from what type of remedy may be sought.

We must keep in mind that court ordered busing is not ordered by the Department of Justice. The Department's sole responsibility and authority is to present relevant facts to Federal courts and, in some instances, to suggest appropriate remedies. It is the courts then who decide what remedy is appropriate in a given situation. This amendment would not prohibit court ordered busing.

Some mechanism must exist through which the Federal Government can assure that Federal funds will not be used to continue segregation in our schools. The Collins amendment, by precluding judicial relief, would raise serious constitutional problems. At the same time, it would seriously interfere with the Department's ability to seek—not order—appropriate remedies in particularly important cases. Mr. Chairman, I urge my colleagues to oppose this amendment.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to the gentlewoman from California.

Ms. FIEDLER. I thank the gentleman for yielding.

Did I understand the gentleman to say that the Department of Justice does not pursue a particular kind of remedy but instead simply pursues the desegregation case itself and the court determines the remedy? Is that correct?

Mr. EDWARDS of California. The Department of Justice is obliged to bring lawsuits to eliminate segregation in our Nation's schools, but it is up to the court to decide what the appropriate remedy might be.

Ms. FIEDLER. I would like to respectfully disagree with the gentleman. The Department of Justice in the pursuit of its cases definitely takes a position on appropriate remedies and participates in what they consider to be appropriate remedies. This particular amendment, which I personally support, would not limit them from pursuing a course of action to protect constitutional rights but, indeed, would limit the remedy for desegregation to not include mandatory busing.

Mr. EDWARDS of California. I certainly disagree strongly with the gentlewoman from California. The Department of Justice is charged with enforcing the laws of the United States and in supporting the Constitution, and where there is a constitutional right involved, and where there are Federal laws involved, and where Federal funds are being used in an illegal way, then the Department of Justice must discharge its responsibilities.

Ms. FIEDLER. Then the gentleman is going back to his original position that he believes that they are involved in the remedy, even though he indicated initially that it was not them; it was the courts. In fact, they are involved in the remedies, and under this particular amendment, it is my understanding it would not affect their right to pursue the case itself, but instead would affect their right to work to implement mandatory busing as the appropriate remedy.

Mr. EDWARDS of California. I point out again to the gentlewoman from California that it is the Federal court that makes the decision as to what the remedy shall be.

Mr. Chairman, I yield back the remainder of my time.

Mr. JOHNSTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this morning's paper reported that the legal profession's share of the gross national product was $27 billion in 1977. If present projections hold out, this year the legal profession's share will exceed that of the steel industry. Nowhere in the legal profession is there a greater number of zealots than those that exist in the Department of Justice of the United States. Their ideas and the idea of the American people are frequently at odds. Survey after survey has shown that the American people strongly oppose the concept of forced busing, strongly oppose the idea that our children are taken from their homes, put on a bus for a trip that can take from 15 minutes to an hour and for 2 more hours each day they are confined, not because their parents did not purchase homes close to the schools, not because the schools are not conveniently located, but because the Federal judiciary, insulated from reality by their lifetime appointments and invested with the arrogance of those nine men to my east, are allowed to put the American people on notice that they will require them to do in the name of constitutionality that which they do not wish to do, and to

force their children to undergo this, be they black or white, in the name of social experimentation.

□ 1430

Let us face it. All the studies show forced busing has not worked. But a group of people protected from the real world by the civil service law down in the Justice Department continue to bring lawsuits seeking forced busing as a remedy to our educational problems.

No one is in favor of segregation, but reasonable solutions are in order, reasonable solutions that take into consideration the fact that this world is critically short of energy; and to waste it carrying people up and down the roads for hours on end is a poor use of resources and time on the part of the American people.

Why not restrict the hands of those legislative zealots that believe that the answer to all our problems in this country rests in the hands of the Federal judiciary and use our resources in accordance with the wishes of the American people, in accordance with the long term best interests of our children and not continue an experiment that has failed miserably and will continue to fail.

Mr. Chairman, I yield back the balance of my time.

Mr. MOTTL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would first of all like to commend the gentleman from Texas (Mr. COLLINS) for offering this very important amendment and would urge my colleagues to strongly support the same.

I would also commend the gentleman from North Carolina (Mr. JOHNSTON) and the gentlewoman from California (Ms. FIEDLER) for their two fine speeches on behalf of the amendment, and I would have to respectfully disagree with the gentleman from California (Mr. EDWARDS) that the Justice Department does not interfere with the court-ordered remedy or impose the remedy of court-ordered busing.

They certainly do advocate in many instances, and I would like to cite the example of my hometown of Cleveland, Ohio. The lawsuit to desegregate the Cleveland school system was brought by the NAACP, but the Justice Department intervened as a friend of the court, filing a brief amicus curiae. When they did so, they advocated at that time that the proper remedy in the Cleveland case would be court-ordered busing. The case then went to the Sixth Circuit Court of Appeals in Cincinnati, and again they were a friend of the court and they advocated court-ordered busing.

What has court-ordered busing done to my hometown of Cleveland, Ohio? It has devastated that school system. Once it was one of the finest school systems in America, and it is now one of the worst school systems in America.

We have seen a great amount of white flight and black flight from the central city to the suburbs. A school district that 4 years ago had an enrollment of approximately 115,000 has approximately 68,000 in enrollment. We have seen the huge sum of money expenditure of $41 million to date spent on court-ordered busing when those sums could have been better spent for more schoolteachers, quality school teachers, better textbooks, and more educational facilities.

Again, they are proposing in this year's budget another $40 million to carry out court-ordered busing. We have seen on the energy side that a schoolbus gets approximately 5 miles to a gallon of gasoline. There are approximately 55,000 gallons of gasoline each day wasted on court-ordered busing in the United States to carry out this remedy.

We all advocate desegregation of our school systems, but let us use the proper remedy of the magnet schools or let anybody in their neighborhood who is dissatisfied with their neighborhood school go to any school in the metropolitan area, which Prof. James Coleman of the University of Chicago—the noted sociologist—now advocates rather than his original remedy of court-ordered busing. He examined 100 desegregation cases from Boston to Los Angeles and found it had not worked.

The minority student has not gotten a better education as a result of court-ordered busing but, on the contrary, all the minuses that I alluded to before as a result of court-ordered busing.

Let us get the Justice Department out of the business of ordering or advocating court-ordered busing to our Federal court.

I strongly support the amendment offered by the gentleman from Texas (Mr. COLLINS).

Mr. EMERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the amendment of the gentleman from Texas (Mr. COLLINS). The gentleman has performed a great public service in offering this amendment and he has given us a great opportunity to take yet another step toward the end of stopping this foolish proposition of forced busing.

I would prefer to get directly to the heart of the matter and have a constitutional amendment that will deal with the subject once and for all. We can theorize until kingdom come, although I understand the theorists who invented this silly idea have backed away from it. I will tell you this: The people want this issue dealt with and they are frustrated that our processes are so slow.

Until we can deal with this issue through a constitutional amendment, the gentleman's amendment is the next best step.

I yield back the balance of my time.

Ms. FIEDLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, for the last 5 years I have spent a good deal of my time dealing with the issue of mandatory busing in the city of Los Angeles. Over that period of time, I have had a variety of experiences that have led me to the personal conclusion that, unfortunately, the debate over mandatory busing and the continuation of it has, instead of solving the problems of unequal education, permitted unequal education to continue in an onerous way. It is preventing children deserving of a decent public education from getting it.

Busing is very, very big business. A lot of people make a lot of money off of it. A lot of people make a lot of political hay out of it. A lot of people keep it going over a long period of time holding out the hope that children will be better educated as a result of simply taking a school bus ride from one side of the city to another; and unfortunately, it is not that easy.

It does not solve the problems that quickly, putting children side by side simply because they fill a certain racial quota system. It is my opinion that there have been hundreds and hundreds of millions of dollars wasted on this particular kind of solution to unequal education, and that over the last 20 years, as we tried to solve the problems of unequal achievement, that this particular course of action has deterred us from that goal.

There are many children in communities all across the country who are deserving of a decent public education who will receive that public education when the time comes that we put our energies and efforts into improving the quality of teaching talent, improving the physical facilities, to make certain that those children receive a full day's education; but instead, when you take a city like Los Angeles and spend between $150 and $200 million a year on desegregation instead of providing a good, solid public education, the children are losing the basic resources that it takes to really help them become independent citizens.

I urge my colleagues strongly to support this amendment. I would also like to say that I recently received a copy of a speech given by our current Attorney General, William French Smith, where he, too, has indicated that he opposes the use of mandatory busing; and while I support this amendment, I also feel a certain measure of confidence in this administration and its representatives in the Department of Justice that they will not, in fact,

pursue mandatory busing as a course to solve the unequal educational achievement of the children of our country.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. COLLINS).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. COLLINS of Texas. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1445

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Texas (Mr. COLLINS) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 265, noes 122, not voting 44, as follows:

[Roll No. 69]

□ 1500

The Clerk announced the following pairs:

On this vote:

Mr. Chappell for, with Mr. Dellums against.

Mr. Rhodes for, with Mrs. Collins of Illinois against.

Mr. DAVIS and Mr. WAXMAN changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MS. OAKAR

Ms. OAKAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Ms. OAKAR: Page 22, after line 7, insert the following new section:

SEC. 14. (a) Not later than September 30, 1982, the Attorney General shall submit to the Congress and to the President a report—

(1) evaluating citizen involvement in community efforts undertaken to augment official urban crime prevention measures in the fiscal year for which sums are authorized to be appropriated by this Act, and

(2) recommending measures to enhance community cooperation in preventing urban crime.

(b) For purposes of preparing the report described in subsection (a), the Attorney General shall—

(1) consider the recommendations of Federal commissions which have studied urban crime prevention, and

(2) consult with persons involved in analyzing and preventing violent crime, including judges, sociologists, social workers, clergy, psychologists, law enforcement officials, and private citizens, and with the victims of violent crime.

Ms. OAKAR (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

□ 1515

Ms. OAKAR. Mr. Chairman, I am very concerned about the alarming increase of crime in our country, par-

ticularly in our neighborhoods. It is really a devastating phenomenon. This is especially true of certain urban areas, and it is becoming ever more true in rural areas.

Simply and without elaborating on a definition of my amendment, I want to state that all it would do is mandate the Attorney General to consider the role of citizens and what they can do in their neighborhoods to constructively support and assist law enforcement officials in combating crime.

In the wake of the alarming news that reaches us everyday about theft, robbery, murder, rape, assault, and so on, citizens have already begun to form their own associations and groups to try to do something about the problem. Rather than having these vigilante groups formed, it seems to me that we ought to have the Justice Department look into the situation and form some guidelines as to how citizens can constructively assist local officials in finding solutions for the crime problem.

Mr. Chairman, I am aware that the Attorney General has a task force on violent crime, but I am concerned that there may not be citizen input. So I would hope that my colleagues would agree to the amendment, and that we would involve citizens in the study of crime so we can achieve some solutions.

Mr. RODINO. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I am happy to yield to the chairman of the committee.

Mr. RODINO. Mr. Chairman, I thank the gentlewoman for yielding.

I would like to say that while I recognize the legitimate concern of the gentlewoman and the emphasis she places on the need for citizen involvement, the gentlewoman does know that the Attorney General has a task force, and that it is due to report.

I would hope that the gentlewoman would not pursue this amendment. I would assure the gentlewoman as chairman of the committee—and I know there are many others on the committee who feel pretty much the same way—that we could articulate the need for this kind of citizen involvement, and I would join in a letter to the Attorney General expressing this kind of concern. I am sure that it would be given not only serious consideration, but I am sure that the Attorney General—and I have found him to be an individual who wants to cooperate—would appreciate having this called to his attention, and I am sure some action would then be taken.

But, Mr. Chairman, I would urge that the gentlewoman not pursue this amendment.

Mr. McCLORY. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I am happy to yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I want to concur in the statement made by the chairman of the committee and concur in the sentiment of the amendment being offered by the gentlewoman from Ohio (Ms. OAKAR).

I would state that I have testified myself before the Subcommittee on Crime, with the expectation and the hope that the Federal Government would assume some leadership role with regard to the national problem of crime in our cities and, as the gentlewoman says, in the rural areas as well.

I would hope, by importuning the Attorney General and his task force to act on this subject, that something tangible may be done, not in this way but in a way consistent with the sense of the amendment.

Mr. Chairman, I applaud the gentlewoman for her effort, and I thank her for yielding.

Ms. OAKAR. Mr. Chairman, I want to thank both the committee chairman and the ranking minority member for their statements. In view of that response, I will withdraw my amendment.

I would like to state, however, for the record that the task force that was set up under the auspices of the Attorney General is due to expire in August. If they have not involved citizen participation, perhaps in our letter we could ask them to extend the task force by a month or two or whatever time is necessary so that citizens can really have an opportunity to say something about what the crime problems are in their neighborhoods, because I am convinced that they know where the solution rests and to what extent it is possible.

The CHAIRMAN. The time of the gentlewoman from Ohio (Ms. OAKAR) has expired.

(On request of Mr. HUGHES, and by unanimous consent, Ms. OAKAR was allowed to proceed for 2 additional minutes.)

Mr. HUGHES. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I just want to say to the gentlewoman from Ohio (Ms. OAKAR) that the Subcommittee on Crime is going to begin oversight hearings tomorrow as a matter of fact, and we have other hearings scheduled on Thursday which bear on the same subject.

I commend the gentlewoman from Ohio for her concern and would invite her to appear before the Subcommittee on Crime and testify on this subject in this most important area. We are going to proceed with an assessment and find out where we stand on crime problems. Are we winning? Are we losing? What are we doing, what can we do, and what are we doing that is wrong? How are we going to get people involved in the crime problem and try to correct the problem without having to put a policeman behind every tree?

The problem needs community support and community assistance, and I would recommend that the gentlewoman testify in support of our endeavors.

I would also say that we are now developing a Justice Improvement Act which hopefully would augment some of the efforts of the LEAA and the Justice Department and craft a very modest program that we can fund this year and share with local law enforcement officials in those areas where they have the responsibility for law enforcement.

Ms. OAKAR. Mr. Chairman, I certainly want to commend the gentleman from New Jersey (Mr. HUGHES) for his efforts. I think it makes tremendous commonsense for us to use his leadership with respect to the subcommittee in holding these hearings. I want to thank the gentleman for his gracious invitation, and I will tell him right now that I will accept it.

The CHAIRMAN. The Chair will inquire, is it the understanding of the Chair that the gentlewoman from Ohio (Ms. OAKAR) asks unanimous consent to withdraw her amendment?

Ms. OAKAR. Yes, Mr. Chairman. In view of the commitment I have had on the floor and knowing the chairman to be such a respected Member and a man of his word, I certainly will withdraw the amendment, and I ask unanimous consent that I may be permitted to do so.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

AMENDMENT OFFERED BY MR. GILMAN

Mr. GILMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GILMAN: Page 22, after line 7, add the following new section:

SEC. 12. Sums authorized to be appropriated by this Act may not be used by the Attorney General to promulgate, administer, or enforce any regulation, or enforce any policy, to the extent that such regulation or policy designates, determines, or fixes the maximum limit of age within which an original appointment may be made to a position as a law enforcement officer (as defined by section 8331(20) of title 5, United States Code) in the Federal Prison System at any age lower than 45 years.

Mr. GILMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. GILMAN. Mr. Chairman, the amendment I am offering will restrict

the ability of the Federal prison system to enforce regulations which have the effect of barring people over age 35 from employment in a position in any capacity in a Federal prison.

This problem was brought to my attention for the first time when the newly constructed Federal correctional institution in Otisville, N.Y., in my congressional district, was staffing up. Many of my constituents who were highly qualified for positions within the prison were barred simply because of their age.

The law which permits this policy to be enforced is an anachronism in this day, when we have recognized that chronological age is very nearly meaningless as an indication of a person's ability. We have passed the Age Discrimination Act, which would probably bar a State from enforcing an age bar to appointment as rigid as the one we have permitted the Attorney General to prescribe by regulation.

Current law permits the Justice Department to fix a maximum age for original appointment as a "law enforcement officer." The Federal prison system has used—I think, abused—that authority by fixing that age limit for any position within any Federal prison at age 35.

At present, all workers in Federal prisons—guards, secretaries, and other administrative personnel, and service workers—are classified as law enforcement officers, along with FBI and DEA agents, U.S. marshals, et cetera.

This amendment forbids the use of funds authorized to be expended by H.R. 3462 to enforce the regulations against hiring, for prison employment, those over a specific age unless the age specified is 45 or older.

The prison system's current policy is one of unabashed "ageism." In an effort to procure a suitably vigorous work force, the prison system bars from possible appointment just about all 36-year-olds—no matter how experienced, talented, or physically fit they may be.

The regulations also tend to undermine the Government's efforts to provide preference in hiring to veterans of the Armed Forces.

This amendment would not affect in the slightest the prison system's ability to bar for employment persons with physical, emotional, or other impairments to the effective performance of the admittedly demanding work performed behind prison walls. But it makes no sense to flatly bar individuals who happen to have reached a certain age from careers in Federal corrections.

I might also add that the concept of increasing the age for original appointment has the backing of at least some members of the clergy, who are concerned with the fact that many clergymen do not complete their training or seek appointments until after age 35, and are thus barred from service by the prison system's policies.

For instance, I have received a letter from Rabbi Allan Kaplan, the executive officer of the Jewish Correctional Chaplains Association, which has 90 members, expressing their support for an increase in the allowable age for original appointment.

Mr. Chairman, we will hear several arguments against this amendment. You will hear that there is an administrative need for this regulation because of the needs of the pension system, or that this regulation makes it easier to recruit minorities or college graduates, but these arguments have been rejected time and time again by the courts and by this House with respect to private employment.

Accordingly, Mr. Chairman, I ask my colleagues to support this amendment.

Mr. SOLOMON. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from New York.

Mr. SOLOMON. Mr. Chairman, I want to commend the gentleman from New York (Mr. GILMAN) for what I think is an excellent amendment.

As a member of the Committee on Veterans' Affairs, I would state that we have been looking into many of the existing statutes and regulations that might discriminate against veterans. This points up one of the real discrepancies that we have in our laws today.

Most of the young men who enlist today as career servicemen go in between the ages of 17 and 20, which means that they retire at the age of about 38, 39, or 40, and many of those people are in excellent physical condition. They are seeking jobs as prison guards, and, of course, they are prohibited under this law.

Mr. Chairman, I think this is an excellent amendment. I think every Member of this House ought to support it unanimously.

Mr. GILMAN. Mr. Chairman, I thank the gentleman from New York (Mr. SOLOMON) for expressing his views. He certainly is right on the mark when he expresses his concern with regard to the veterans who are seeking employment.

This is partially the reason I brought this amendment to the floor, because there are veterans in my own area who sought employment in the new prison facility and who were barred because of the age problem.

Mr. SAWYER. Mr. Chairman, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Michigan.

Mr. SAWYER. Mr. Chairman, I thank the gentleman for yielding.

As a member of both the Committee on the Judiciary and the Committee on Veterans' Affairs, I share the view of the gentleman from New York (Mr. SOLOMON).

The CHAIRMAN. The time of the gentleman from New York (Mr. GILMAN) has expired.

(On request of Mr. SAWYER, and by unanimous consent, Mr. GILMAN was allowed to proceed for 2 additional minutes.

Mr. GILMAN. Mr. Chairman, I am pleased to yield further to the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. Mr. Chairman, I thank the gentleman for yielding.

The veterans as a group are rapidly getting past these age brackets, and despite the doctrine of veterans' preference, they would be excluded from this employment. It might have made more sense if they had limited it to the guards or something like that, but when they limit it to the people who work in the messhall and the secretaries in the offices, and so forth, I think that points up the absolute lack of necessity for this prohibition. They have no different requirements in those jobs than other people in Government, and they have not found it necessary to put those limitations in anywhere else.

Mr. Chairman, I congratulate the gentleman from New York (Mr. GILMAN) for offering this amendment.

Mr. GILMAN. Mr. Chairman, I thank the gentleman from Michigan (Mr. SAWYER) for his supporting statement and for his concern about our veteran employment force.

Mr. KASTENMEIER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I realize that the gentleman from New York (Mr. GILMAN) offers this amendment in good faith. While I have not been aware of the amendment itself until today, I am apprised that he had raised the issue somewhat earlier.

□ 1530

I think the answer he offers the Committee is not the correct one. I strongly urge that the amendment be rejected.

Now, the gentleman arbitrarily inserts the age of 45, rather than 35 years. Who is to say that 40 or 45 or any other age is a correct age?

It is true that the Justice Department, for purposes of law enforcement, including the Bureau of Prisons, presently has an employment policy of 35 years or younger; but the gentleman from New York would separate out the Bureau of Prisons only, not all Federal law enforcement personnel, because Otisville, N.Y.—because a prison has been put in his district, and because this is where the issue affects him.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. KASTENMEIER. Yes, I yield to my colleague.

Mr. GILMAN. I have also heard from my colleagues in other areas. The gentleman from Tennessee for example, told me about a problem there. In upstate New York, the gentleman from New York has told me that they have a problem. There are problems in other areas wherever there are Federal prisons located and they are located throughout our country in at least 20 different locations.

Mr. KASTENMEIER. Presumably, furthermore, I would say that if there are problems, they would reach the question of Federal law enforcement generally, not just the Bureau of Prisons, if this is a problem.

Maybe the gentleman from Florida (Mr. PEPPER) and others who are concerned about employment of older people would raise the general question.

What I urge today is that the Committee reject this particular formulation of 45 years for the Bureau of Prisons only.

Let us generally look at the question of employment practices by age in the Department of Justice with reference to law enforcement personnel.

Let us have hearings on it and let us determine what the correct age is, if any—whether the need for such a policy, discriminatory on the face of it, is justified.

I do not know the answer, and I am sure others in this Chamber do not. We do not know whether 40, and I understood the gentleman originally was going to offer 40 years, or 45 or, indeed, all law enforcement personnel in the Federal system ought to be subject to such a limitation.

It is said that for purposes of attracting young personnel, for purposes of recruiting well-educated women and minorities, this program was invoked.

Now, whether or not that is justified on that ground—and I offer this to the Committee of the Whole because you should know that this was arrived at, not by the Congress, but by the Justice Department over the years for very special reasons.

I do think we have not had hearings on this question. I understand there is legislation, and for my part I would assure the House that there surely will be hearings on the question as it relates to the Bureau of Prisons and on the larger question as it relates to law enforcement personnel and age discrimination practices, whether justified or not. That is the way I believe we ought to resolve it, I say, Mr. Chairman, not by willy-nilly accepting an amendment on an authorization bill of general proportions where there have been no hearings, no documentation, no record created whatsoever.

Mr. Chairman, I hope the Committee will reject this particular amendment.

Mr. PEPPER. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the amendment.

Mr. Chairman, I am very much aware of the sincerity of the view expressed by the able gentleman who just concluded. I realize it is always not an easy matter to decide between one age and another; but this House has a fine record of opening up the doors of opportunity for work to older people. When we started the legislation that originated in this House, even in the Federal Government, where there was a mandatory period when you could mandatorily require anybody to quit work on account of age. We have eliminated that for the Federal Government, except in specific instances.

At the time in private industry you could mandatorily retire anybody at 65. We raised that to 70.

Not long ago there was an instance of the Foreign Service. A lot of the Foreign Service personnel complained that they were being required to give up their employment for certain professions which they had given a lifetime of effort at 60 years of age. This House finally originated a change in the law that moved it to 65, so that now in the Foreign Service you may continue to work, that is, you cannot be mandatorily retired for age alone below 65 years of age.

We have a statute on the law books of our Government that forbids discrimination on account of age. I realize there may be instances where there should be exceptions, but it does seem to me that this House should push forward the boundaries of opportunity for older people. To say that a man absolutely cannot be fit to work in a prison if he is 35½ years old is wrong. He could be a champion prize fighter, he could be a champion baseball player, he could have whatever mental and physical excellence a man might possess, and yet the fixed age, fixed by the Attorney General pursuant to the law of this Congress, says that you cannot work if you are over 35 years of age in a Federal prison.

Mr. KASTENMEIER. Mr. Chairman, would the gentleman yield on that?

Mr. PEPPER. Yes; I would

Mr. KASTENMEIER. This is for hiring purposes at the original point of hiring. The average age of people who work in the Federal prison system is very elevated, indeed. I suppose it averages well over 50. This does not prohibit somebody from continuing employment. This is a program of recruiting only.

Mr. PEPPER. Does the gentleman mean hiring?

Mr. KASTENMEIER. Just hiring purposes only; it does not limit a person from continuing employment in the prison system at age 55 or 60 or any other age.

Mr. PEPPER. But if my friend will allow me, more and more older people are having difficulty finding employment. Every time you shut a door from their being employed, you have just that much retarded their opportunity to make a living.

Mr. McCLORY. Mr. Chairman, would the gentleman from Florida yield to me?

Mr. PEPPER. Yes; I yield.

Mr. McCLORY. I thank the gentleman for yielding. I think also the Bureau of Prisons are having difficulty finding people to serve as custodians and prison guards. I think this would provide more opportunity, more latitude with regard to getting qualified personnel. Without this amendment, it seems to me that we deprive them of that opportunity; so I think that there is a valid case that can be made against pursuing age discrimination, especially in this category where we have such a dire need to keep the peace within the prison walls.

I thank the gentleman for yielding.

Mr. PEPPER. I thank the gentleman.

I hope to see the day when a man, as Bobby Burns said, will be a man for all that. It will not make any difference how old he is. It is what he is. What can he do? What has his age got to do with it if he can do a credible job?

We have come to that stage, but this House has been pushing back the borders of discrimination for years here and there.

I do not see this amendment would do any harm. It would open doors of opportunity for employment to people who pass the examination. Surely, you cannot get a job in a Federal prison without passing an examination. If he can pass the examination, why not give him the job, if he is otherwise competent? Here is another opportunity where we may move that border a little bit forward in the face of increased opportunity for the older people of the country to get a job.

I hope the amendment will be adopted.

Mr. SOLOMON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to wholeheartedly support the amendment offered by the gentleman from Florida and to take exception to some of the remarks made by the gentleman from Wisconsin when he says that the 45-year age was arbitrarily set.

I spoke with the gentleman from New York (Mr. GILMAN) and explained some of the things we were doing in the Veterans' Affairs Committee and pointed out that many of these men and women who have devoted 20 years of their lives were being retired from the armed services at the age of 38, 39, 40, 41, and 42, and were unable to find jobs today after devoting all that time

to their country. When you can pick up any newspaper in this country and see the unrest and the overcrowdedness within our prisons, I think it would be deplorable for us to fail to enact this amendment today to let people over 45 years of age obtain these jobs.

There is nothing mandatory in the amendment. It simply says to the Justice Department that if you can take advantage of the abilities of these men and women who are now retired and cannot find jobs, then perhaps you should put them to work to restore peace in the prison facilities throughout this country.

I wholeheartedly support the remarks and the amendment offered by the gentleman from Florida.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. GILMAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. NELSON

Mr. NELSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. NELSON: Page 22, after line 7, add the following new section:

SEC. . Sums authorized to be appropriated by this Act for the Immigration and Naturalization Service which are available for the administration of field offices shall be expended in such manner and such amounts as will ensure that the number of personnel assigned to each field office bears the same ratio to the aggregate number of personnel assigned to all field offices as the estimated number of applications under the laws relating to immigration, naturalization, and alien registration received at such field office in fiscal year 1982 bears to the estimated aggregate number of applications under such laws received at all such field offices in such fiscal year.

Mr. NELSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. NELSON. Mr. Chairman, I first want to congratulate the gentleman from New Jersey, the chairman, and the gentleman from Kentucky, the chairman of the subcommittee, for what I think is an excellent bill. I certainly intend to support it.

The intention of this amendment, which I will ask unanimous consent to withdraw after a statement of position, is to point out that probably the worst problem we have in all the casework we do in my district is with the Immigration and Naturalization Service. It is an acute problem in all their offices, but especially in the Miami field office. In Miami, they have only 3.2 percent of all the INS personnel outside Washington and yet they are processing 4.7 percent of the nationwide applications for changes in status and they are processing 6 percent of applications for naturalization.

This amendment as offered would correct that imbalance; so although I intend to support the chairman's bill, the committee's bill, on the much needed restoration of these positions that are targeted for destruction, these positions that were targeted for elimination, I would hope that through this statement on this amendment that INS will understand that the priorities need to be rearranged and some additional personnel are needed to address the problems of just being swamped with applications in Miami.

It is not uncommon for it to take 6 weeks for them merely to respond when a Congressman in Florida inquires about an immigration problem.

Mr. MAZZOLI. Mr. Chairman, will the gentleman yield?

Mr. NELSON. I certainly yield.

Mr. MAZZOLI. I thank the gentleman for yielding.

I congratulate the gentleman for having by way of his amendment, which as I understand will be withdrawn, opened up the debate on this topic, the topic being, of course, the perpetual lack of resources on the part of the INS to do the job that they want to do and I think the gentleman would agree that these people who are in the employ of INS do indeed want to do the job, is through no lack of talent or energy on their part. It is through simply being overwhelmed with the paperwork and not having at their disposal the kinds of machinery and equipment that would enable them to provide prompt answers.

As the gentleman has already cited, and I appreciate his mentioning it, of course, the bill before this House today, which I hope is approved overwhelmingly, would restore 973 positions of the 1,355 which the administration proposed to cut and in that case some 200 adjudicators who do a great deal of the kind of work the gentleman cites.

I would certainly believe that the subcommittee which I am privileged to chair would be in the position to assist the gentleman from Florida in securing information from the Immigration Service as to its general disposition of how it intends to array these additional resources.

Now, obviously, the bill that is before the House today is in a form that we would agree to. It has to go through the other body. It has to survive quite a bit of legislative process; but assuming that this bill before the House becomes the law of the land, I would certainly offer the gentleman all the resources of our subcommittee in his effort, and I think a very commendable one at that, to be sure that his State and the city in particular that has so much work receives a fair share of these resources, personnel and financial resources.

□ 1545

Mr. NELSON. I thank the gentleman from Kentucky.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. NELSON. I yield to my colleague from Florida.

Mr. PEPPER. I thank the gentleman for yielding. I would just like to join my distinguished colleague from Florida in commending the committee on behalf of our people. We have 500 Haitians a week coming into Miami. One hundred came in yesterday morning. Besides that, we had 125,000 come in from Cuba since April of last year. These people need relief down there. We appreciate what the gentleman is doing to help those people to do the job they need to do for the country as well as for Dade County.

Mr. NELSON. I thank my colleague for his statement.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to bring up a matter which has been discussed before, and the same problem arises today due to the wording which appears in the bill. It relates to the Immigration and Naturalization Service. On page 9 of the bill, line 17, section (L) provides for "acquisition of land as sites for enforcement fences, and construction and maintenance incident to such fences."

Living on the United States-Mexico border as I do, this has always presented a problem.

Today I have just come from a luncheon where the President of the United States had as his guest the President of Mexico. All of the visit was on the friendship which exists not only personally between our two Presidents but between our two peoples. Coming from there to here at this point in time, I know that this is not the intent of the chairman or the committee, but nonetheless the words appear in the bill and I would like to ask, if I might, the distinguished gentleman from New Jersey, or the distinguished gentleman from Kentucky if they would again reassure us that this is not the intent of the legislation.

Mr. RODINO. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from New Jersey.

Mr. RODINO. I thank the gentleman for yielding. As the gentleman knows, in the past the gentleman has very justly shown concern about some

of these items, and the gentleman from New Jersey has reassured him in the past. As the gentleman recalls, we addressed a letter to the Immigration Service in order to insure that none of the moneys that are in here as a lump sum would be used for other than the purposes that they are now being used, and that is for no further acquisition of land, no further new construction of these fences that the gentleman is concerned with.

I wholeheartedly agree that this is a valid, legitimate concern. But I want to tell him once again that he has my wholehearted cooperation, and if it is necessary, although we do know that the sums are delineated for reasons other than the gentleman has concern about, I would again address that kind of a communication which we did in the past in order to put his mind at ease.

Mr. DE LA GARZA. We always appreciate the distinguished gentleman's cooperation. I wish he would just change the wording in the original authorization. If it does not mean that, why have it there?

Nonetheless, I had prepared an amendment, but I do not think I will offer it, Mr. Chairman, that under no circumstances should barbed wire be used, at any place. I wonder if the gentleman would agree with me, as a matter of legislative history.

Mr. RODINO. If the gentleman will yield, I want him to know that it is as repulsive and repugnant to me as it is to the gentleman to use any kind of wire of that sort in fences. I again tell him that that is categorical, and I am sure that all of the committee joins me in that statement.

Mr. DE LA GARZA. The distinguished chairman is a great humanitarian, and I appreciate his interest. My concern is that I have spoken throughout the world and used us as an example, the United States and Mexico, and I say there are no machineguns; there are no tanks; there is no barbed wire like they have in West Berlin, for example. Then you go to the border and see this serpentine barbed wire on top of the fence, and it is repulsive and obnoxious, because in my area of Texas we use barbed wire to keep cattle out or in, not people.

I know we have a problem with illegal aliens. I know we have a problem at the border that has to be addressed. It was addressed by the two Presidents, but that is another issue.

To have a fence with barbed wire on top of it to me is obnoxious and repugnant. It is against human nature to do that, and I know the distinguished gentleman from New Jersey agrees with me so I will not offer my amendment. I appreciate again his cooperation. I wish the staff or INS, or whoever prepares this document, if they do not want it to mean what it says here, that they will just use the words, it shall not be used for land acquisition; shall not be used to build new fences; shall only be used to repair or to do whatever is necessary under the circumstances as we now have them.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. DE LA GARZA was allowed to proceed for 1 additional minute.)

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to my colleague from Texas.

Mr. KAZEN. I thank the gentleman for yielding. We went over this at the last session and the session before, and the gentleman from New Jersey (Mr. RODINO) has been very fair with us. He has talked to the Immigration authorities downtown. We have not had any more problems since the Bamboo Curtain incident of a few years ago. I would certainly associate myself with the remarks of my colleague, the gentleman from Texas (Mr. DE LA GARZA), and add not only barbed wire, but spiked wire or any other kind of wire that would go into the building of a fence between our two friendly countries.

Mr. DE LA GARZA. I thank the gentleman for his contribution. I thank very sincerely the distinguished chairman of the committee, the gentleman from New Jersey (Mr. RODINO) and am much appreciative of his cooperation.

The CHAIRMAN. Are there any further amendments? If not, the question is on the committee amendment in the nature of a substitute, as amended. The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. DANIELSON) having assumed the chair, Mr. SWIFT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3462) to authorize appropriations to carry out the activities of the Department of Justice for fiscal year 1982, and for other purposes, pursuant to House Resolution 147, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MAZZOLI. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 353, nays 42, not voting 36, as follows:

□ 1600

The Clerk announced the following pairs:

On this vote:

Mr. Chappell for, with Mr. Mottl against.

Until further notice:

Ms. Ferraro with Mr. Ashbrook.
Mr. Price with Mr. Hollenbeck.
Mr. Mazzoli with Mr. Walker.
Mr. Howard with Mr. Rousselot.
Mr. Fuqua with Mr. Carney.
Mr. Flippo with Mr. Badham.
Mr. Dellums with Mr. Brown of Ohio.
Mr. Hightower with Mr. Conte.
Mr. Udall with Mr. Railsback.
Mr. Evans of Georgia with Mr. Goldwater.
Mrs. Collins of Illinois with Mr. Kemp.
Mrs. Byron with Mr. Courter.
Mrs. Bouquard with Mr. Michel.
Mr. Albosta with Mr. Quillen.
Mr. Harkin with Mr. Forsythe.
Mr. Roe with Mr. Grisham.

Messrs. WYDEN, CRAIG, BEREUTER, MARTIN of North Carolina, BENEDICT, MOORHEAD, and STANGELAND changed their votes from "yea" to "nay."

Mr. EDGAR changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous material on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

U.S. AIR FORCE RESERVE AND AIR NATIONAL GUARD

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, the Air Reserve Forces have a critical role in the effective implementation of our total-force concept. The total-force concept requires Air Reserve Forces to provide trained individuals and units to augment and support the Active Air Force during periods of national emergency or wartime. The Air Reserve Forces which include the Air National Guard and the Air Force Reserve, just as Reserve components in the other services, donate many hours to supporting a difficult Reserve mission.

From the beginning in 1946, when over 400,000 veterans accepted appointments or enlistments in the Air Force Reserve, the Air Reserve Forces have contributed to this country's war fighting and peacekeeping efforts.

This Nation called upon the Air Reserve Forces during the Korean war and Vietnam war, as well as during periods of increased tension such as the Berlin crisis in 1961, the Cuban crisis in 1962, and the Middle East crisis of 1973, to name a few. Each time these forces were called upon, they more than met the challenge.

Today, we continue to be faced with global challenges, and now perhaps more than ever, we must stand prepared to meet these challenges anywhere in the world. Since Air National Guard and Air Force Reserve units represent approximately 34 percent of our total tactical fighter capability, 61 percent of our tactical airlift capability, 49 percent of our strategic airlift capability, 65 percent of our strategic defensive interception capability, and 57 percent of our tactical reconnaissance capability, it is imperative that the Air Reserve Forces be maintained at a high state of readiness.

The Department of Defense reports that 98 percent of Air Guard flying units and 100 percent of Air Force Reserve flying units are combat ready—that is, they have sufficient personnel and equipment to accomplish their respective combat missions. Further, both the Air National Guard and the Air Force Reserve met their authorized manning level during fiscal year 1981.

This year the Air Reserve Forces are requesting a modest increase in personnel—approximately 4,000 for the Air Reserve, and 4,000 for the Air National Guard. These additional authorizations will enable this extremely valuable Reserve component to continue to train and provide operational support to the Active Forces. The Air Force Reserve has also asked for additional authorizations in fiscal year 1982 to continue its equipment modernization program.

Although both the National Guard and the Air Force Reserve have not experienced any difficulties meeting their manpower strength requirements, they are experiencing some problems in recruiting and retaining certain critical skills. The Department reports that the Reserve incentive programs have been helpful, and we on the Armed Services Committee are recommending extending the bonus authority for several programs until fiscal year 1985.

Clearly, the Air National Guard and the Air Force Reserve are making significant contributions to military readiness. They, do, however, need the continued support of the Congress to meet the many challenges that this decade will most certainly present.

I, therefore, urge your strong support for the defense authorization bill for fiscal year 1982 which our committee, under the superior leadership of our chairman, Mr. PRICE, has reported.

THE LEGIS FELLOWS PROGRAM

(Mr. HARTNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARTNETT. Mr. Speaker, since February 1980, over 60 Government personnel from various executive branches of our Government have participated in the LEGIS fellows pro-

gram headed by the Office of Personnel Management. LEGIS fellows are selected to participate in the program from Senior Executive Service members and candidates, or other personnel designated for Government executive development. The primary objective of the LEGIS fellows program is to give executive branch personnel a firsthand opportunity of how the legislative branch process operates. These Government executives have served with many Members and committees in both Houses. I believe the Members of Congress who have been fortunate enough to have a LEGIS fellow on their staff have all found this program to be helpful. The amount of executive branch experience and familiarity that these Government LEGIS fellows can contribute in helping to solve and answer many of the day-to-day issues that come before Congress is of tremendous value. Having been fortunate enough to have had a LEGIS fellow on my personnel staff since January, I have experienced firsthand the benefit and value of this program.

Mr. Speaker, I would like to express my sincere appreciation, and the appreciation of my entire staff, to Phillip Edward Rogers, my recent LEGIS fellow. He is from the Department of Defense, the Defense Contract Audit Agency. Mr. Rogers served as my legislative assistant for defense and armed services related activities. He assisted me as a member on the House Armed Services Committee and the Subcommittee on Seapower and Strategic and Critical Materials, and the Subcommittee on Military Personnel and Compensation.

Mr. Rogers also assisted me on a number of other areas such as the Vinson-Trammel Act, preparing testimony before the Subcommittee on Military Installations and Facilities, the Trident submarine issues, the proposed arms sale to Saudi Arabia, the Navy's medium-depth mine warfare program, cosponsoring of Congressman MONTGOMERY's new GI bill legislation, and other defense areas.

Mr. Speaker, Mr. Rogers has performed a very valuable service for me and for our country. The Defense Contract Audit Agency should be proud of Mr. Rogers' dedication and the professional image he has projected. Again, I want to extend my appreciation for his service and urge other Members to make use of the LEGIS fellows program headed by the Office of Personnel Management.

ISRAELI ATTACK ON IRAQ

(Mr. BINGHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, Israel's attack on an Iraqi nuclear reactor is without question a serious development and presents dangers. At the same time, it may have prevented a far more dangerous situation: a nuclear-armed Iraq. Accordingly, I do not join in the chorus of condemnation of Israel's action. I urge my colleagues to carefully consider the facts before passing judgment on Israel's action.

First, it has been clear for some time that the Iraqis were actively seeking to develop a nuclear weapons capability. The United States has been attempting to prevent this, through diplomatic approaches to France and Italy, but to no avail.

Second, for the Israelis the idea of Iraq having a nuclear bomb capability is intolerable. Because of its small size geographically, Israel could be virtually destroyed by one or two nuclear weapons.

Third, Iraq has been at war with Israel since 1948. Iraq did not participate in the 1949 armistice agreement with Israel; nor did it accept the cease-fire of 1973.

Fourth, according to the official Israeli statement on the attack, Iraq's President Saddam Hussein has stated publicly that the facility was being built to be used against Israel. On August 19, 1980 President Hussein said that his goal is "to destroy Tel Aviv with bombs."

Fifth, under these circumstances, Israel's action may well be viewed as a matter of legitimate self-defense.

In order to maintain a proper perspective on the Israeli action, it is useful to remind ourselves how we felt about the Soviets moving missiles into Cuba. At that time many American leaders were arguing that the appropriate response for the United States was to take out the missile sites, even though there was no immediate threat that the missiles would be fired.

Mr. Speaker, the world may well be a safer place because of Israel's action on Sunday. The menace of a nuclear Iraq is, at the very least, forestalled. But we cannot allow a repetition of this event. The international community—and especially the United States—must redouble its nonproliferation efforts. We must prevail upon our allies to abandon their policies of selling nuclear technology to whichever nation has the cash. If we sit back and do nothing, we can be certain that Israel's action will not be the last of its kind.

ADMINISTRATION SOCIAL SECURITY PROPOSAL A SHAM

(Mr. AuCOIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AuCOIN. Mr. Speaker, 4 weeks ago, generations of Americans were shocked when the administration proposed a drastic reduction in retirement benefits under the social security system.

The outcry has been so strong that it is now clear the administration is willing to negotiate and cooperate with Congress on each and every point of its package. This is good news about a proposal that is nothing but bad news for the elderly.

In fact, the administration's plan is so seriously flawed that I am going to spend as many days as I have to at the beginning of each day we meet, to remind the President that his plan to allegedly restore public trust and confidence in the system is a sham. I will focus on the impact of a 30- to 40-percent cut for early retirees, a 30-percent cut in disability, and the special effects these cuts will have on women—90 percent of whose sole source of income is social security.

When added to previous rounds of the administration's budget cuts—$2.3 billion in food stamps, $8.7 billion in housing assistance, $450 million in low-income energy assistance, $347 million in legal services—this proposal puts the United States on a different road to security than the one envisioned by, I believe, the vast majority of Americans.

The President wants us to approve a massive spending spree for armaments—his budget calls for the largest, most expensive military spending plan in history—$226.3 billion next year, and $1.5 trillion over the next 5 years. And it expects us to get there, in part, by taking benefit dollars from the pockets of early retirees and the long-term disabled. It would rather reduce benefits by $70 billion in this period than forgo the $60 billion MX-missile boondoggle.

Inflation's power to tear apart the very fabric of society, necessitates that we take corrective economic action now to provide a solvent social security system—one that can be depended on. Certainly a nation that can afford to throw billions of hard-earned tax dollars at the Pentagon for an insane nuclear arms buildup can afford to provide for the health and welfare of its elderly.

NTIA FACILITIES PROGRAM

(Mr. SWIFT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SWIFT. Mr. Speaker, this House last week approved the 1981 rescission bill. An important provision of that bill retained $19 million in funding for the NTIA facilities program. Shortly, we will consider legislation to reauthorize the program for 1982 through 1984 at reduced but still adequate levels. Although the administration wanted to terminate this program im-

mediately, we did not. That was a wise decision.

This small but vital program has produced many benefits. In fiscal year 1980, some $14 million in local funding was added to the $20 million in Federal funds. The program provides largely invisible support for public broadcasting—towers, antennas, studios, equipment, and transmitters. But without it, the best television programs in the world would have no audience.

NTIA facilities' dollars go for three important functions: Extending service to those areas that are unserved; replacing wornout equipment and improving the quality of present equipment to give better service.

In my own State of Washington, we are 1 of the 12 Western States where large areas are still unserved by public radio and television. My own hometown, Bellingham, Wash., for example, cannot receive public television except in those homes that receive cable-TV which carries the Seattle station. I have been working with public broadcasters in my State for a long time now to correct that problem. But without funding, there is little chance a station will ever go on the air that will serve the northwest corner of my State.

Just as serious is the problem faced by people in another part of the State, represented by my good friend from Washington (Mr. DICKS). Public radio and television coverage in his district was seriously diminished when a storm destroyed the broadcast tower of KTPS-TV and KTOY radio. Although the stations are back on the air with limited service, they can no longer reach more than 1 million people they previously served, a major loss for the people of Washington State. I understand the gentleman intends to insert a news article in the RECORD that further outlines the serious nature of this problem. I commend it to my colleagues attention.

Presently, there are more than 550 grant applications on file with NTIA. They total more than $110 million. Had this year's facilities program been eliminated, it would probably have been impossible to restore service in the area served by my colleague. Because we have been able to preserve funding, the people of Tacoma, Olympia, and Centralia, will at least have a 1- in 5-chance of receiving the help they will need. If the House approves funding, contained in H.R. 3238, for years 1984, 1985, and 1986, the people in my own hometown could be equally fortunate.

ISRAELI ATTACK A VIOLATION OF INTERNATIONAL LAW AND U.S. LAW

(Mr. BOWEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOWEN. Mr. Speaker, I know that most, if not all, of the Members of this body were shocked and disturbed by the aerial assault by the State of Israel on the Republic of Iraq.

This attack, resulting in the loss of life of innocent civilians and heavy destruction, clearly appears to be a violation of international law and of U.S. law as well. Public Law 90-629, passed in 1968, states explicitly that—

Defense articles and defense services shall be sold by the U.S. Government under this chapter to friendly countries solely for internal security, for legitimate self-defense, to permit the recipient country to participate in regional or collective arrangements or measures consistent with the charter of the United Nations, or otherwise to permit the recipient country to participate in collective measures requested by the United Nations for the purpose of maintaining or restoring international peace and security.

Peace and security will not only not be served by this air raid, but they will be gravely jeopardized. The fact that Israel has overwhelming military superiority in the Middle East and also possesses its own nuclear weaponry, which Prime Minister Begin suspects the Iraqis might also try to develop, does not appear to color Mr. Begin's thinking, which seems to be more heavily influenced by the upcoming election in his country.

In contrast, President Sadat, who met with Prime Minister Begin only 1 week ago, must feel stabbed in the back, and we Americans should feel gravely embarrassed, since it is our weaponry and our technology, financed by our foreign aid, which has made this raid possible.

We all await the recommendation of our administration to the Congress under Public Law 90-629, and I believe we can see readily that defensive measures such as AWACS for Saudi Arabia, whose air space, among others, was violated by the Israeli raiders, is now far more clearly justified than before. We can only hope that this attack will not be used as the precedent for others like it around the world, to be described presumably as "preemptive self-defense."

Since Iraq is a signatory of the Nuclear Nonproliferation Treaty and has accepted regular inspections by the International Atomic Energy Agency, even if they should determine later this year to use their enriched uranium for nonpeaceful purposes—which has in no way been established—almost a decade would have to elapse before weapons could be produced by Iraq.

This lengthy process would easily be detected by any number of sources and give Israel a wide range of options, up to and including military force, at a much later date, thereby doing far less to preclude a peaceful solution to the problems of the region.

Sunday, June 7 was a sad day for peace in the Middle East and for American foreign policy.

Thank you, Mr. Speaker.

ADJUSTABLE MORTGAGE LOANS: NECESSARY CREDIT DEVICE

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. O'BRIEN. Mr. Speaker, the plight of savings and loan associations is severe. According to the National Savings and Loan League, between 90 and 95 percent of the Nation's savings and loans are losing money today. On a net basis, losses in the first quarter of 1981 totaled more than $700,000,000. Savings outflows for the January through April period came to $5,500 million. At the same time, they are under obligation to pay out interest in some instances at 15 percent, while they are taking interest in on loans made years ago at 6 to 9 percent. I think it is fair to say that the savings and loan associations of the United States are facing the greatest threat to their existence in their history.

It is therefore fitting to bring to the attention of my colleagues the thinking of Mr. James G. Schneider, president of the Kankakee Federal Savings and Loan Association. Mr. Schneider, a longtime friend, discusses the adjustable mortgage loan and how it can help stop the slide to insolvency of many savings and loan associations.

APRIL 1981.

WHERE IS IT WRITTEN?

After listening to "professional consumerists" of the Ralph Nader school scream about the newly authorized "Adjustable Mortgage Loan" (AML) and decry how it may throw innocent homebuyers into bankruptcy, we want to know: "Where is it written that savings and loan associations must forever protect homebuyers from the ravages of inflation?"

We don't recall that Moses brought that down from the Mount, nor have we been able to find it in other biblical writings or in the constitution or the statutes of the United States. We cannot even find it carved in granite on the courthouse lawn. So where have the professional do-gooders gotten that idea?

Do the AFL-CIO's plumbers, carpenters and electricians promise the homebuyers to make all their home repairs for the next twenty-five years at today's wage rates? Will the United Auto Workers build their cars for the same labor costs for the next quarter of a century? Will the U.S. Postal Service supply their postal needs for the next two and one-half decades at today's prices? Are Congressmen and Senators (and state legislators) ready to promise a moratorium on tax increases in that period? Indeed, will those same public servants swear not to raise their own salaries during that time? Will that bastion of consumer defense, the daily press, hold off demanding "a fair return for the small saver" long enough to

guarantee the home owners a twenty-five year subscription—payable a month at a time—to their newspapers at today's prices?

The answer to all of those questions is an obvious and ringing "NO". Yet, they all expect, as a matter of right, that the savings and loans will provide that kind of twenty-five year protection whenever a citizen buys a home. Which leads us to ask again, "Where is it written?".

We suppose they have assumed that some immutable law of nature provided for it because that's exactly what the savings and loan associations have been doing up until now—insulating the homebuyers from the Congressionally-induced inflation. The savings and loan business didn't cause inflation in this country. The do-gooders in and out of Congress have done it by saddling onto the free enterprise system a huge dollar amount of non-productive costs and by burdening the citizens with huge federal deficits over the past quarter of a century.

Those of us who know anything about financial institutions understand that nearly every savings and loan in the nation is now operating at a loss. About 70 percent of the Illinois associations showed a net loss for 1980 (Kankakee Federal was one of the 30 percent which finished in the black). But the relentless escalation of money costs has now thrown virtually every Illinois association into the red. The only one we know of still showing a monthly net income is a $25 million association located downstate. It explains that it stopped making mortgage loans about three years ago, and has kept its ever-increasing liquidity invested only in federal funds and treasury securities.

Were it not for the newly authorized "Adjustable Mortgage Loan", many associations which have continued to make mortgage loans day-in-and-day-out might soon have started to understand the wisdom of that downstate association. Then there would be very little mortgage money available, no matter what the rate.

Future protection of associations from the ravages of inflation is absolutely necessary if they are to continue in their major lending role. The homeowner will somehow have to shoulder his own burden instead of being protected by an innocent party which has not caused and has no power to stop or even diminish the scourge of inflation.

We hope readers active in the housing business will understand that an adequate supply of mortgage money in the 1980s can be assured only if the "AML" comes into general use in the S&L business. We trust they will helpfully explain that fact of life to prospective homebuyers. (Remember to point out that interest rates are required to go down when interest levels decline. The AML is definitely a two-way street.)

Although a few fixed-rate mortgages are apparently still being written, their day is over. In fact, their day really ended on June 1, 1978, when money market certificates came into being, thereby placing the cost of funds for S&Ls at the tender mercy of the money market. Any lending officer who continues to grant long-term, fixed-rate mortgage loans obviously doesn't understand the facts of life. In fact, I'd say he deserves to be called a "damn fool", and you may quote me on that.

JAMES G. SCHNEIDER,
President, Kankakee Federal Savings and Loan Association.

□ 1245

RECONCILIATION UPDATE

(Mr. PANETTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. PANETTA. Mr. Speaker, I am inserting into the RECORD today a copy of a Dear Colleague letter which the gentleman from Ohio, Mr. REGULA, who is ranking member of the Reconciliation Task Force and I as chairman have sent out, updating Members on the status of reconciliation, including therein guidelines that have been agreed upon by both the House and the Senate as to how reconciliation will be implemented.

For the information of the Members, as of today, three committees, the Committee on Agriculture, the Committee on Ways and Means, and the Committee on Post Office and Civil Service, have reported out bills meeting their targets. Ten others are in the process of developing, hopefully, bipartisan approaches to doing that. Two are presently in markup.

I would remind all committees that the deadline for reporting on reconciliation is June 12, which is this Friday.

The "Dear Colleague" letter and reconciliation update are as follows:

RECONCILIATION UPDATE

DEAR COLLEAGUE: The fifteen House Committees affected by reconciliation instructions contained in the first budget resolution continue to work on legislation to reduce spending in programs under their jurisdiction. Attached is a further update on what action committees have taken thus far.

Also attached is a set of reconciliation questions and answers developed jointly by the House and Senate Budget Committees.

Sincerely,

LEON E. PANETTA,
Chairman, Reconciliation Task Force.
RALPH REGULA,
Ranking Republican, Reconciliation Task Force.

RECONCILIATION UPDATE—REDUCTIONS DIRECTED UNDER RECONCILIATION FISCAL YEAR 1982 [1]

[In millions of dollars]

House committee	BA	O	Committee action
Agriculture	2,208	2,521	The Agriculture Committee met June 2 and 3 and will meet again to consider reconciliation savings. The Committee has approved a cap on the food stamp program that would achieve savings of $1,458 million in budget authority and outlays.
Armed Services	966	966	Hearings were held June 2 and are scheduled for June 4.
Banking, Finance and Urban Affairs.	13,177	640	A preliminary list of reconciliation options has been developed as a basis for Committee markup on Monday, June 8.
District of Columbia	39	40	The District of Columbia Committee is planning a markup session on June 10.
Education and Labor	12,099	10,084	The Education and Labor Committee staff is preparing options for the Committee. The full Committee will mark up during the week of June 9.
Energy and Commerce	5,385	5,184	Subcommittee on Health and Environment is scheduled to complete markup of Public Health Service legislation on June 4. Hearings on medicaid scheduled for June 5. Other subcommittees involved in reconciliation are developing options but have not formally marked up.
Foreign Affairs	250	130	Options for achieving the reconciliation targets have been prepared by the staff and will be considered by the full Committee during the week of June 8.
Interior and Insular Affairs	755	309	Reconciliation options being discussed informally by Members and staff.
Merchant Marine and Fisheries.	339	207	The Committee will review the issues and options in a Committee meeting, Wednesday, June 10.
Post Office and Civil Service	4,737	5,163	The Committee is currently developing options at the staff level. The Committee expects to mark up June 9 and June 10.
Public Works and Transportation.	6,346	1,218	The Committee is presently reviewing its options.
Science and Technology	78	39	Reconciliation options have been developed by staff.
Small Business	529	390	The Committee will mark up reconciliation provisions on June 9.
Veterans' Affairs	110	110	The Committee plans to include in the reconciliation bill the entitlement savings recommended in its March 30 report to the Budget Committee.
Ways and Means	4,677	9,241	On June 2, 1981, the Committee ordered reported a reconciliation package which would achieve outlay savings in fiscal year 1982 of $9,390 million.

RECONCILIATION UPDATE—REDUCTIONS DIRECTED UNDER RECONCILIATION FISCAL YEAR 1982 [1]—Continued

[In millions of dollars]

[1] Reductions are also required in fiscal years 1983 and 1984.

GENERAL ISSUES

I. Direct Spending

Question. How are savings in direct spending achieved?

Answer. Direct spending occurs without the discretionary action of the Appropriations Committee. Savings can be achieved by changes in laws which created these programs.

Question. If a direct spending program expires at the end of fiscal year 1981, how can savings be achieved for fiscal year 1982 and beyond?

Answer. Under the procedures for reconciliation scorekeeping purposes, program levels in a given year are projected forward into the next year, even when the existing authorization for the programs is scheduled to expire. This scorekeeping convention is not applied to programs that are clearly temporary. If a program is reauthorized for fiscal year 1982 at a level below the projected level (below the current policy baseline), savings will be credited.

II. Discretionary Spending

Question. How can discretionary spending savings be achieved for programs which expire at the end of fiscal year 1981?

Answer. As with direct spending programs under the procedures used by the Congress for scorekeeping purposes, program levels in a given year are projected forward into the next year, even when the existing authorization for the program is scheduled to expire. This scorekeeping convention is not applied to programs that are clearly temporary. If a program is reauthorized for fiscal year 1982 at a level below the projected level (below the current policy baseline), savings will be credited.

Question. What methods can be used to achieve savings in discretionary spending?

Answer. It is possible to achieve savings in these areas by at least one of two methods. First, the authorized level of spending for the year or years covered by the existing authorization may be reduced to a level that will achieve the savings intended. Second, regardless of the authorization level, a "cap" for the year or years involved may be placed on the programs in which savings are to be achieved sufficient to assure that the savings will be realized.

Question. If a discretionary program authorization expires at the end of fiscal year 1981 how may a committee be credited for savings if the committee chooses not to reauthorize the program?

Answer. In the committee report accompanying the reconciliation bill, a committee should include a statement of intent as to programs for which no reauthorization will be considered. To the extent that a committee includes such language, it will be credited with the savings accordingly.

Question. Are committees required to follow the program reduction assumptions underlying the first resolution?

Answer. No; the assumptions should be viewed as nothing more than options for consideration by the committees. The standing committees could consider these options or others that they may wish to devise.

Question. In cases where program requirements have been reestimated or spendout rates have been adjusted since passage of the reconciliation resolution, will these be used in scoring a Committee's reconciliation actions or will they be scored the same way they were at the time the House and Senate Budget Committees considered the reconciliation instructions? In sum, what baseline are the Budget Committees scoring the savings against and what methodologies are being used to determine the amount of savings?

Answer. The baseline against which legislation will be measured is the current policy baseline developed by CBO and agreed to in conference.

Question. If a committee approves a different mix of savings than that assumed by the Budget Committee in arriving at the reconciliation instructions meeting the budget authority instructions but not its outlay instructions (because of different spendout rates) will the committee have met its reconciliation instructions?

Answer. No; committees must satisfy their instructions as to both budget authority and outlays.

Question. If a committee normally reports an annual authorization for a program, must it now report a two or three-year authorization in a case where still greater savings are assumed in fiscal years 1983 and 1984?

Answer. To satisfy the reconciliation instructions, legislation must demonstrate that it will have the effect of reducing spending in the indicated years. A mere statment of intention that a committee will, one or two years from now, propose an authorization for the second or third year which will reduce spending in that year is not adequate to satisfy the reconciliation instructions. However, if a committee proposes policies in the first year that—if continued in subsequent authorizations to be proposed later—will yield the required savings in the outyears, the Budget Committee will credit the committee with the outyear savings even if the committee submits only a one- year authorization at this time.

Question. Can a committee receive credit for satisfying reconciliation instructions by submitting legislation which would, by statute, require what the Administration can currently do by administrative action?

Answer. The pivotal question is always whether the legislation achieves the savings required. Where the savings are achievable by administrative action, legislation is superfluous. However, if a committee were to submit legislation which simultaneously eliminates administrative discretion in a particular program or activity, the committee would be credited for the amount of such savings.

Question. Can a committee receive credit for satisfying reconciliation instructions by submitting legislation which increases revenues?

Answer. No, revenue increases may not be used to satisfy reconciliation instructions.

Question. Can a committee receive credit for satisfying reconciliation instructions by submitting legislation which results in savings in certain programs but may also result in increased costs in other programs?

Answer. The standard of savings is net savings to the government. Therefore, the savings of the proposed legislation would be netted against any increased costs and the committee will receive credit accordingly.

HOUSE PROCEDURAL ISSUES

Question. What is the timetable for reconciliation action?

Answer. House committees are to submit legislative proposals sufficient to comply with their reconciliation instructions to the House Budget Committee by June 12, 1981. The legislation will be assembled into an omnibus bill and reported out of committee by June 15, 1981. The bill should be considered by the House during the week of June 22, 1981.

Question. What procedures should be followed by committees in making their required reductions?

Answer. The schedule requires committees to submit recommendations for specific changes in laws to the House Budget Committee by June 12. The Budget Committee will assemble and report them to the House as one omnibus reconciliation bill. The changes should be submitted to the Budget Committee in legislative draft form. To facilitate preparation of the report on the reconciliation bill, committees should include report language as well as any matter necessary to conform to the Rules of the House (e.g. CBO cost estimates, inflation impact statements, Ramseyer).

It is possible that committees will wish to combine their reconciliation legislation with other legislation which will together move along a separate legislative track. The Budget Committee has no objection to moving a legislative proposal along more than one track. But to count towards reconciliation, provisions will have to be in the reconciliation bill regardless of whatever other bills contain these provisions. If, however, provisions in the other bill are enacted before the reconciliation bill is, they will be incorporated by reference into the reconciliation bill. Second, if a bill is enacted prior to June 12, a committee may count that bill towards their reconciliation goal, but only if all their legislation enacted before June 12 is counted as part of reconciliation.

Question. Will reestimates of the cost of existing laws or of Current Policy affect the reconciliation savings target of a committee? How about reestimates of the cost/savings of the actual reconciliation provisions?

Answer. Reestimates to existing law or Current Policy will have no effect on the scorekeeping of the reconciliation bill. For example, if the current policy estimate of a program such as Medicaid increases, the authorizing committee will not be required to achieve additional savings to offset that increase. Likewise, if the current policy estimate of a program decreases, the authorizing committee will not be relieved of its responsibility to achieve the reductions specified in the reconciliation directive.

An exception to this last statement is the "hold harmless" rule in which reconciliation legislation that exactly matches the program reduction assumptions underlying the first budget resolution are given the same credit as assumed in the resolution.

Question. What if a committee fails to make the dollar goal contained in the reconciliation directive?

Answer. The Budget Committee retains the option of going to the Rules Committee to implement appropriate savings.

□ 1415

GRAIN EXPORT BANK

Mr. WEAVER. Mr. Speaker, I take this time on the House floor to address the issue of our foreign grain sales. Presently our Government representatives, the U.S. Department of Agriculture, are negotiating with the Russians in London on a possible new long-term grain agreement.

At the present time in the Congress we are negotiating on vastly expanded budgets for our military. So, on one hand we are subsidizing the Russians with cheap grain, allowing them to expand their military potential, while on the other hand, we are spending billions of taxpayers' dollars increasing our military in order to defend ourselves against the Soviet Union. This makes no sense at all.

Our selling to the Russians of extremely cheap grain, of grain at prices below the cost that it takes our farmers to produce it, subsidized by the taxpayers and sold at a loss by the farmers to the Soviet Union is to my mind the most grave and severe export problem we have in this country.

It is food stamps for the Russians while at the same time I sit in the Agriculture Committee and see us cut food stamps for the American people, food stamps for the elderly, food stamps for those people in this country who now cannot afford adequate diets and see us subsidize the Soviet Union, in effect, giving the Soviet

Union food stamps by selling them cheap grain is beyond my ken.

That is why I have introduced and pushed for 6 years a bill creating a Grain Export Bank. This bank simply would allow the Secretary of Agriculture to set minimum prices on American grain sold to overseas customers where it would not affect the domestic market. It would allow the domestic grain market to be free. It would establish the market values for the various grains that are grown in this country. But it would, to foreign buyers, say, we no longer are going to give our grain away. Ten years ago wheat sold on the international market at $2 a bushel. Oil sold 10 years ago on the international market for $2 a barrel. That is why I coined 5 years ago on the House floor the phrase "barrel for bushel," because at one time and for many years a barrel and a bushel were equal in price.

Today oil is $40 a barrel and wheat $4 a bushel. How much longer can we go on buying oil for $40 a barrel to produce our grain that we sell for $4 a bushel? It is sheer madness and it results in deficits in our exports of billions and billions of dollars and makes us laughing stocks throughout the world.

Now many people say, "Oh my goodness, we should sell our grain cheap in the world because the poor starving people of the Third World nations could not pay a high price for our grain. We should sell it cheap."

Let met tell my colleagues that the poor starving nations of this world do not buy our grain. The nations who buy 90 percent of our grain are the wealthiest nations in the world. Japan now holds tens of billions of dollars of American money because they have sold us Toyotas, Sonys, and many other manufactured goods at prices, I can assure my colleagues, that were not below the cost of production. They were sold at a profit.

Yet, we sell our grain to Japan for less than it costs us to produce. Now when Japan buys our wheat at $4 a bushel, the Government puts on a $9 charge on that wheat before it turns it over to its own millers. In other words, the Government of Japan says that they can get $13 a bushel for wheat from their millers, but that $9 is pocketed by the Government of Japan and used actually to subsidize their own agriculture. Surely, we should be getting that $9 or at least a hefty part of it to help us with the subsidies that our agriculture receives. Why on earth should we sell our grain and allow the Government of Japan to make a 300-percent market profit on it. I cannot imagine why.

What are the other purchasers of our grain? The OPEC nations, the wealthiest nations per capita in the world, purchase 25 percent of our grain exports. That is easy. If they can raise the price of our oil that they sell to us, then most certainly we should be raising the price of the grain we sell to them. The other nations that purchase our grain, Germany, again one of the wealthiest nations of the world, England, South Africa, and on.

Then of course the People's Republic of China who hold more oil reserves perhaps than we do, and the Soviet Union has become one of the major buyers of our grain and will again now that the embargo is off. The only way we can raise the price to the Soviet Union or to OPEC or to Japan or anyone else is simply to say we are going to set a minimum price on our grain.

Now, if we set this minimum price on our grain, will the nations who buy grain simply go elsewhere and buy grain? That is a question that the administration and previous administrations have raised. They say, "Oh my goodness me, if we raise the price of our grain, why, these other countries will just buy it from somebody else." I answer that by saying this: When OPEC raised the price of oil, did we say, "Oh goodness, OPEC, we will just go some place else and buy our oil." No; we did not do that. We did not do that for a very good reason and that is because nobody else had the oil we wanted to buy. The same goes for grain. If a nation such as Japan wants to go and get more soybeans—and they have done that, they have invested, actually, in soybean farms in Brazil and they are growing some soybeans in Brazil and exporting them. Nevertheless, over 80 percent of the world's soybeans in the international markets are furnished by the United States.

So, if a country has bought 20 percent of its soybeans and wants its full share of the soybeans it needs, it is going to have to come to the United States. Corn, we export 70 percent of the corn moving in world markets. Wheat, we export over 50 percent of the wheat moving in world markets. We are OPEC, in effect, in grain. We are in grain, Saudi Arabia, Kuwait, Abu Dhabi, Algeria, Libya, Nigeria, Iraq, and Iran combined. If somebody wants vast quantities of grain in the world markets, they must come to us.

I have received letters from the Australian Wheat Board, the competitor we have in world markets, the country that produces wheat and in which many of our administration spokesmen say, why, they will just go to Australia and buy wheat if they cannot buy it from us at the price they want. I have a letter from the Australian Wheat Board that says, please, America, raise the price of your grain. Your grain in surplus is a drug on world markets. Your grain drags down the prices for all the rest of us. We are going broke, please raise your price so we can make a living.

But no, we continue to allow our grain to be a drug on world markets, a slight surplus dragging the price down as much as 50 percent. So we have established that the wealthiest nations in the world are the buyers of our grain, that they have no place else to go for the grain in the quantities they need it, that they can pay more for the grain and will do so vis-a-vis Japan adding $9 to a bushel of wheat if they buy from us.

So why do we not get more for our grain? Well, I will tell my colleagues why, I will tell my colleagues very simply why, because there are five large international grain companies that like it that way. There are five large international grain companies, four of whom are privately owned and therefore do not disclose anything about their operations or their profits or whom they buy or sell to, and they want to keep it that way. They want to deal in secret.

The American farmer, producing our greatest single product in the world, the greatest export product that we have, must sell his grain without knowing who is buying it and without knowing what prices are paid for his grain when it is sold to foreign countries. But the big grain companies like it that way. They do not want to be bothered. But what about America? What about the taxpayers and the people of America and the farmers themselves?

They do not like it that way, so why must we be subservient to five large grain companies? Why must we prostrate ourselves before five companies because they want to make profits, they want to deal in secret. Why must we give away our richest, most precious resource, our food production, and give it away is what we do, to the wealthiest nations in the world.

Am I in my Grain Export Bank disrupting the regular operations of our grain? Is that what they are concerned about? No. My Grain Export Bank bill simply allows the Secretary to set a minimum price. The grain companies actually can continue to buy on the domestic market, can store it, ship it, sell it overseas, they are completely free to run their operations as they do now, with one exception: They have to get a better price for it for the farmer. They have to get a better price for it for our balance of trade. They have to get a better price for it for the American taxpayers—that is all. And they have to reveal who they are selling it to and at what price. But I think that is fair for us to know, how much we sell our grain for and to whom. I think it is fair America should know that. I think it is fair the farmers should know who they are selling to and at what price. I think it is fair that the American taxpayer who subsidizes our

agriculture should know. That is all we are asking.

But think now for a moment of those negotiations going on in London. We are looking at signing a new agreement with the Soviet Union. Is that not nice? Is that not interesting? Here we are in the Congress appropriating hundreds of billions of dollars in weapons to defend ourselves against the adversary and at the same time our Government is negotiating in London for a grain agreement, a long-term grain agreement assuring the Soviet Union of a grain supply at costs below the price of production?

Now does that make any sense? Well let me tell you something else. I will tell my colleagues how the Soviet Union buys our grain, how they pay for it. They pay for it by selling gold. They have a lot of gold and they sell the gold in the world market and they take the dollars and they buy out grain with those dollars.

Now the price of gold 10 years ago was $35 an ounce. That is at the time that wheat was $2 a bushel. Since that time gold has risen almost twenty-fold. It has fallen a little recently—sorry about that, Mr. Brezhnev—but it has. But nevertheless, the price of gold has increased almost twenty-fold while the price of wheat has increased twice to $4 a bushel.

□ 1630

So, the Soviet Union now needs only one-tenth the amount of gold to buy our grain. Remember, if they were paying for it in dollars, they would still be buying it at below the cost of production; paying for it with hard cash, they would still be buying it below the cost of production. But, they are paying for it with gold that has increased twenty-fold, so they are paying for our grain what I would say amounts to roughly 40 or 50 cents a bushel. That is what we are doing to the Soviet Union when we could be getting twice that under the Grain Export Bank bill.

I see my dear friend from South Dakota, who in my estimation is one of the finest people I have ever seen serve in this Congress, and I want to bring him into this dialog in just a second, but I want to make this one point: My Grain Export Bank bill would simply allow the Secretary of Agriculture to raise the price gradually, maybe 10 cents a bushel, maybe 20 cents a bushel, just keep going up until we see what the market will bear. I have a suspicion that we could get at least $2 or $3 more a bushel without ever increasing the production in the world. I think there is that much gap right now, but let us find out.

Can one imagine this country's great business acumen, and we are letting ourselves be taken to the cleaners by this? I cannot believe it.

Mr. DASCHLE. Mr. Speaker, will the gentleman yield?

Mr. WEAVER. I yield to my good friend from South Dakota, Mr. DASCHLE, who to my mind is one of the finest young leaders that this Congress has seen, certainly in the years that I have been here.

Mr. DASCHLE. Mr. Speaker, I only rise to commend the gentleman from Oregon for his statement and for his legislation. I am proud to be a cosponsor of the bill. I think, as has been proven in past years, the gentleman from Oregon has a vision about the future of agriculture and the things we have to do to show the kind of strength that this country can show with regard to maintaining a strong agricultural economy.

I think the people in this country will one day recognize the value of the idea expressed today in this legislation, and will one day, as they have in the past, come to accept as reality the need for some new marketing device internationally. There is no question in my mind that as we progress, as we develop ways in which we can bolster international trade, international commerce, especially in the agricultural sector, we are going to have to use new mechanisms. The proposal made by the gentleman from Oregon to allow the Secretary to set that level of trade over at least the cost of production makes eminent good sense.

I was alarmed—in fact, shocked—when the members of this administration recently came before our committee in the Department of Agriculture and told us that: "Yes indeed, we are marketing our grain abroad at less than the cost of production." What greater crisis can our farmers face? Certainly not natural crises. Certainly not the disasters they find in hail and wind and drought. If our own Government cannot assist them in a more positive vein than to market our grain on the international market at less than cost of production, it is a very reasonable approach, and I think provides a reasonable yield in their profits, in their return for the tremendous costs and investment our farmers face today.

I think another couple of years will bring this Congress and bring this country around to the realization that we are the leaders in international marketing. We do need a new mechanism, an already recognized mechanism in Canada, in Argentina, in Australia, those other grain marketing countries that recognize our leadership. They also recognize our failure to exercise that kind of leadership at a time when we need it the most.

So, I again reiterate my praise for the Member from Oregon and for his leadership in showing a new way for this country to go forward, knowing that we need that leadership right now in the agricultural sector.

Mr. WEAVER. Mr. Speaker, I want to thank my friend from South Dakota, who represents a State in which I was born, and which is one of the great farm States of our Nation. I think the gentleman from South Dakota knows that what we are proposing here is not the Canadian Wheat Board, which goes in and gives quotas to farmers and allotment payments, a bureaucratic morass. There is no bureaucracy required at all. We just set minimum prices for the grain sales overseas.

But it does have, as the gentleman from South Dakota knows, a Farmer Advisory Board, a majority of which must be composed of active farmers, and I hope that one of them will be from South Dakota. They will advise the Secretary on what they think wise in terms of how to price our grain.

I think the gentleman from South Dakota also knows that this is not an embargo. A lot of people go out and say, "Weaver's bill is some sort of embargo." It is just the opposite. We want to sell as much grain as we possibly can, but we want to get a fair price for it.

We know the administration has the authority now under law to impose an embargo. They do not need any legislation. What they do need is the authority to raise the prices for our farmers.

Mr. DASCHLE. Mr. Speaker, if the gentleman would yield further, I would reiterate, of course, as the gentleman from Oregon well knows, that I am cognizant of the value as the gentleman has described it just now. The problem is that the rest of the country does not know that. The Congress is not fully cognizant of the fact that we are not trying to repeat the Canadian experience, not trying to devise a way in which Government will get more and more in the pockets and minds of American farmers. All we are doing is proposing a new mechanism that allows the grain companies the ability to market freely, but as we have already accepted the concept of minimum wage and minimum standards, accountability in trade and commerce and safety, all we are trying to propose is a minimum concept of return on investment for American farmers. That is all we are proposing. I hope the Congress as a body will one day recognize that this is no different, and that if we favor continuity in policy, certainly we must favor a minimum acceptable return on investment for American farmers.

Mr. WEAVER. I again thank the gentleman from South Dakota. I was interviewed today by the Associated Press on this bill, and the woman who interviewed me said, "What would the starving people of the world do if we raised our grain prices? Oh my good-

ness, aren't you going to hurt the starving peoples of the world?"

They do not buy our grain. The richest, wealthiest nations in the world buy our grain. The countries who can afford to pay for it buy our grain.

In conclusion, let me make one point, because this is not food as a weapon. As a matter of fact, the more we get for our grain sales, the more we can afford to put in Public Law 480; the more we can afford to put into famine relief. Then we will have the money to do that, and we can help Third World countries if we get a decent return from grain sales to countries such as Japan and the Soviet Union.

But, let me make one point, and I think this is where some of our farmers in the country miss, because they are afraid of Government interference, and rightfully so. I am always afraid when Government has to get involved, but nevertheless the point is, they are afraid somehow or other that they will get less money for their grain. When was it in this decade or any decade, for that matter, when foreign countries scrambled over themselves, fought with themselves, to buy our grain? Was it when the prices were the lowest? Was it when the prices were rock bottom, down at the lowest point? No. No; the time when the countries of the world just sent agents into this country to buy all the grain they could from us was at the time when the price was the highest, the time when prices were rising. That is when they were anxious to buy our grain.

That should be a lesson to us, because right now with our vast, huge crops growing, with our bins bursting with surpluses, right now the buyers of the world are saying, sitting back and yawning and saying, "We do not need to build up our inventory; there is all that grain in the United States and we can buy it anytime. As a matter of fact, harvest time might be better, when farmers have to put it out on sidings because they cannot even find places to store it, and we will come in."

The Soviet Union, that is when they like to buy. The Soviet Union will come in and buy it at even cheaper prices, but you put in a Grain Export Bank and the Secretary of Agriculture is talking about raising the price a little bit, what is that going to do? It is going to make those buyers a little nervous. It is going to make those buyers in Japan and the Soviet Union a little nervous and say, "How high is the Secretary going to raise the price? Maybe we better get in and buy it now before the Secretary raises prices much higher," and if they do the prices will go up, and as the price goes up and other countries see the price going up they will come in and start buying. So, instead of the buyers of our products sitting back and waiting for the price to fall, they will start coming in and buying and making the price go up. We will make a profit for a change. That is an interesting concept for America—a profit. Gosh, gee whiz, how long is this country going to go on subsidizing the wealthiest nations in the world and selling our grain at a loss?

So, I conclude with a small story; 4 years ago, in 1977, I offered in the Agriculture Committee an amendment to the farm bill at that time for a farmer-held grain reserve, and oh my goodness, it just was awful. It would be the worst thing in the world to have a grain reserve, even though it was farmer-held. It would just be awful. The big grain companies thought it would be terrible, that it would take away their secret rights to handle all the grain, and it might affect prices, and the Chicago Board of Trade thought it might hurt the speculators. It was just terrible. I only got, I think, six or seven votes in the Agriculture Committee when I offered it to the committee. It was just a terrible idea.

The Secretary, when we brought the farm bill to the floor of the House of Representatives and I notified the Members that I was going to offer the farmer-held grain reserve on the floor as an amendment to the farm bill, the Secretary of Agriculture stood right at that door of the House as we were voting on the Weaver grain reserve amendment and asked Members as they came in not to vote for the Weaver amendment.

He said, "Oh, it is a bad idea. Don't vote for it."

That is the same Secretary that said that the Grain Export Bank was such a bad idea. All those Secretaries, it does not matter who they are or what party they are, they have all said the same thing. But this House of Representatives passed that Weaver amendment, and we were able to keep it in the conference committee and it was enacted into law. Do the Members know what they say about that? They say it is the greatest farm program in the last 50 years. They will say the same thing about the Grain Export Bank, but somehow or other we have got to drag them screaming and hollering into commonsense.

Mr. Speaker, I see another dear friend of mine to whom I would like to yield at this time, the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Speaker, I appreciate the gentleman yielding. I want to associate myself with his remarks and commend the gentleman for his leadership on this issue.

We have an energy problem in this world, and there are lots of forms of energy. Food is one of them. This country produces a lot of food for the export market, and I come from a region of the country that is one of the most efficient food producers in the world.

However, in the marketing of that food around the world we do not do a very good job. It seems to me that when we talk about agriculture and investment in agriculture and how important that investment is, we have to understand that we are talking about an export commodity that returns over $30 billion in a year. That is a tremendous contribution to the balance of trade in this country, and so it is an important part of our economy. It is an important part of the energy question in this country.

I think it is time that we treat the food commodity that we have, which translates itself into energy, in a logical way in export markets. The gentleman from Oregon, I think, has attempted this over the years prior to my being here. I know he has championed this for a better export price for our agricultural products. This year, I think more attention than ever has been given to the ideas of the gentleman from Oregon.

Mr. WEAVER. Would the gentleman from North Dakota think that it would be wrong to charge OPEC nations for our grain?

Mr. DORGAN of North Dakota. No; our country, our reputation is based on being smart Yankee traders. I wonder where the smart Yankee trading ethic went when we are sending American food to the OPEC countries at less than the cost of production. It does not make sense at all.

Mr. WEAVER. But does the gentleman not feel sorry for the Saudi Arabians having to pay maybe as much as 50 cents or a dollar a bushel more for grain?

Mr. DORGAN of North Dakota. We used to be able to buy one barrel of oil for every bushel of grain we sent them, and the gentleman knows what has happened to that parity price. The fact is that that situation has changed dramatically over the years. Those who say that a bushel for a barrel philosophy is trite, they are dead wrong. The fact is there ought to be a parity price between the price of energy and the price of grain.

□ 1645

Mr. WEAVER. Mr. Speaker, I will say this: We know that the Arabs have raised the price of their oil time and time again, and they may have gotten it too high now. Forty dollars may be too high, and the price of oil may be coming down. But does the gentleman not think that certainly we should start seeing how high we can get our grain and test the market?

Mr. DORGAN of North Dakota. Exactly. I am not a person who believes in the custom of price gouging, nor is the gentleman from Oregon, but it

seems to me that again a smart trader in the international trade is the trader who gets what the product is worth. It does not make any sense to me for America to be trading abroad its very precious resources, including food resources, at a price that is less than the full cost of production.

It seems to me that we have to go even a step further. We have to be getting involved in the process by which we engage in international transactions on the sale of agricultural commodities.

I would commend to people who are interested in this subject and to all the Members of this House the book by Dan Morgan entitled "Merchants of Grain." I think it is time that we began to examine the process by which we market and export our agricultural products in this country. It is a process that, I think, is throttled by the very large grain exporting companies, those that are international grain operators and that often operate in a manner that is not in the best interests of family-sized farm producers in this country.

So I think that we ought to take a look at our trade relationships with the Soviets, with the Japanese, with the Chinese, and with the OPEC countries and say to ourselves, "Look, it is time for us to start getting the price for this commodity we are selling, for these products we are producing and exporting today, that represents a fair price." And a fair price is always the price that is equivalent to the full cost of production and a fair profit or return to the producer.

Mr. WEAVER. Mr. Speaker, I thank my friend, the gentleman from North Dakota (Mr. DORGAN), and I thank him specifically for pointing out Mr. Morgan's book. I recommend it.

I thank the gentleman also for making another extremely important point, and I am glad he did because I would not want this dialog to end without getting this point brought out in the RECORD here. That is as to what is a fair price. We know that we are actually selling below the cost of the farmer's production, but are we not also—and I am sure this is true in North Dakota and South Dakota—are we not also exporting a little of our topsoil every time we send a bushel of grain overseas?

I point that out because of the loss of topsoil it takes to grow that bushel of grain. So we are sending that topsoil and we are not charging for that. That is an irrevocable loss. And we are losing the subsidies we pay for the shipments on the Mississippi and the locks that are required there. We are losing on the subsidies for water in some areas of our Nation, and also for cheap electricity and all these things.

Of course, I want the farmers to have them, and I do not want anyone to misunderstand me. I think they are extremely important, and I have fought for those things all my political life.

My point is that I ask, who is benefiting from this? The one who is benefiting from this is not the farmer. Those who are benefiting from this are the Soviet Union, Japan, and the OPEC nations. When we subsidize REA electricity, who gets the benefit but the communes in the Soviet Union? Who gets the benefit but the sheiks in Saudi Arabia? They are the ones who get the benefit.

It is time that the American farmer got the benefit and the American taxpayer got the benefit, and that we stop sending our soil overseas without getting any just compensation for it.

So with that, Mr. Speaker, I conclude my remarks, if my friends in the House have no further remarks. I want to thank those Members who participated here. We will be offering the Grain Export Bank bill to the farm bill this year on the floor of the House of Representatives, and we certainly hope that we can have as much success then as we did with the grain reserve 4 years ago.

Mr. Speaker, I yield back the balance of my time.

CALL TO CONSCIENCE VIGIL FOR DR. SEMYON GLUZMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 5 minutes.

● Mr. GREEN. Mr. Speaker, I rise to speak out for the release of Dr. Semyon Gluzman, a psychiatrist imprisoned in the Soviet Union for 9 years for choosing to adhere to his personal and professional code of ethics. I am proud to again participate in the "Call to Conscience" Congressional Vigil for Soviet Jewry, and pleased at yet another opportunity to speak on Dr. Gluzman's behalf.

It is perhaps difficult for many of us to imagine living in an environment where morality and professionalism bring harsh punishments. Such has been the life of Semyon Gluzman. In 1968 he graduated from the Kiev Medical Institute, and practices psychiatry for several years. Dr. Gluzman repeatedly refused to help the KGB in its insidious practice of branding dissidents as psychotics, saying, "Psychiatry is a branch of medicine and not of penal law." He turned down a good position in the Dnepropetrovsk Special Psychiatric Hospital because he knew political prisoners there received treatment as a form of punishment. He also refuted the official diagnosis of a leading dissident, Gen. Pyotr Grigorenko, as insane.

For his ethical crimes, which also included several samizdat—underground—articles about the Soviet authorities psychiatric abuses, Gluzman was arrested in May 1972, tried in an empty classroom, and sentenced on October 12, 1972, to 7 years in prison and 3 years in internal exile.

While in prison, Gluzman maintained his commitment to the cause of all dissidents. He strictly refused to recant, and staged several hunger strikes to protest prison treatment and conditions. In addition, he coauthored a book for dissents advising them how to avoid classification as psychotic.

Gluzman, now in his third year of internal exile, lives and works on a Siberian farming collective in the Temenskaya Oblast. Address: Do Vostrebovania, Posiolok Nizhnaya Tavda, Tyumenskaya Oblast 620620, RSFSR, USSR. He depends to great extent on packages from the outside, which, according to several reports, he has had difficulty receiving in recent months. Because of what he had endured both in prison and in exile, his health is failing and several times in recent years he has almost died.

In less than a year Semyon Gluzman's sentence will have expired. I fervently hope that he will be freed and allowed to emigrate to Israel. Certainly, this hope has been the focus of the efforts of groups around the world who have taken up his case. As in past years, I introduced in this Congress a resolution (H.J. Res. 230) calling for Dr. Gluzman's release and permission for him to emigrate to Israel. The number of cosponsors to the resolution has increased every year—to a total of 81 this year—and I am proud to be able to play this part in working toward Dr. Gluzman's freedom. The recent release of Iosef Mendelevich makes me hopeful that our efforts in the U.S. Congress can have tangible results. The Soviet Union must hear our voices.

In closing, I would like to share with my colleagues excerpts of a letter Dr. Gluzman wrote to his parents in the fall of 1974. In the face of his imprisonment in Perm, Dr. Gluzman expresses moral and physical courage that are evidence of one of the human spirit's finer moments. Dr. Gluzman has achieved the near impossible: "Demonstrating our human dignity to all the thugs around us." Mr. Speaker, I hope that in next year's Call to Conscience, I can speak of Semyon Gluzman as a hero whose dignity is demonstrated in freedom, not in prison.

You write that I should reconsider my values. Daily and hourly, my physical being and personality are being killed. The watchdog outside the fence gets better food, with more calories, than I do. It is not fed rotten cabbage and stinking fish. Right now I am wearing a thin cotton tunic of the same infamous cut that Stalin wore, with a name tag on my chest. My head is shaved. I am always hungry, and I freeze on the cement floor of the punishment cells. . . .

Do you realize that when we are marched from one place to another, stopping or taking one step to the side is considered an

attempt to escape? (I know this from personal experience.) Or that when the temperature was −58° F, I was forced to lie down in the snow at night, guarded by a German shepherd straining at the leash, 'just in case'? This is the basis of my values; I can have no others. Therefore, there will be no compromise.

Would you really have approved such a recantation? You—conscientious and honest people, and doctors? No, you would not have. Because then I would really have become a criminal. . . .

I am not strong enough to violate my own conscience. And not weak enough. Here in this concentration camp I am leading an authentic spiritual life. I am happy, despite everything I have to endure. I say this even though declaring a hunger-strike is the only means available to me and my comrades in happiness (this is no slip of the pen: I am really happy) for demonstrating our human dignity to all the thugs around us. Even though refusing to help build the camp prison is one of the few ways I can affirm the morality of my convictions and my civic creed.●

INTRODUCTION OF LEGISLATION TO ABOLISH THE POSTAL RATE COMMISSION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. DERWINSKI) is recognized for 5 minutes.

● Mr. DERWINSKI. Mr. Speaker, during the past 10 years I have bravely accepted my role in achieving enactment of the Postal Reorganization Act. The decade of the seventies, with that law in place, has seen a vast improvement in the operation of the U.S. Postal Service, stabilization of its finances including a reduced burden on the American taxpayer, and enhancement of postal pay and benefits, and a general improvement in service.

However, I must admit one flaw in the Reorganization Act which I hope to correct with the legislation I am today introducing.

Having carefully followed the activities of the Postal Rate Commission since its inception under the act, and in particular, its inept and thoughtless handling of the current rate case, I have come to the conclusion that the Commission has not served its intended purpose.

The legislation I introduce would abolish the Commission and establish a ratemaking procedure within the purview of the Board of Governors of the Postal Service.

Enactment of this legislation would immediately save some $3,645,000 in outlays, which is the present budget of the Rate Commission. But, more important, it would allow the Postal Service to better fulfill its mandate of providing efficient service to the American public.

There would be established within the Postal Service a rate panel comprised of three administrative law judges, which upon request of the Board of Governors, would submit recommended decisions on changes in postal rates. The customary safeguards of the Administrative Procedure Act would continue, but such an arrangement would eliminate the second guessing on postal policy that has characterized the existing Rate Commission.

The panel would operate under the same time frame as presently exists, that is, they would have 10 months to report back with a recommended decision. The authority of the Board of Governors to establish temporary rates is continued, if the panel fails to meet its deadline.

Under my bill, the Board of Governors may accept or reject a recommended decision, or may modify it by a unanimous vote. The main thrust of the bill, therefore, is to streamline the ratemaking procedure without denying due process.

Unlike other Federal regulatory bodies, the Postal Rate Commission is unique in that it has only one business to regulate—postal service. When it was given that assignment under postal reorganization, it was with the hope and expectation it would usher in an era of enlightened postal ratesetting procedures which would be finely tuned to meeting the needs of the Postal Service and its nationwide constituency. Regrettably, the Postal Rate Commission has chosen to become a unrelenting adversary more interested in trying to usurp the management and policy prerogatives of the U.S. Postal Service.●

POSTSECONDARY STUDENT ASSISTANCE AMENDMENTS OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. COLEMAN) is recognized for 10 minutes.

● Mr. COLEMAN. Mr. Speaker, I have introduced the Postsecondary Student Assistance Amendments of 1981. This legislation is designed to make significant reductions in the costs of the two principal Federal student assistance programs: The guaranteed student loan program and the Pell grant program.

The future of Federal financial assistance for postsecondary students has been a major concern of the higher education community throughout the current budget crisis. The budget resolution enacted by Congress last month directs the Committee on Education and Labor to make substantial savings for fiscal years 1982, 1983, and 1984 in the Pell grant and guaranteed student loan programs.

Just a few days ago, I introduced, by request, the administration's proposal for reducing the costs of these two programs. Today I am offering my own bill as an alternative to the administration's bill. In drafting this legislation I sought to build upon the administration's proposals to the maximum extent feasible.

The goals of the two bills—savings of $504 million in the GSL program and of $711 in the Pell grant program for fiscal year 1982—are the same. However, the means to achieve that goal are different.

It has not been an easy task to write this bill. It has involved many hours spent talking with students from my home State of Missouri and elsewhere in the country, and it has involved many discussions with presidents and financial aid officers of colleges and universities from around the country that represent all types of institutions, small, large, public, and private. The bill I am introducing today is a workable and reasonable solution to the budget crisis facing these two programs.

What the bill does, Mr. Speaker, is to require that any loan made to a student under the GSL program be based on that student's remaining need, after the expected family contribution and other types of assistance—scholarships, grants—have been subtracted from the cost of attendance at the institution. In this way, a student who can show need can obtain a guaranteed loan to meet that need. My bill also retains the in-school interest subsidy and the special allowance payments. But to meet the required savings, I am proposing a loan origination fee of 3 percent to be paid by the student on the loan principal at the time the loan is made to the bank. This loan origination fee is solely for the purposes of offsetting the special allowances—the difference between 9 percent and market rates—paid by the Government to the bank. Through this mechanism, budget outlays for the GSL program will be significantly reduced.

The bill also will raise the interest rate on parent loans from 9 percent to 14 percent, eliminate the higher independent student loan limits, eliminate the second grace period following deferments, and eliminate some existing deferments. The present deferment for military service is retained in my bill. The needs analysis used to determine need for the GSL program will be the existing system already in use for Pell grants.

Savings in the Pell grant program will be made through amendments to the section 482 needs analysis to include all of social security and veterans benefits to be included as student aid for the purpose of calculating a student's need; allow the Secretary of Education to set an assessment rate on parental discretionary income to determine expected family contribution; allow the Secretary of Education to limit the allowable cost of attendance at an institution; and the change the

treatment of family assets to provide for a flat deduction of $25,000 from net assets in determining expected family contribution and of $100,000 if net assets include a farm or business.

In addition, my bill includes several amendments concerning the Student Loan Marketing Association (Sallie Mae), which allow Sallie Mae to deal in noninsured student loans and to act as a guarantor under the loan consolidation plan.

The overall effective date for these amendments is October 1, 1981. The collection of the loan origination fee, however, will begin upon enactment in order to effectuate some fiscal year 1981 savings.

Mr. Speaker, it is not an easy or popular job to cut educational programs, particularly those assisting college students. But if we do not return these Federal student assistance programs to their original intent—that of aiding the student who shows need—we may be jeopardizing the entire program. My approach to meet the total savings—as mandated by the budget resolution—of $1.215 billion is as fair and equitable as can be drawn. This bill may signal the end of loans of convenience to students, but it will keep the GSL program viable for students who need the money for one of the most serious and valuable purchases they will ever make—their education.●

TV STATIONS BLOWN OFF THE AIR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. DICKS) is recognized for 5 minutes.

● Mr. DICKS. Mr. Speaker, I am pleased that the House Committee on Energy and Commerce has recommended reauthorization of the NTIA telecommunications facilities program.

In my own district, continuation of this program is essential. On February 19, 220 feet of the 300-foot tower of KTPS television and KTOY radio was blown down in 100-mile-an-hour winds. A service reaching 1.3 million Washingtonians suddenly provided coverage to a mere 170,000 people. The equipment replacement cost to the station is $95,000; the insurance policy of the station is $100,000 deductible. In addition, funding for the Tacoma School District, from which these stations receive 40 percent of their total budget, was reduced by $6 million, resulting in a 20-percent loss in revenue for these stations.

Continued funding of this small but vital program provides a chance for the restoration of public radio and television to over 1 million Washington State residents.

Mr. Speaker, I insert at this point in the RECORD a portion of a February 19, 1981, Tacoma News Tribune article which describes the damage to this transmission tower:

SCHOOLS' RADIO, TV STATIONS BLOWN OFF THE AIR

(By Betty Anderson)

Tacoma School District's public television and radio stations will be off the air for at least the rest of the week because transmitting antennas were destroyed by high winds early this morning.

The top two-thirds of a 300-foot tower situated on the roof of L. H. Bates Vocational-Technical Institute snapped off during the storm.

Both KTPS-TV (Channel 62) and KTOY-FM used the tower for program transmission. Station managers arriving at work today found more than half the tower hanging over the roof and down the side of the building on South 11th Street.

Areas leading to the station have been cordoned off, but classes at Bates were being held today.

Robert Slingland, KTPS manager, said the broken tower left a gaping hole above offices adjacent to the station's master control unit.

Heavy rains poured through the roof before equipment could be covered, he said.

The equipment is being dried out to prevent electrical shock to station staff.

Slingland said he was still assessing the damage.

Lee Perkins, KTOY manager, said the radio station lost both its full and auxiliary power antennas.

"They were smashed beyond use," Perkins said.

The loss of the antennas and tower will affect the expanded coverage that had been under way at the TV station and will affect the training programs held at both stations, but the managers said they didn't know to what extent.●

EUROPEAN THEATER NUCLEAR FORCES RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, President Reagan has set our Nation on a course of massive military buildup that will markedly increase our nuclear stockpile. At the same time, he has shown strong resistance to efforts to reduce and eliminate nuclear weapons worldwide. Clearly, we are moving down the road to social, economic, and global disaster. The world will become an increasingly dangerous place until we are able to turn around the nuclear arms race.

I am thus concerned that the administration will not follow through on its announcement in early May that it plans to pursue negotiations with the Soviet Union to limit the deployment of European theater nuclear forces. The House of Representatives should support completion of these negotiations in a way that clearly expresses our commitment to nuclear disarmament and to avoiding nuclear war. For this reason, I am introducing today a resolution which encourages efforts to reach agreement on controlling the spread of nuclear weapons in the European theater, as well as around the world.

The announced U.S. commitment to negotiations is in accord with the 1979 NATO agreement which originally authorized placement of U.S.-provided nuclear forces in Europe. This agreement clearly linked such deployment to initiation of negotiations for controls on these weapons. Several European nations opposed placing U.S.-made weapons in Europe at the time of the agreement.

To proceed with deployment is to increase the possibility of a devastating nuclear conflict with the Soviet Union. Already the United States maintains a strategic nuclear advantage over the Soviet Union, as do NATO countries over Warsaw pact nations. Making Europe the battleground only increases the frightening prospect of nuclear war.

The continued buildup of nuclear weapons cannot be allowed to go on without making the world a more dangerous place. Unrestrained development and deployment of nuclear weapons greatly increases the likelihood that the weapons will be used and greatly increases the risks involved in all future conflicts, no matter how small. Arms control measures and disarmament are the only sure way of preventing a nuclear holocaust.

This resolution would state the sense of the House on four main points.

First, that the negotiations on European theater nuclear forces should be pursued vigorously;

Second, that the United States should make a firm commitment to a clearly defined timetable for completing these negotiations, so as to prevent them from dragging on indefinitely;

Third, that further development of the plan to place U.S.-provided nuclear weapons in Europe be suspended until negotiations are concluded;

Fourth, that these negotiations be planned and carried out as part of a comprehensive international effort to limit and halt the development and deployment of nuclear weapons.

This resolution is a clear statement of support for the control and eventual elimination of nuclear weapons. World peace and real national security can be achieved only by freezing nuclear weapons stockpiling and reversing the arms race. I urge my colleagues to join me in supporting this legislation.

A copy of the resolution follows:

H. RES. 153

A resolution expressing the sense of the House of Representatives that negotiations pursuant to the 1979 NATO decision concerning the deployment of nuclear weapons in Europe should be vigorously pursued by the United States and that the United States should commit itself to a clearly defined timetable for completing such negotiations, and for other purposes

Whereas the decision to deploy tactical nuclear weapons provided by the United States in Europe, which was made in 1979 by the North Atlantic Treaty Organization (hereinafter referred to as "NATO") in response to the presence of Soviet nuclear weapons in Europe, was linked to the initiation of negotiations for limitations on such deployments;

Whereas the United States has announced it will pursue negotiations in accordance with the 1979 NATO decision;

Whereas the deployment of nuclear weapons provided by the United States in Europe may strain international relations within the NATO alliance and actually weaken the security of all the countries which are members of NATO;

Whereas the deployment of nuclear weapons in Europe will increase significantly the possibility of a so-called "limited" nuclear war with potentially devastating impact on the people and economies of Europe, if not the whole world;

Whereas the United States currently has approximately 3,200 more strategic nuclear weapons than the Soviet Union has and the member states of NATO together have approximately 7,000 more nuclear weapons than the Soviet Union has;

Whereas the unrestrained development and deployment of nuclear weapons greatly increases the likelihood that such weapons will be used, greatly increases the risks involved in all future conflicts no matter how small, and greatly increases the possibility of a military confrontation between the United States and the Soviet Union; and

Whereas arms limitation and disarmament agreements and negotiations historically have both slowed and limited the expansion of the nuclear weapons capability of both the Soviet Union and the United States and have helped maintain a strategic balance between the two nations; Now, therefore, be it

Resolved, That it is the sense of the House of Representatives—

(1) that negotiations pursuant to the 1979 NATO decision should be pursued vigorously by the United States;

(2) that the United States should commit itself to a clearly defined timetable for completing such negotiations;

(3) that both the development of the nuclear weapons intended for deployment in Europe and the actual deployment of such weapons should be deferred until these negotiations are concluded and ratified; and

(4) that these negotiations should be planned and carried out as a part of a comprehensive international effort to limit and halt the development and deployment of nuclear weapons.●

EXPORT TRADING COMPANY ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 10 minutes.

● Mr. LAFALCE. Mr. Speaker, there is growing awareness that this country needs a comprehensive national export policy, in order to address the problem of chronic trade deficits, which has developed in recent years. The Foreign Corrupt Practices Act must be reformed and improved; the onerous and counterproductive level of taxation of Americans working abroad must be reduced; and the problem of export subsidy wars must be addressed in the context of international negotiations.

However, at the center of that national export policy must stand U.S. export trading companies. Therefore, I have introduced H.R. 1648, the Export Trading Company Act of 1981. The companion bill in the Senate, S. 734, passed the Senate by a remarkable margin of 93 to 0. H.R. 1648 has attracted the broad and bipartisan cosponsorship of more than 80 Members. The Reagan administration has enthusiastically endorsed the bill, and Secretary Baldrige has testifed twice in strong support of H.R. 1648.

The Export Trading Company Act has two key features. First, it would permit bank participation and ownership of export trading companies under strictly regulated conditions. Second, it extends an existing antitrust exemption for export trading associations to export trading companies under the supervision of the Departments of Justice and Commerce.

Export trading companies have a proven track record in various European and Asian countries, where they have helped produce healthy export performances. U.S. export trading companies would be particularly useful for small- and medium-sized companies which lack export experience and the necessary capital to export their goods and services. The Department of Commerce has estimated that there are at least 20,000 small- and medium-sized companies which could competitively export their goods and services but which do not because of those factors. U.S. export trading companies could help fill that void with marketing, financial, technical, and informational assistance.

H.R. 1648 recently won the strong endorsement from the Security Pacific National Bank which is bank with a great deal of experience in foreign markets and which has provided various forms of assistance to California manufacturers and companies. I want to share that position with all of my colleagues, because it contains a very cogent and persuasive set of arguments in favor of H.R. 1648; and I hope that all of my colleagues will join me in cosponsoring this important, bipartisan export initiative.

The statement follows:

SECURITY PACIFIC NATIONAL BANK POSITION ON EXPORT TRADING COMPANY LEGISLATION, JUNE 1, 1981

The management of Security Pacific Bank has for many years had a special interest in assisting California firms to become involved in exporting. This interest has resulted from an awareness of California's role as the principal gateway to the markets of the Pacific Rim; from continued analysis of the diversified economy of California; and from a long-standing concern for the imbalance in our nation's trading relationship with the rest of the world.

It is from this position that we wish to encourage support of legislation which is now before the House (H.R. 1648) to create Export Trading Companies. The remarks which follow we hope will provide insight into the need for new approaches to the problem of motivating domestic firms to aggressively seek foreign markets. We believe allowing banks to establish export trading companies will significantly enhance the chances for success in this country's continuing efforts to expand its international trade.

In the course of assisting numerous California firms to expand their markets beyond the borders of the U.S., we have undertaken several unique activities which have given us an unusual perspective of the problems faced by our government officials as they seek to encourage the smaller and so-called "middle market" firms to become more actively involved in international trade.

We have conducted market surveys to find ways to encourage local manufacturers to expand their sales efforts in international markets.

To help local marketing executives find overseas markets for their products we have created computer programs in order that we might make maximum use of the extensive export trade data available from the Department of Commerce. From this data we extract detailed information identifying specific markets for products currently manufactured by individual California firms. Furthermore, we identify foreign firms with special capabilities to be engaged as marketing representatives.

To further encourage exporting we publish a variety of reports weekly, monthly and annually documenting the trends in international trade and important developments of which California firms should be aware. Such frequent publication of information leads to numerous requests for further information and assistance which in turn gives us further insight into the export marketplace.

These efforts are in addition to the more normal pursuits of a major commercial bank with more than 600 California branches seeking to aggressively expand its own market by building a network of branches in 30 foreign countries, and with an Edge Act subsidiary in New York operating branches in major metropolitan areas of the U.S.

From this base of activity and the vantage point it provides, it is clear to us that the U.S. is falling far short of its potential in the international marketplace. We feel the nation's failure to reach its international goals is due in large measure to the artificial separation of our marketing and financial systems. The result is that our manufacturers all too often wait for foreign buyers to come to them. The usually protracted nature of export transactions resulting from distances involved, documentation, currency exchange, and language differences strain the managerial as well as financial resources of small and medium sized manufacturers and export management companies.

These weaknesses are clearly pointed out in the Bank prepared study which makes

the observation at one point that ". . . exporters are faced with something of a dilemma. That is, a firm's major motivation for exporting is to expand the market for its product; yet locating and developing that foreign market is reported to be one of the major difficulties facing the exporter. In addition, once the firm locates the foreign market, management feels that the transaction is hindered by excessive paper work and slow processing. Finally, once the goods are shipped, the firms feel that they have to wait too long for payment."

The creation of export trading companies which could be owned and operated by domestic banks is well suited to bridge the gap between the domestic firm without foreign marketing capability and the international consumer. Commercial banks, with their prominent place in the fabric of nearly every community in the country (particularly in those states with large branch chains); with their knowledge of the practices of international trade and finance; and, in many instances, with already existing networks of overseas branches and "rep-offices;" are potentially too important as facilitators in the international marketplace to be prohibited from assuming this role any longer.

As indicated in the opening paragraphs, we have tried a number of innovative ways to assist our customers to take the necessary steps to expand into world markets. It has been hard work and yet not nearly as successful as it should have been considering the great opportunities which exist.

Even the firms who commence to sell outside the U.S. too often lack the ability to maintain the sustained marketing efforts necessary to achieve significant presence in the market. Too narrow a product line and relatively heavy marketing burdens deter many firms from the efforts necessary to reach the volume to justify the decision to expand overseas sales.

Bank-operated export trading companies, by being able to represent several manufacturers with complementary product lines, and with established networks of domestic and overseas offices are in an excellent position to overcome several of the major obstacles to exporting which discourage other domestic firms. Combined with their already-existing expertise in trade documentation and financing, such export trading companies offer a potentially winning combination of capabilities which we feel can make a significant contribution to enhancing this country's international trade volume as well as freeing banking to compete in a field where its foreign counterparts have long been active and successful.●

SECRETARY OF INTERIOR WATT—PROFILE IN PERFIDY

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. OTTINGER. Mr. Speaker, I would like to insert in the RECORD the following profile of Secretary of Interior James Watt, written by Elizabeth Drew, which appeared in the May 4, 1981, issue of the New Yorker magazine.

The article is remarkably well written and contains an excellent evaluation of the dangerous potential of the current Secretary of the Interior. I urge my colleagues to take the time to read Ms. Drew's superb profile:

SECRETARY WATT

The Department of the Interior has jurisdiction over roughly one-fifth of all the land in the United States—more than four hundred million acres, most of it in the West and in Alaska. It is charged with both the preservation and the development of publicly held land—a charter that has historically led to conflict over its mission. It recommends which areas are to be used for parks, wilderness, wildlife refuges, and other recreation areas, and for grazing of livestock and for exploration for oil and other minerals. It also administers mining and mineral leasing on an additional three hundred and seventy million acres lying under other federally and privately owned land, plus another roughly one billion acres on the outer continental shelf. It manages the National Park System, which consists of some three hundred parks, covering more than eighty million acres; it is in charge of the Bureau of Reclamation, which promotes development of water resources, particularly in the West; and it runs the Fish and Wildlife Service, which is in charge of conserving migratory birds, endangered species, and other wildlife, and supervises some four hundred wildlife refuges. It has jurisdiction over strip-mining policy. It runs services involving outdoor recreation and national landmarks. It influences policies involving the production, consumption, import, export, and stockpiling of minerals. And it administers the Bureau of Indian Affairs. All these activities make Interior one of the most controversial and sensitive departments in the government, affecting as it does so many conflicting interests. And a Secretary of the Interior has wide discretionary authority. Secretaries of the Interior have ruined Presidents, and one (Albert B. Fall) went to jail. Great stakes are involved in the department's decisions, and many of the results of its actions are, of course, irreversible.

In recent years, for a variety of reasons, the department has become more controversial than ever in the West. The controversy has been embodied in the Sagebrush Rebellion—a political movement that helped Ronald Reagan carry every Western state, and that now has one of its avowed partisans, James Watt, as Secretary of the Interior. ("I am a part of the Sagebrush Rebellion.") Through actions he has already taken or is planning, Watt intends to try to reverse federal policy across the spectrum of functions performed by his department: to put less emphasis on preserving federal lands for wilderness areas and more on leasing them for drilling and mining; to accelerate the distribution of federal lands on which states have existing claims and of parcels of land they would like to obtain; to speed up offshore drilling; to promote mineral exploration (Watt was instrumental in the Administration's recent decision to interrupt and reassess the United States' participation in negotiating a Law of the Sea Treaty); to halt the acquisition of national parks and turn more of the management of existing ones over to private enterprise; to relax regulations on strip-mining; to reduce the requirements for assessing the environmental impact of drilling for geothermal energy; and to allow more killing of wild horses and burros and also of predators, and put less emphasis on the protection of endangered species. The Sagebrush Rebellion, in its ultimate form of protest, calls for federal lands to be turned over to the states. Watt has said that this demand is a way of bringing pressure for changes in federal policies. In his confirmation hearings, he was somewhat ambiguous: "I do not see the need at this time for a massive transfer of public lands to state or local control or private interests. If we do not shape up the management processes of these public lands, then there probably ought to be a massive transfer. I think some good management will handle those problems."

Watt has also been influencing environmental, energy, and even international policy beyond the boundaries of his department. According to White House aides, Watt was a lively and enthusiastic participant in the early Cabinet meetings and offered opinions on a variety of questions. The President, they said, was quite pleased with him. Watt recommended greater budget cuts for his own department than had been suggested by the Office of Management and Budget. And he was placed in charge of the interagency Cabinet Council on Natural Resources and Environment, which includes representatives of the Department of Energy, the Department of Agriculture, and other departments and agencies. The council will shape the Administration's position on the forthcoming revision of the air-pollution law, which must be reauthorized, this year, and on water policy. Watt is effectively in charge of important energy policy decisions, such as the pending one on whether to deregulate the price of natural gas. (He supported the deregulation of natural gas prices during previous government service.) Recently, the President appointed him to head the Advisory Commission on Intergovernmental Relations, which was established in 1959 to examine relations among federal, state, and local governments, and has done distinguished work in that field.

Watt's early actions have stirred up a storm, but the few dispassionate observers one can find tend to agree at least in part with some of the things he seeks to do; the question is how far he intends to go. In this, as in other areas of government, those who supported various programs in the past did not attend to how they were being administered, and are now on the defensive. Even some environmentalists agree that there is good reason to try to develop less cumbersome ways of administering some of the laws on the books. One can find dispassionate observers who agree that procedures for granting leases for mineral exploration can and should be speeded up. Moreover, it is the role of the environmental groups to sound the alarm, to give the worst-case analysis of what anyone who differs with them is trying to do, and to take the most adamant positions. And many of the actions initiated by Watt are only in their beginning stages: more are to come after some of his appointees have been confirmed by Congress. Several people who are worried are prepared to give him more time. But it is clear that a number of the actions already initiated or being contemplated by the Department of the Interior, as well as by related agencies, could amount to a radical change in land, conservation, and environmental policies—many of which have had an essentially bipartisan consensus behind them for many years. Some of the actions could upset delicate balances that have been painstakingly reached; some could result in the transfer of substantial amounts of land and resources now deemed to be the domain of all of the people to a much smaller group; some could result in very big gains for certain private interests.

Watt's personal style, as well as his professional background, has added to the controversy surrounding his appointment and his management of the department thus far. He comes across as smart, certain of his views,

intense, combative, and suspicious to an unusual degree of those who do not agree with him and also of the career bureaucracy, which includes many dedicated public servants. There have been wholesale firings at the Interior Department, and the career civil servants, many of them experts, have been cut out of decision-making. "We are not to become a part of the bureaucracy," Watt said in an interview in Public Opinion, which is published by the American Enterprise Institute, a couple of months ago. He went on to say, "Frequent Cabinet meetings keep us isolated and in unity. There's comfort in that. When I go against my bureaucracy, the issues are often against me. But when I come back to the fold, I'm nurtured." In March, addressing a group of people who run concessions in national parks, he said, "The President was brought to power by a restlessness of the people because they needed change and he represents change, and those old-time liberals that don't want change are going to frustrate [us] conservatives who want change every chance they can, and we've got to change forty, fifty years of bad government. To accomplish that, we fired every person in the Department of the Interior that was a Presidential appointee. I mean, we cleaned every one of them out and then we started appointing good people." Forty or fifty years of bad government covers a lot of ground, including several Republican Administrations.

Watt, who grew up in Wyoming, is forty-three years old, tall, and bald; he wears thick glasses; and he is polite and contained. One of his friends, Senator Alan Simpson, Republican of Wyoming, who is a most agreeable person, insists that Watt is a warm and sensitive man who has been treated unfairly by the environmentalists and in the press. In the early nineteen-sixties, Watt worked for Simpson's father, Milward Simpson, who was also a senator from Wyoming, and who served on the Senate Interior Committee. Then, in 1966, Watt became a lobbyist for the Chamber of Commerce, where he opposed the first national laws dealing with water and air pollution. During the Nixon and Ford Administrations, Watt served in the Interior Department and then on the Federal Power Commission. In both jobs, his actions were controversial, and led to a reputation, justified or not, for being pro-development, uninterested in preservation, and quick to remove subordinates who did not agree with him.

There is, of course, nothing wrong, in and of itself, in being pro-development. Obviously, some resources have to be developed. The real argument is over manner and degree: over how quickly resources should be developed, and how much attention should be paid to other considerations, such as preserving resources for the future, preserving the land around development areas, setting aside land for recreation, and protecting renewable resources like forests and rangelands. In a rush to gain access to current resources, future productivity can be damaged. And if the emphasis is on developing oil and other minerals now, will America be more secure in the future? These are issues that call for careful, reasoned judgments. Everyone involved in these controversies, it seems uses the word "balance." Everyone says that he is for balance, and everyone feels qualified to define it. If one drew a chart of the philosophies of Secretaries of the Interior, Watt's would be way off to one side.

Following his government service, Watt was hired by Joseph Coors, the president of the Adolph Coors Company and a right-wing activist (also an important backer of Ronald Reagan and ultimately a member of his kitchen cabinet), to head the Mountain States Legal Foundation, which is in Denver, and which Coors founded in 1977. The purpose of the foundation, which is nonprofit and tax-exempt, was, Watt said in 1977, to "fight in the courts those bureaucrats and no-growth advocates who create a challenge to individual liberty and economic freedoms." In a much quoted speech he gave during his tenure at the Mountain States Foundation, he said, "What is the real motive of the extreme environmentalists, who appear to be determined to accomplish their objectives at whatever cost to society? Is it to simply protect the environment? Is it to delay and deny energy development? Is it to weaken America?"

Watt's argument, which he made many times, was that the West held virtually all the nation's energy resources, and that "because of the actions being taken by extremists to delay or stop the orderly development of energy resources, the nation is likely to suffer energy shortages and thus severe economic hardship." His thesis was that "when this happens, the politicians in Washington will seize on the crisis and take whatever action is needed to extract energy from the Western States, in order to light and heat the East and to maintain jobs in the Midwest and on the East Coast." He continued, "I fear for our ecology in the West and for our life style. When the economic pressures start strangling the Eastern States, due to short supplies of energy, their political leadership will come after our resources." One person who knows Watt says, "He sincerely believes that he is standing between this country and disaster. His beliefs are close to those of corporate America's, because he believes that America would be better off if the companies were unshackled to do what they want."

This made him just right for the Mountain States Legal Foundation. The foundation is an offspring of the National Legal Center for the Public Interest, to which Coors has contributed and on whose board he serves as vice-chairman. The National Legal Center organized and initially funded several regional legal centers, of which Mountain States was one. The legal centers remain associated. The first chariman of the National Legal Center was J. Robert Fluor, the chairman of the Fluor Corporation, which is an international engineering and construction company. The Fluor Corporation is also in the coal business, provides drilling services, and has been attempting to acquire other mineral companies. The current chairman of the National Legal Center is Charles Barber, chairman of ASARCO, Inc., formerly the American Smelting and Refining Company, and one of the nation's largest mining concerns. The Coors Company not only makes beer but has invested in coal, oil, and natural-gas leases. Its mining affiliate has strip-mining plans pending at the Interior Department. Joseph Coors was also one of the founders of the Heritage Foundation, a highly conservative, policy-oriented organization based in Washington. Several of Watt's early actions at Interior are in accord with recommendations made in a report, "Mandate for Leadership," that was published by the Heritage Foundation shortly before the Reagan Administration took office.

The Mountain States Foundation will not give out the names of its contributors, but its financial backers are known to have included large firms involved in energy development, construction, and agribusiness, and also banks, public utilities, and casino companies. Its executive committee has included officials of such corporations as Amax, one of the nation's largest mining and coal companies; Conoco; and the Amoco Production Company. Watt, too, refused to disclose the names of its contributors during his confirmation hearings. Stephen Shipley, who served as the foundation's vice-president and was in charge of contributions, has gone to the Interior Department as Watt's executive assistant. Among the cases that the Mountain States Legal Foundation brought—several of them against the Interior Department—were ones challenging government policies on leasing for oil and gas exploration, air pollution, allotments for grazing on federal lands, strip-mining, water-management policy, and sovereignty for American Indians. It brought a suit challenging a requirement that public utilities in Colorado provide lower rates for the poor, the elderly, and the disabled. It filed a friend-of-the-court brief on behalf of a casino at Lake Tahoe that, along with other casinos, was seeking to hook up to a sewage-treament plant in an area that the Environmental Protection Agency said had already been too densely developed (a position shared by California, which, like Nevada, borders the lake). At his confirmation hearings, Watt told the Senate committee that he would avoid sitting in on any aspect of cases that the Mountain States Foundation was involved in—but would not refrain from getting involved in policy questions that might be related to the cases.

Watt himself, as attorney for the foundation, had filed a brief challenging the constitutionality of the present strip-mining law, which Interior administers. And when he was with the foundation he appeared before the Interior Department to protest new rules designed to bring about tighter enforcement of law that provided low-cost irrigation water in Western states. In February, Watt told the House Interior Committee that he intended to delay new department regulations indefinitely. They had been drawn up by the Carter Administration, under court order, to stop the practice of providing water to corporations and farms whose holdings exceeded the one-hundred-and-sixty-acre limit set by the reclamation law. An official order to delay the new regulations has been issued over the signature of one of Watt's deputies, but the department announced the action as Watt's.

Watt himself is a man of modest means, and in religion he is a devout fundamentalist. (He was "born again" in the mid-sixties and became a Charismatic Christian.) He spelled out his basic philosophy in Public Opinion (Watt declined to be interviewed for this article) as follows:

I come to Washington with a western states perspective. We feel that our individual freedoms have been reduced considerably by the power of Washington to set values. Market forces and the individual properly set values. We feel the pressure of reduced freedom in terms of access to the resource base. We have grown up with the land. The wealth of the nation comes from its resource base and its people. So we have had access to economic enhancement for personal gratification. In the last ten years, we have seen the government redetermine these values by limiting our access to these lands for market use or personal pleasure . . . . I believe strongly in market forces. The President's decision to dereg-

ulate crude oil was symbolic and important. I pushed very hard for that decision. Economically, it's not that big a deal. But the symbolism is important. Will Reagan allow market forces to set values or are we going to continue to let artificial forces coming out of Washington, D.C., set them?

In the same interview, he said, "In this country, we're going through a reassessment of our values. It's back to fundamentals—fundamental economics, fundamental social structures, fundamental religion, fundamental basic concepts."

Watt applies his fundamentalist religious beliefs to his job. In early March, he was quoted in the Washington Post as saying, "I believe there is a life hereafter, and we are to be here to follow the teachings of Jesus Christ. One of the charges He's given us is to occupy the land until He returns. We don't know when He is coming, so we have a stewardship responsibility . . . to see that people are provided for until He does come and a new order is put in place." This quotation ricocheted about Washington and has been interpreted—unfairly—by some as suggesting that Jesus wanted us to use up our resources. But Watt also said "So we cannot waste or despoil that which we've been given in the earth because we don't know our tenure here." He is usually careful to use such terms as "balance" and "controlled development." However, some people who work at Interior, and others who have dealt with him, say that he has a moral certainty about what he does—a conviction that he is doing what God intended. And one of Watt's friends said recently, "Jim has taken up the most anthropocentric intrepretation of Christianity—he feels that whatever human beings need is O.K." This man continued, "And he does have a religious sense of being a chosen person."

At Interior, Watt works with a coterie he brought in with him, and has largely shut others out. One department employee says, "There are people here who feel we can develop faster without sacrificing the environment, and believe that many of the directions he wants to go in are right, but we're not being tapped. He says that the career people are important, but everything he does gives us a feeling of a deep-seated contempt for everyone who has chosen to work for the government. There's very much an us-versus-them mentality developing, and it's very sad." Watt is essentially a loner, who works hard and spends what spare time he has with his family. He conducts his business briskly and likes to make decisions quickly. Says one Interior official, "He's smart but not particularly analytical. A lot of people are impressed by him because he talks rapidly and comes across decisively." In the course of the meeting with park concessionaires, he stressed that he would make decisions without hesitation. ("I'm out to make decisions and I will make them quickly. . . . I make lots of decisions.") He also said, "If we need to change personnel to accomplish a more aggressive concessioners program, we will change the people. We mean business, and when you read the press you're going to find that I can be cold and calculating, and indeed I can. But we are determined, and we are going to get ahold of this thing fast. . . . If a personality is giving you a problem, we're going to get rid of the problem or the personality, whichever is faster." He recently told a writer for the Denver Post that he had hired his personal secretary "because she is as abrupt as I am."

No one has much question that Watt reflects the Reagan Administration's outlook, but other Cabinet Secretaries also represent the President's views, in a different manner. A White House aide who works on energy, environment, and natural-resources issues recently told some environmentalists that the attitude of this Administration is that the 1980 election was about "privatization" versus "publicization," and that "we won." Watt told Public Opinion, "No other Secretary of the Interior, in recent times at least, has had a President who understands my department like Ronald Reagan does. He's a Westerner. Fifty per cent of his state is owned and managed by the federal government. When I said, 'I want to do this, I want to do that,' he replied 'Sic 'em.' "

Watt was chosen Secretary of the Interior after Clifford Hansen—a Republican who has been both governor of and senator from Wyoming—dropped out of consideration because he did not want to sell his family's valuable permits to graze cattle on federal lands in order to comply with conflict-of-interest regulations. When Hansen's appointment fell through, Watt was proposed by a group of Western senators who knew him from his earlier work, and was interviewed by Senator Paul Laxalt, of Nevada, the President's close friend. According to people working on the transition, it was understood that when it came to selections for the Interior Department Laxalt's word was it. Laxalt tells me that he had known Watt only by reputation, but that after he interviewed him "I almost single-shotted him—I phoned the President and said, 'He's our man.'" At that point, Laxalt had the enthusiastic concurrence of Coors, who, along with other wealthy Reagan supporters, was helping the President select his Cabinet. Laxalt says that Coors had been backing another man—that apparently Watt had not occurred to him. Laxalt told me, "As soon as I called Joe about Jim, he agreed immediately, and enthusiastically backed his appointment."

Reagan, who did not know Watt, then met with him for about twenty minutes and selected him. Alan Simpson said to me, "When we were talking about who should have the job, someone said, 'If you've got a bear of a job to do, why not hire a grizzly?' They got a grizzly when they hired Jim." When I asked Laxalt what Watt's mission was, he said simply, "To pacify the West." This gets to why the West is so angry, and what the Sagebrush Rebellion—of which Laxalt is a leader, and with which Reagan identified himself during the campaign ("Count me in as a rebel")—is all about.

Not all of the West is angry, of course, nor does the Sagebrush Rebellion represent all of the West. It is concentrated in the Rocky Mountain States, and represents a combination of forces: oil and mining interests that want more access to the minerals and other resources they believe to be on federally owned Western lands; interests that want federally owned land for commercial development; livestock interests that want more land, and ranchers who want to be freer of restrictions on grazing on federal lands; cowboys and farmers, who are traditionally suspicious of the federal government; and commercial interests that seek to overturn a number of federal policies. And in recent years these forces have been fed by the New Right political movement. A Western senator says that the Sagebrush Rebellion represents "the old cowboy who's not angry so much as independent and suspicious; plus a new force, fed by the New Right; and raw commercialism—the old land-grab issues of the nineteenth century reemerging." One Interior Department official describes it as "an attempt on the part of some opportunistic politicians to grab some land, capitalizing on some very legitimate complaints and frustrations on the part of local people." It has some roots in resentment of the East—a feeling that the East is the center of the environmentalists, and that Easterners think that Westerners, if left to their own devices, would strip-mine Grand Teton. (The environmental movement is strong in the West, of course.) Simpson says, "The toughest thing to handle is the paternalism from other areas which think that we really don't know what a jewel of a place we have, and that they are going to help us preserve that jewel." The Sagebrush Rebellion has some roots in resentment—some of it apparently justified—of a bureaucracy that is felt to be unresponsive to the ranchers with whom it deals in administering the federal lands. And it has some roots in commercial interests that have recently come to see value in certain of those lands.

The argument is over the disposition and management of the public lands currently managed by the Bureau of Land Management, in the Department of the Interior. This agency manages almost seventy per cent of all the land in Nevada, forty-two per cent of the land in Utah, roughly a quarter of the land in Wyoming, Oregon, and Idaho. These are the lands that were long considered the least valuable or attractive public lands and have not been set aside as national parks or reserved for forest preserves by the Forest Service or given away or sold off over the years. Homesteaders didn't want them. Until about a decade ago, the federal policy was essentially to dispose of these lands. Then a variety of people began to realize that they contained a number of important resources: ecological and environmental resources; renewable resources, such as timber and forage land; water resources; recreational opportunities; and valuable minerals. The lands are estimated to contain mineral assets worth hundreds of billions of dollars; eighty per cent of the nation's oil shale and forty per cent of its coal reserves; large deposits of oil, natural gas, and uranium ore; tar sands and geothermal heat. At the same time that commercial groups were taking a greater interest in these lands, the nation's population was increasing and the demand for recreational areas was growing—and all this coincided with a heightening of the environmental movement. (The first Earth Day was in 1970.) A move developed in Congress to establish a more comprehensive policy toward the disposition and management of those federal lands, and in 1976 the Federal Land Policy and Management Act was passed. This law said, for the first time, that it was in the public interest for the federal government to retain and manage the lands, instead of disposing of them, and it established procedures for deciding which lands should be set aside for wilderness areas and which should be released for other uses. The decisions are made by Congress, on the basis of recommendations by the department. Even those lands which are set aside for wilderness areas can be drilled for oil and gas and other minerals, with certain stipulations as to how the land around drilling sites is to be treated. Land that is awaiting designation as suitable or unsuitable for a wilderness area can be explored for oil and minerals, with certain restrictions that are designed to prevent the land from being made unsuitable for wilderness. Of the almost hundred and seventy-five million

acres that the Bureau of Land Management has studied to see if they should be released as unsuitable for wilderness, all but about twenty-five million have been released, but Watt and the mining companies say that the restrictions still go too far, and Watt has acted to loosen them. It is not quite accurate to say, as Watt and other critics of federal land policy do, that federal land has been "locked up" for a "single purpose"—by which they mean wilderness—and that exploration for resources is prohibited on it. One career official at Interior says, "They are reacting to impressions rather than facts."

It stands to reason that people who had become accustomed to the old system would resent the new one. Before the 1976 act, grazers and miners had relatively free access to these lands; some parts of them were being over-grazed and ruined for future use. It also stands to reason that various interests that wanted to possess or exploit these lands would be upset. (A permit to graze on federal lands is a very good deal, since the federal government generally charges cattlemen less per acre than private landholders do. Previous Administrations have tried to raise the price of grazing fees, but the Reagan Administration, despite its emphasis on cutting the budget and its nod in the direction of charging users' fees, has made no such effort. The politics of such a decision are fairly obvious. The rental cost of an oil or gas lease is also an attractive arrangement—a dollar an acre per year. If oil or gas is produced on federal lands, the federal government receives a royalty.) Reductions of grazing allotments and of access to public lands for drilling for oil and gas were among the subjects of suits Watt brought when he was at the Mountain States Legal Foundation.

The complaints about the Bureau of Land Management's overseeing of lands include homey stories about a rancher who was not allowed to put a fence up; about a miner who was penalized for building a road three feet in the wrong direction; about a rancher who opened his land to hunters, who were then forbidden to hunt on adjacent public land. Simpson points out that some Westerners are also disturbed because when federal rulings are challenged in the federal courts the appeals end up in the federal circuit court of appeals in Washington rather than in a court in Cheyenne, Wyoming. Most of the complaints, however, have to do with restrictions on grazing and with delays in or restrictions on getting access to minerals.

Laxalt said to me recently, "Westerners should be more involved in the decision-making. That was essentially the situation we had before the 1976 law was passed. Implicit in the old system was the idea that the allocation of grazing lands would be left to Westerners. The 1976 law had the decisions taken over by the activist-type managers in the Interior Department. They made decisions about where there would be grazing, about predator control, about wild horses. Essentially, the same thing is true of mining: by virtue of tremendous withdrawals of land, primarily for wilderness, a great deal of valuable property was being denied for use. The hostility just grew and grew, into the Sagebrush Rebellion. It wasn't just administrative turmoil, it was political. If there was one thing that burned Jimmy Carter in the West, it was this."

In 1979, the Nevada state legislature passed a bill, supported largely by miners and stockmen, that called for the turning over of federally owned lands to the states, and in the following year similar legislation was adopted in Utah, Arizona, Wyoming, and New Mexico. Bills to this effect have also been introduced in Congress. Sponsors of such legislation argue that these lands belonged to the states in the first place. Others argue that people who say this have their history wrong—that these lands were originally owned by the federal government or were given to it as part of the arrangements for achieving statehood. The idea of turning the lands over to the states horrifies many people, of course; they argue that there is a national interest in the way these lands are utilized, and assume that the lands would be yielded to the strongest economic interests within a given state. Richard Lamm, the governor of Colorado, and a Democrat, has said, "The West went into the Union with its eyes open, knowing well these lands were reserved. In the enabling acts that made us states, we waived any rights to these lands. We didn't want the burden of administering them. But now, finding valuable minerals in the ground, everybody is starting to get interested." Bruce Babbitt, the governor of Arizona, and a Democrat, has said that the instigators of the Sagebrush Rebellion are "ranchers, mining companies, and timber folk—the same old special-interest crowd that has been grabbing for Western land [since] the days of Teddy Roosevelt." Mike O'Callaghan, a former Democratic governor of Nevada, has said, "The term 'Sagebrush Rebellion' sounds Western, horsy, outdoorsy, and something any red-blooded, Levi's-wearing Westerner can identify with in good conscience. It is really the opposite. . . . What started out as a series of legitimate complaints against the federal landholders has now resulted in an attempted land grab by mining companies, large ranchers, and land speculators and oil companies."

Some career people in the Bureau of Land Management recognize that some of the complaints are valid, and are struggling to make the agency more responsive. They say that the process of deciding whether an area should be set aside as wilderness should be speeded up, and that the backlog of applications for exploration or drilling for minerals should be dealt with more rapidly. But, they say, they need more people to handle these things. Watt, however, cut the agency's budget for management of the lands. He has frequently referred to the Bureau of Land Management as "arrogant." And he has proceeded in a way that undermines the morale of the very people he needs in order to deal with the complaints of the Westerners. (A theory is held by some in the agency—and they concede that it may result from paranoia—that Watt is setting them up for failure, so that he can accept the more radical proposals of the Sagebrush Rebels.) Watt has said that "the Sagebrush Rebellion helps create the attention on those basic problems which Congress needs to address," and that "it will be my objective to manage these lands as a good neighbor to eliminate that friction and let the Sagebrush Rebellion die because of friendly relations." When he was asked during his confirmation hearings what his inclination would be if he was asked to testify on legislation providing for the transfer of federally owned lands to the states or private entities, Watt replied, "My present inclination would be that that would be a premature piece of legislation that would be a divisive force in Congress, unlikely of being passed." He also said, "If I failed in my mission, pressures would be so great on you senators to do that, that you would have no other alternative."

Some of the anecdotes about the Bureau of Land Management's recalcitrance are not altogether true. Watt had one that he particularly liked to tell—about how long it supposedly took a school to be able to build an athletic field on federal land—and he continued to tell it after his office had been informed that the facts were otherwise. When a congressman asked bureau officials about it in a hearing and was told the facts, he suggested that Watt get another example, and the Interior Department headquarters sent a request to a meeting of state directors of the bureau in Phoenix to provide one. Many of the examples of the bureau's unwillingness to allow a fence or a road to be built are true, and this unwillingness and many of the bureau's restrictions on mining in potential or actual wilderness areas have existed because of what bureau officials and previous other Interior officials believed to be the requirements of the law. The majority of the people who work for the bureau in the West are Westerners, but most of them are trained as foresters, range managers, archeologists, wildlife biologists, and the like, and have not had training in dealing with people. The bureau has now instituted training in "conflict resolution." There are often a number of parties fighting over the use of a given piece of federal land: backpackers want it left alone; hunters want to shoot on it and don't want the forage taken by grazing animals; grazers don't want energy development that might interfere with the grazing; wildlife biologists don't want either hunting or grazing on it; timber companies want to cut trees, which could foreclose hunting, grazing, and wildlife preservation; geologists want to study and preserve rock formations; oil and mineral companies want to drill and dig on it and, like timber companies, build access roads through it. It is the role of the bureau to resolve these conflicts—a process that can take time. Shortly after Watt assumed office, he held a series of large meetings with department employees and told them, among other things, that any of them who were committed to a "single-purpose" use of land should seek work elsewhere. But it is the funciton of the wildlife biologists and the geologists on the staff to say that if drilling, for example, is permitted in a certain place, an endangered species or a geological formation might be destroyed—to be advocates in a process in which a decision is made further up the line. Now some of these people are fearful of doing their job. Shortly after Watt came in, he fired fifty-one staff members of the Solicitor's Office—the office that gives opinions on how the laws are to be interpreted and helps the department build the cases that are then brought by the Justice Department against violators. He explained his action by saying that the Carter Administration had exceeded hiring levels; Carter Administration officials say that the levels were exceeded in terms of numbers but not in terms of the budget, and that the firings were political. If the office was too large, some have suggested, it could have been reduced by attrition. The Solicitor's Office, of course, decided on the regulations that Watt challenged in court when he was with the Mountain States Legal Foundation, and that annoy so many ranchers and mining companies. After Watt took office as Secretary, he asked some Interior employees why they did something in a certain way, and was told

that they acted in accordance with an opinion issued by the Solicitor's Office in 1979. Watt replied that the solution to that was easy—they would just get a new opinion. He added that one thing he would insist on was that the solicitors not sit around deliberately misinterpreting the law.

Watt has said that he will seek to release more land for exploration and development. The department has already taken steps—by getting a new solicitor's opinion reinterpreting the law—to relax the environmental constraints on oil drilling and mineral exploration on some of the public lands. These constraints were the subject of a suit the Mountain States Legal Foundation brought against the Interior Department. Douglas Baldwin, Watt's spokesman and longtime friend, told me that "the new regulations will permit exploration even though there will be some degradation of the environment." The department also has under consideration a process by which Congress would be asked to release lands unsuitable for wilderness while potential wilderness areas were still being studied. But some members of Congress want to continue the practice of considering the two types of areas at the same time, so as not to find that they had foreclosed the possibility of saving wilderness lands in certain areas. The real question is what sort of "balance" Watt will want to strike. Though Congress acts on Interior's suggestions as to which areas should be set aside for wilderness and which should not, the shape of the proposals it receives from Interior can affect its decisions. And there have been reports that Watt will recommend no further setting aside of land for wilderness areas at all. Baldwin told me that that "would be consistent with his philosophy—that this country has enough recreation areas, and there is no need for more." Baldwin continued, "He has said many times that public lands suitable for such development should be developed for multipurposes. The Secretary has taken personal charge of regulatory revision. We'll say not only what regulatory actions are wrong but what solicitor's opinions are wrong."

Watt has expressed concern that the United States is not sufficiently aggressive in developing its strategic mineral resources, and has become dangerously dependent on foreign suppliers. He has told Congress, "I plan to end unnecessary and burdensome regulations now frustrating America's mineral-development programs." He has called for a minerals policy that "involves not simply the establishment of emergency government action in the face of a non-fuel-minerals crisis such as war, market disruption, or price manipulation but the adoption of policies that protect American jobs and investments, improve our balance of trade, revitalize the nation's economy, and provide for the security of foreign-mineral imports." He has told a congressional subcommittee that the Department of the Interior must be the "'Amicus' for the minerals industry in the court of federal policymaking—not as a representative of private mining interests per se but as a spokesman for the very real public interest involved in the protection and preservation of a strong minerals sector." Again, the goal of developing minerals is in itself unexceptionable, up to a point. But the question remains of whether it will be done without undue damage, with a fair return to the government, and with consideration of what would be involved in getting at the minerals. There is also the question of whether it makes sense to go all out to extract strategic minerals now—as the mineral companies would like—or is it more in the national interest to identify mineral deposits and leave them in the ground until it becomes clear that they are needed. Watt objected to going ahead with the Law of the Sea Treaty because he felt that it represented too great a concession to the Third World; moreover, the Administration was under strong pressures from large mining companies to renegotiate the treaty. The new Administration made its position known on the eve of what was expected to be the final session on the treaty at the United Nations, and fired the entire negotiating team. The negotiations had been going on, under bipartisan auspices, since 1973. Elliot Richardson, who played a variety of roles in former Republican Administrations, had been the chief United States negotiator. It is widely agreed that the mining companies need a treaty in order to go forward with deep-seabed mining, because of the enormous costs and the risks of competing claims. The question before the Administration, which now has the treaty under review, is whether the companies can get what they want and also get a treaty.

Watt has considerable discretionary authority in leasing certain lands for exploration and development of oil and gas. He has taken steps to speed up the process of granting leases for exploration of the outer continental shelf. And in early February he proposed making four areas off the Northern California coast available for oil drilling. The four were among five California areas that had been under consideration for some time, and last year Cecil Andrus, the Secretary of the Interior in the Carter Administration, proposed making just one of them available—an area to the south of the others. Exploration of the others would involve drilling in waters off such areas as Big Sur, Point Reyes, and Mendocino. The agencies under Andrus had recommended that these areas also be drilled, but estimated that most of the potential oil and gas were contained in the one area Andrus proposed. Andrus decided that the expected yield in the four other areas did not justify the environmental hazards—the danger of oil spills, the threat to sea life and birds. Watt's proposal was protested not only by environmental groups but also by Governor Jerry Brown and by a majority of California's congressional delegation—including such conservative Republicans as Senator S. I. Hayakawa and Representative Barry Goldwater, Jr. Recently, a decision on these new areas was deferred. Watt's aides say that Andrus's decision was made for political reasons.

Watt also has discretionary authority to dispose of certain federal lands, and in this area, as in other areas, he moved quickly. The Interior Department may sell off to state and local governments parcels of federally owned land that is near privately owned land, for parks, municipal facilities, or community expansion. In his second week on the job, Watt wrote to Western governors inviting them "to identify parcels of federally owned land needed to meet community needs—such as land for community expansion and for schools, hospitals, and parks." If these needs could not be met under existing authority, Watt wrote, "I am prepared to pursue vigorously legislative and regulatory changes, if necessary, to meet your needs." The offer is unprecedented, and does not indicate whether Watt intends Interior to take into account the possibility that some of the parcels of land may be of great value, and to follow existing law and regulations governing what the states might have to pay for the property. Speedy action on all requests could result in the transfer at low cost of some valuable public land. The responses that have come in to Interior thus far indicate that some governors and local communities have interpreted the invitation broadly. New Mexico has asked for land, at no charge, that communities plan to turn around and sell to developers; one community in California is proposing to acquire land free that it has said it might then sell off to a developer.

Watt has also begun proceedings that could result in the transfer of a very large amount of valuable land to the State of Utah—a transaction that could set a precedent for similar action in other states. The transaction arises in part from the fact that the federal government still owes some states some land on the basis of arrangements that were made when they acquired statehood. When Western states entered the union, the federal government gave them specific sections of land in each township, primarily for the purpose of building schools. If the designated lands were already committed for other uses—had been set aside for national forests or parks or Indian reservations, or had been given to the railroads—the states involved were entitled to select other lands instead. Some states, such as Nevada, simply sold off the lands they were given. Some claims for land in lieu of the lands originally designated are still pending, in part because it has taken the states a long time to decide which land they wanted, or whether they wanted any, and in part because such exchanges are studied for the value of the lands involved, and hearings are conducted for all parties that might be affected. Eight states still have a total of slightly over six hundred thousand acres due them—ranging from small amounts (Wyoming and South Dakota are owed just over a thousand acres each) to quite substantial ones. The largest claim is that of Utah: two hundred and twenty-seven thousand acres. And Utah has decided that it wants some other land as well. States may seek to exchange some of their land for federal land—for example, to consolidate each of the two kinds of holdings. But there is a very large question of what consideration is to be given to the value of the federal lands those states are seeking. A few years ago, Utah tried to claim over two hundred thousand acres of federal lands containing highly valuable oil-shale deposits as the lands due it in lieu of its original federal grants. The Interior Department rejected the claim, and Utah sued, arguing that the Secretary should have no discretion to determine which federal lands could be claimed. The issue reached the Supreme Court, which ruled last year (in Utah v. Andrus) that the settlement could not simply be on an acre-for-acre basis but must be on the basis of "roughly equivalent value." Now Governor Scott Matheson of Utah is engaged in discussions with Watt about ideas that Utah has for overcoming the Supreme Court decision and arranging not only for a transfer of the lands in lieu of the original grants but also for a trade of a substantial amount of federal lands for lands owned by the state. Matheson, a Democrat, supported Watt enthusiastically during his confirmation hearings. On February 18th, Matheson wrote to Watt enclosing a memorandum, written by the assistant attorney general of Utah, that he described as "concerning the statewide land-exchange

79-059 O - 85 - 51 (Pt. 9)

program which we discussed in your office on February 10." Matheson said in his letter that he was in general agreement with the memorandum, and concluded, "I think we both view this subject as an historic opportunity for the public-lands states, as well as the United States, to solve many of their land-management problems and to create vastly improved relationships that should endure for decades to come." The memorandum proposes that Utah identify as lands to be acquired from the public domain "lands and minerals having a sufficient value so that we could actually do something with them and derive some substantial income from them." It goes on to say that "value is not a vital federal interest" and "there should be no reason why federal lands of high value would not be suitable for state acquisition simply because of such high value." It suggests that the state offer in return school lands "that we own but do not want or cannot use" and a number of what it considers unliquidated claims. Among these claims are lands that Utah argues it would have received if the 1976 Federal Land Policy and Management Act had not been passed. It argues that at the time Utah became a state and up until the passage of the 1976 law the federal policy was to dispose of unreserved public lands, and that Utah was therefore economically damaged by the new law. The memorandum asserts that because of these claims "we are justly entitled to values substantially in excess of the current net value that we will offer in exchange for the selection rights that we will agree to release." The memorandum goes on to suggest that there be "no effort to make exhaustive and detailed appraisals" of the land to be exchanged, because such appraisals would be time-consuming and also "partially irrelevant in that we will ask Congress to agree to the proposed over-all statewide plan or proposals." In other words, Congress is to be asked to approve, post facto, an elaborate plan that will have been worked out between Utah and the Interior Department, and not bother with the details. The states' memorandum suggests developing a number of proposals, each with a different ratio of benefits for Utah as opposed to those for the federal government, starting with five-to-one; it warns against making a proposal "where the values were equal or roughly equal, because it might be too tempting for Congress to opt for the latter alternative." The memorandum suggests that a legal brief be written, to be used "as a lobbying tool to justify the value discrepancy we would seek." It says that this brief "will be a subjective document prepared by one advocating a particular cause, drafted to persuade and convince members of Congress." The memorandum suggests that the state "proceed independent and apart from federal regulations and procedures," reasoning that since Congress would have approved the state's proposals, "there would be no violation of any law or regulation."

The career staff, worried about the implications of this proposal, warned Watt's office, and drafted a response for him saying that the department would have to give the proposal further study. Before the letter was signed by Watt, a second one arrived from Utah.

On March 19th, Matheson wrote to Watt referring to "our telephone discussion last week." He went on to say, "I am very pleased that you have agreed to proceed with my proposal to 'block up' state-owned lands in Utah"—that is, to consolidate them—"through a comprehensive exchange with the Department of the Interior." He proposed a speedy schedule for action, and said, "I assure you that we are committed to making this a successful endeavor and a model for other public-lands states." He also said, "It is important to remember during the process that the question of value is secondary. Our responsibility is to provide the Congress with a rationale for the final package, not an accounting of dollars or acres. If we proceed as though this is a 'business-as-usual' exchange on a massive scale, the project is doomed."

On February 25th, Watt met with the governors of eleven Western states and held a press conference afterward. Governor Robert List of Nevada told the press conference, "In all candor, I can't recall a single instance in which the governors raised issues . . . that the Secretary did not agree."

Watt stirred up a major storm by halting the expenditure of funds for the acquisition of land for national parks—including parks whose purchase Congress had authorized. The Carter Administration had recommended that three hundred and thirty-five million dollars be spent on acquiring parks this year. Watt reduced the sum to forty-five million dollars, to be used in special cases. His action not only would halt the acquisition of new parks but would leave some existing ones, such as the Cape Cod National Seashore and the Redwood National Park, incomplete. (It was when Reagan was running for governor of California that he made the remark "A hundred thousand acres of redwood trees are an awful lot of trees to look at. If you've seen one, you've seen them all.") Watt's position is that the government "must learn to manage what it owns before it seeks to acquire more land." However, his decision to acquire no more parks may be a permanent policy: Baldwin told me that Watt believes that "we have already protected most of the truly unique lands." Watt has also proposed to halt funding for the acquisition of parks in urban areas. His position is that these are "playgrounds," unsuitable for consideration as national parks.

This is another area in which some dispassionate people feel that Watt has something of a point but also that he is carrying things much too far and has come up with a simplistic and short-sighted solution. These people, who include conservation-minded Democrats, maintain that Congress had got in the habit in recent years of authorizing the purchase of parks that could not be described as "national jewels"—that a bit of pork-barrelling was going on. Traditionally, the Interior Department was supposed to recommend twelve national parks to Congress each year, and Congress added to the list. If some state or local areas desire more parks, these people say, they should pay for them. Some of them say that there are less expensive ways of allocating areas for recreation—that is, by designating them wilderness areas. However, Watt may not want any more wilderness areas, either. Baldwin says that Watt's general view is that we have enough of each type of ecological system already set aside. (Watt also plans to close down the Youth Conservation Corps, which has offered maintenance jobs in national parks and wilderness areas to poor young people.) The people who agree that Congress has gone too fast say, however, that it is one thing to slow down the acquistion of park land, another to stop it altogether. And if land is to be acquired in the future—assuming it is still available—it will cost all the more. Others argue that the population is growing, that we are running out of land suitable for parks, and that state and local governments are not likely to buy the land. They point out that Watt complains that some parks are overcrowded and yet refuses to add to the inventory. They say there is a national interest in having more parks available. They cite Theodore Roosevelt, who was the first President to champion the establishment of national parks, and point out that the parks have been called "the lungs of the land." Former Senator Gaylord Nelson, now the chairman of the Wilderness Society, says, "If you stop the acquisition of park lands now, where will you be in fifty years, when the population of the country has doubled?" They point out that the acquisition of parks was maintained through the Nixon and Ford Administrations, and that Watt's action reverses a long-standing tradition. And some are inclined to suspect that his action stems from concerns other than good management. Some environmentalists say they suspect that Watt's intention is to diminish the size of national parks that contain timber or oil resources. Baldwin says that even though there are a lot of mineral resources in some national parks, Watt "would never allow them to be opened for exploration or development." Baldwin also says, "There's probably a treasure trove in Yellowstone Park, but Watt would never allow it to be gone after—and Congress wouldn't allow it." There may, of course, be valuable land adjacent to existing national parks—land that under the new policy would not be acquired for park expansion. Watt has said that he might consider the transfer of some national parks to state and local governments—which may or may not have the funds, or may decide they don't want to use their funds, to maintain the parks.

A stir has also occurred over some remarks that Watt made in early March to the Conference of National Park Concessioners. Watt told the private concessionaires, "We are going to ask you to be involved in areas that you haven't been allowed to be involved in before." Even those who say that Watt may have a point concerning the purchase of more land for national parks are appalled at the idea of turning over more management of the existing national parks to private concessionaires, whose motivation is not the same as that of the National Park Service. Fans of the Park Service, who believe that it may represent the government at its best, argue that it is crucial to preserve the tradition of the trained Park Service ranger, in his Smokey the Bear hat, greeting people as they arrive at the parks and giving them information. They are aghast at the idea—which is being considered by Interior—of having this role taken over by representatives of private companies who are running concessions within the parks. They envision the national parks being turned into commercial operations. For example, the Music Corporation of America, which runs concessions in Yosemite National Park, has proposed that it take over the functions of greeting visitors and orienting them to the park. A few years ago, a great furor was caused when MCA, which was filming the television series "Sierra" in Yosemite, painted some of the rocks; during the Nixon administration, MCA wanted to put an aerial tramway into Yosemite, but the suggestion was turned down by the Interior Department.

Watt told the concessionaires, "I will err on the side of public use versus preserva-

tion," and he also said, "We will use the budget system to be the excuse to make major policy decisions."

Watt has already taken a number of actions involving the treatment of wild animals and rare species, and has thus managed to get a great many people upset. There are more actions in the works that could cause even more of a furor. One issue has to do with wild horses and burros that graze on federal land and can ruin it both for cattle grazing and for the wildlife that hunters want to go after. Watt has suggested that the way to deal with the wild horses and burros is to allow them to be killed. Currently, there are laws on the books controlling the killing of wild horses and burros. Those that may not be killed (old ones, sick ones, and lame ones may be) are put up for adoption. But it is costly to round them up—over five hundred dollars a head. Watt is considering a proposal to charge a sizable adoption fee; the result would be that fewer would be adopted and more could be killed off on the range. Shortly after he came on the job, Watt suggested to a group of Interior employees that perhaps wild horses and burros should be "harvested," just as elk are. (If elk or deer are overrunning an area, hunters are allowed to kill more than the usual number.) The Mountain States Legal Foundation sued the Interior Department during the Carter Administration, arguing that it was unlawfully permitting wild horses to graze on private lands. Changes are also in the works concerning predator control. Watt is considering a proposal to permit the "denning" of coyotes: going into the dens and clubbing the pups to death—a practice that Cecil Andrus has stopped.

The Interior Department has shifted its emphasis away from the listing of more endangered species; once a species is listed, government agencies must do what they can to protect it, which can hold up construction projects. The department says that the new emphasis is to be on "recovery plans" for those already listed. The new Administration dismissed the environmentally oriented members of a delegation preparing to attend an international convention on endangered species in late February in New Delhi, and replaced them with people more interested in hunting and in the commercial uses of animals. The United States ended up changing its previous positions on the protection of certain species of whales and all parrots—opposing most of the other nations represented. The Interior Department is also moving to take certain African leopards off the endangered list, thus permitting them to be hunted for sport. And it is moving to lift a ban, in effect since 1974, on the importation of kangaroo hides. The United States used to be a major importer of kangaroo hides, which are used for jogging shoes.

The initial actions that Watt has taken to enforce the law resolving the disposition of public lands in Alaska—enacted last year, after five years of attempts to strike a compromise between development and preservation—suggest to some that the balance may be changed in the direction of development. Watt is also being watched to see how far he will go in relaxing regulations to enforce the strip-mining legislation—something he has said he intends to do. The strip-mining legislation was passed in 1977, after ten years of effort to strike a compromise between environmentalists and mining companies. Even some environmentalists think that a certain amount of easing is in order, but a number of people are concerned that the department will go too far. Watt has already reduced funding for the agency that oversees the enforcement of the strip-mining law. A few weeks ago, he told a congressional committee that some people in the agency "feel they have been gutted," and he added, "We have trimmed fat out of the operation, and if that's gutting, I'm proud of it."

In March, Andy Pasztor, of the Wall Street Journal, reported that the man whom Watt had chosen as head of the department's Office of Surface Mining—James R. Harris, a former Indiana state senator—had received reclaimed strip-mined lands at bargain prices from two of the nation's largest coal producers. While Harris was in the State Senate, he had backed a resolution that led Indiana to join a Supreme Court case challenging the constitutionality of the strip-mining law. Watt, as head of the Mountain States Legal Foundation, had filed a friend-of-the-court brief in support of Indiana's position.

In fact, the appointments that have been made throughout the agencies in Watt's domain, in and beyond the Interior Department, represent a fairly consistent point of view—and set of interests. Two of Watt's allies from his Colorado days hold key jobs. Robert Burford, a rancher and former Speaker of the State House of Representatives, and a leader of an effort to get Sagebrush Rebellion legislation through the state legislature, has been named to head the Bureau of Land Management. According to Laxalt, Burford was the man whom Coors had been backing for Secretary before Watt's name came up. Burford has held a permit to graze livestock on bureau lands; Watt has said that the permit will be transferred to Burford's son to avoid a conflict of interest. Anne Gorsuch, a former Colorado legislator and attorney for the Mountain Bell Telephone Company, and an old friend of Watt's and Burford's, who was also supported by Coors, has been named to head the Environmental Protection Agency. The E.P.A. has jurisdiction over the air- and water-quality acts, as well as other environmental responsibilities. Watt has said that the National Environmental Policy Act "must be changed." The entire professional staff of the Council on Environmental Quality, whose function is to see that federal agencies carry out the requirements of the National Environmental Policy Act, has been fired, and the council's budget has been reduced. The council was established in 1970, during the Nixon Administration, to help carry out the National Environmental Policy Act, and Republicans were among those fired.

The new solicitor of the Interior Department is to be William Coldiron, the former general counsel of the Montana Power Company. Daniel Miller, a former geologist for several oil and gas companies, has been named Assistant Secretary of the Interior for Energy and Minerals. The under-secretary of the department is Donald Hodel, an energy consultant who served as deputy administrator of the Bonneville Power Administration. The Forest Service, which is in the Agriculture Department and is the largest public-land manager outside the Interior Department, is to be headed by John Crowell, a timber lobbyist who was previously general counsel for the Louisiana-Pacific Corporation, which is an offshoot of the Georgia-Pacific Corporation and is one of the country's largest cutters of timber in national forests. The role of the Forest Service is to administer the national forests so that some of the land is used for wilderness and recreation and some for timber cutting, and to insure that the timber cutting is done in a way that preserves the land for future use. Louisiana-Pacific has been at odds with the Forest Service and the Environmental Protection Agency over a number of policies, and some of the disputes have resulted in decisions against the company. Crowell has advocated an increase in the cutting of timber in national forests by lumber companies, and has been a critic of the Forest Service. He has denounced the idea of setting aside some of the forest land for wilderness areas as a concept that "originated with a surprisingly small band of devotees who over the years preached their cause with articulate persuasiveness and with unremitting fervor and zeal."

Even some Republicans—and they include lawyers representing corporate clients—who seek changes in the way laws in these areas have been administered are concerned about some of these appointments. They are concerned that things will be carried so far as to cause a reaction that would make what they see as legitimate change impossible. Certain federal officials—such as members of the Joint Chiefs of Staff or the head of a consumer-protection agency—are meant to perform advocacy rules; but most federal positions require administrators who will weigh and balance interests. The pattern that has appeared in the sphere of resources and the evironment is that positions that require judiciousness and a sensitive balancing of interests have been filled with dedicated advocates—advocates at one end of the spectrum, and advocates whose former clients stand to gain a great deal from their decisions.

A number of conservative Republicans who could have been named Secretary of the Interior would not have drawn the electricity that Reagan's choice has. Some true conservatives suggest that what Watt may be setting out to do is not truly conservative—that a true conservative would be more concerned with preserving our heritage. There is more of a consensus, even within his own department, for changes in direction and emphasis than Watt may think. But if he goes at his job with hostility toward real and imagined opponents, operates in isolation, is driven by ideological fervor, and is hellbent on taking action for the sheer sake of taking action, he is headed for trouble. Some people in Interior and outside, including environmentalists, haven't given up on Watt yet. Some even hold out the hope that he will be able to make sensible changes in policy and calm the West down without giving away the national store, and will thereby do some real good. But he may lack the temperament or the flexibility to do this—and, in any case, intentionally or not, he is the instrument of forces that are bigger than he is. In this area, as in others, there is a danger to the Reagan Administration and its allies in overinterpreting its mandate. The large interests that are propelling Watt's policies may find, as Watt may, that they can lose a great deal if they push too far. The changes over the last decade or so in national policies having to do with the management of resources and the environment would not have occurred if there had not been a substantial constituency behind them; they were not just the product of a few zealous lobbyists in Washington; they did not arise out of transient values. The America that some of the large interests seem to long for has ceased to exist. The days of everyone

for himself, with little thought for the future, are over. But while the issues are being fought out, a great deal of irreparable damage can be done.—Elizabeth Drew.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CHAPPELL (at the request of Mr. BENNETT), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BEREUTER) to revise and extend their remarks and include extraneous material:)

Mr. DOUGHERTY, for 60 minutes, on June 16.

Mr. GREEN, for 5 minutes, today.

Mr. DERWINSKI, for 5 minutes, today.

Mr. COLEMAN, for 10 minutes, today.

(The following Members (at the request of Mr. HATCHER) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. DICKS, for 5 minutes, today.

Mr. WEISS, for 5 minutes, today.

Mr. LAFALCE, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. OTTINGER, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $3,360.

(The following Members (at the request of Mr. BEREUTER) and to include extraneous matter:)

Mr. DAN DANIEL.

Mr. COUGHLIN.

Mr. YOUNG of Alaska.

Mrs. SCHNEIDER.

Mr. DANIEL B. CRANE.

Mr. DENARDIS.

Mr. MCCLORY.

Mr. RUDD in three instances.

Mr. COLLINS of Texas.

Mr. DERWINSKI.

Mr. BROYHILL.

Mr. LEBOUTILLIER.

Mr. SOLOMON.

Mr. CONABLE.

Mr. KEMP.

Mr. LAGOMARSINO.

(The following Members (at the request of Mr. HATCHER) and to include extraneous matter:)

Mr. TAUZIN.

Mr. BENJAMIN.

Mr. SOLARZ.

Mr. MCDONALD.

Mr. FRANK.

Mr. GEPHARDT.

Mr. DIXON.

Mr. FORD of Tennessee in three instances.

Mr. HAMILTON in two instances.

Mr. SHARP.

Mr. WEISS in two instances.

Mr. RAHALL.

Mr. MOFFETT.

Mr. LONG of Maryland.

Mr. ROSE.

Mr. RODINO.

Mr. D'AMOURS.

Mr. LANTOS.

Mrs. SCHROEDER.

Mr. LAFALCE in two instances.

Mr. BEILENSON.

Mr. BIAGGI in three instances.

Mr. FARY.

Mr. LUKEN.

ADJOURNMENT

Mr. DASCHLE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 50 minutes p.m.), the House adjourned until tomorrow, Wednesday, June 10, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1551. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Air National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1552. A letter from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting a revised annual report for calendar year 1980 on special pay for duty subject to hostile fire, pursuant to 37 U.S.C. 310(d); to the Committee on Armed Services.

1553. A letter from the Secretary of Commerce, transmitting notice of the President's recognition of the Louisiana World Exposition, and the registration of the exposition by the Bureau of International Expositions in Paris, pursuant to section 2(c) of Public Law 91-269; to the Committee on Foreign Affairs.

1554. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Germany (Transmittal No. 81-50), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1555. A letter from the Secretary of Education, transmitting the annual report on the Department's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1556. A letter from the Acting Deputy Assistant Secretary for Administration, Department of Housing and Urban Development, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1557. A letter from the Acting Deputy Assistant Secretary for Administration, Department of Housing and Urban Development, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1558. A letter from the Acting Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

1559. A letter from the Acting Comptroller General of the United States, transmitting a report on salary levels, pay adjustments, and pay interrelationships of top Federal officials; to the Committee on Post Office and Civil Service.

1560. A letter from the Deputy Assistant Secretary of the Army (Civil Works), transmitting the sixth annual report recommending deauthorization of various water resources projects, pursuant to section 12 of the Water Resources Development Act of 1974, as amended (H. Doc. No. 97-59); to the Committee on Public Works and Transportation and ordered to be printed.

1561. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting the annual report on the state of the finances of the U.S. Government for fiscal year 1980, pursuant to section 257 (First) of the Revised Statutes; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2330. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes; with amendment (Rept. No. 97-22, Pt. 2). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FISH: Committee on the Judiciary. H.R. 1681. A bill for the relief of Andre Bartholo Eubanks; with amendment (Rept. No. 97-129). Referred to the Committee of the Whole House.

Mr. FRANK: Committee on the Judiciary. H.R. 1785. A bill for the relief of Gladys Belleville Schultz (Rept. No. 97-130). Referred to the Committee of the Whole House.

Mr. MAZZOLI: Committee on the Judiciary. H.R. 2010. A bill for the relief of Kai-

Mee-Chen (Rept. No. 97-131). Referred to the Committee of the Whole House.

Mr. LUNGREN: Committee on the Judiciary. H.R. 2573. A bill for the relief of Moses Bank; with amendment (Rept. No. 97-132). Referred to the Committee of the Whole House.

Mr. SAM B. HALL, JR.: Committee on the Judiciary. H.R. 2975. A bill for the relief of Yuk Lee Li; with amendment (Rept. No. 97-133). Referred to the Committee of the Whole House.

SUBSEQUENT ACTION ON BILLS INITIALLY REFERRED UNDER TIME LIMITATIONS

Under clause 5 of rule X, the following actions were taken by the Speaker:

The Committee on the District of Columbia consideration of the bill (H.R. 3518) extended for an additional period not later than June 12, 1981.

The Committee on Government Operations and the Committee on the Judiciary consideration of the bill (H.R. 3519) extended for an additional period ending not later than June 12, 1981.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CONABLE (for himself and Mr. HANCE) (by request):

H.R. 3849. A bill to amend the Internal Revenue Code of 1954 to encourage economic growth through reduction of the tax rates for individual taxpayers and acceleration of capital cost recovery of investment in plant, equipment, and real property; to the Committee on Ways and Means.

By Mr. ROSTENKOWSKI (for himself and Mr. CONABLE):

H.R. 3850. A bill to make expenditure reductions in accordance with the budget reconciliation process; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. PHILLIP BURTON:

H.R. 3851. A bill to provide benefits under part B of the medicare program with respect to acupuncture treatment in States which license or certify individuals who furnish such treatment; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. DERWINSKI:

H.R. 3852. A bill to amend title 39, United States Code, to abolish the Postal Rate Commission, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. DUNCAN:

H.R. 3853. A bill to amend the Internal Revenue Code of 1954 to provide that interest on certain mortgages sold by savings and loan institutions will be exempt from Federal income tax; to the Committee on Ways and Means.

By Mr. EDWARDS of Alabama:

H.R. 3854. A bill to amend the Internal Revenue Code of 1954 with respect to the income tax treatment of incentive stock options; to the Committee on Ways and Means.

By Mr. FOLEY:

H.R. 3855. A bill to amend the Saccharin Study and Labeling Act to extend to June 30, 1983, the ban on actions by the Secretary of Health and Human Services respecting saccharin; to the Committee on Energy and Commerce.

By Mr. GARCIA (for himself, Mr. CORRADA, Mr. ST GERMAIN, Mr. BROWN of California, Mr. COELHO, Mrs. SCHROEDER, Mr. VENTO, Mr. CLAY, Mr. DWYER, Mr. WEISS, Mr. BINGHAM, Mr. BENJAMIN, Mr. MILLER of California, Mr. NOWAK, Mr. FORD of Michigan, Ms. MIKULSKI, Mr. BIAGGI, Mr. STARK, Mr. PATTERSON, Mr. ADDABBO, Mr. WEAVER, Mr. DOWNEY, Mr. STOKES, Mr. DELLUMS, Mr. GOODLING, Mr. KILDEE, Mrs. CHISHOLM, Mr. FORD of Tennessee, and Mr. CONYERS):

H.R. 3856. A bill to require each Federal grant applicant proposing to construct a new building to consider using a vacant school, in lieu of constructing such building, in order to carry out the purposes of the grant; to the Committee on Government Operations.

By Mr. GIBBONS:

H.R. 3857. A bill to provide that the tax treatment by certain lessors of automobiles and trucks as depreciable property shall not be disturbed without legislative action; to the Committee on Ways and Means.

By Mr. LAFALCE:

H.R. 3858. A bill to amend the Federal Water Pollution Control Act relating to the construction and operation of certain treatment works which are subject to regulation under international treaties; to the Committee on Public Works and Transportation.

H.R. 3859. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for sewer taxes, rents, and other similar sewer charges; to the Committee on Ways and Means.

By Mr. LEBOUTILLIER:

H.R. 3860. A bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition; to the Committee on Ways and Means.

By Mr. McDONALD:

H.R. 3861. A bill to terminate all participation by the United States in the United Nations, and to remove all privileges, exemptions, and immunities of the United Nations; to the Committee on Foreign Affairs.

By Mr. McKINNEY (for himself, and Mr. BLILEY):

H.R. 3862. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to allow the Mayor and the Council of the District of Columbia to specify the purposes for which funds may be expended, and the amount of funds which may be expended, for each of the various programs of the Board of Education of the District of Columbia; to the Committee on the District of Columbia.

By Mr. MARLENEE:

H.R. 3863. A bill to amend the Poultry Products Inspection Act to increase the number of turkeys which may be slaughtered and processed without inspection under such act, and for other purposes; to the Committee on Agriculture.

By Mr. OTTINGER:

H.R. 3864. A bill to amend the Internal Revenue Code of 1954 to increase the amount of interest income exempt from tax, to allow taxpayers to receive a refundable credit in lieu of the partial exclusion of interest income, and to provide for a special partial exclusion of interest income in the case of elderly taxpayers; to the Committee on Ways and Means.

By Mr. PICKLE:

H.R. 3865. A bill to establish a Social Security Court under article I of the Constitution to serve as the initial reviewing court with respect to all decisions rendered under the old-age, survivors, and disability insurance program and final determination made under the supplemental security income program, and to make other improvements in the appeals process under those programs; jointly, to the Committees on Ways and Means, and the Judiciary.

By Mr. SKELTON:

H.R. 3866. A bill to change the title of the new permanent flag grade for the Navy from commodore admiral to commodore; to the Committee on Armed Services.

By Mr. YOUNG of Alaska:

H.R. 3867. A bill to control processing by certain foreign vessels operating in the internal waters of Alaska during 1981; to the Committee on Merchant Marine and Fisheries.

By Mr. GREEN:

H.J. Res. 280. Joint resolution to provide for the designation of the 40th anniversary of the renewal of Ukrainian independence, June 30, 1981, as "Ukrainian Independence Day"; to the Committee on Post Office and Civil Service.

By Mr. WEBER of Minnesota:

H.J. Res. 281. Joint resolution to designate August 1, 1981, as "Accessibility for Disabled Persons Day"; to the Committee on Post Office and Civil Service.

By Mr. DONNELLY:

H. Con. Res. 143. Concurrent resolution to offer strong support for diplomatic efforts to resolve the current crisis in Lebanon, and to protect the right of Lebanese Christian and other communities to live in freedom and security; to the Committee on Foreign Affairs.

H. Con. Res. 144. Concurrent resolution authorizing and requesting the President to establish May 29 as a day of remembrance of John F. Kennedy; to the Committee on Post Office and Civil Service.

By Mr. MARLENEE:

H. Con. Res. 145. Concurrent resolution expressing the sense of the Congress that Amtrak should continue service on certain rail lines; to the Committee on Energy and Commerce.

By Mr. ROE:

H. Con. Res. 146. Concurrent resolution concerning the rights of the people of Ireland; to the Committee on Foreign Affairs.

By Mr. RINALDO:

H. Res. 152. Resolution to urge the President to continue to express the opposition of the United States to the imprisonment of Anatoly Shcharansky by the Soviet Union; to the Committee on Foreign Affairs.

By Mr. WEISS:

H. Res. 153. Resolution expressing the sense of the House of Representatives that negotiations pursuant to the 1979 NATO decision concerning the deployment of nuclear weapons in Europe should be vigorously pursued by the United States and that the United States should commit itself to a clearly defined timetable for completing such negotiations, and for other purposes; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

117. By Mr. KAZEN: A memorial of the Legislature of the State of Texas, relative to the basing mode for deployment of the MX missile system; to the Committee on Armed Services.

118. By the SPEAKER: A memorial of the Legislature of the State of New Hamsphire, relative to reimbursement for federally mandated State expenditures for special education; to the Committee on Education and Labor.

119. Also, a memorial of the Legislature of the State of Texas, relative to restrictions on the use of natural gas; to the Committee on Energy and Commerce.

120. Also, a memorial of the Legislature of the State of Colorado, relative to oil shale recovery activities on Federal lands; to the Committee on Interior and Insular Affairs.

121. Also, a memorial of the Legislature of the Territory of Guam, relative to public hearings in Guam on proposed legislation to waive visa requirements for certain alien visitors to Guam; to the Committee on the Judiciary.

122. Also, a memorial of the Senate of the State of Colorado, relative to regulation of wetlands by the Army Corps of Engineers; to the Committee on Public Works and Transportation.

123. Also, a memorial of the Legislature of the Territory of Guam, relative to extending the supplemental security income program for the aged, blind, and disabled to Guam; to the Committee on Ways and Means.

124. Also, a memorial of the House of the Representatives of the State of Missouri, relative to block grants; jointly, to the Committees on Education and Labor, Energy and Commerce, and Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. DERWINSKI introduced a bill (H.R. 3868), for the relief of Richard B. Port, which was referred to the Committee on Armed Services.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 501: Mrs. BOGGS, Mr. ECKART, Mr. MARKEY, Mr. PATTERSON, Mr. FOUNTAIN, Mr. BOWEN, Mr. RALPH M. HALL, Mr. MATSUI, Mr. EVANS of Indiana, Mr. LEACH of Iowa, Mr. CHAPPELL, Mr. COELHO, Mr. COLLINS of Texas, Mr. BEDELL, Mr. DASCHLE, Mr. HARKIN, Mr. HORTON, Mr. MICA, Mr. MONTGOMERY, Mr. BADHAM, Mr. ANDREWS, Mr. DELLUMS, Mr. MINISH, Mr. HOWARD, Mr. ST GERMAIN, Mr. HUTTO, Mr. RICHMOND, Mrs. BYRON, Mr. YOUNG of Alaska, and Mr. WYLIE.

H.R. 654: Mr. GUARINI.

H.R. 741: Mr. BROWN of Ohio, Mr. QUILLEN, Mr. DWYER, Mr. DASCHLE, Mr. WEBER of Minnesota, Mr. FROST, and Mr. HILER.

H.R. 894: Mr. O'BRIEN, Mr. PRITCHARD, Mr. BROWN of Colorado, Mr. CHAPPIE, Mr. STUMP, and Mr. FITHIAN.

H.R. 911: Mr. BOWEN.

H.R. 1005: Mr. HOPKINS.

H.R. 1297: Mr. WILSON.

H.R. 1298: Mr. WILSON.

H.R. 1300: Mr. GORE.

H.R. 1313: Mr. GARCIA, Mr. BLANCHARD, and Mr. CLAY.

H.R. 1353: Mr. DYMALLY, Mr. NAPIER, and Mr. MITCHELL of New York.

H.R. 1400: Mr. EVANS of Georgia.

H.R. 1447: Mr. EMERSON.

H.R. 1490: Mr. WYDEN, Mr. BEREUTER, and Mr. BEDELL.

H.R. 1539: Mr. MCCOLLUM, Mr. DAUB, Mr. HANCE, Mr. GUNDERSON, Mr. BAILEY of Pennsylvania, and Mr. FAZIO.

H.R. 1603: Mr. HENDON, Mr. ROBERTS of Kansas, Mr. WHITTAKER, Mr. PURSELL, Mr. HARTNETT, Mr. EDWARDS of Oklahoma, and Mr. CAMPBELL.

H.R. 1765: Mr. ALEXANDER and Mr. HAMMERSCHMIDT.

H.R. 1918: Mr. ROBERTS of South Dakota.

H.R. 1937: Mr. SAM B. HALL, JR., Mr. EVANS of Georgia, Mr. SYNAR, Mr. ROSE, Mr. MCCLORY, Mr. LAFALCE, Mr. FLORIO, Mr. FISH, Mr. HILER, Mr. WOLPE, Mr. DWYER, Mr. HUGHES, Mr. NOWAK, Mr. MADIGAN, Mr. SANTINI, Mr. ADDABBO, Mr. JENKINS, Mr. LUKEN, Mr. HILLIS, Mr. GLICKMAN, Mr. SCHEUER, Mr. JOHNSTON, Mr. GRAMM, Mr. GUARINI, Mrs. ROUKEMA, Mr. PEYSER, and Mr. MOLLOHAN.

H.R. 2146: Mr. HOLLENBECK, Mr. RINALDO, Mr. SMITH of Alabama.

H.R. 2389: Mr. SMITH of Alabama, Mr. DREIER, and Mr. AUCOIN.

H.R. 2631: Mr. FINDLEY.

H.R. 2640: Mr. WATKINS.

H.R. 2646: Mr. ANNUNZIO, Mr. BEDELL, Mrs. BOUQUARD, Mr. BARNARD, and Mr. RAILSBACK.

H.R. 2793: Mr. AKAKA, Mr. ALBOSTA, Mr. ASPIN, Mr. AUCOIN, Mr. BARNES, Mr. BEDELL, Mr. BEILENSON, Mr. BONIOR of Michigan, Mrs. BOUQUARD, Mr. BRODHEAD, Mr. BROWN of California, Mr. CLAY, Mr. CLINGER, Mrs. COLLINS of Illinois, Mr. DASCHLE, Mr. DIXON, Mr. DORGAN of North Dakota, Mr. DOWNEY, Mr. DYMALLY, Mr. EDWARDS of California, Mr. ERDAHL, Mr. ERTEL, Mr. FASCELL, Mr. FARY, Mr. FAZIO, Mr. FINDLEY, Mr. FOGLIETTA, Mr. FORSYTHE, Mr. FRANK, Mr. FRENZEL, Mr. GORE, Mr. GREEN, Mr. HEFTEL, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. JACOBS, Mr. JEFFORDS, Mr. KASTENMEIER, Mr. KILDEE, Mr. LAFALCE, Mr. LEHMAN, Mr. LUNDINE, Mr. MCCLOSKEY, Mr. MCHUGH, Mr. MAZZOLI, Mr. MITCHELL of Maryland, Mr. MITCHELL of New York, Mr. MOLINARI, Mr. NOWAK, Ms. OAKAR, Mr. OBERSTAR, Mr. OTTINGER, Mr. PANETTA, Mr. PEPPER, Mr. PEYSER, Mr. RAHALL, Mr. RANGEL, Mr. RICHMOND, Mr. ROSENTHAL, Mr. ROYBAL, Mr. SABO, Mrs. SCHROEDER, Mr. SEIBERLING, Mr. SIMON, Mr. STARK, Mr. STUDDS, Mr. WEAVER, Mr. WIRTH, Mr. WOLPE, and Mr. YATRON.

H.R. 2835: Mr. CROCKETT and Mr. WAXMAN.

H.R. 2982: Mr. EMERSON.

H.R. 3075: Mr. LANTOS.

H.R. 3136: Mr. ROBERTS of South Dakota and Mr. MCKINNEY.

H.R. 3181: Mr. ANTHONY, Mr. DASCHLE, Mr. MOFFETT, and Mr. SUNIA.

H.J. Res. 197: Mr. HORTON.

H.J. Res. 211: Mr. DAN DANIEL, Mr. ROUSSELOT, Mrs. HOLT, Mr. RUDD, and Mr. MARLENEE.

H.J. Res. 259: Mr. VANDER JAGT, Mr. MITCHELL of Maryland, Mr. DORNAN of California, Mr. OTTINGER, Mr. WYLIE, Mr. CORCORAN, Mr. WEBER of Minnesota, Mr. DASCHLE, Mr. WOLF, Mr. HARKIN, Mr. BARNARD, Mr. SEIBERLING, Mr. PEPPER, Mr. LAFALCE, Mr. MCGRATH, Mr. DAUB, Mr. BENEDICT, Mr. MATSUI, Mr. GUNDERSON, Mr. CLAY, Mr. MCHUGH, Mr. RINALDO, Mr. SOLARZ, Mr. SCHEUER, Mr. LENT, Mr. DWYER, Mr. NOWAK, Mr. LEBOUTILLIER, Mr. KASTENMEIER, Mr. PARRIS, Mr. PURSELL, Mr. STUDDS, Mr. GINGRICH, Mr. DENARDIS, Mrs. CHISHOLM, Mr. FOGLIETTA, Mr. ROSENTHAL, Mr. LEACH of Iowa, Ms. MIKULSKI, Mr. MURPHY, Mr. ROBERTS of Kansas, Mr. ROBERTS of South Dakota, Mr. CROCKETT, Mr. DAVIS, Mr. COUGHLIN, Mr. STARK, Mr. PASHAYAN, Mr. FOWLER, Mr. RAILSBACK, Mr. MCKINNEY, Mr. ALBOSTA, Mr. CONYERS, Mr. MCEWEN, Mr. SAWYER, Mr. BEDELL, Mr. FORD of Tennessee, Mr. D'AMOURS, Mrs. COLLINS of Illinois, Mr. LANTOS, Mr. KOGOVSEK, Mr. EMERSON, Mr. PRITCHARD, Mr. ROE, Mr. FLORIO, Mr. LUJAN, Mr. SABO, Mr. SUNIA, Mr. MOLLOHAN, Mr. HOLLENBECK, Mr. SMITH of New Jersey, Mr. DORGAN of North Dakota, Mr. ST GERMAIN, Mr. AUCOIN, Mr. TAUKE, Mr. ADDABBO, Mr. WORTLEY, Mr. BOWEN, Mr. GREEN, and Mr. FRANK.

H.J. Res. 268: Mr. BROOMFIELD, Mr. WINN, Mr. DERWINSKI, Mr. LEBOUTILLIER, Mr. ALBOSTA, Mr. BAILEY of Pennsylvania, Mr. BENJAMIN, Mr. BLANCHARD, Mr. BONIOR of Michigan, Mr. CLAUSEN, Mr. CONYERS, Mr. PHILIP M. CRANE, Mr. DWYER, Mr. FAUNTROY, Mr. FOGLIETTA, Mr. FORSYTHE, Mr. FRENZEL, Mr. FROST, Mr. GREGG, Mrs. HOLT, Mr. HORTON, Mr. LAFALCE, Mr. LEHMAN, Mr. LUNGREN, Mr. MCDONALD, Mr. MOLINARI, Mr. MURPHY, Mr. OBERSTAR, Mr. PANETTA, Mr. ROE, Mr. SCHEUER, Mr. SMITH of New Jersey, Mr. SUNIA, Mr. VENTO, Mr. WORTLEY, Mr. YOUNG of Florida, Mr. YOUNG of Missouri, and Mr. ROBINSON.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

112. By Mr. KAZEN: Petition of Thomas C. Wakefield and Elsie W. Choate, Uvalde, Tex., relative to the first amendment to the Constitution; to the Committee on the Judiciary.

113. By the SPEAKER: Petition of the city council, New York, N.Y., relative to home health services; jointly, to the Committees on Energy and Commerce and Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3480

By Mr. SENSENBRENNER:

—Page 13, insert the following section after line 2 and redesignate succeeding sections accordingly:

AUDITS

SEC. 13. Section 1009 of the Legal Services Corporation Act (42 U.S.C. 2996h) is amended—

(1) by redesignating subsection (d) as subsection (e); and

(2) by inserting after subsection (c) the following new subsection:

"(d) The Comptroller General and the General Accounting Office shall have the same authorities with respect to conducting audits of the Corporation as the Comptroller General and the General Accounting Office have with respect to conducting audits of all departments and agencies of the United States, including the authority to settle and adjust the accounts of the Corporation.".

—Page 11, line 25, strike out ", except that" and all that follows through "sponsibilities" on page 12, line 3.

H.R. 3481

By Mr. SAWYER:

—On page 7, strike out lines 20 through 24 and insert the following:

SEC. 6. The table of sections for chapter 207 of title 18, United States Code, is amended—

(1) by striking out the item relating to section 3147 and all that follows through the item relating to section 3150 and inserting in lieu thereof the following:

"3146A. Detention prior to trial.
"3146B. Detention of addict.
"3147. Appeal from conditions of release or order of detention.
"3148. Release in capital cases or after conviction.
"3149. Release of material witnesses.
"3150. Penalties for failure to appear.
"3150A. Penalties for offenses committed during release.
"3150B. Penalties for violation of conditions of release.

(2) by striking out the item relating to section 3152 and all that follows through the item relating to section 3155 and inserting in lieu thereof the following:

On page 8, insert the following after line 20:

SEC. 9. Section 3146 of title 18, United States Code, is amended—

(1) by inserting in subsection (a) "or the safety of any other person or the community" (A) after "as required" in the first sentence, and (B) after "for trial" in the second sentence;

(2) by amending paragraph (5) of subsection (a) to read as follows:

"(5) impose any other condition, including a condition requiring that the person return to custody after specified hours of release for employment or other limited purposes.";

(3) by adding the following sentence at the end of subsection (a): "No financial condition may be imposed to assure the safety of any other person or the community.";

(4) by inserting in subsection (b)—

(A) ", if any," after "conditions of release";

(B) "or the safety of any other person or the community" after "assure appearance";

(C) "such factors as" after "take into account"; and

(D) "past conduct," after "mental condition,";

(5) in subsection (c)—

(A) by striking out "and" after "of his release and inserting in lieu thereof a comma; and

(B) by adding the following before the period at the end thereof: "and shall warn such person of the penalties provided in section 3150A of this title"; and (6) by adding the following subsection (h):

"(h) The following shall be applicable to any person detained pursuant to this subchapter:

"(1) The person shall be confined, to the extent practicable, in facilities separate from convicted persons awaiting or serving sentences or being held in custody pending appeal.

"(2) The person shall be afforded reasonable opportunity for private consultation with counsel and, for good cause shown, shall be released upon order of the judicial officer in the custody of the United States Marshal or other appropriate person for limited periods of time to prepare defenses or for other proper reasons.".

SEC. 10. Chapter 207 of title 18, United States Code, is amended by adding the following new sections 3146A and 3146B after section 3146:

"3146A. Detention prior to trial

"(a) Subject to the provisions of this section, a judicial officer may order pretrial detention of—

"(1) a person charged with a dangerous crime, as defined in section 3156(a)(3) of this title, if the Government certifies by motion that based on such person's pattern of behavior consisting of this past and present conduct, and on the other factors set out in section 3146(b) of this title, there is no condition or combination of conditions which will reasonably assure the safety of the community;

"(2) a person charged with a crime of violence, as defined in section 3156(a)(4) of this title, if (A) the person has been convicted of a crime of violence within the ten-year period immediately preceding the alleged crime of violence for which he is presently charged; or (B) the crime of violence was allegedly committed while the person was, with respect to another crime of violence, on bail or other release or on probation, parole, or mandatory release pending completion of a sentence; or

"(3) a person charged with any offense if such person, for the purpose of obstructing or attempting to obstruct justice, threatens, injures, intimidates, or attempts to threaten, injure, or intimidate any prospective witness or juror.

"(b) No person described in subsection (a) of this section shall be ordered detained unless the judicial officer—

"(1) holds a pretrial detention hearing in accordance with the provisions of subsection (c) of this section;

"(2) finds—

"(A) that there is clear and convincing evidence that the person is a person described in paragraph (1), (2), or (3) of subsection (a) of this section;

"(B) that—

"(i) in the case of a person described only in paragraph (1) of subsection (a), based on such person's pattern of behavior consisting of his past and present conduct, and on the other factors set out in section 3146(b) of this title, or

"(ii) in the case of a person described in paragraph (2) or (3) of such subsection, based on the factors set out in section 3146 (b) of this title,

there is no condition or combination of conditions of release which will reasonably assure the safety of any other person or the community; and

"(C) that, except with respect to a person described in paragraph (3) of subsection (a) of this section, on the basis of information presented by proffer or otherwise to the judicial officer there is substantial probability that the person committed the offense for which he is present before the judicial officer; and

"(3) issues an order of detention accompanied by written findings of fact and the reasons for its entry.

"(c) The following procedures shall apply to pretrial detention hearings held pursuant to this section:

"(1) Whenever the person is before a judicial officer, the hearing may be initiated on oral motion of the United States attorney.

"(2) Whenever the person has been released pursuant to section 3146 of this title and it subsequently appears that such person may be subject to pretrial detention, the United States attorney may initiate a pretrial detention hearing by ex parte written motion. Upon such motion the judicial officer may issue a warrant for the arrest of the person and if such person is outside of the district in which the warrant for this arrest was issued, he shall be brought before a judicial officer in the district where he is arrested and shall then be transferred to the district in which the warrant for his arrest was issued for proceedings in accordance with this section.

"(3) The pretrial detention hearing shall be held immediately upon the person being brought before the judicial officer for such hearing unless the person or the United States attorney moves for a continuance. A continuance granted on motion of the person shall not exceed five calendar days, unless there are extenuating circumstances. A continuance on motion of the United States attorney shall be granted upon good cause shown and shall not exceed three calendar days. The person may be detained pending the hearing.

"(4) the person shall be entitled to representation by counsel and shall be entitled to present information by proffer or otherwise, to testify, and to present witnesses in his own behalf.

"(5) Information stated in, or offered in connection with, any order entered pursuant to this section need not conform to the rules pertaining to the admissibility of evidence in a court of law.

"(6) Testimony of the person given during the hearing shall not be admissible on the issue of guilt in any other judicial proceeding but such testimony shall be admissible in proceedings under section 3150, 3150A, and 3150B, of this title, in perjury proceedings, and for the purposes of impeachment in any subsequent proceedings.

"(7) Appeals from orders of detention may be taken pursuant to section 3147 of this title.

"(d) The following shall be applicable to persons detained pursuant to this section:

"(1) The case of such person shall be placed on an expedited calendar and, consistent with the sound administration of justice, his trial shall be given priority.

"(2) Such person shall be treated in accordance with section 3146 of this title—

"(A) upon the expiration of sixty calendar days, unless the trial is in progress or the trial has been delayed at the request of the person other than by the filing of timely motions (excluding motions for continuances); or

"(B) Whenever a judicial officer finds that a subsequent event has eliminated the basis for such detention.

"(3) The person shall be deemed detained pursuant to section 3148 of this title if he is convicted.

"(e) The judicial officer may detain for a period not to exceed five calendar days a person who comes before him for a bail determination charged with any offense, if it appears that such person is presently on probation, parole, or mandatory release pending completion of sentence for any offense under State or Federal law and that

such person may flee or pose a danger to any other person or the community if released. During the five-day period, the United States attorney shall notify the appropriate State or Federal probation or parole officials. If such officials fail or decline to take the person into custody during such period, the person shall be treated in accordance with section 3146 of this title, unless he is subject to detention under this section. If the person is subsequently convicted of the offense charged, he shall receive credit toward service of sentence for the time he was detained pursuant to this subsection.

"3146B. Detention of addict

"(a) Whenever it appears that a person charged with a crime of violence, as defined in section 3156(a)(4), may be an addict, as defined in section 3156(a)(5), the judicial officer may, upon motion of the United States attorney, order such person detained in custody for a period not to exceed three calendar days, under medical supervision, to determine whether the person is an addict.

"(b) Upon or before the expiration of three calendar days, the person shall be brought before a judicial officer and the results of the determination shall be presented to such judicial officer. The judicial officer thereupon (1) shall treat the person in accordance with section 3146, or (2) upon motion of the United States attorney, may (A) hold a hearing pursuant to section 3146A, or (B) hold a hearing pursuant to subsection (c) of this section.

"(c) A person who is an addict may be ordered detained in custody under medical supervision if the judicial officer—

"(1) holds a pretrial detention hearing in accordance with subsection (c) of section 3146A;

"(2) finds that—

"(A) there is clear and convincing evidence that the person is an addict;

"(B) based on the factors set out in subsection (b) of section 3146, there is no condition or combination of conditions of release which will reasonably assure the safety of any other person or the community; and

"(C) on the basis of information presented to the judicial officer by proffer or otherwise, there is a substantial probability that the person committed the offense for which he is present before the judicial officer; and

"(3) issues an order of detention accompanied by written findings of fact and the reason for its entry.

"(d) The provisions of subsection (d) of section 3146A shall apply to this section."

SEC. 11. Section 3147 of title 18, United States Code, is amended—

(1) by striking "or" after "conditions of release," in clause (1) of subsection (b);

(2) by inserting after "the offense charged" in subsection (b) "or (3) he is ordered detained or an order for his detention has been permitted to stand by a judge of the court having original jurisdiction over the offense charged,"; and

(3) by inserting after subsection (b) the following new subsections:

"(c) In any case in which a judicial officer other than a judge of the court having original jurisdiction over the offense with which a person is charged orders his release with or without setting terms or conditions of release, or denies a motion for the pretrial detention of a person, the United States attorney may move the court having original jurisdiction over the offense to amend or revoke the order. Such motion shall be considered promptly.

"(d) In any case in which—

"(1) a person is released, with or without the setting of terms or conditions of release, or a motion for the pretrial detention of a person is denied, by a judge of the court having original jurisdiction over the offense with which the person is charged, or

"(2) a judge of a court having such original jurisdiction does not grant the motion of the United States attorney filed pursuant to subsection (c),

the United States attorney may appeal to the court having appellate jurisdiction over such court. Any order so appealed shall be affirmed if it is supported by the proceedings below. If the order is not so supported, the court may (A) remand the case for a further hearing, (B) with or without additional evidence, change the terms or conditions of release, or (C) in cases in which the United States attorney requested pretrial detention pursuant to sections 3146A and 3146B, order such detention."

SEC. 12. Section 3148 of title 18, United States Code, is amended to read as follows:

"§ 3148. Released in capital cases or after conviction

"(a) A person who is charged with an offense punishable by death shall be treated in accordance with the provisions of section 3146 unless the judicial officer has reason to believe that no one or more conditions of release will reasonably assure that the person will not flee or pose a danger to any other person or to the community. If such a risk of flight or danger is believed to exist, the person may be ordered detained.

"(b) A person who has been convicted of an offense and is awaiting sentence shall be detained unless the judicial officer finds by clear and convincing evidence that he is not likely to flee or pose a danger to any other person or to the property of others. Upon such finding, the judicial officer shall treat the person in accordance with the provisions of section 3146 of this title.

"(c) A person who has been convicted of an offense and sentenced to a term of confinement or imprisonment and has filed an appeal or a petition for a writ of certiorari shall be detained unless the judicial officer finds by clear and convincing evidence that (1) the person is not likely to flee or pose a danger to any other person or to the property of others; and (2) the appeal or petition for a writ of certiorari raises a substantial question of law or fact likely to result in a reversal or an order for new trial. Upon such findings, the judicial officer shall treat the person in accordance with the provisions of section 3146 of this title.

"(d) The provisions of section 3147 of this title shall apply to persons detained in accordance with this section, except that a finding of the judicial officer that the appeal or petition for writ of certiorari does not raise by clear and convincing evidence a substantial question of law or fact likely to result in a reversal or order for new trial shall receive de novo consideration in the court in which review is sought."

SEC. 13. Section 3150 of title 18, United States Code, is amended by inserting "(a)" before "Whoever" at the beginning thereof, and by adding the following at the end thereof:

"(b) Any failure to appear after notice of the appearance date shall be prima facie evidence that such failure to appear is willful. Whether the person was warned when released of the penalties for failure to appear shall be a factor in determining whether such failure to appear was willful, but the giving of such warning shall not be a prerequisite to conviction under this section.

"(c) The trier of facts may convict under this section even if the defendant has not received actual notice of the appearance date if (1) reasonable efforts to notify the defendant have been made, and (2) the defendant, by his own actions, has frustrated the receipt of actual notice.

"(d) Any term of imprisonment imposed pursuant to this section shall be consecutive to any other sentence of imprisonment."

SEC. 14. Chapter 207 of title 18, United States Code, is amended by adding after section 3150 the following new sections:

"§ 3150A. Penalties for offenses committed during release

"(a) Any person convicted of an offense committed while released pursuant to section 3146 shall be subject to the following penalties in addition to any other applicable penalties:

"(1) A term of imprisonment of not less than one year and not more than five years if convicted of committing a felony while so released; and

"(2) A term of imprisonment of not less than ninety days and not more than one year if convicted of committing a misdemeanor while so released.

"(b) The giving of a warning to the person when released of the penalties imposed by this section shall not be a prerequisite to the application of this section.

"(c) Any term of imprisonment imposed pursuant to this section shall be consecutive to any other sentence of imprisonment.

"§ 3150B. Penalties for violation of conditions of release

"(a) A person who has been conditionally released pursuant to section 3146 and who has violated a condition of release shall be subject to revocation of release, an order of detention, and to prosecution for contempt of court.

"(b) Proceedings for revocation of release may be initiated on motion of the United States attorney. A warrant for the arrest of a person charged with violating a condition of release may be issued by a judicial officer and if such person is outside of the district in which the warrant for his arrest was issued, shall be brought before a judicial officer in the district where he is arrested and shall then be transferred to the district in which the warrant for his arrest was issued for proceedings in accordance with this section. No order of revocation and detention shall be entered unless, after a hearing, the judicial officer finds that—

"(1) there is clear and convincing evidence that such person has violated a condition of his release; and

"(2) based on the factors set out in subsection (b) of section 3146, there is no condition or combination of conditions of release which will reasonably assure that such person will not flee or pose a danger to any other person or the community. The provisions of subsections (c) and (d) of section 3146A shall apply to this subsection.

"(c) Contempt sanctions may be imposed if, upon a hearing and in accordance with principles applicable to proceedings for criminal contempt, it is established that the person has intentionally violated a condition of his release. Such contempt proceedings shall be expedited and heard by the court without a jury. A person found guilty of criminal contempt for violation of a condition of release shall be imprisoned for not more than six months, or fined not more than $1,000, or both.

"(d) Any warrant issued by a judicial officer for violation of release conditions or for contempt of court, for failure to appear as required, or pursuant to subsection (c)(2) of section 3146A of this title, may be executed at any place within the jurisdiction of the United States. Such warrants shall be executed by a United States marshal or by any other officer authorized by law.

SEC. 15. Section 3156(a) of title 18, United States Code, is amended by (1) striking "3150" and inserting "3150B"; and by adding the following paragraphs at the end thereof:

"(3) The term 'dangerous crime' means (A) taking or attempting to take property from another by force or threat of force, (B) unlawfully entering or attempting to enter any premises adapted for overnight accommodation of persons or for carrying on business with the intent to commit an offense therein, (C) arson or attempted arson of any premises adaptable for overnight accommodation of persons or for carrying on business, (D) forcible rape, or assault with intent to commit forcible rape, or (E) unlawful sale or distribution of a narcotic or depressant or stimulant drug (as defined by any Act of Congress) if the offense is punishable by imprisonment for more than one year.

"(4) The term 'crime of violence' means murder, forcible rape, carnal knowledge of a female under the age of sixteen, taking or attempting to take immoral, improper, or indecent liberties with a child under the age of sixteen years, mayhem, kidnaping, robbery, burglary, voluntary manslaughter, extortion or blackmail accompanied by threats of violence, arson, assault with intent to commit any offense, assault with a dangerous weapon, or an attempt or conspiracy to commit any of the foregoing offenses as defined by any act of Congress or any State law, if the offense is punishable by imprisonment for more than one year.

"(5) The term 'addict' means any individual who habitually uses any narcotic drug as defined by section 102 of the Controlled Substances Act (21 U.S.C. 802) so as to endanger the public morals, health, safety or welfare."'

EXTENSIONS OF REMARKS

BILL TARGETS FUNDS TO 1890 LAND-GRANT INSTITUTIONS

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. FORD of Tennessee. Mr. Speaker, recently I submitted testimony on H.R. 1309 before the Subcommittee on Department Operations, Research and Foreign Agriculture. This bill calls for the Department of Agriculture to allocate $10 million per year for the next 5 years to the 16 1890 land-grant institutions and Tuskegee Institute.

These moneys are catchup funds for years of neglect by the Federal Government as well as the States in which these institutions are located. The funds will be used to purchase equipment and land, and in the planning, construction, alteration and/or renovation of buildings to strengthen their capacity for research in the food and agricultural sciences.

The 1890 institutions are all historically black institutions created by States during the second Morrill Act. They were created because, rather than educate black students at the existing 1862 land-grant institutions started through the first Morrill Act, the States opted to build, in exchange for Federal land, separate institutions for black students.

The 1890 institutions, throughout their nearly 100 year history, were never funded to par as the 1862 institutions were. They were charged with the responsibility of providing instruction, public service, and research, but not provided funds to establish a research environment.

H.R. 1309 does not correct all the problems that have resulted through 100 years of neglect toward the 1890 institutions. It does, at least, recognize the initial need to adequately fund these institutions in order for them to have greater participation in solving the various food and agriculture related problems of the world.

Following is a copy of my testimony submitted at the Agriculture Subcommittee on Department Operations, Research, and Foreign Agriculture's recent hearing.

TESTIMONY OF CONGRESSMAN HAROLD FORD OF TENNESSEE ON ADDITIONAL FUNDING FOR 1890 LAND-GRANT COLLEGES AND UNIVERSITIES, INCLUDING TUSKEGEE INSTITUTE (H.R. 1309)

Mr. Chairman and distinguished members of the Subcommittee on Department Operations, Research and Foreign Agriculture. It is my honor to present testimony on H.R. 1309 before my colleagues today. The purpose of this bill is to provide $10,000,000 for each of fiscal years 1981 through 1985 to the sixteen 1890 public land-grant colleges, and Tuskegee Institute, a private college that has had a historical role in agriculture instruction and research.

The funds are to be used for assisting these colleges and universities in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity for research in the food and agricultural sciences.

These seventeen 1890 institutions in our nation. They are Alabama A & M University (1875); University of Arkansas at Pine Bluff (1873); Delaware State College (1891); Florida A & M University (1873); Fort Valley State College, Georgia (1895); Kentucky State University (1886); Southern University, Louisiana (1880); University of Maryland-Eastern Shore (1886); Alcorn State University, Mississippi (1871); Lincoln University, Missouri (1866); North Carolina A & T State University (1891); Langston State University, Oklahoma (1897); South Carolina State College (1897); Tennessee State University (1912); Prairie View A & M University, Texas (1876); Virginia State University (1882); Tuskegee Institute, Alabama (1881).

I stand before you today as a proud alumnus of one of these 1890 institutions—Tennessee State University—and I have 11 other brothers and sisters who also attended that fine institution in Nashville.

Now, let us first remember why we have 1890 institutions, all which are historically black colleges and universities generally located in the Southern region of the United States.

These colleges and universities are called 1890 land-grant institutions because of the second Morrill Act of 1890 as opposed to the first Morrill Act of 1862. These two acts, often called the land-grants acts, established the public land-grant institutions.

We must also remember that in the 1800's the States in which these institutions are located were told that they had to provide education to their black citizens at the existing segregated 1862 land-grant institutions.

Instead of integrating the public institutions established under the Morrill Act of 1862, they opted to establish segregated institutions for blacks which were funded through the Morrill Act of 1890. Thus, each of these States today still has two land-grant institutions—one established under the 1862 land-grant act and the other under the 1890 act.

However, the 1890 institutions were never adequately funded the way they should have been by the various States. With assistance from the various States and the Federal Government, the 1862 institutions were permitted to thrive and expand, while the 1890 institutions received meager funding from both their respective State and the Federal Government.

Yet, these institutions, in addition to the nation's 85 other historically black colleges and universities, have done a magnificent job under difficult circumstances. Today, forty percent (176,000) of all black students still attend historically black institutions. Yet, over 60 percent of the degrees awarded to black students last year were awarded at the historically black institutions. Furthermore, the majority of our black doctors, lawyers, dentists, and other professionals are graduates of the historically black colleges.

As you know, the primary mission of any institution of higher education is instruction, research, and public service. The 1890 institutions have done an outstanding job in instruction and public service, but they have never received adequate funding in order to conduct research or to create an environment conducive to conducting research. Most do not receive funds from their respective States to conduct research, especially in the area of agriculture, despite their land-grant mission.

Furthermore, the 1890 institutions were not eligible to participate in the facilities programs provided in the late 1960's and early 1970's by the Federal Government. Under the Research Facilities Act of 1963, only the 1862 land-grant institutions were permitted to participate in this program. Not until 1967 did the Federal Government start to provide research funds to the 1890 programs. As you know, these funds were for research projects, and not for constructing research facilities.

Without adequate research facilities, the 1890 institutions have had to perform miracles in order to conduct research.

Currently, many of the 1890 institutions are using classrooms as make-shift research facilities. How can one conduct research without adequate facilities for research?

They have been forced to limit agriculture research programs as the result of inadequate funding for this purpose. It not only shortchanges the faculty at the 1890 land-grant institutions who are capable of agriculture-related research and the students who could gain first-hand knowledge and experience from participating in research, but the country and the entire world as a whole is also shortchanged.

I should also note that, despite this handicap, the 1890 institutions still have managed to contribute to the state of the art regarding agricultural research.

Furthermore, at a time when many institutions have been accused of catering to the big agri-businesses, the Fortune 500 of agriculture, the 1890 institutions have concentrated on conducting research that benefits the small farmer who still comprises the majority of all farmers in this country and the world.

So now we have an interesting situation. Seventeen colleges charged by their States and the Federal Government with the responsibility of research, as one of their prime missions, and, yet, not getting research money from the State or the government. At the same time, not being provided the funds to construct facilities in which to conduct research.

I wholeheartedly endorse H.R. 1309 and its purpose. However, I only wish that more could be done. These funds are considered "catch-up" funds for years of past neglect. The funds are also in recognition of the role that the 1890 land-grant institutions must play in helping to resolve food and nutrition

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

problems, not only in this country, but internationally as well. We must remember that almost one-fourth of the world still goes to bed hungry at night.

However, it should be noted that even if H.R. 1309 is approved, and we disregard the proposed formula and simply divide the annual $10,000,000 by the seventeen 1890 land-grant institutions, each one will get approximately $588,000. Remember now, most of the 1890 institutions are 100 years old and have been through their history neglected by their respective State and the Federal Government.

Will the average of $588,000 annually for the next five years make up for nearly 100 years of neglect in the areas of agricultural research that the 1890 land-grants have experienced?

Nevertheless, I think that Rep. DE LA GARZA in introducing H.R. 1309 and my colleagues who are members of this Subcommittee in considering the bill, are to be commended for recognizing H.R. 1309 as a step in the right direction.

It is a step which says that we realize the past neglects of the 1890 land-grant colleges and universities as compared to the royal treatment regarding agriculture-related research funds and facilities that the 1862 land-grant institutions have received, not only from their States, but the Federal Government as well.

H.R. 1309 also says that we recognize the important role that the 1890 institutions have played in the past in the education of hundreds of thousands of students who because of the color of their skin could not attend any other state college or university, despite the fact that their parents, too, paid State and Federal taxes.

H.R. 1309 has been endorsed by the Department of Agriculture and the Administration. It is my hope that other agencies which provide research and public service to various colleges and universities will also recognize the importance of the 1890 institutions.

H.R. 1309 will ensure that the 1890 land-grant institutions will be able to enhance their research environments in order to strengthen their capacity for agricultural research. In this way, they will expand their opportunities to have a greater role in assisting the country and the world, particularly the third world nations, diminish and eliminate our food problems and the devastating effects of hunger and starvation.

Thank you for permitting me to testify before you today.●

UNESCO AND FREEDOM OF THE PRESS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. McCLORY. Mr. Speaker, I was heartened to read the other day that Elliot Abrams, the Assistant Secretary of State for International Organization Affairs, has warned UNESCO (the United Nations Educational, Scientific, and Cultural Organization) that the United States may quit that body if it proceeds with plans to regulate journalists in the performance of their professional duties. The so-called New World Information Order which many members of UNESCO are proposing is nothing but a transparent attempt to stifle freedom of the press in the interest of protecting governments which fear the free flow of information.

Mr. Speaker, an excellent editorial on this subject appeared in the Chicago Tribune of Tuesday, June 2, 1981, which I offer here for my colleagues' attention.

UNESCO AND FREEDOM OF THE PRESS

For a number of years, the United Nations Educational, Scientific, and Cultural Organization (UNESCO) has served as the stage upon which assorted communist and Third World governments are trying to bring about new laws "to protect journalists." This is a euphemistic way of saying that they want laws to protect themselves from prying journalists.

Until recently, the battle against UNESCO and its latter-day George Lommens (see the preceding editorial) has been fought by a handful of Western diplomats and newspapermen—including George Beebe of the Miami Herald, as chairman of the World Press Freedom Committee and president of the Inter American Press Association, and Clayton Kirkpatrick, then editor of The Tribune, who is retiring (today, too, by coincidence) as its chairman.

The assault has been slowed but not stopped. As soon as one proposal seems to have been laid to rest, a new version arises to take its place. There have even been sneak plays which could only have been designed to prevent the participation of the Western press: one recent meeting, for example, for which notices went to communist and Third World delegates but not to American delegates.

The proposals have included licenses for journalists, local government controls over them and their movement, and most recently a program of "education" presumably designed to teach them proper respect for government authorities. What the Communists and Third Worlders want, quite clearly, is a press which will spread only the news that the governments want spread. It is the kind of press that already exists in totalitarian countries and is spreading, through the mechanism of "licensing," in parts of the Third World, including Latin America.

As in the case of Near v. Minnesota, more and more of the free world's press is awakening to the threat that the news appearing in the rest of the world—and even the news emanating from much of it—may be controlled by governments who do not wish to be subject to any check and regard the free press as "a public nuisance."

Two weeks ago in Talloires, France, representatives of the free world press, including representatives from a number of Third World countries, listened to Amadou Mahtar M'Bow, director general of UNESCO, try to soothe them while at the same time citing the importance of the press as "the key to power," and declaring his determination to push ahead with UNESCO's "New World Information Order."

The next day, the conference replied with the Declaration of Talloires, an unprecedented international "bill of rights" for the free press. In effect, it was a challenge to UNESCO. But here there is no orderly process by which a Supreme Court can issue an order to which communist and Third World governments and their courts will listen. Guarantees of freedom of speech in the constitution of the Soviet Union and its satellites mean nothing. The battle will have to be fought in and by the free press itself, especially the free press in those parts of the world where it still exists and is threatened.●

COWBOY ECONOMICS—A CRITIQUE OF SUPPLY-SIDE ECONOMICS

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BROWN of California. Mr. Speaker, I recently came upon an interesting essay about the economic theories of the Reagan administration. I commend this essay, written by Dr. Kenneth Boulding, a distinguished economist and former president of the American Association for the Advancement of Science, to my colleagues.

The essay follows:

[From the Technology Review, May/June 1981]

COWBOY ECONOMICS

[By Kenneth Boulding]

As one contemplates the political scene nowadays, it is hard not to get the feeling that one is sitting through a very long and rather bad cowboy movie. The world is divided into good guys and bad guys in the international scene, with the United States, of course, clearly wearing the white hat. In the domestic scene, the private sector is wearing white and the public sector black. To people raised on cowboy movies, this scenario has a certain nostalgic charm. However, one has grave doubts about whether the plot is adequate to deal with international and domestic complexities. It may be that the world's a stage, but the play is by no means simple. In the age of space travel, it is ironic that we have landed ourselves in what future historians may well call the "first cowboy administration."

HORSE POWER AND COW SUPPLY

I cannot recall ever seeing a treatise on cowboy economics. In the movies, at least, it appears to involve horses, cows, and shootouts. Historically, horses have created chevaliers and caballeros, that is, knights. In most societies, there was not enough hay for everybody to have a horse, so that whoever owned one was in a superior position to anyone who did not. Horses, therefore, tended to produce feudal systems. The brief American cowboy era may have been an exception: because of the low density of the human population, there was enough hay for everybody to have a horse. But even then horses tended to produce bellicosity. Perhaps when males look at the world from an unnatural ten feet up in the air, they get delusions of macho grandeur. It is also hard to be very productive on a horse; we do most of our work on two feet as pedestrians, or in the old days, as peasants. Not surprisingly, then, cowboy economics concentrates heavily on threat systems, threat-counterthreat, being quick on the draw, and thievery when you can get away with it.

Cowboy economics, of course, also depends on cows, curious creatures that have some tendency to become sacred. Cows, especially on the open range, are the perfect,

and perhaps the only, example of supply-side economics. All one has to do is leave them alone while they breed and feed themselves, corral them, and drive them to market when the time is ripe. The student of an economist friend of mine once responded to an examination question on marginal productivity: "You have a cow and it has a calf; that's marginal productivity!" It is not surprising that cowboy economics believes in the magic of unleashing supply.

Another characteristic of the cowboy economy is that it does not have very much in the way of grants, or one-way transfers, except maybe in the gambling saloon or thievery. Public transfers, certainly, are never heard of. There are remarkably few children, old or indigent people, or women in cowboy movies; apart from the occasional "mush," there didn't even seem to be any sex. Cowboys are obviously cloned straight from the mind of the moviemaker. All is exchange—the tinkle of coins at the bar, bluff transactions at the cattle market.

Another thing lacking in the cowboy economy is conservation. Conservation may be all right for the crowded rice fields, but who needs it in great open spaces? The world is a great ripe fruit waiting to be picked, and never mind who planted it or whether we need to plant another. No cowboy ever felt an urge to recycle the manure, and why should he? It recycles itself.

THE LAST SHOOT-OUT

Any resemblance between this fantasy and the present administration may not be wholly accidental. The cowboy is our national hero and the country is in a cowboy mood. Unfortunately, cowboy eras always seem to contain the seeds of their own destruction. The great hunters that invaded North America across the Bering land bridge some 11,000 years ago took a few hundred or maybe a couple of thousand years to kill off all the big game. They ate all the horses without learning how to ride them. There must have been a phenomenal unrecorded collapse between 10,000 and 9,000 B.C.: Mongols on horseback ravaged nearly all of Eurasia for space. Now Mongolia is a minor buffer state, and now barbed wire has closed many of our great open spaces.

Therefore, it could be catastrophic that at the precise moment in history when the cowboy era has reached its end and the cowboy economy has become almost grotesquely inappropriate, we have a cowboy government. The philosophy of the shoot-out threatens to destroy our whole society in a nuclear war, the chances of which have increased quite perceptibly in the last few months. We live in a world in which the management of conflict has become a major problem, simply because the costs of unmanaged conflict have skyrocketed almost to infinity. Yet we have retreated into a philosophy of winning fights, which is a wholly different skill from managing conflict.

A RIDERLESS HORSE

We also have retreated into extraordinary illusions about supply economics, as if all we had to do was let the bulls in with the cows. Instead, we face an infinitely painstaking and tedious learning process from which productivity might be reborn. If we think our whole trouble is having the government on our backs, then our ideal is a riderless horse. Are we looking for the bucking bronco that throws its rider off? We have some pretty poor riders, but the solution of no rider at all seems unrealistic. The farmer triumphs over the cowboy in the long run because a governed ecosystem, a farm, is far more productive than an ungoverned one, a cattle range. The moral would seem to be that a well-governed society is more productive than a not-governed society.

Undoubtedly, the most dangerous aspect of the present situation is the almost universal belief in the capacity of our national defense. The truth is that traditional unilateral national defense can only assure our destruction. The more we put into our defense, the less secure we become and the more we hinder our productivity. The relationship between the proportion of GNP that goes into national defense and the failure of productivity is very clear. National defense is a cancer that eats out the health of the rest of the body politic and virtually guarantees our eventual extinction in nuclear war. Fortunately, there is a substitute: multinational defense based on a positive policy for stable peace. This is a long way from the cowboy economy. One only hopes we will reach it in time.●

TEXAS CONCURRENT RESOLUTION 53

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. COLLINS of Texas. Mr. Speaker, George W. Strake, secretary of the State of Texas, sent me a copy of the senate concurrent resolution number 53 which was passed by the 67th Legislature of Texas and signed by Gov. Bill Clements on May 26, 1981.

This issue of the MX missile system is very important in Texas and the Members will be interested in seeing the views of our Texas State Legislature.

S.C.R. No. 53

Whereas, United States Air force plans call for a sheltered road-mobile basing system for the M-X missile system, and currently under consideration are plans for either full basing in Nevada/Utah or a split basing in Nevada/Utah and Texas/New Mexico; and

Whereas, A decision to adopt the split-basing mode would require the relocation of approximately 500 families and would require United States Air Force acquisition of many acres of highly productive land in Texas which would be unlikely to be reclaimed for agricultural purposes; and

Whereas, An amendment to the Department of Defense Supplemental Appropriations Act, Section 2.02(b), June 27, 1979, states that it is the sense of Congress that the basing mode for the M-X missile should be restricted to location on the least productive land available that is suitable for such purpose; and

Whereas, The January 19, 1981, Department of Defense M-X Split Basing Report to Congress states that there exists a relative balance in the environmental impact between the two alternatives, while also stating that the split-basing mode would require the additional expenditure of $3.475 billion over the cost of the full-basing mode; now, therefore, be it

Resolved by the Senate of the State of Texas, the House of Representatives concurring, That the 67th Legislature respectfully request that the congress do not adopt the split-basing mode for the deployment of the M-X missile system.●

TIME HAS COME FOR A NEW EFFORT TO CAP STRATEGIC ARMS RACE

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. FRANK. Mr. Speaker, former U.S. Ambassador to the Soviet Union, Thomas J. Watson, Jr., recently delivered one of the most elucidating and compelling defenses of the need for arms control agreements that I have heard in a long time. Mr. Watson spoke before Harvard's 330th commencement ceremony.

In his remarks, Mr. Watson makes the case that the United States needs a cap on the strategic arms race. Drawing on his years of experience in the Soviet capital, Watson is intimately familiar with Soviet perceptions of effective nuclear deterrence and the myths many Americans hold about the current defense debate.

The simplistic approach adopted by advocates of huge increases in defense spending is tempered by Watson's careful analysis of the true meaning of an adequate strategic balance. Watson calls for nuclear sufficiency, not superiority; he does so with a clear understanding of the current strategic balance between the superpowers and the need for a deescalation of the strategic arms race.

Mr. Watson's remarks, which appeared in the Boston Globe, June 6, 1981, follow:

"TIME HAS COME FOR A NEW EFFORT TO CAP STRATEGIC ARMS RACE"

Thomas J. Watson Jr., former US ambassador to the Soviet Union, delivered the keynote address at Harvard's 330th commencement Thursday. Following are excerpts from his address.

Let me start out by speaking to today's graduates and those of you who are young.

Throughout the past half century, young people have played many heroic roles. You went to World War II and brought down fascism. You fought and died in the mountains of Korea. You fought heroically in Vietnam. And you worked courageously within the system, joined it in large numbers, became a potent political force, influenced public opinion, and helped bring that tragic war to an end.

We need this kind of courage and conviction. And especially we need today the courage and conviction of youth to face up realistically to a change of course as a nation—our course on stratetic arms control and our whole handling of the nuclear equation.

The hour is late. The imperative of realism and reason is urgent. And we confront many illusions.

First is the illusion of victory: the illusion that one side or the other can start a nuclear war and win it.

WHAT'S WRONG WITH THIS PICTURE?

Common sense analysis will tell anyone that this is impossible. Consider this illusion in its most popular package:

The Soviets launch a surgical first strike and destroy most of our Minutemen and Titan missiles in their underground silos. Thus they leave us few weapons capable of retaliation in kind—of wiping out their remaining underground missiles. And thus they force us to a choice: attack Soviet cities with our submarine missiles and bombers, thereby provoking a counterattack on American cities from Boston to Seattle; or surrender.

What's wrong with this picture? Lots of things. It assumes, against all common sense, that the Soviet leaders, notoriously cautious about security, would bet their total nation on at least four fool-hardy all-or-nothing gambles:

The gamble, against all technological likelihood, that their first strike would be essentially perfect—that it would leave few, if any Minutemen or Titans to retaliate in kind;

The gamble that we would not use some of our remaining underwater and airborne weapons, nearly three fourths of our total warheads, to attack the thousands of vulnerable military targets in the Soviet Union other than missile silos;

The gamble that when our President learned the Soviet missiles were flying our way he would freeze and do nothing—that he would not send those targeted Minutemen and Titans flying toward Russia's remaining silos before the enemy missiles landed;

And the ultimate gamble: That in desperate retaliation we would not rain down total destruction on Soviet cities, even though that might mean our own destruction as well.

Make no mistake: That scenario would be the most risky and ultimately costly gamble in history. By overwhelming odds, the result of any use of nuclear weapons would not be victory. It would be all out war and total destruction. And in the words of President Kennedy, "The living would envy the dead."

The illusion of Soviet preemptive victory has a corollary: the illusion of achieveable American superiority—the illusion that like the Red Queen in Through the Looking Glass we can outrace the danger by going "faster, faster;" outproducing the Soviets in nuclear arms; playing a multibillion-dollar shell game in the desert; hoping that somehow with exotic weapons we can erect a protective umbrella over our country.

So-called nuclear superiority assures no safety—not for the Soviet Union; not for us; because what counts is not superiority but sufficiency, the guaranteed power to destroy the other side under all circumstances. And we both have it.

Think of it this way: Would you, if you sat in the Kremlin, attack the United States, even knowing that you could knock out 95 percent of our weapons, but realizing that the remaining five percent could destroy literally the whole Soviet Union?

Would you, sitting in Washington, attack even a small country which had only a thousand warheads knowing that if you missed only 10 percent they could wipe out 100 American cities?

You know the answer: There is no safety in numbers. The war planning process of the past has become totally obsolete. Attack is now suicide.

Yet the pursuit of the mirage of superiority persists. And over the years the two superpowers have piled weapon on useless weapon.

SOVIET UNION CLOSED THE GAP

In 1945, when we exploded our first atomic bomb at Hiroshima, we had a four-year lead over the Russians. In 1952, when we exploded our first H-bomb, we had a 10-month lead. The Soviet Union closed the gap despite having a country severely torn by the ravages of a war of a ferocity never visited on our country. And it has kept up in the race, despite the burden of a hopelessly inefficient economy, by ruthlessly channeling its resources, and by calling upon the Soviet people for an endless acceptance of sacrifices.

Between us, our two countries now have explosive power equal to a million Hiroshima A-bombs. We have between us some 15 thousand "city killing" weapons—one bomb, one city. Bigger stockpiles do not mean more security. Enough is enough. And we are far beyond that point now.

There is a third illusion, rooted in the belief that nuclear victory is possible and strategic superiority attainable. It is the illusion of nuclear omnipotence, that if we just have more weapons we can use nuclear threats to deter Soviet misbehavior anywhere in the world.

I can think of no quicker prescription for disaster. Our nuclear weapons are useless except for their mission of preventing direct attack on us.

Fourth is the illusion of futility: the illusion that we cannot sign treaties with the Russians because they systematically violate them.

Let us be clear about this: there are major differences between our two countries. Soviet values are diametrically opposed to ours. Contention between us on a global scale is a fact of life. Suspicion is the keynote of our relations.

But having said that, let me add this: On the evidence, the Soviets do keep agreements provided each side has an interest in the other's keeping the agreement; and provided each side can verify compliance for itself.

Look for example at the 1972 Anti-Ballistic Missile Treaty and the Interim Agreement: the two parts of SALT I. The Soviet Union has violated neither. For these treaties do not depend on trust or good will. They depend on cold self-interest and unilateral verifiability.

Fifth is the illusion of benign neglect—the idea that if we just muddle along, in the phrase of Dickens' Mr. Micawber, "something will turn up;" that the current aging Soviet leadership, for example, will soon be replaced by enlightened and reasonable men; that the Soviet system will crumble from within; or that we can indefinitely stall on serious negotiations, let the Soviets cool their heels waiting, and use the intervening time for our own advantage to arm up.

Let us not delude ourselves. We can take no comfort from all these kinds of wishful thinking.

To be sure, the average Soviet Politburo member today is 69 years old. But I have met many of the possible successors, and I can tell you: I foresee no real change. I do not see the Soviet Union becoming more pro-American. I do not see a revolution around the corner. I do not foresee the demise of the rigid system or the rigid thinking that runs it. And I see no chance that the Soviet leaders will be hoodwinked by protracted negotiations while we try to jump ahead in strategic arms.

"ARM UP AND STAND FIRM" FORMULA

Finally, we confront the illusion of softheadedness; that anyone who favors an end to the arms race must be soft on U.S. defense or even soft on Communism. And we confront its corollary: the simplistic formula "arm up and stand firm," though war would mean losses of 50 to 75 percent on each side.

The illusion of softheadedness is thermonuclear McCarthyism. Because the search for a way out of this morass—the search for an avenue of negotiation and survival instead of confrontation and weaponry—has a long and honorable heritage.

That heritage includes Republicans and Democrats; military and non-military leaders, among them some of the greatest and most tough-minded of our time.

It began in 1946 under President Harry Truman with the proposal of a hardheaded financier, Bernard Baruch, for international UN control of atomic energy.

It continued with President Dwight Eisenhower, who in his first major foreign policy address denounced the tragic waste of armaments, and in his farewell message warned against the power of a military-industrial complex.

It embraces the last legacy of President Kennedy, the nuclear test ban treaty of 1963; the SALT I accords under President Nixon; and the SALT II treaty initiated by President Nixon, continued by President Ford, and completed by President Carter.

Thermonuclear McCarthyism is a slander against the wisdom of many great Americans.

Against all these illusions, what is the reality? The reality is that thermonuclear war in any form is suicide.

Our imperative is to change our course—to take the only road which offers a viable hope for the future: not a road to unilateral action of any kind, but a road toward the joint continuation of the SALT process; a road to a long series of mutually verifiable treaties.

I know from experience how maddening protracted negotiations with the Russians can be. I know what these negotiations will demand of us: in the words of St. Francis of Sales, "A cup of science, a barrel of wisdom, and an ocean of patience." But we have no choice.

The time for action is at hand. And that action must begin in Washington, D.C.—begin with the same urgency and effectiveness the Administration has shown in confronting our serious economic difficulties: the same urgency and courage the President has shown in already beginning a major buildup in our conventional forces.

The time has come for all of us to reject the scenarios of the theoreticians mesmerized by computer projections into thinking that the leaders of the Soviet Union would bet their homeland on a lottery chance at victory.

The time has come to realize that our nuclear deterrent is robust under any possible contingency. Let our politicians and arms technicians stop poor-mouthing it.

TIME TO REJECT SCENARIOS

Above all, the time has come for a new effort to cap the strategic arms race—cap it through a verifiable treaty which gives both sides the security they require.

SALT II offers a good framework. Minor changes could be made at the negotiating table if necessary. But there is little time before technology and pressures on both sides push us into a new and unmanageable spiral.

We cannot wait for improved Soviet behavior around the world, or for better US-Soviet relations. Control of strategic arms is not a concession to the Soviets. It must not be linked to irrelevant issues. Those who urge delay take an awesome responsibility on their shoulders.●

CARDINAL WYSZYNSKI

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. COUGHLIN. Mr. Speaker, I would like to pay tribute to the late Cardinal Wyszynski, primate of the Roman Catholic Church in Poland. As Poland's spiritual leader for more than three decades, Cardinal Wyszynski was responsible for his nation's pursuit of freedom and independence. He represented social and political stability to his followers as he would not give in to the demands of the Communist regime. For a long time, the Roman Catholic Church, under the cardinal's leadership, was the only organization in Poland to maintain its independence despite the repressive power of a totalitarian state.

Although Cardinal Wyszynski was an outspoken opponent of Marxist ideas, he was a political realist and knew he would have to work with his political adversaries in order to insure the integrity of the Polish nation and the spiritual restoration of its people. Communist Party leader, Stanislaw Kania, recently praised the late cardinal for his ability to promote an understanding between church and state. The cardinal believed that Poland's longtime Christian tradition would outlive its current domination by communism.

Cardinal Wyszynski paved the way for the independent Solidarity trade union. Such a reform movement would not have been possible without the determined stand taken by the Polish Catholic Church under Cardinal Wyszynski's guidance during the Stalinist persecutions. Solidarity leader Lech Walesa said of the cardinal:

He is a great man, his wisdom is immense and his help has been enormous. * * * All the time and in every way. People don't know it was Cardinal Wyszynski who arranged our meetings with Gierek and Kania and even during the labor unrest earlier this year, I had to ask him to give me a hand. Without his intervention, I would not have been able to call an end to those strikes.

Cardinal Wyszynski also acted as an intermediary between the Communists and Solidarity when Polish authorities beat union activists in the town of Bydgoszcz. At this time, he preached to government officials of the need to serve society and respect human rights while he preached to Solidarity members of the need for time and patience in obtaining social and economic demand. Additionally, the cardinal argued the case for farmers to be able to establish a union and, after many legal and political battles, Rural Solidarity came into existence.

Before Solidarity, Cardinal Wyszynski assisted in the organization of Christian trade unions in the 1930's believing that these groups should focus their energies on social problems and work safety rather than becoming involved in politics. During World War II, the cardinal lent his support to the Warsaw and Lublin underground resitance movements against the Nazis.

Cardinal Wyszynski's accomplishments are many and great, and I join the people of Poland in mourning the death of this most faithful and effective leader. His compassion for and his devotion to a free and independent Poland will long be remembered. He truly loved his church and his nation and I pray that his vision of a free Poland will come to pass in the 20th century.●

WHEN LIFE BEGINS

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. FORD of Tennessee. Mr. Speaker, a constituent of mine has brought to my attention some serious consequences of the deliberations undertaken by the distinguished Members of the Senate. As a member of the House tax writing committee, I thought I would share with my colleagues just how far the considerations of legislating "when life begins?" extend. There is an old saying, "* * * the only things certain about life are death and taxes." I think that this gentleman's questions show just how far reaching the problems could become if Congress tries to legislate a definition of life.

MEMPHIS, TENN., *May 21, 1981.*

Representative HAROLD FORD,

U.S. House of Representatives, Longworth House Office Building, Washington, D.C.

DEAR REPRESENTATIVE HAROLD FORD: As I was playing handball the other day I had some thoughts on Congress' deliberations on a bill to circumvent the Supreme Court's decisions concerning abortion, and I thought I might share these thoughts with you and possibly through you with your colleagues.

First, if a person exists shortly after ejaculation, then any spontaneous miscarriage (one out of every five pregnancy's) would be deemed a birth and death therefore and due an income tax deduction, as a dependent child, for that year. Furthermore if that nebulous individual existed in November and aborted in January there would be a deduction for 2 years.

Secondly, any pregnancy that extended past January 1 and resulted in a live birth would be due a deduction for the previous year as well as the year of birth.

Following this rather absurd logic, individuals could go back and revise their tax liability, even those who had had legal therapeutic abortions.

Having done primarily infertility work for the past 20 years, of course, I welcomed the decision of the Supreme Court which declared abortions legal for the past 200 years, because I saw so much permanent infertility following so-called illegal abortions performed by untrained individuals.

Sincerely,

ALBERT M. ALEXANDER, M.D., P.C.●

BILL TO TEMPORARILY EXCLUDE FOREIGN PROCESSING VESSELS FROM THE INTERNAL WATERS OF ALASKA

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. YOUNG of Alaska. Mr. Speaker, I am introducing today a bill which will temporarily exclude foreign fish processing vessels from the internal waters of Alaska, subject to certain overrides by the Governor of Alaska and the U.S. Department of Commerce. This is a companion measure to a bill introduced by my Alaskan colleagues in the Senate (Mr. STEVENS and Mr. MURKOWSKI).

The need for this legislation has been suggested by certain segments of the commercial fishing industry and the State of Alaska. Prior to this year, Alaska State law prohibited the entrance of foreign processing vessels into the internal waters of Alaska unless otherwise approved by the Governor and the Alaska Board of Fisheries. However, recent court action has suggested that this law may violate the commerce clause of the U.S. Constitution. It also appears that other existing Federal law, including the Magnuson Fishery Conservation and Management Act, does not prohibit the operation of foreign fish processing vessels in the internal waters of any State. U.S. fish processors are of course concerned that foreign vessels may enter at any time and undercut the operation of U.S. facilities without having to comply with those laws and regulations that are normally applicable to onshore fish processors.

At present, it appears that no emergency exists in terms of the imminent arrival of foreign processing vessels in Alaskan waters. Thus, both fishermen and the State of Alaska have suggested that it may be appropriate to hold hearings on this measure before asking the House to rush it through. I agree completely. However, in the event that an emergency does become apparent, I will ask the chairman of the House Merchant Marine and Fisheries Committee to expedite passage of this measure. Further, I hope that hearings can be held as soon as possible.

I want to stress that this is a temporary measure designed to correct a particular problem in a particular area during one fishing season. I do not view it as a long-term solution nor do I feel that passage of this bill should preclude the concerned interests throughout the country from developing a comprehensive approach to closing what appears to be a loophole in existing law. The approach used in this bill may serve as a model for future action. However, it should not be viewed as necessarily the best means to accomplish what we seek. Any long-term approach should only be developed with the full participation of all interested parties, including fishermen, processors, affected coastal States, and the Federal Government.●

DANIEL L. SCHLAFLY—"MR. BOARD OF EDUCATION"

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. GEPHARDT. Mr. Speaker, I want to take this opportunity to salute Daniel L. Schlafly, who is retiring this month after 28 years of service on the St. Louis Board of Education. During that period he has served responsibly, wisely, and well; and every person who has attended school in St. Louis since 1953 owes him a vote of thanks.

Our schools have changed a lot during the past 28 years. The problems they face today are different from those of the early 1950's. The methods used by Daniel L. Schlafly remain relevant, though. In fact, his efforts to reform and remold the board have made it the effective agency it is today in dealing with our city's schools.

He has worked hard in this part-time position. He has contributed more to our schools than some who devote a lifetime of service to them. He is called Mr. Board of Education with good reason.

He has served us well and we are grateful. It will be hard, if not impossible, to replace him.●

BARRINGER TO RETIRE

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. JONES of Tennessee. Mr. Speaker, I want to take this opportunity to note the retirement of my good friend, Mr. Lew Barringer, president of the L. T. Barringer & Co., a cotton firm in Memphis, Tenn. Mr. Lew, as he is known by many, has decided to step down effective August 1 as president of the company. He has served as president of that company since it was founded in 1930 as a subsidiary of Cannon Mills.

Mr. Lew has been throughout his life, very active in politics and public policy, especially in legislative proposals that affected cotton. He has been an unofficial adviser to many Members of Congress and was an agricultural adviser to President Harry Truman. Whenever there were important policy decisions to be made regarding cotton, Mr. Lew Barringer was always there offering his knowledge and his insight into the needs of the cotton industry.

It is reassuring to know that Mr. Lew, at the age of 80, is not going to go into complete retirement. He will keep his offices at L. T. Barringer & Co., and will continue to serve as a consultant to the company. Nonetheless, I wanted to share with my colleagues in this body his decision to retire and include in the RECORD a copy of a recent story in the Memphis Commercial Appeal noting his retirement.

BARRINGER TO RETIRE AS COMPANY HEAD

(By Emmett Maum)

L. T. 'Lou' Barringer, 80, considered one of the most valuable men in helping to achieve cotton legislation, will step down Aug. 1 as president of L. T. Barringer & Co., cotton subsidiary of Cannon Mills Co.

Barringer, an agricultural confidant of President Harry Truman, will retire after 63 years in the cotton business.

But, Barringer said, "The next day, I will be back at my desk, doing what I've been doing for so many years."

No successor has been named, "and I have no idea who will become president," Barringer said. At the same time, Hugh J. Toumey, board chairman and chief executive officer of Cannon Mills, Inc., sales subsidiary of Cannon Mills Co., will retire.

Barringer is in his office from 9 a.m. to 6 p.m. weekdays and usually 9 a.m. to 1 p.m. Saturdays and Sundays. The only difference is that he will be serving as consultant rather than president, a position he has held at the company at 1195 Union since it was organized in 1930.

Otto G. Stoltz, board chairman and president of Cannon Mills Co., based in Kannapolis, N.C., said, "Lou Barringer has made a long and valuable contribution to Cannon and the cotton industry. We are very proud to have been associated with him."

While Truman was a U.S. senator from Missouri, he and Barringer met on one of Truman's visits to the Bootheel. Thereafter they often discussed agricultural matters, especially cotton. Barringer helped Truman learn a great deal about cotton and said that as senator and later as President, Truman was a big help in agricultural legislation, including cotton programs.

During the Truman administration, Barringer frequently visited the White House, often for meetings with the President concerning agriculture, but sometimes on efforts related to the then-developing space program and other Truman programs, he recalled.

"Once I visited Truman six straight days in the White House," he said.

Barringer spent so much time in Washington that he kept a room at all times at the Mayflower Hotel. Even today, he has a White House pass given him by Truman.

"In those days, synthetic fibers were just getting going, and we had to work to ward off their efforts to take over our cotton markets," he said.

Through the years in which he was a factor in agricultural and cotton legislation, Barringer worked behind the scenes. He never accepted an official position, but was close to numerous U.S. senators and representatives and high government officials.

Truman was "knowledgeable and fair about agriculture, including cotton," said Barringer. In fact, the former President worked on a farm his parents owned near Independence, MO., as a youngster. "Truman was agriculture all the way," said Barringer.

In the 1940s, Barringer said, he was able to swing one the biggest advance bookings of cotton in history. Anderson, Clayton & Co., which no longer is in the cotton business, was financing some California cotton producers' crops. A-C planned to buy the cotton as it was ginned. Barringer asked how many bales would be involved and was told 70,000 to 80,000 bales.

"I told them we would buy all of it," he said, "and it turned out to be a total of 78,000 bales. We paid the current market price each day when the farmers were ready to sell the cotton.

Barringer's presence in agricultural policy efforts hs continued throughout his career. His collection of Washington memorabilia includes large signed photographs of Truman, key Truman aides with whom he worked and former President Lyndon B. Johnson, as well as invitations to gatherings like the "housewarming" former Vice President Nelson Rockefeller held for his new quarters in 1975.

During the Carter administration, when cotton exports were lagging, Barringer recalled, "The Export-Import Bank head was resisting a $75-million loan to Japan for the purchase of cotton." Barringer said he and some Southern senators worked closely, and the senators finally persuaded former President Carter to push for the loan.

"If Japan hadn't received it and bought the cotton, prices for cotton probably would have dropped quite a bit, and our exports would have been down sharply. That didn't cost the taxpayers a penny, because Japan pays its obligations."

Barringer in 1918 started his cotton career with Cannon Mills as a "squidge," or clerk, in Concord, N.C. Later he moved to the firm's cotton department in Atlanta. Finally, in 1930, Charles A. Cannon, who was board chairman and president, decided the company was using so much cotton it should open its own cotton firm. So L. T. Barringer & Co. was founded here. Today, John W. Barringer, a son who is a Collierville farmer, serves as assistant to the president of the cotton company. The younger Barringer has been a prime mover in the group organizing the Mid-South Agricenter, Inc., for Memphis.

In 1976, Barringer was honored with a surprise dinner at the Mayflower. Many speakers lauded the Memphian, including Truman's daughter, Margaret Truman Daniel; Rep. Ed Jones (D-Tenn.), former Sen. James O. Eastland (D-Miss.), former Sen. William Fulbright (D-Ark.), and former Secretary of Agriculture Orville Freeman. He was praised for working in the thick of congressional battles over cotton legislation for more than 35 years.

Mrs. Daniel recalled that Barringer had campaigned for Truman in 1938, 1944 and 1948. "I don't have much to say except I love you," she said. "To this day, he is a close family friend."●

IS OUR NATIONAL POLICY ONE OF RENEGING ON INTERNATIONAL AGREEMENTS?

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. RAHALL. Mr. Speaker, it appears the Reagan administration's national energy policy has become one of reneging on international agreements with our European allies. As a nation blessed with abundant reserves of fossil fuels, including the largest recoverable coal reserves in the world, the United States has been a leader in the move away from high dependency on OPEC oil and toward a greater reliance on coal; both domestically and abroad through the export of steam coal.

However, the Reagan administration through the Department of Energy has made it a policy to renege on international cooperative efforts dealing with coal utilization. It has proposed pulling Federal funds from the SRC-II synethic fuels demonstration project in Morgantown, W. Va., leaving our German and Japanese partners in the cold. And now, the Energy Department has announced the withdrawal of its participation from the Grimethorpe pressurized fluidized bed combustion project in the United Kingdom. This experimental project is a cooperative effort between the United States, Germany, and the United Kingdom to develop a data base for fluidized bed combustion technology which could then be used in commercial application. This process is perhaps the most promising method of burning high-sulfur coal in a sound environmental manner.

Besides the international ramifications of the administration's apparent disregard for energy research and development agreements, the most appalling aspect of this country's withdrawal from the Grimethorpe project is that while we have already invested $25 million, we will not be entitled to reap the benefits of the experimental results. In other words, the United States will lose access to any information dealing with this project due to its withdrawal.

This says one thing about the Reagan administration's concept of energy research and development. It is shortsighted, to say the least.

According to Energy Department personnel involved with the Grimethorpe project and with the agency's fluidized bed program in general, the loss of data from the international project will have a grave impact on our domestic program in this area. The experimental data from Grimethorpe would hasten the development of this technology in the United States and thus, save money in the agency's research and development program. Without this data, domestic projects will suffer a setback which will effectively prolong the development of fluidized bed combustion technology for commercial uses.

From what I have been told, for an additional $12 million the United States could complete its commitment to the Grimethorpe project, and to our German and British partners, and gain the benefits associated with the data being produced.

While I realize the need for controlling our Nation's budget, I believe to sacrifice critical data on high-sulfur coal combustion while losing a $25 million investment seems inconsistent with the administration's desire for accountability and efficiency. Furthermore, it concerns me that this country is recklessly reneging on international energy commitments forged with an element of mutual trust and cooperation with our European allies. With the type of energy policy being advanced by the Reagan administration, this Nation may continue to languish within the weakening grip of foreign oil dependence. We are not only turning our backs on our European allies by backtracking on international projects, we are also undercutting our own national interests.●

SOCIAL SECURITY COURT

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. PICKLE. Mr. Speaker, I today introduce legislation which would establish a social security court and provide specific statutory authority for the current appeals council which would be reconstituted as the review board. This legislation is designed to focus attention on the social security appeals process which we expect to explore in depth later this Congress.

Mr. Speaker, I introduce this legislation as a vehicle for discussion of the appeals process which is playing an ever more important role in the disability program. I have an open mind on this legislation and welcome the views of the administration and other interested parties.

While I recognize this may not be an approach many may want to take, it is an approach that has been recommended by the National Commission on Social Security and earlier by the Center for Administrative Justice, and it addresses clearly many of the issues and problems now apparent in the social security appeals process. It is in that spirit that I hope we can use this bill as a forum to improve that process.

The appeals process continues to play a greater role in social security decisionmaking. In 1964 under 3 percent of disability allowances were made at the Federal appeals level—the ALJ's and the courts. In 1980 this figure stood at 21 percent. Over the years it has become clear that there are unacceptable variances in how cases are decided at the State agency level and the ALJ and court level. Last year the Congress took some remedial action in requiring the Secretary of Health and Human Services to institute a program of own-motion review so that ALJ allowances would not go unreviewed as they have for the last 5 years. We also closed the record after the ALJ hearing and foreclosed the authority of the Secretary to pull cases back to the administrative process just because he could not defend them in court. The conferees on the 1980 disability amendments in rejecting an administration proposal to change the "susbstantial evidence rule" instructed the National Commission on Social Security to "examine the disability adjudication and appeals process generally and deal specifically with such elements as the administration proposals for judicial review in addition to alternative approaches such as a disability court."

The National Commission reported back in March of this year advocating as the center piece of its section on the appeals process the creation of a specialized administrative court under article I of the Constitution. The Commission report states:

> This new court could make significant improvements in the appeals process. Because they reviewed only Social Security cases, judges of the court would acquire an expertise in the area that judges in Federal District Courts usually lack. By creating a uniform body of precedential material, the court's decisions would have a significant effect on the earlier stages of the adjudicative process as well. With all appeals going to a single court, it could no longer be argued, as it is now, that the need for uniform nationwide decisions precludes using the sometimes conflicting decisions of the several circuit courts as binding precedents.

In reaching its recommendations the Commission was greatly influenced by the earlier report of the Center for Administrative Justice which had also been requested by our committee. The Center report noted the lack of a precedent-setting mechanism which would provide guidance at all levels of adjudication. They pointed out that the State agency ignored court cases within their jurisdiction while ALJ's might or might not follow them. The social security court would provide case-law precedent which would be binding on all levels of adjudication

and where its policy determination were at odds with those of the claimant community or the Social Security Administration these differences could be submitted to the Congress for resolution.

The second major argument for the court cited by the Commission was that it "would help lessen the congestion in the Federal courts." Last year approximately 8,000 social security and SSI cases were filed in Federal district court and the pending backlog of cases stands at about 18,000. Hopefully the social security court could more expeditiously deal with the high volume of cases. Presumably the district court system would be reduced as a result of this legislation, or not enlarged as has been done periodically in past years.

The bill I introduce today would follow quite closely the National Commission recommendation. It also follows the structure of the bill introduced by my predecessor, Hon. James Burke, in the 95th Congress. It would be structured on the pattern of the Tax Court. Its 20 judges would be appointed by the President for a term of 10 years, and the President would designate a chief judge to administer the system. Commissioners could be appointed by the chief judge as in the Tax Court who could carry out "magistrate" functions in dealing with the caseload. There would be divisions of the court so that cases could be heard throughout the United States, and a review mechanism would be established so that decisions having policy implication would be reviewed by the court en banc or by panels of judges. Appeals from decisions of the social security court could be made to the U.S. Circuit Court of Appeals for the District of Columbia on the basis of constitutionality or statutory interpretation.

This legislation differs from that introduced by Congressman Burke in that it would create a social security rather than a disability court. This was done to prevent a cumbersome mechanism whereby disability issues would have gone to the new court while the nondisability issues would go to the district courts. Thus, a case with both insured status and disability issues would have to have been split. Although over 90 percent of the caseload will be disability, the social security court should have no trouble dealing with the other types of social security litigation. Similarly the idea of offering the claimant two alternative appeals mechanism as in the tax area seems inappropriate for social security.

The bill introduced today departs from the National Commission recommendation in that it retains an administrative appeals body after the ALJ level. I am aware of the very valid criticism which is made of this body as presently constituted. This is undoubtedly true. The elimination of the appeal court own-motion review function, the periodic transfer of its program analyst to the field to expedite cases, and the deemphasis of its medical staff have all added substance to charges that it was merely a bureaucratic layer rather than an entity carrying out a legitimate function. Some ALJ suggest elimination of Appeals Council and substitution of direct appeal to the court or some peer review mechanism. The National Commission suggests that the social security court should "take over the appellate functions now in the hands of the Appeals Council and the Federal district courts." However, if there was no Appeals Council or review board, the social security court would have to handle a much greater workload than contemplated.

Fifty-two percent of the ALJ affirmances of denials of benefits were appealed in 1980 and although 87 percent of these were upheld by the Appeals Council only 20 percent of these denials were subsequently appealed to the district courts. It is probably valid to assume that not as many ALJ decisions would be appealed to the social security court as would be appealed to the Appeals Council, but the workload increase to the court for direct appeal from the ALJ decision would be significant. Moreover, this does not take into account the additional appeal of ALJ allowances by the Government under an own-motion review mechanism. This too could be a very significant workload addition to the court. These were some of the aspects cited by the Center for Administrative Justice report in recommending retention of the Appeals Council structure. Direct appeal of ALJ decision also puts the Government in the anomolous situation of having to appeal its own decision.

This legislation, thus, rests on the assumption that the Appeals Council Review Board serves a legitimate function in both funneling appeals and in formulating a uniform governmental position that can be presented to the social security court. It would establish a statutory base for a review board which would generally carry out the existing functions of the Appeals Council in a more effective manner. It would differ from the existing Council in that the board would be composed of persons who have served as ALJ's adjudicating social security cases. The review board shall take requests for review of decisions by claimants and by the Social Security Administration. The board may affirm, reverse, or modify the ALJ decision or remand the case for further proceeding to the ALJ. The board may consider new evidence in any case only where it is material to the issue to be decided and there was good cause for failure to incorporate it into the record previously. And, of course, the decision of the review board would constitute the final decision of the Secretary and be subject to court review.●

BASEBALL TITLES FOR ARIZONA STATE UNIVERSITY AND GRAND CANYON COLLEGE

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. RUDD. Mr. Speaker, sports news from Arizona might not always receive top billing here in Washington, but two great institutions within my State do deserve special mention for their baseball victories last night. The Arizona State University Sun Devils beat Oklahoma State, 7 to 4, to win their fifth National Collegiate Athletic Association baseball title and second under head coach Jim Brock.

A smaller, but no less deserving school, Grand Canyon College, won its championship game yesterday in the National Association of Intercollegiate Athletics tournament with an 11 to 4 win over Winthrop College of Rock Hill, S.C. The Antelopes' NAIA title was their second in a row and first under new coach Gil Stafford.

Both of these teams have a history of success on the diamond and Monday's victories should be an additional boost of pride for those associated with the two schools and all residents of Arizona. I share in the celebration of both Arizona State University and Grand Canyon College.●

BIG BUSINESS PLACES AIDES IN CONGRESS

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. FORD of Tennessee. Mr. Speaker, a recent article written in a Memphis newspaper revealed that since 1976, 25 of the country's major corporations have paid the salaries, expenses, and fringe benefits of 54 young executives to work with key House and Senate subcommittees.

The program is operated by the Conference Board, a 60-year-old nonprofit organization which includes among its membership 4,000 corporations, labor unions, and universities.

The program raises potential questions of conflict of interest, and I have submitted the following article in order that readers themselves can make their judgments regarding the program:

CORPORATE AIDES FILL KEY CONGRESSIONAL ROLES

(By John Bennett)

WASHINGTON.—Some of the largest corporations in America pay the salaries of key staff assistants in Congress.

These corporate interns have played and continue to play major roles in drafting legislation, and some are given credit as chief movers behind the enactment of federal laws.

Records show that some corporate interns are being assigned to key committees in Congress that enact legislation directly affecting their companies.

Few Americans are aware that, since 1976, 25 of the country's blue-ribbon corporate giants have paid the salaries, expenses and fringe benefits of 54 promising young middle-management executives to join the government world in Washington.

The interns have set aside a year's climb up the executive ladder to accept assignment as staffers to major House and Senate subcommittees where they gain intimate access to government information affecting private enterprise.

These midcareer transplants to Congress owe their Washington plunge to The Conference Board, a 60-year-old nonprofit organization whose board members include 4,000 corporations, labor unions and universities. The corporations pay their Washington-based employees through the board.

This year, 10 corporate executives—6 in the House and 4 in the Senate—are busily at work on major subcommittees analyzing everything from income tax reductions to synthetic fuel project financing.

Despite safeguards, it is an assignment fraught with potential for conflict of interest.

Sen. Dale Bumpers (D-Ark.) seriously questions the propriety of the program.

"It at least raises the question of serious conflicts of interest," Bumpers said. "I can see how an argument might be made for the program, but I see that it also raises serious problems. I certainly would not want someone from Common Cause on my staff, and I wouldn't want anyone whose salary is paid for by private enterprise on my staff, either.

"I'm not saying any of these people would do anything improper, but it raises that question," Bumpers added. "It just isn't worth it."

New York officals of The Conference Board claim they scrupulously avoid any possibility of a conflict of interest in their Congressional assistant program.

"The overall aim of the program is to contribute to better understanding and communication between the United States Congress and the private sector," a board publication states. "The experience offered these men and women is to learn about the legislative decision-making process while working with the staff of a congressional committee during one legislative session of Congress.

"The responsibilities proposed for a congressional assistant are carefully reviewed by The Conference Board, the sponsoring corporation and the congressional committee to anticipate and avoid any real or apparent conflict of interest between their assignment and their corporation."

But 1981 assignments show several potential conflicts. Several executives are assigned to committees or subcommittees that study legislation directly affecting the companies.

Under the program, the corporation-paid staffer is assigned to a specific subcommittee and is under the direct supervision of the chairman of that subcommittee.

Staffers are assigned to legislative work that supposedly would not benefit the home office, although safeguards can hardly prevent all benefits gained through contacts in Congress.

At the very least, in a general way, many of the corporations have reaped benefits of federal legislation their employes helped get through Congress.

An example is passage of the 1979 Paper Reduction Act. A General Motors Corp. production executive organized field hearings to take testimony and made key recommendations on the law's content to Sen. Lawton Chiles (D-Fla.), chairman of the subcommittee that drafted the legislation.

The law set up a process for eliminating a duplication of paperwork, including paperwork that falls on corporations.

General Motors has sent five of its top executives to Washington under the program.

"We consider the program a valuable and unique resource, enabling some few of our promising young executives to participate actively in the Washington scene for a period of time long enough to provide significant experience," said Thomas A. Murphy, chairman of the board of General Motors.

"Each of those who have taken part benefitted personally," he said. "On their return, we gained from their increased knowledge and understanding. And we have firsthand reports that they brought to their assigned sector of the Congress a sense of the business world that was otherwise lacking."

C. R. Blundell, vice president of personnel for General Foods Corp., said, "There is no possible way currently we could provide the internal experience which offers the exposure to the working of our federal system of government that one gets through the Congressional Assistant Program."

In 1977, Allan Cors, vice president and director of government affairs for Corning Glass Works, commented about one of the company's executives sent to Washington under the program.

"The program has been very good for him and Corning Glass Works," Cors said. "Joe's experience has definitely made him a much more valuable resource to the company. His better understanding of the governmental process has given him a substantially enhanced ability to make decisions now, as well as the future."

The praise doesn't all come from the private sector.

Chiles, chairman of the Senate Federal Spending Practices and Open Government Subcommittee, praised Stephen Cole, a General Foods executive assigned to his supervision.

"Steve turned out to be a real tiger," Chiles said.

Another assistant assigned to Chiles' subcommittee was Richard R. Grosse of General Motors who arranged field hearings on the 1979 Paperwork Reduction Act.

"He virtually drafted the legislation," said a subcommittee staffer who worked with Grosse. "He briefed the senator on what he recommended him to do."

Some assignments raise immediate questions:

Richard E. Storat, chief project engineer for Bethlehem Steel Corporation, has been assigned this year to the House Committee on Energy and Commerce Subcommittee on Fossil and Synthetic Fuels.

Bethlehem Steel is involved with Westinghouse in a proposed methanol plant at Johnstown, Pa., and the project is pending for approval before the new U.S. Synthetic Fuels Corporation.

Storat's subcommittee is responsible for initial drafting of legislation affecting synthetic fuel projects.

U.S. Steel Corp. assigned a $36,000-a-year environmental engineer to the Senate Committee on Energy and Natural Resources.

That committee has major responsibility over legislation dealing with the nation's natural resources, such as coal used in the production of steel. The committee recently drafted legislation that would give steel companies extensions on meeting clean air deadlines.

Denis W. Ray, a mill superintendent with Aluminum Company of America, is assigned to a House subcommittee on mines and mining.

A. Lyell Rushton III, an advisor on international public affairs with Mobil Oil Corporation, is assigned to the Senate Banking Subcommittee on International Finance and Monetary Policy.

Michael J. Prendergast, a tax assistant with U.S. Steel, is assigned to the House Committee on the Budget.●

NATIONAL ITALIAN AMERICAN HERITAGE WEEK

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, June 4, 1981

● Mrs. SCHNEIDER. Mr. Speaker, I would like to take this opportunity to acknowledge the importance of Italian Americans and the cultural richness which they have brought to our societal community in the United States, by cosponsoring House Resolution 145, requesting the President to declare the week of June 7 to 13 as National Italian American Heritage Week. As the Representative of the largest concentration of Italo-Americans of any congressional district, I would like to pay tribute to this rich cultural group, which has not only influenced the state of Rhode Island, but also has played a substantial role in shaping the essence of a country we take great pride in calling the land of opportunity, diversity, chance for acceptance, growth and progress.

Two bronze plaques in the Italian-ethnic area of Providence, Federal Hill, are dedicated to the men of the Muratori and Garafalo families whose fruit stands were located on that site for 40 years. These men came to this country, worked their way through the depression and successfully supported their families as fruit vendors. The Italian Americans, many of whom are the descendents of early immigrants, have contributed to the arts, medicine, education, construction trades, business, the list goes on.

In 1950, John O. Pastore of Rhode Island, became the first Italian American to be elected to the U.S. Senate. In years to come, Senator Pastore was followed by many distinguished Ital-

ian Americans who later joined the House and the Senate. Senator Pastore is only one example of the Italian Americans who, to this day, are the cultural and economic backbone of my State.

The declaration of a National Italian American Heritage Week, like the bronze plaques, signifies the contributions of generations of a people who have had a significant impact on our nation. More importantly, it reminds us that our country is still that place where we as Americans can pull together during hard times and experience successful triumph.●

CAN WE AVOID AN ARMS RACE IN SPACE?

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BROWN of California. Mr. Speaker, whatever one's views on the value of an aggressive civilian space program, or on the negotiation of a strategic arms treaty with the Soviet Union, he should be concerned about the militarization of space. In fact, an arms race in space will undermine both the efforts to exploit the peaceful uses of space, and the efforts to achieve some sort of military balance between the two superpowers.

I am one who believes the beneficial uses of space are far greater than we yet imagine, and the development of space technologies offers benefits to all the people of the Earth. It also seems evident that extending the arms race into space, in whatever form, is destabilizing and counterproductive. Yet, the United States is cutting back on civilian space programs, dramatically increasing military programs, and dedicating a larger share of the Space Shuttle payloads to military and intelligence uses. These budgetary decisions are de facto space policy decisions, although the policy we are making is generally unknown and unrecognized in the Congress. Former Air Force Secretary, and now Deputy Administrator of the National Aeronautics and Space Administration, Dr. Hans Mark, made this point when he recently noted:

> NASA is in fact a minor user and not the driver (of the Space Shuttle). That's something the NASA folks don't like to hear, but it is true.

Mr. Speaker, there is time to avoid an arms race in space. Dr. George B. Kistiakowsky, former science advisor to President Eisenhower, discussed this subject in a recent article which I commend to my colleagues.

The article follows:

[From the Los Angeles Times, June 4, 1981]

ARMS RACE IN SPACE?—BIG PUSH FOR ANTISATELLITE WEAPONS SHOULD BE AVOIDED

(By George B. Kistiakowsky and Kosta Tsipis)

The successful maiden flight of the space shuttle Columbia has reawakened keen interest in the uses of outer space, including the role that military forces should play there.

Quite early in the Space Age, the U.S. military was mostly interested in the uses of outer space for manned warfare, and funded such science-fiction studies as "The Strategic Defense of Cis-Lunar Space." But, as the recognition grew of the military advantages offered by the panoramic view of Earth from atmospheric heights, the military became involved in a variety of unmanned missions designed to increase the effectiveness of the armed forces that are deployed on Earth.

The military space budget reached $5.3 billion in fiscal 1979, rose to $7.4 billion in fiscal 1981 and, judging by the plans of the Reagan Administration, will be double that by fiscal 1985. Compared with these figures, the National Aeronautics and Space Administration's fiscal 1981 budget is $5.1 billion, a substantial fraction of which is allocated for the space shuttle, which will serve military as well as civilian projects.

The United States and, to a lesser extent, the Soviet Union have become increasingly dependent on outer space for the smooth operation of their armed forces. For example, most long-terms, strategic intelligence-gathering is conducted by satellites that fly over the nations of the world and photograph military, industrial and agricultural activities and installations, providing timely and reliable information.

Since the early 1960s, satellites have also been used to monitor compliance with arms-limitation agreements as they came into force. It is quite doubtful that agreements such as SALT I would have been concluded without the capability of satellites to monitor compliance. In time of war, satellites could track battlefield activities and the deployment of the combatants, as was done by the United States and the Soviet Union during the last Arab-Israeli war. The cameras of modern satellites can scan large areas of land and also zoom in to transmit detailed information.

Synchronous satellites whose rate of travel enables them to remain over the same point on the earth's surface, positioned about 21,000 miles above the Equator, stare continuously at the Soviet Union and provide almost instantaneous warnings of Soviet missile launchings. Such early-warning satellites can detect both intercontinental ballistic missiles and submarine-based ballistic missiles, and in seconds warn our military commands if the numbers launched suggest the start of an attack, rather than routine testing.

One of the satellites' most important military functions is carrying the bulk of communications among our forces based around the world. Any developments that would make military communication satellites vulnerable in time of war would seriously threaten the combat capabilities of our forces.

The United States makes much more extensive use of outer space for these activities than does the Soviet Union. Although the United States has fewer but perhaps more elaborate and sophisticated systems in space, it has grown more reliant on space for its daily military operations and derives greater advantages from space. The Soviet Union does not appear to be experimenting with the more sophisticated uses of space, probably because our open society offers the Soviets easier ways to acquire the information that they desire about us. Thus any military developments that would restrict the usefulness of outer space are most likely to work against the security interests of the United States.

Outer space so far has remained free of weapons of any kind. An international treaty to which the United States and the Soviet Union adhere forbids the deployment in space of "weapons of mass destruction"—that is primarily, nuclear warheads.

Stimulated probably by intelligence leaks that the Soviet Union is working on anti-satellite weapons, there has been recent speculation in our press that it is possible, and even desirable, to place weapons systems in space that could either damage satellites or electronically impede their functions. There has even appeared journalistic hyperbole to the effect that it would be possible, within the next decade or so, to deploy "death-ray" weapons in outer space that could protect the United States from a missile attack. Such claims are totally unsupported by technological reality, and are science fiction best left to Hollywood. They seem to reflect the shortsighted desire of some military planners to extend the arms race into outer space.

Regrettably, both superpowers have already taken the first steps in this direction. In the last decade, the Soviet Union has conducted unmanned satellite rendezvous in space that could be interpreted as anti-satellite weapons testing. Eleven of these might have been successful in the sense that one satellite passed within a half-mile of the other. The potential to damage U.S. satellites is presently limited to those in low orbits, but it has been cited as the reason the United States is now developing its own anti-satellite system.

The space shuttle was begun as a civilian project by NASA, but military planners soon recognized its potential for placing heavy payloads in space. It has continued as a joint venture, still under NASA management but with the shuttle somewhat redesigned to accommodate military needs.

In the last few years, partly because of large budget overruns in the shuttle project, NASA has postponed scientific missions in space that were planned to utilize the shuttle as the launch vehicle. The current drastic restrictions in civilian budgets proposed by the Reagan Administration will result in even less money for scientific objectives.

The shuttle will most probably be used for placing in space commercial satellites that are now revolutionizing long-distance civilian communications, as well as transmission of commercial data and television programs. Nonetheless, one might expect that the majority of shuttle payloads will turn out to be of interest to the armed forces, which are being promised rapidly rising budgets. Undoubtedly their payloads will include still larger and more advanced satellites intended for synchronous orbits, for which the satellites must be equipped with powerful rocket-propulsion systems to lift them from the low orbits of the shuttle to 21,000 miles.

The shuttle payloads can, of course, include anti-satellite systems, but interference with the opponent's intelligence satellites is contrary to the commitments made by the United States and the Soviet Union in SALT I and the unratified SALT II. Even the development of systems for this purpose

will threaten the benefits that we gain from the application of superior technology to outer space. Hence it is to our advantage to reach an agreement with the Soviet Union to stop the incipient anti-satellite projects under way. To engage, instead, in an anti-satellite arms race would be folly.●

THE LOEBE JULIE CASE: AN EXAMPLE OF WASTE IN DEFENSE SPENDING

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. WEISS. Mr. Speaker, waste in Government programs is the concern of every citizen. Yet an administration that professes to seek elimination of wasteful and excessive spending has ignored the largest source of waste in the Federal Government: the national defense budget.

Some examples of waste in defense spending are well known. Pentagon interest in state-of-the-art equipment leads to gold plating, where millions are spent on technical improvements that provide no real military advantages. Unnecessary bases are kept open. Redundant weapons systems are purchased.

Other examples are not well publicized. But when added up, they yield estimates such as that made by former Comptroller General Elmer Staats of up to $10 billion a year in defense waste.

One example is the case of my constituent, Loebe Julie. Mr. Julie is an inventor and manufacturer of calibrations equipment which is used to keep our weapons in the highest possible state of readiness. If incorrectly calibrated, weapons guidance systems will send missiles off course, to use a crude example.

According to many experts and the Army itself, Mr. Julie manufactures an exceptionally accurate and reliable calibrations set. The Army has refused to purchase his equipment for field use, however, insisting that it is both too expensive and too sophisticated.

Mr. Julie has argued that purchase and deployment of his equipment would save the Army about $600 million over its 20-year span of operation. Indeed, he has pointed out that the Army has likely wasted about $70 million over the past decade by purchasing equipment that either proved to be inadequate or was obsolete.

A General Accounting Office study of this situation, requested by myself and Congressman JOSEPH P. ADDABBO, concluded that the Army "has not adequately considered" the Julie equipment. In fact, Army evaluations of Mr. Julie's product "appear to be based on some questionable conclusions and assumptions, and largely ignore favorable impressions by Army representatives who saw the equipment in operation," according to the GAO report.

The Army had questioned Mr. Julie's assumptions made in developing projected cost savings for the use of his equipment. But the GAO noted that the Army had either failed to develop accurate data of its own, or had simply not furnished it to GAO.

The Secretary of the Army has ordered his Department's Inspector General to investigate the situation, and I am hopeful that the waste involved can be identified and corrected.

But I must point out that there are strong indications that further investigation of the calibrations area is needed. GAO has suggested, for example, that such an investigation be made of the Army Metrology Calibration Center—AMCC—Redstone Arsenal, Ala., which has recently gained administrative control over much of Army purchasing and policy in this area.

In addition, reports filtering back to the United States from Europe indicate that our system of calibrations deployment in that theater is plagued by mismanagement, inefficiency, and inadequate support. Highly trained, irreplaceable technicians are leaving the Army because conditions are inimical to quality calibrations.

The United States cannot afford a weak or inadquately maintained calibrations system. Mr. Julie has done all of us a service in calling attention to this previously unheralded but critical area of military readiness.

I am certain that there are hundreds of other men and women in the Department of Defense, the armed services, and civilian industry who can testify to the waste that is countenanced each day by our Defense Establishment. We must continue our efforts to see that this waste is identified and eliminated. This cause is important not only to the small businessman such as Mr. Julie, but to every citizen with an interest in both effective use of Government funds and a strong national defense.●

CYPRUS 1981: ONLY THE PAST IS CERTAIN

HON. PHILIP R. SHARP

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. SHARP. Mr. Speaker, I would like to bring to the attention of my colleagues the following essay on current elections in Cyprus and Turkey by Prof. John T. A. Koumoulides. The holding of democratic elections on the island is especially noteworthy in light of the history of international conflict and tension in this area, and I believe Professor Koumoulides provides interesting insights into this endeavor:

On Sunday 24 May the Greek inhabitants of Cyprus will be called to the polls to elect the next President of the Republic of Cyprus and thirty-five members of the Vouli (parliament). One month later the Turkish inhabitants of the island will go to the polls to elect their leaders. Western observers consider this to be the most important election since the birth of the Republic of Cyprus in August of 1960. It is the first election without the impressive presence of the late President of the Republic, Archbishop Makarios. An election of great importance to the future of the Republic, therefore an election which now more than ever before demands unity, wisdom and political and social discipline on the part of all the people of Cyprus. The future leaders of the two (Greek and Turkish) ethnic communities of Cyprus will be faced with the major responsibility of helping to find just and lasting solutions to the chronic problems of the island. The bitter truth is that the real victims, or I should say tragic victims, of the tragedy of Cyprus are the Greek and Turkish inhabitants of the island. All others, whether Greeks, Turks, British, Americans, Russians, Arabs etc., are not but casual observers and outside "sympathizers" of the drama being played on that lovely but tragic island. The stakes in Cyprus are so high and the tension so great that the coming elections in the Greek and Turkish communities are being closely observed by the international community. Cyprus is of great strategic importance to the west being regarded as "vital" to its "national security". The complex issues in this tiny, rich history, scenically beautiful country carry the seeds of danger for the Greco-Turkish conflict and through Greece and Turkey NATO itself and the western alliance.

On the Greek cypriot side seven political parties are contesting the May 24 elections. They are the 'Democratic Party' of current President Speros Kyprianou; the 'Democratic Rally' of Mr. Glafkos Klerides; the communist party (AKEL) of Mr. Ezekias Papaioannou; the socialist party (EDEK) of Dr. Vassos Lyssarides; the 'Union of the Centre' of Mr. Tassos Papadopoulos; the 'New Democratic party' of Mr. Alekos Michaelides; and the 'Pancyprian party' of Mr. Chrysostomos Sofianos. On the Turkish side two major parties are contesting the June election. They are led by Dr. Kutchuk, ex-Vice President of the Republic of Cyprus and the current Turkish-cypriot leader Mr. R. Denktash.

The intercommunal talks which first took place under the auspices of the U.N. Secretary-General Dr. Kurt Waldheim first between the late President, Archbishop Makarios and Mr. R. Denktash (27 January and 12 February 1977), and again on 18 and 19 May 1979 between President Speros Kyprianou and Mr. R. Denktash continued in 1980. However, because of the coming elections on both sides Mr. Hugo J. Gobbi, special representative of the U.N., Secretary-General proposed a new time table for the intercommunal talks. 15 April 1981 constitutional aspects; 29 April, Territorial aspects; 6 May, Resettlement of Varosha; 3 June, Initial practical measures; 8 July, constitutional aspects; and 15 July 1981, Territorial aspects. Thereafter the talks will revert to the normal weekly pace. However, other than the comfort of knowing that the two sides are at least talking to each other across the diplomatic table, no real progress has taken place in the intercommunal talks. Yet the problem of Cyprus continues to be

extremely critical and potentially dangerous. Europe and the western world in general needs an independent, strong, united and peaceful Cyprus. Today American 'efforts' to bring a just solution to the problem have had an extremely limited success. It is therefore time for a new, fresh approach to the problem. A new initiative to be vigorously undertaken by the European Community. England with a constitutional obligation should lead the new peace initiative assisted by Greece, Turkey and other European states.

The pre-1974 situation of Cyprus is now historical. A de-facto partition of the island is extremely dangerous, unrealistic and unthinkable. What is possible is to maintain the unity and independence of Cyprus on a different arrangement. An arrangement which should include a bizonal constitution, with a strong federal government responsible for the conduct of national defense, foreign policy, and the economic affairs of the Republic of Cyprus.

Only through serious and effective intercommunal negotiations a viable and just solution to the tragic situation in Cyprus can be found. The two ethnic communities of Cyprus have capable and wise leaders who should be encouraged to meet, discuss, and solve their problems and find effective and lasting solutions to their difficulties and misunderstandings. An atmosphere of trust, confidence and justice must be created on Cyprus where Greeks and Turks might live and work together—with respect for each other's religious, social and political rights—for social and economic progress. Greece and Turkey, so close geographically, must also attempt to put aside their antagonisms, polemics and general hostilities which endanger the security of both—they should stop being prisoners of the past. Rather these two nations must realistically and diligently work to solve their problems and differences in Cyprus and the Aegean and help establish between themselves and with their Balkan neighbours an atmosphere of cultural, diplomatic, social and economic cooperation for peace, justice and prosperity in the area.●

MORE OPPOSITION TO METRIC

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. RUDD. Mr. Speaker, I have introduced H.R. 1660, a bill to repeal the Metric Conversion Act of 1975. Since that time I have received literally hundreds upon hundreds of letters from people all over this Nation supporting that bill and expressing the hope that Congress will act favorably upon it soon.

I think, Mr. Speaker, the time has come for a brief reminder of the need for my bill, of the necessity to repeal the Metric Conversion Act and abolish the Metric Board.

There is a great misconception abroad in the land that United States conversion to the metric system is national policy and that the Metric Board exists to implement that policy.

The facts are that conversion to metric is not a matter of U.S. policy, and the mission of the Metric Board should have been to encourage voluntary adoption of the metric system—not using propaganda methods to scare the public into believing that they ought to accept metric because the law dictates it.

Furthermore, there is nothing new about voluntary use of metric measurement in this country. Such use has been authorized since 1966—115 years ago. There has been no success during these years because the American people do not favor conversion.

Other facts we all should be aware of, Mr. Speaker, include the information that Great Britain and Canada both regret their statutory acceptance of metric, and efforts are underway in both nations to return to the pre-metric status quo.

Conversion to metric would unfavorably affect all aspects of our lives and subject Americans to a financial burden of billions of dollars in this conversion of weights and measures.

I recently read through some of the materials used for National Metric Week, May 10 to 16. Included was a true-false quiz testing a person's knowledge of metric, a metric cross word puzzle and other propagandistic items that attempted to ridicule legitimate opposition to metric. There is a devious effort to convince the Nation that metric conversion is mandatory. This is false.

The forces that wish to impose the metric system on the people of our country should draft legislation to do so legally for consideration of the Congress. The people deserve honesty.●

JAMES RIORDAN

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. FARY. Mr. Speaker, all of us in this body have been shocked recently by the attempts on the lives of President Reagan and His Holiness, Pope John Paul II. We all are blessed by their recovery and their near-miraculous return to sound health.

I regret that such good fortune was not the case for the citizens of the city of Chicago this week. I just received the tragic news that the first deputy superintendent of the Chicago Police Department, James J. Riordan, died last weekend from gunshot wounds received in the line of duty. Although off-duty at the time, Deputy Superintendent Riordan attempted to quell a minor disturbance in a downtown restaurant. The fact that the second-ranking officer in the department has fallen victim under such seemingly innocuous circumstances numbs my senses.

James Riordan was a "policeman's policeman" who enjoyed the widespread respect and friendship of the entire police force. After joining the department in 1947, he rose quickly through the ranks, as sergeant, lieutenant, and captain. He held eight command positions during his career, and in 1965 was named "outstanding district commander of the year" by the highly respected Chicago Crime Commission. It is reported that at one point, J. J. was offered the superintendent's position. However, his skills and intelligence as an administrator, and his savvy as a streetcop, convinced him to forgo the opportunity, retaining his reputation as a "policeman's policeman."

The ultimate irony was struck when it was discovered that the accused assailant was a former Davenport, Iowa, policeman himself.

We seem to be a battered people of late. To say that James Riordan cannot be replaced is a gross understatement. I offer my prayers and condolences to his wife, Loretto, and his seven children.●

TERRORIST LEADERS IN WASHINGTON

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. McDONALD. Mr. Speaker, yesterday I was shocked to receive a press release—Information Note No. 3581, June 5, 1981—from the United Nations Centre Against Apartheid announcing a conference on the United States and South Africa held at Howard University and which listed the speakers as including B. Akporode Clark, chairman of the U.N. Special Committee on Apartheid; Oliver R. Tambo, president, African National Congress (ANC); Moses Garoeb, administrative secretary of the South West African People's Organization (SWAPO); Representative WILLIAM GRAY, vice-chairman, Congressional Black Caucus; Dr. Robert Cummings, Department of African Studies, Howard University; Canon Robert C. S. Powell, director, African Office, National Council of Churches; and Randall Robinson, director of Transafrica.

It is shocking that two high-level leaders of Soviet-dominated terrorist groups, the African National Congress and South West Africa People's Organization, were permitted to enter the United States and travel without restriction.

While in Washington, Tambo met with some Members of the House and Senate in an effort to lend an aura of credibility to his brutal terrorist organization.

I understand that this Marxist terrorist today plans to visit Atlanta, and lunch with its mayor, Maynard Jack-

son. That Mr. Jackson, properly occupied with directing a manhunt for the killers of innocent children in his city, should meet with a man who directs the murder of innocent people in South Africa—both black and white—is an affront to decent people.

It is also the height of illogic for Atlanta's mayor to meet with a terrorist boss whose henchmen have maimed and killed innocent civilians—both black and white—in South Africa, while at the same time refusing to meet with the South African Ambassador to the United States, or indeed any official of the South African Government.

It is my understanding that the State Department in response to questions by John Rees, Washington bureau chief of the Review of the News, admitted that Tambo received his visa in error from the U.S. Embassy in Lusaka, Zambia, and stated that the State Department recognizes that elements of the African National Congress directed by Tambo are terrorists. The State Department also said that Tambo had been brought to this country in 1961 by the American Committee on Africa (ACOA), the major U.S. support arm for revolutionary African terrorists. Subsequently Tambo has been in our country at the United Nations in New York which provides his Moscow-dominated terrorist group with observer status.

The President of the United States and his Secretary of State quite properly have criticized the support provided to revolutionary terrorist movements by the Soviet Union, its satellites and client-states.

Western intelligence and counterterrorist specialists and even some journalists have known that the Soviet Union, directly and through its satellites like Cuba, East Germany, North Korea, Czechoslovakia and Bulgaria, and through client states like Algeria, Angola, Libya, Mozambique and South Yemen provide training, logistical support and political guidance for terrorist groups.

The terrorist recipients of Soviet support include the Basque ETA in Spain, Red Brigades in Italy, Irish Republican Army, Polisario, the Palestine Liberation Organization (PLO), and the African National Congress (ANC) and South West Africa People's Organization (SWAPO). Several previous administrations declined to make a public issue of Soviet support for terrorism because they placed their priority on an illusory and false policy of détente with the U.S.S.R.

But President Reagan and his Secretary of State have been forthright in condemning Soviet aid to terrorists, which makes inexplicable how and why Tambo and Garoeb were permitted to come to Washington.

Terrorists addressing the United Nations has become a commonplace. We have seen addressing a body purportedly dedicated to peace the pistol-packing PLO chief Yasir Arafat and Fidel Castro who gives terrorist training on a wholesale basis to revolutionaries from all over the world, as well as the representatives of terrorist so-called national liberation movements and diplomats from regimes whose rise to power was accompanied by terrorism such as Vietnam, Zimbabwe, Algeria, Angola and Mozambique.

Is it surprising that the United Nations has been unable even to define terrorism, let alone condemn it, when so many of the U.N.'s member states use terrorism as a means for destabilizing their neighbors?

Of course the terrorists and their supporters try to camouflage their terrorism with rhetoric. They try to confuse the issue by calling terrorists freedom fighters and terrorist organizations national liberation movements. However, those who adhere to the values of civilized free societies I believe agree with the definition of terrorism I first offered in July 1976:

Terrorism: A violent attack on a noncombatant segment of the community for the purpose of intimidation to achieve a political or military objective.

This definition exposes the terrorists' favorite propaganda line that one man's terrorist is another's freedom fighter for national liberation.

To return to the appearances in Washington of leaders of the African National Congress and South West Africa People's Organization, the public record of their terrorist activities and Soviet backing is ample which makes the granting of visas to ANC and SWAPO leaders by the State Department under Secretary Haig all the more bizarre.

A history of the African National Congress was provided in the staff study, "'Terrorism," published in 1974 by the House Committee on Internal Security. ANC was formed in South Africa in 1912, and was the target for rhetorical criticisms by the South African Communist Party until the early 1940's when the SACP began infiltrating ANC with younger activists who rose to leadership. By the late 1940's, ANC was controlled by the white-dominated Communist Party. Some of the better known SACP activists working in ANC included Moses Kotane, simultaneously SACP general secretary and ANC treasurer; Walter Sisulu, the ANC general secretary; J. B. Marks; Bram Fischer; Michael Harmel and Joe Slovo.

After preliminary organizing work in protests against identity cards, as the HCIS staff study reported:

In 1961, the Communist Party decided to lead the African National Congress into a campaign of terrorism. An official of the African National Congress, Nelson Mandela, was placed in charge of the terrorist organization called Umkonto We Sizwe (Spear of the Nation).

The official history of the South African Communist Party, written pseudonominously by Michael Harmel and printed in East Germany in 1971, admits that the leaders of the African National Congress and the Communist Party set themselves to recruit and train fighting cadres which entered the field of action on December 16, 1961, with the opening of a campaign of planned sabotage throughout the country. Harmel, alias A. Lerumo—Zulu for teacher—wrote:

Numbers of young militants were recruited and sent abroad for combat training as guerrillas of Umkonto We Sizwe. Following the examples of Nelson Mandela, a number of leaders of the Party and the Congress organizations were directed to leave their homes and assume new identities and disguises. Secret headquarters were set up at a farm in Rivonia, near Johannesburg, and elsewhere.

The House Committee on Internal Security staff study continued:

Subsequently, Abram Fischer, a white Communist Party member * * * of a prominent Afrikaans family, was captured. He admitted during his trial in 1966 that the leaders of the terrorist movement had given assurances to the Communist Party that no action would be taken without prior consultation with the party. * * * As Fischer said, "The Congress and the Communist Party did not wish to have their membership held liable for every act of sabotage."

This meant that ANC's Umkonto We Sizwe terrorist arm would consult with the SACP regarding overall strategy and policy, but were at liberty to select particular individual targets. In other words, once the policy was set that planting bombs in public places would be a good tactic, they did not have to ask whether the Communist Party would prefer a particular bomb be planted in a train station as opposed to a department store or post office.

Regarding Nelson Mandela, I would like to point out that when three terrorists armed with Soviet AK-47 assault rifles and hand grenades from ANC's Umkonto We Sizwe raided a bank branch in suburban Pretoria on January 25, 1980, and took 25 people hostage, they demanded the release from prison of revolutionaries. Mandela headed their list.

The brutality exhibited by ANC's bank raiders was similar to the savagery of the mixed Palestinian and West German group led by Soviet-trained assassin Ilich Ramirez Sanchez (Carlos the Jackel) that raided the Vienna OPEC ministers meeting. According to official statements, the ANC terrorists murdered a young woman teller in cold blood to demonstrate they meant business. That killing resulted in a police counterattack during which the terrorists threw hand grenades into the group of hostages, wounding 16 and killing another woman.

The ANC terrorists had demanded the release of James Daniel Mange, the leader of a 12-man ANC terrorist unit that had been trained in Cuba, has smuggled Soviet weapons into South Africa from Mozambique, and were preparing terrorist attacks when apprehended.

In reporting the bank raid, many U.S. newspapers relied on an Associated Press dispatch which termed ANC's terrorists "black nationalists," and which called Nelson Mandela a 61-year-old lawyer who is long regarded as the most probable head of a black government if one is ever established in South Africa. That dispatch is typical of the U.S. media blackout regarding the Communist control and Marxist ideology of the ANC and SWAPO.

The South African Communist Party is not so reticent. The SACP quarterly, the African Communist, for the third quarter of 1964 carried a long account of the trial of Nelson Mandela and six other leaders of ANC, the SACP and Umkonto We Sizwe. Part of the evidence at the trial stemmed from ANC and SACP archives seized in the police raid at Rivonia. The African Communist article reported the police found many confidential documents, including operation mayibuye, the Umkonto We Sizwe draft plan for guerrilla warfare.

A tenant of the Rivonia farm who was a Communist Party member was arrested. The African Communist noted he had had documents in his handwriting indicating that he had been sent abroad on a mission to find whether arms could be obtained for the Umkonto soldiers.

> The Communists always try to present terrorism as guerrilla warfare and terrorists as soldiers. But legitimate warfare, regular or irregular, attacks military targets, not civilians.

The article continue with an account of Mandela:

> Among the documents discovered at Rivonia were manuscripts in the handwriting of Nelson Mandela, who had found refuge at the farm at one stage of his underground leadership.

* * * * *

> * * * The leaders in the dock * * * disdained to repudiate * * * or to deny the part that some of them had played in Umkonto. * * * "I admit immediately," said Mandela, "that I was one of the persons who helped to form Umkonto We Sizwe, and that I played a prominent role in its affairs until I was arrested in August 1962.

* * * * *

> "I do no deny that I planned sabotage," said Mandela. "I did not plan it in a spirit of recklessness, nor because I have any love of violence. I planned it as a result of a calm and sober assessment of the political situation that had arisen * * *."

Mandela was taking pains to explain on the record that he held the correct and classical Marxist-Leninist position regarding terrorist armed struggle. This is that violence should be used only after a cold-blooded assessment of its consequences and a political determination by the party leadership as to whether or not it will advance their aims.

In the 1960's, ANC cadre received their terrorist training principally at camps in Algeria and Cuba. Libya, Mozambique, Tanzania and Angola have also provided ANC with facilities, with some of the most promising potential leaders going to the Soviet Union and East Germany.

The principal front group controlled by the South African Communist Party and ANC is the South African Congress of Trade Unions (SACTU). SACTU's official history published last year, "Organize or Starve," emphasizes that ANC and SACTU campaigns were never regarded as separate from one another, and members of both organizations committed equal energies to all congress work. In its official publication, Sechaba (printed in East Germany as one of the many services provided by the GDR regime to ANC and the SACP), ANC wrote that in the SACTU official history:

> The relationship between the trade unions and the national liberation movement, the African National Congress, is clearly drawn—one built on many years of work amongst the masses in very difficult conditions.

The Communist Party has boasted of its clandestine work with ANC in organizing strikes by black labor organizations. For example, the SACP magazine Inkululeko, second quarter, 1973, said:

> Strikes are a potent force because they begin to instill fear into the capitalists; because they help to educate the workers about the true nature of the capitalist state. * * * The white ruling class will not surrender its control of the State without a violent struggle, therefore the continuation of the preparation for such a struggle is essential for victory.

Terrorist activities by the African National Congress were renewed, starting in 1979. Militant organizing of groups such as the South African Students Organization (SASO) and the Black Consciousness Movement headed by the late Steve Biko who said his goal was forging unity among the younger militants and ANC had brought continuing agitation after the 1976 Soweto riots. Biko's death in police custody 3 years ago removed the only major independent leadership outside the Communist Party and ANC. The Communists promptly took advantage of this by arranging for new cadres to receive terrorist training in Cuba and Tanzania.

Captured ANC members from Umkonto We Sizwe have boasted that their main infiltration route is from bases in Tanzania through Mozambique then into South Africa through the Kruger National Park.

During 1979, ANC's attacks generally were aimed at small police posts located near black townships like Soweto. In his recent monograph, Soviet Support for International Terrorism, published by the Foundation for Democratic Education, Inc., Herbert Romerstein, a professional staff member of the House Intelligence Committee, cited a biography in ANC's official publication, Sechaba, of an ANC terrorist captured in June 1977 after machinegunning a number of unarmed civilians working in a garage, which admitted he had left South Africa in October 1976 to receive training abroad.

Following the Pretoria bank raid in which all three ANC terrorists were killed, the next major attack was on June 1, 1980, when coordinated attacks were carried out on three facilities of the South African Coal Oil and Gas Corp. (SASOL), causing $7 million in damages.

Oliver R. Tambo from ANC's base in Tanzania, said that the attacks were carried out by ANC's Umkonto We Sizwe cadre. Tambo boasted, "We have attacked these installations because of their key strategic position in the whole economy of South Africa." He explained that to destroy the country's efforts for energy self-sufficiency would facilitate efforts for an oil boycott to collapse the economy. A London ANC spokesman, Francis Meli, also confirmed that the SASOL sabotage is part and parcel of the general offensive of our movement.

South African newspapers reported that the sabotage campaign has been masterminded by Joe Slovo, 55, a member of the Communist Party Central Committee who was born in Lithuania and is Tambo's chief adviser. Slovo, formerly a lawyer in Johannesburg, and his wife Ruth first fled from South Africa to avoid arrest in the late 1950's. They have operated from London, East Berlin and more recently from Maputo. Joe Slovo is a frequent contributor to the African Communist, with an article in the issue for the second quarter of 1978 in support of the applicability of protracted armed struggle, that is, terrorism, to revolution in South Africa.

It should be pointed out that after the SASOL bombings, the South African Minister of Police, Louis LeGrange outlined Slovo's central role in ANC terrorist planning and charged also that the Russian Ambassador in Lusaka, Mr. (Vasily) Solodovnikov, played an important role in the planning of ANC and Communist strategy. Vasily Solodovnikov is named in John Barron's book, KGB, as a senior KGB official active in key African countries for more than a decade.

Slovo's wife, Ruth First Slovo, also a Communist Party functionary, has taken a leadership role in anti-South

Africa organizing in Western Europe carried out by the Washington-based Marxist think-tank, the Institute for Policy Studies and its Transnational Institute project (IPS/TNI).

We often hear the argument that Communists cannot be involved in terrorism because Communists oppose individual terrorism. Lenin supported terrorism as a tactic carried out under the political control and supervision of the Communist Party. In other words, Communists supported terrorism controlled or directed by their party, or when the party agrees that terrorist violence and disruptions will be useful in achieving the Communists goals such as undermining confidence in a government, disrupting democratic political systems and destabilizing society.

A classic example is an article that appeared in the African Communist for the third quarter of 1980 called armed struggle in South Africa: The immediate task of our movement. The article states:

> In this period of struggle the urgent task of our movement is to inject the masses of our people a feeling of confidence in their own potential to overthrow the racists, by means of vigorous revolutionary action, the main content of which must be effective and sustained guerrilla operations including a nation-wide sabotage campaign reminiscent of the early sixties.
>
> * * * * *
>
> The experience of other countries like Algeria, Cuba, (and) Angola * * * shows that guerrilla struggle can bring about a revolutionary situation. Nowadays this is more so because the liberation forces have at their disposal an advantage (which the Russian revolutionaries never had), that is, the existence of a socialist community which is committed to the principles of proletarian internationalism.

The article concludes that there is no other path to liberation than that of armed struggle. To think otherwise would be to engage in a lifeless theoretical discussion lacking all practical significance.

Oliver Tambo's extremism was demonstrated in a speech he delivered at an International Conference in Solidarity with the Struggle of the Namibian People, sponsored by the World Peace Council in Paris last September. Tambo said:

> Speaking as the leader of a liberation movement, I would like to assure our comrades-in-arms in the liberation struggles POLISARIO, FRETELIN, the PLO, the fighters in the Canary Islands, that by definition their struggle is ours. Every victory they win advances our cause against the forces of imperialism and racism. We fight in our countries to advance their struggle. As far as the PLO is concerned our fight is carried on in the knowledge of the degree of intimacy and political, military and economic alliance that has developed between racism and zionism.

Terming the role of the five Western powers in seeking a solution to independence for South-West Africa sinister in the extreme, Tambo called for a four-point program to give massive support to its sister terrorists in SWAPO, to rally international defense to support Angola which provides SWAPO with terrorist training bases and refuges, to deal with the Western powers as comprising the greatest source of misery and suffering in Namibia, and fourth, to deal with the transnational corporations * * * these heartless vultures which feed on the sweat and blood of enslaved millions.

SWAPO's public record is as closely alined with the Soviet Union as is ANC's.

The South-West Africa People's Organization (SWAPO) was founded in the late 1950's by Sam Nujoma, its president, in pursuit of an independent South-West Africa (Namibia). But SWAPO was picked up by the Soviet Union to use as an instrument through which Soviet policies for control of Africa's resources can be expressed. As Soviet influence, political support and indoctrination of SWAPO recruits increased during the 1960's and 1970's, SWAPO dropped its early Pan-Africanist ideology and replaced it with ever closer ties with Moscow and Marxism-Leninism.

Soviet support for the SWAPO terrorists escalated sharply after 1974, when the Portuguese leftist military junta handed over control of Angola and Mozambique to the Soviet-backed Marxist-Leninist terrorist organizations, MPLA and FRELIMO, respectively, which the Portuguese army once fought. Both the Angolan MPLA and the Mozambican FRELIMO were long backed by the U.S.S.R. with arms, training and indoctrination, as well as political assistance internationally. The leaders of MPLA and FRELIMO, like those of ANC and SWAPO, were appointed to the presidential committee of the World Peace Council. Bases were set up for training SWAPO terrorists in southern Angola.

It should be pointed out that SWAPO's favorite method of recruitment of new terrorists is to surround a small village and kidnaping at gunpoint the young men and women.

Once in the terrorist training camps, a quarter of the time of SWAPO's new terrorists is taken up with ideological indoctrination at the hands of Cubans and East Germans.

The fact of Soviet backing for the southern African terrorist movements has been a matter of public record for nearly two decades. One early sign of Soviet intentions to use terrorist movements to gain control in that area was the appointment of the ANC and SWAPO leaders to the presidential committee of the Soviet-controlled World Peace Council (WPC). This sadly misnamed organization has two main functions: manipulating public opinion in non-Communist countries and providing logistical support to Soviet-backed terrorist national liberation movements.

But my colleagues in this House I presume are aware of the nature of the World Peace Council since the Intelligence Committee in 1978 published a Central Intelligence Agency study of KGB media operations which called the WPC the Soviet Union's single most important international front organization.

To return to the southern African terrorist groups, SWAPO has a long record of violence against civilians. It has a consistent policy of murdering black political leaders opposed to Nujoma; SWAPO attacks rural villages and brutally executes those it suspects of opposition; and its armed struggle consists primarily of planting mines on roadways along public bus routes and has killed and wounded scores of innocent civilians. These actions demonstrate that SWAPO is a vicious terrorist group, not a legitimate guerrilla group or national liberation movement. Rhetoric does not change the facts.

While accepting political assistance from the Soviet camp in the U.N. and the Soviet-controlled international front groups, SWAPO leaders, like their comrades in ANC, say that armed struggle will be the principal tactic for taking control of South-West Africa.

A typical example was provided by SWAPO's spokesman at the United Nations, Theo-Ben Gurirab, on March 20 of this year, who maintained that SWAPO would leave no stone unturned as it intensifies the armed liberation struggle in Namibia. Gurirab also pledged SWAPO's mutual support for the Soviet-backed terrorist movement in South Africa, the African National Congress.

I would like to emphasize that Soviet backing of terrorist groups is not a secret. Terrorists frequently boast of their backing from the Kremlin because they feel it gives them some sort of dubious prestige in the eyes of some Third World countries to be seen to have the backing of a superpower.

Let me give a recent example. In March, SWAPO boss Nujoma attended the 26th Congress of the Communist Party of the Soviet Union (CPSU) in Moscow. He made a speech to the CPSU Congress directly acknowledging Soviet assistance to SWAPO. He said:

> Without the support of the Soviet Union, we would not have been able to achieve those results that we have achieved today. * * * we address ourselves to the Soviet Union which is giving comprehensive support to the people of Namibia * * *.

Mr. Speaker, if this Nation is to win the fight against international terrorism, a tactic directed against our free

world allies by the Soviet Union, we must at least block terrorist leaders from holding meetings on our own soil at which they can plan lobbying and pressure campaigns against us.

In order to maintain the credibility of the administration's campaign against international terrorism, the State Department should explain on the record how Tambo and Garoeb came to receive U.S. visas and which consular officials were involved. It should also consider transferring those officials to more appropriate posts in which their evident lack of judgment will do less harm.

I would also suggest that the administration direct the State Department to immediately review its classifications of terrorist groupings so as to end the present nonsense in which they say only some elements of the PLO and ANC are involved in terrorism when the entire organizations exist to plan and carry out terrorist attacks.●

LOCAL INITIATIVE OF GERALD, MO., SAVES FEDERAL TAX DOLLARS

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BAILEY of Missouri. Mr. Speaker, local initiative and community self-help are alive and well in the city of Gerald, Mo., and saving our tax dollars. Like many of our communities, Gerald needed to improve its sewer system. The city fathers received an engineer's estimate of $95,000 for their needed sewer extension and were encouraged to seek half of the moneys in the form of a Federal grant. The Gerald Board of Aldermen, however, felt the cost of $5,000 per family to be served was excessive and also did not want to wait the several years it would take to receive a Federal matching grant. They resolved they would just undertake the sewer construction themselves.

The city passed a bond issue, subsequently constructed a superior quality sewerline, and all for the total cost of $25,364, less than one-fourth the overall estimated cost and about one-half of what the Federal contribution alone would have been. Encouraged by this success, the city is currently constructing a 200,000-gallon water tower, again, without any help from the Feds.

Now, I will have to admit that Missouri is a State chock full of good old commonsense and community spirit. But the city of Gerald's experience just goes to show what can be accomplished with a little sweat and a lot of creative thinking at the local level. President Reagan wants to return more decisionmaking and initiative to our local governments. The citizens of Gerald think that is where it should be and so do I.

Here is the city of Gerald's story:

CITY OF GERALD,
Gerald, Mo., April 20, 1981.

Hon. WENDELL BAILEY,
Cannon House Office Building,
Washington, D.C.

DEAR MR. BAILEY: Mayor Dave Weatherford of Gerald told me that he was talking to you at the Franklin County Municipal League Dinner meeting in Gerald on April 15 on the subject of getting Federal and State government off the back of local government and how local government can do a job better and cheaper if the local government is allowed to do so.

As an example Weatherford cited the experience of our own City in constructing a sewerage line extension on our own without any government largess. You asked if he would put all this down on paper as an example of what local government can do without federal support. The following is the experience of the City of Gerald.

About eight years ago the Board of Aldermen decided that sewerage lines were necessary in an annexed area of the City that was not served by the existing sewerage system. The City hired E. T. Archer Engineering Company to draw up plans which would serve 18 widely scattered homes that were without sanitary sewers.

The Company came up with a cost estimate of $105,000, with the probability of an overrun due to rock, but assured the Board they could get a "grant" from the government for half the cost. The Board figured this would cost nearly $6,000 per home served, which was higher than they wanted to spend, so the matter was dropped at that time.

A few years later the smell from septic tanks and the mosquitos they produced hadn't abated a bit and since the City had hired Kleberger & Associates as engineers for the City, Mr. Kleberger was asked to make some plans. Kleberger came up with an estimate of $95,000 as his guess, but he too said federal help was available for half the costs—maybe in two or three years.

This would have made the cost over $5,000 for each family served, which the Board again considered too much. Finally, Mr. Kleberger was asked what the cost would be if we did the job ourselves without any government help or expensive contractor. We have an air compressor, 2 backhoes, every other piece of equipment needed and our own employees have the ability to do the job.

Mr. Kleberger stated, "Well, now that's a whole new ball game I will have to refigure." At the next meeting he came up with a figure of $50,000 if we bought everything ourselves and did the work with present employees. That sounded good to the Aldermen as the smell and mosquitos hadn't improved and we didn't want to wait several more years, so we promptly passed a bond issue for $50,000 by an 87 percent vote and got on.

Of course, the $50,000 was put on short term interest until the money was needed and the City made $1,753 in interest, so we had a total of $51,753. The total cost of the project came to $25,364 (this included $2,000 paid to the bonding company, $1,016 paid to the engineer, salaries for city employees and all material used).

If the City had gone the government "grant" route, with a contractor doing the job, and the $95,000 estimate held up which was unlikely as we did encounter rock and that ups the price quickly, the project would have cost the City $47,500. By doing it ourselves the City saved $22,136 and the taxpayers of the country saved $47,500.

The material used was of a better quality than used in the original sewerage lines and the work was superior as smoke tests showed absolutely no leaks while the original lines had many leaks when tested with smoke.

This is just one example where if local governments are allowed to use their abilities and apply good old "Missouri thinking" we can do a job better and much cheaper than if the Federal government gets involved. This is the point I believe Mayor Weatherford wanted to get across to you. I hope the information will be useful to you as an example of what people can do on their own without government largess and I believe it is how President Reagan wants to run the country.

Sincerely,

R. B. GARLOCK,
City Clerk.

P.S.—At present the City is constructing a 200,000 gallon water tower also without the assistance of a grant and the Board of Aldermen believe we will get by for less than if we had the grant.●

ASSISTANCE FOR SAVINGS AND LOANS

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LUKEN. Mr. Speaker, I am cosponsoring the All Savers Act, H.R. 3456, which will allow financial institutions to issue tax-exempt certificates of deposit. An investor would be able to exclude from income $1,000, and couples $2,000, of interest on the certificates. This legislation would help to arrest the spiral of dissavings and higher interest rates, and would channel savings back into financial institutions. The All Savers Act, combined with other measures I am cosponsoring, will allow savings and loans to draw on a long-term and secure source of capital for investment into local communities.

One of the other bills I am cosponsoring would provide for exclusion from taxation, interest earned on savings which are used by financial institutions for residential mortgage lending. I am convinced that this bill would create an incentive for people to make greater use of their neighborhood savings and loans. For too long we have taxed savings accounts and in these times of high interest rates, forced people to invest money in other areas. No one can deny the importance that savings and loans play in local community development.

Both the President and the Ways and Means Committee chairman, Dan Rostenkowski, have announced that they will accept as part of their tax

cut packages another proposal that I am cosponsoring to increase the tax exempt contribution into IRA's from $1,500 per year to $2,000 per year. This would provide for long term savings and therefore would provide savings and loan with a secure source of capital to invest.

I hope that we can convince the President, and other Members of Congress, that it is equally important to add All Savers Act to the tax package. Our high interest rates have forced savers to look for a "quick fix" with their investment dollars. This in turn has severely impacted on all savings and loans that have historically used long term investments such as mortgages, in communities across the country. While we must pursue other paths to bring down our crippling inflation rate, we cannot allow the savings and loans and the homebuilding industry to languish.

Representatives of the S. & L.'s have been very active here in Washington. If we have not been successful as yet, it is not because we have not tried.

The "American Dream" of homeownership must be preserved at all costs.

We owe it to the elderly to keep rents at a cost they can afford to enable them to survive. We also owe to our children the opportunity to become owners of homes and thus good American citizens.●

THE HOUSING INDUSTRY IN CRISIS

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BROYHILL. Mr. Speaker, all of us are painfully aware of the economic problems faced by the housing industry. Recently I had the opportunity to listen to W. Travis Porter, a very distinguished attorney from Durham, N.C., as he addressed a gathering of North Carolina Congressmen and Senators, congressional aides, and more than 100 Tar Heel housing industry members who came to Washington for the meeting.

Because of the excellent manner in which Mr. Porter outlined the problem and the solutions, I am inserting the speech into the RECORD. I commend it to your attention:

THE HOUSING INDUSTRY IN CRISIS

(By W. Travis Porter)

In light of the shortness of time I will attempt to emulate Jack Webb in Dragnet and give you the facts, just the facts as we ask for your help in the latest depression in housing.

First the Economic Facts:

The Savings and Loan Industry is the primary source of mortgage money.

The S & L Industry is in deep trouble.

The Congress is "de-regulating" the industry, i.e., making S & L's just like banks. Thus the S & L's will become banks or go bankrupt. No more mortgages.

The Wall Street Journal of March 20, 1981 states: Money Market Funds (Brokerage Houses) gain 3.7 Billion Dollars in one week.

At the end of 1977 the funds had: 3.9 Billion.

March 1981: 104.9 Billion.

3 Billion per week is going into Money Market Funds.

At least 2 Billion has been taken out of N.C.—to Euro Dollars, Foreign investments and U.S. megalopolises.

The Federal S & L Insurance Corp. lost more money in 1980 than in the previous 50 years for assisted mergers of sick S & L's. The Federal Home Loan Bank Board has a current list of 132 problem Associations. No report on how many are in N.C.

Time Magazine, March 23, 1981 quoting S & L League "Money market funds are undermining the mortgage lending and banking systems."

There is a bill in the N. C. Senate asking the Congress to deal with the problem.

Secretary Regan stated there is a problem.

Wall Street Journal—"Regulators fear that a loss of public confidence could spark a run that would drain institutions of their cash reserves and sink them."

Savings inflow in February 1981 was the worst February in history.

Newhouse News Service, Washington, D.C. March 29, 1981:

"The solvency of hundreds of S & L's hangs in the balance."

"The money market funds which operate virtually free of * * * regulations * * * have been attracting savers money * * * straight from the savings institutions."

The Ullman Bill or Mortgage Subsidy Bond Tax Act of 1980 is a bad bill in the first place and in the second place it is putting the N. C. Housing Finance Agency and other State Agencies out of business because:

(1) The Treasury has issued no regulations and thus there can be no bond issues. If no regs are forthcoming this month the N. C. Agency stands to lose a 2 Million Dollar State appropriation and a 100 Million Dollar Bond Issue. The members of the N. C. Legislature are all aware of this.

(2) The Act says there will be no mortgage assumptions. Other Federal legislation says there must be free assumption to qualify for FHA-VA insurance.

A dilemma.

Housing starts will be at about 1,000,000 this year. Down 800,00 from the good years.

Second, The Political Facts as we see them:

Some prominent U.S. Senators have been quoted to the effect that with de-regulation, interstate banking and other trends in the Congress there will only be 5 Banks in the U.S. in 1986.

What effect will it have on us and on you when there are no N.C. based banks?

There will be 42 million new families needing housing in the 1980's.

95 percent of the families of America are currently frozen out of the housing market.

In May 1980 we presented letters from industry members saying that they were going to vote for a change in November. Apparently they were serious.

When the N.C. industry has employment there are 160,000 people who work directly in building.

What do people do when they cannot obtain the necessities of life such as shelter? What have they done in other countries?

What will be the effect on you and on us as the N.C. Savings and Loans start to fail across the State?

Please ask the S & L people in your home areas if this is an overstatement of the gravity of the problem.

Our Proposed Solutions:

We sincerely implore your help.

Ultimately your work in our behalf is the only solution.

As you know there are 103 bills before the Congress now giving incentives to savers but as far as we know no real action has been taken.

We urge your support of Senate Bill 701—Senator Bentsen's bill—excluding all interest earned on savings deposits from taxation.

This bill would create sufficient federal revenues and net savings of about 12 billion to offset the revenue loss from the exemption.

It would create 600,000 additional housing units and 860,000 man years of work.

It would revive the S & L industry.

We need this Bill.

We also ask that you urge the Treasury Department to get the regulations out on the Ullman Bill by the end of this month; that you amend the Ullman Bill permitting assumptions and bring Federal law in the area into logical form; and finally we ask that you exempt the State Agencies—who were never offenders—from the Ullman Bill entirely.

It would give our leaders great pleasure to report to the 160,000 members of our industry that every current member of our N.C. Congressional Delegation was taking action to make affordable mortgage money available, to save the faltering S & L industry, to make homes available.

How long can our nation survive economically with its two largest industries, housing and automobiles, in very ill health, with its thrift industry in disarray with no incentive for savers or capital formation? A saver who earns 12% on his investment winds up after taxes and inflation with about 8% less money than he had at the beginning of the year.

In conclusion I quote President Reagan in his most recent public message to the Congress when he quoted a former President, Theodore Roosevelt, as follows:

"The American people are slow to wrath, but when their wrath is once kindled, it becomes like a consuming flame."●

HAROLD F. DEMMER IS NEW PRESIDENT OF THE AMERICAN OPTOMETRIC ASSOCIATION

HON. W. J. (BILLY) TAUZIN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. TAUZIN. Mr. Speaker, on June 27, 1981, Harold F. Demmer, O.D., of Houma, La., will be installed as president of the American Optometric Association. Dr. Demmer is exceptionally well qualified for this office. He has been an outstanding member in his field for 27 years and has done much to enhance his profession. Dr.

Demmer has held many offices in optometric associations, including president of the Gulf Zone Optometric Society and the Louisiana State Association of Optometrists. He has served in a long list of offices with the American Optometric Association and was vice president of that organization from 1979-80.

In addition to his professional activities, Dr. Demmer has devoted much of his time to community, civic, and church work. Some of the organizations he has given his time and talents to have been the Houma Lions Club, Chamber of Commerce, Southern Eye Bank, Terrebonne Parish and Bayou-River Area Health Planning Commissions, Boy and Girl Scouts, PTA, the American Legion, and the VFW. Dr. Demmer was instrumental in initiating and securing an eye/vision care program in the Louisiana State penitentiary system; initiating and revising the state optometric Association's accounting system; initiating an optometric grant-in-aid program; and writing a manual on standards for optometric utilization and review.

Dr. Demmer's professional excellence and community service have been recognized by several awards, among them the Bourg Lions Community Service Award, Louisiana Lions Eye Foundation Service Award, and being named Louisiana Doctor of Optometry every year from 1969 through 1978.

I join with the members of the American Optometric Association in congratulating Dr. Demmer on assuming the presidency of that fine organization. I know he will bring to the office the dedication and professional excellence for which he is so well known.●

THE CIGARETTE SAFETY ACT

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. MOAKLEY. Mr. Speaker, recently the Oregon State Senate passed legislation which enables the State fire marshal to prescribe standards to reduce the capacity of cigarettes to ignite smoldering upholstered furniture and mattress fires.

As sponsor of parallel Federal legislation (H.R. 1854), I would like to share with my colleagues materials relating to the Oregon legislation.

The text of materials follows:

[Oregon Legislative Assembly—1981 Regular Session]

SENATE BILL 738

Requires State Fire Marshal regulation of cigarettes and little cigars to reduce fire hazard. Prohibits sale of nonconforming product on and after January 1, 19—.

A BILL FOR AN ACT

Relating to fire protection.

Be It Enacted by the People of the State of Oregon:

Section 1. Sections 2 and 3 of this Act are added to and made a part of ORS chapter 476.

Section 2. As used in this 1981 Act:

(1) "Cigarette" means:

(a) Any roll of tobacco wrapped in paper or in any substance not containing tobacco; or

(b) Any roll of tobacco wrapped in any substance containing tobacco which, because of its appearance, the type of tobacco used in the filter, or its packaging and labeling, is likely to be offered to, or purchased by, consumers as a cigarette as described in paragraph (a) of this subsection.

(2) "Little cigar" means any roll of tobacco wrapped in leaf tobacco or any substance containing tobacco other than a cigarette, of which 1,000 units weigh no more than three pounds.

Section 3. The State Fire Marshal shall prescribe by rule standards for cigarettes and little cigars sold in this state that insure that such cigarettes and little cigars, if ignited, will stop burning within a time period specified by the standards if the cigarettes or little cigars are not smoked during that period. The State Fire Marshal may also prescribe other standards to insure that cigarettes and little cigars have a minimum capacity to ignite smoldering upholstered furniture and mattress fires.

Section 4. On and after July 1, 1985, cigarettes and little cigars that do not meet the standards prescribed by the State Fire Marshal under section 3 of this Act shall not be sold in this state.

OREGON FIRE EDUCATION ASSOCIATION,
Tualatin, Oreg.

I am Roger Neal, President of Oregon Fire Education Association. Our organization is comprised of individuals from all over Oregon, and many other states who are dedicated to the prevention of fires and burn injuries.

"According to figures developed by the United States Fire Administration's National Fire Data Center, cigarettes and the careless use of smoking materials is the number one national cause of both injuries and fire deaths in residential occupancies" said former administrator Gordon Vickery recently. There are more than 2,300 deaths each year in the United States caused by carelessly discarded cigarettes. Along with an additional 5,800 burn injuries, cigarettes cause an estimated $210 million in property damage annually. In Oregon alone, 40 percent of the residential fire deaths last year were a result of fires caused by cigarettes.

Studies done at the National Bureau of Standards and at the California State Bureau of Home Furnishings have shown two things. First, furniture will begin smoldering in five or more minutes after a cigarette is placed on the piece of furniture. Second, there are a few American made cigarettes that do not, under most conditions, start a smoldering fire and, thus, are fire safe. Sherman and More cigarettes tend to self-extinguish when placed on furniture and do not start a fire. And Carltons do not self-extinguish. As yet unexplained, the Carlton continues to burn but does not produce enough heat to cause a fire. In short, the tobacco companies have inadvertently produced fire safe cigarettes.

Why do cigarettes continue to burn long enough to cause furniture to catch on fire? Chemicals are added to the cigarette paper to promote burning. Once a cigarette is lit, it will burn automatically whether it is puffed on or not. This artificially induced long burning time of the cigarette (up to 45 minutes) is the primary reason that cigarettes cause fires.

At least 19 patents exist for self-extinguishing cigarettes. The technology readily exists to mass produce self-extinguishing cigarettes.

This fire safety effort has the support of the National Fire Protection Association, The International Association of Fire Fighters, The United States Fire Administration, The International Association of Fire Chiefs, The American Burn Association, and many other organizations. Last session, the Oregon Senate passed Senate Memorial 4, supporting the concept of self-extinguishing cigarettes. The Oregon Fire Standards and Accreditation Board has issued a proclamation endorsing self-extinguishing cigarettes. A copy of the proclamation is included for you.

The enclosed copy of a newspaper clipping shows a picture in the lower left hand corner of two small children. I was part of the team that rescued those two children from a burning house. We did C.P.R. on those two kids all the way to the hospital and in the emergency room. The little girl died a day or two later. Her 2½ year old brother remained in a coma and died a couple of years later. The fire was caused by a cigarette accidently dropped in a piece of furniture. If you have ever held a lifeless child in your arms that you have just rescued from a burning house, you will know why I support this legislation. If that had been a self-extinguishing cigarette that dropped on the furniture that night, those two children probably would be alive today.

Thank you.

Facts about cigarette fires and deaths in Oregon

[Dollars in thousands]

1977:	
Residential fire deaths	65
Deaths due to cigarettes (33 percent of residential deaths)	21
Number of cigarette fires	1,928
Estimated loss	$2,500
1978:	
Residential fire deaths	53
Deaths due to cigarettes (38 percent of residential deaths)	20
Number of cigarette fires	1,697
Estimated loss	$5,000
1979:	
Residential fire deaths	52
Deaths due to cigarettes (33 percent of residential deaths)	17
Number of cigarette fires	2,191
Estimated loss	$8,000
1980:	
Residential fire deaths	47
Deaths due to cigarettes (40 percent of residential deaths)	19
Number of cigarette fires	1,523
Estimated loss	$3,600

AN INTRIGUING BILL TO SAVE LIVES

EUGENE, OREG.—An interesting proposal that just could turn out to be the 1981 version of Oregon's bottle bill or antifluorocarbon spray bill was approved Thursday by the Senate Business and Consumer Affairs Committee.

Senate Bill 738 would require any cigarette sold in Oregon after July 1, 1985 to be self-extinguishing—that is, it would have to go out in a few minutes if not puffed.

It was introduced by Sen. George Wingard, R-Eugene, at the request of Joyce Owen of the Lane County Chapter of the Association for Non-smokers' Rights. But this is not an anti-smoking bill, merely a safe-smoking one.

Most cigarettes will burn for 20 to 45 minutes if left unattended. And within 10 to 20 minutes a dropped cigarette can ignite upholstery, a rug or bedding.

Last year in Oregon, smoldering cigarettes started fires that killed 28 people, more than half the state fire deaths for the year. Nationwide, 2,000 to 3,000 people die annually from cigarette-started fires, thousands more are terribly burned and millions of dollars worth of property is destroyed.

It's obviously a national problem. Yet nothing's been done about it nationally—other than attempts by the Consumer Product Safety Commission to force fabric and furniture manufacturers to spend millions to fireproof their products.

That's a little like requiring everybody to wear bulletproof vests because some people are careless with guns. The root of the problem is obviously the cigarette—and careless smokers.

And the problem is solvable. Cigarettes continue to burn when they're laid down because the manufacturers want them to. Said an R. J. Reynolds Tobacco Co. spokesman to the Wall Street Journal: "Have you ever tasted a cigarette that's been relit? It's pretty bad."

The suspicion is that chemicals are added to the tobacco and/or paper of most cigarettes to keep them burning—although the suspicion can't be confirmed because cigarette manufacturers aren't required to reveal their contents.

But material can be added to keep cigarettes from burning if left unattended, without affecting quality. The technology is there and the cost is said to be low.

The tobacco industry's clout in Washington is such, however, that no bill to require self-extinguishing cigarettes has ever gotten anywhere in Congress. The industry should have no such clout in the Oregon Legislature.

But, aren't there practical problems in trying to apply rules here that don't apply elsewhere to a nationally distributed product? Answer: Remember the bottle bill and anti-fluorocarbon spray container bills.

The same argument was made against both. Both were passed, nonetheless, and the manufacturers adapted.

They substituted returnable bottles for non-returnable bottles in Oregon and they substituted nonfluorocarbon sprays for the fluorocarbons. In both cases, action here triggered similar action elsewhere.

So if cigarette manufacturers find that they are about to lose their market in even one state, wanna bet they won't find a way to make their products self-extinguishing?

The 1985 effective date was put in to give the manufacturers time to find a way. Unfortunately, it would also give them two more legislative sessions to try to get the measure repealed. But if common sense prevails, this Legislature will pass the bill and future ones will resist repeal efforts.

The stakes in the bottle and spray bills were environmental. The stakes in the self-extinguishing cigarette bill are higher. It offers Oregon a chance to again be a national leader, this time in saving lives and property.●

INTERNATIONAL PAPER MILL IN CORINTH, N.Y., ACHIEVES LAUDABLE SAFETY RECORD

HON. GERALD B. H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. SOLOMON. Mr. Speaker, at 4 a.m. on Friday, May 29, the employees of the International Paper mill in Corinth, N.Y., posted a remarkable safety record which I think deserves notice by Members of Congress and all Americans. At that time, the mill posted its 2 millionth consecutive safe man-hour. That is 2 million man-hours, 20 months, and 600 days of operation without an on-the-job injury.

The Corinth mill is the oldest of International Paper's original mills, and great achievements, when it comes to safety, are nothing new to its 560 employees. Just last year, the mill won the IP Chairman's Safety Award as the safest of all of the company's 14 primary installations.

Mr. Speaker, I am so proud of the efforts of all the employees of IP in Corinth—workers and management. Together, they have created and maintained a safe, productive working environment which stands as a shining example for all to follow.●

NEW YORKERS GO ON RECORD AGAINST REAGAN EARLY RETIREMENT PENALTY PROPOSAL

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr, BIAGGI. Mr. Speaker, on May 12, President Reagan unveiled his social security reform proposals aimed at averting what he considers the imminent bankruptcy of the social security system. From the outset, I have stated my opposition to a number of his proposals including the deferral of the 1982 cost-of-living increase for 3 months.

Yet, without question, the most cruel of all the proposals would slash early retirement benefits for persons retiring at age 62 by 25 percent. This would take effect in January of 1982. In practical terms, this would mean that a person who has contributed to social security for 30 and 40 years is told just months shy of retirement that he will have to do with less. This is a breach of a covenant.

The New York Daily News published the results of a poll yesterday on the administration's social security proposals. Specifically the sample group of 400 were asked if they supported cutting early retirement benefits. An overwhelming 72 percent said no.

Another 77 percent of those surveyed expressed their sentiments that some changes in the system are necessary to keep it from going broke. I agree but feel it can be accomplished without cutting benefits to current recipients. I have cosponsored legislation to provide for interfund borrowing. I also support limited general revenue financing of social security. These comprise short- and long-term solutions which can keep the system alive and functioning without causing older people the hardship of cutbacks.

At this point in the RECORD, I insert the article from the Daily News entitled "Most Oppose Reagan Social Security Plan."

[From the New York Daily News, June 8, 1981]

MOST OPPOSE REAGAN SOCIAL SECURITY PLAN

(By Joan Nassivera)

Nearly three quarters of metropolitan-area residents are against the Reagan administration's proposal to lower Social Security benefits for those who elect to retire early, according to a Daily News Opinion Poll.

The administration has proposed that people who retire early—at age 62 rather than the more traditional age of 65—receive only 55 percent of retirement benefits rather than the 80 percent now provided early retirees.

Despite their widespread opposition to the proposal, nearly eight of 10 poll respondents agreed that some changes are necessary to rescue the financially strapped Social Security system from the threat of insolvency.

Another administration plan—to gradually remove the limit on how much money a retiree may earn without losing Social Security benefits—was favored by nearly six out 10 respondents. Under current law, which President Reagan wants to abolish, beneficiaries under the age of 72 have their Social Security benefits reduced by $1 for every $2 they earn over $5,500.

The poll, a telephone survey of 400 adults, was conducted May 18 and 19 in consultation with Richard F. Link & Associates.

The first question asked was: "Do you favor or oppose the proposal to reduce Social Security benefits for those who retire early at 62 instead of 65?" Respondents replied:

	Percent
Favor	21
Oppose	72
Don't know	7

The next question was: "Do you favor or oppose the proposal to gradually remove the limitation on the amount of money a retired worker may earn without losing Social Security benefits?":

	Percent
Favor	56
Oppose	33
Don't know	11

The final question was: "Do you think some changes in the Social Security law are necessary to keep the system from going broke?":

	Percent
Yes	77
No	14
Don't know	9

SEWER CHARGES SHOULD BE TAX DEDUCTIBLE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LaFALCE. Mr. Speaker, we have heard a lot this year about how our Tax Code needs reform and simplification. I could not agree more, and I have discovered a problem in it that warrants attention as we pursue that worthwhile goal.

Thanks to differing provisions of the Tax Code and of other Federal laws relating to water pollution, some Federal taxpayers are able to deduct payments made to help support the operation of local wastewater treatment programs on their Federal income taxes while other taxpayers living in different communities cannot make such deductions.

The reason for this situation is primarily semantic. In localities where the charges for sewer treatment are called taxes they are treated as local taxes under the Tax Code and are, therefore, deductible. Yet where these charges have a different name—"sewer fees" or "sewer rents," for example—they are not deductible, even though they are otherwise the same and are used for exactly the same purpose. Surely a Tax Code that seeks to treat all taxpayers alike should not result in situations like this.

Therefore, Mr. Speaker, I have introduced a bill to amend the Internal Revenue Code by providing that all charges relating to local wastewater systems, no matter what they are called, may be deducted on a taxpayer's Federal income tax return. This will eliminate an inequity in the Tax Code and provide some much-needed relief to families which are being asked to defray the higher and higher costs of insuring that the Nation's waterways are cleaned up and kept free from pollution.

I hope that the Ways and Means Committee will give this proposal serious consideration as it reviews the many recommended changes in our tax laws this year. At this point, Mr. Speaker, I would like to submit the text of my bill for inclusion in the RECORD. Thank you.

Text of bill follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Subsection (b) of section 164 of the Internal Revenue Code of 1954 (relating to definitions and special rules for deduction of taxes) is amended by adding at the end thereof the following new paragraph:

"(6) SEWER TAXES, RENTS, AND OTHER SIMILAR SEWER CHARGES.—The term 'real property taxes' shall include sewer taxes, rents, or similar sewer charges, regardless whether same are computed per capita, or on the basis of real property valuation or usage.".

SEC. 2. Paragraph (1) of subsection (c) of section 164 of the Internal Revenue Code of 1954 (relating to the denial of deduction in the case of certain taxes) is amended to read as follows:

"(1) Taxes assessed against local benefits (other than sewer taxes, rents, or other similar sewer charges) of a kind tending to increase the value of the property assessed; but this paragraph shall not prevent the deduction of so much of such taxes as is properly allocable to maintenance or interest charges.".

SEC. 3. The amendments made by this Act shall apply to taxable years beginning after the date of the enactment of this Act.●

NUCLEAR PROLIFERATION THREATENS THE MIDDLE EAST

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LANTOS. Mr. Speaker, 2½ months ago from this very spot I called attention to the growing menace of Iraq's irresponsible and reckless dictatorship moving inexorably toward the completion of its nuclear arsenal. The Iraqi regime is in the midst of a war of aggression against its Moslem neighbor; it has openly defied worldwide consensus concerning nuclear nonproliferation, and has repeatedly threatened the annihilation of Israel.

The Israeli Air Force with a preventative and limited strike has obstructed the completion of Iraq's weapon of mass destruction. Those who now criticize Israel's decision to protect its very existence would be the first to call for the obliteration of any nuclear facilities constructed in Cuba, so near our own borders.

Many were silent as Iraq threatened to defy the terms of the Nuclear Nonproliferation Treaty. Many were silent as several European powers supplied the Iraqi dictatorship with lethal nuclear technology. Will they continue to remain silent as even now Libya's Qadhafi installs his nuclear weapons arsenal? Will they act or will they choose to submit to nuclear blackmail and quietly hope that the Israelis will again take care of the problem?●

SOCIAL SECURITY FUNDING MUST BE STABILIZED

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. RUDD. Mr. Speaker, more than 36 million Americans depend on social security benefits, and the reports they hear daily on the news about the shaky financial condition of the system are reason for great alarm.

Because of this, I believe the President's proposal addressing the root causes of social security's recurrent funding problems is good news. It shows that this administration recognizes that the funding crisis is real, and will not disappear unless steps are taken to assure the long-term solvency of the program.

Without immediate action, the social security fund will run dry as early as fall of 1982. In the past, Congress has propped up the program with exorbitant tax increases and cosmetic changes which have only exacerbated the problems and postponed the imminent reckoning day. We must not evade this issue any longer. If we are to honor the commitment this Government has made to the millions of Americans participating in good faith in the social security program, we must act to stabilize its funding.

The administration's proposal recommends changes which will first, and foremost, guarantee the solvency of the system. These reforms would insure that those receiving retirement benefits will continue to receive them, including cost-of-living allowances. The proposals do not remove from the rolls or cut benefits for any current recipients of social security. Retirees who are dependent on monthly checks should not feel threatened by the administration's facing up to the funding crisis. Any suggestion that this effort will victimize retirees is simply a political scare tactic meant to divert attention from the bad mistakes which have been made in the past with regard to social security funding.

What the administration has proposed is a list of changes which will redirect social security toward its original purpose as a sound base around which Americans can plan for their retirement years. These changes will assure current recipients and future generations that the social security system is dependable.

With this goal in mind, we can afford to be flexible and review a number of proposals. But we must not back away from this task. In order to provide a stable system, social security must be self-sustaining without imposing an unreasonable burden on those who participate. To these ends, I concur with the administration that we should not consider funding the program out of general revenue or raising social security payroll taxes, as these would only aggravate the economic crisis we face.

The proposals which have been recommended by the administration encourage work until the traditional retirement age of 65. This does not mean any change in the full benefit retirement age. Those who elect early retirement would receive a lower percentage of benefits than the 80 percent they receive currently. However, this reduction would be scaled so that each month spent in the work force

past age 62 would increase the level of a person's benefits. At age 63 and 8 months a person would be eligible for 80 percent of full social security benefits, and at 64 and 6 months could retire with 90-percent benefits.

Another element of the President's proposal would relate disability insurance more closely to medical factors. Workers can now qualify for disability benefits on such factors as age, education, and work experience. This change would insure that disability benefits would go only to those who are determined medically disabled. Since social security was never meant to be an insurance program, I believe we should begin to channel these peripheral programs which have been added on to social security into the mainstream objective of the program. Many of my constituents have expressed the desire to return to the original concept of social security, and I believe that this recommendation seeks to do just that by eliminating some of the welfare aspects of the program.

The proposal to eliminate so-called double dippers would correct the current inequity which allows Federal retirees who enter social security-covered employment for only a few years to receive higher benefits than low-wage earners who contribute to the system for a lifetime. Addressing this situation is not an attempt to deprive anyone of an earned benefit, but simply to face the real inequities of the current benefits structure and answer them directly, rationally, and fairly.

If we act to secure the system now, we will all be the benefactors: Social security recipients can breathe a sigh of relief knowing that their checks can be counted on and are good at the bank; those paying into the program now can do so with the confidence that the plan will be around to serve them in years to come, and future generations will be relieved of the overbearing tax burden they will have to pick up if the system is not stabilized now.

If we do nothing, we will all suffer the consequences. The President's recommendations acknowledge the severity of the situation we face and propose realistic steps to rectify it. I urge my colleagues to meet this challenge head on, so that soon we may report the good news that the social security program is on firm ground to the American people.●

PLIGHT OF STANISLAV ZUBKO

HON. LAWRENCE J. DeNARDIS

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. DeNARDIS. Mr. Speaker, recent events in the city of Kiev are cause for concern by the many who cherish basic human rights and freedoms. A stepped-up campaign by Kiev authorities to suppress the activities of refuseniks and hamper the emigration in the Ukrainian capital is evidenced by a disturbing wave of arrests, incarcerations, prohibitions against emigration and movement, and separations from families.

Mr. Speaker, Soviet treatment of Jews has clearly deteriorated.

Today, I wish to direct the attention of my colleagues to the plight of Stanislav Zubko, a long-time Kiev refusenik. On the pretense of investigating a robbery next door, the Kiev KGB entered Zubko's apartment and allegedly confiscated hashish and a firearm. The authorities did take a Hebrew book. Charges lodged against Zubko carry a prison term of up to 12 years.

Zubko has long been active in the collective protests of Kiev refuseniks. Most notably, the protestors sent a telegram to the 26th International Communist Party Congress, while convened in Moscow, to express concern about the local situation. In connection with this act, Zubko was arrested and charged with "contemptuous behavior and use of improper language in a public place." He was originally sentenced to 15 days imprisonment, and within 2 weeks, 15 days were added.

Stanislav Zubko joins the ranks of other prominent Kiev refuseniks who have either been arrested under highly questionable circumstances or who have been handed prison sentences as a means to control the fledgling movement. But let there be no doubt, Mr. Speaker, these voices of freedom will not be silenced.

I am happy to participate along with my colleagues in the "Call to Conscience," congressional vigil for Soviet Jewry, and will continue to press for recognition of human rights and social justice wherever it may be found wanting.●

TRIBUTE TO RAY DeGREEFF

HON. WENDELL BAILEY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BAILEY of Missouri. Mr. Speaker, I rise today to pay tribute to one of Missouri's outstanding coaches who recently passed away at the age of 63.

Ray DeGreeff coached basketball at St. Francis Borgia High School, Washington, Mo., for 27 seasons, longer than any other man. During those 27 years, Borgia was one of the most consistent high school basketball teams in the State, averaging nearly 20 wins a season against 8.8 losses. Under Ray, Borgia took the State district championships six times.

Last season would have been Ray DeGreeff's 28th at St. Francis Borgia, but 1 year ago he was diagnosed as having cancer. After seven games this year, he resigned in favor of assistant Steve Reuther, who had been coaching in his absence. Borgia dedicated the season to DeGreeff.

Ray DeGreeff lived long enough to see his team finish the regular season, win the State district championship—for the seventh time in 28 years—and win its first game in the sectionals. Then, the morning of the last game of sectionals, Ray DeGreeff passed away. That night, Borgia won the sectionals.

Borgia won the game for Ray DeGreeff. The game went into six overtimes. By the beginning of the third of these, the entire Borgia starting squad with the exception of one man had fouled out. Borgia finished the game with five substitutes, some of whom had not seen as much playing time the rest of the season combined. But still, Borgia won. And Borgia ended up taking second in State.

Ray DeGreeff spent 10 years coaching elsewhere before coming to St. Francis Borgia. His career basketball coaching record was 703 wins and 349 defeats. At St. Francis Borgia, over the course of his 27 years, he at one time coached every sport at the school, both boys' and girls'. His impact on thousands of kids was immeasurable.

Ray DeGreeff's contributions to sports and youth were recognized with these awards: Outstanding Service Award from the American Legion; Khoury League Man of the Year Award; Jaycee Outstanding Service Award; Hall of Fame, Quincy College; Medal of Recognition, Culver-Stockton College; and Missouri Basketball Hall of Fame.

Ray DeGreeff will be missed.●

THE ABORTION ISSUE

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. WEISS. Mr. Speaker, the abortion issue continues to haunt us despite the very clear prochoice views expressed by a majority of Americans. The most recent survey data collected by the Washington Post/ABC news and released this week indicated that people from all over the country and from varying ideological and economic backgrounds oppose current attempts in the Congress to ban abortion and to make criminals of the women and doctors involved in this safe medical procedure.

Among those surveyed, 88 percent favored legal abortions when the woman's life is endangered; 82 percent in cases of rape and incest; 84 percent when the woman might suffer severe

health damage; 70 percent when there is a chance the baby would be born deformed; and 73 percent when the woman's mental health is endangered. When questioned, "Would you favor or oppose a law that would make abortions murder?", only 29 percent favored such a law and 67 percent opposed it.

I believe these figures show that most Americans recognize the difficult circumstances confronting women regarding an abortion and a respect for the right of the individual to make this personal decision. Banning abortion by any approach would necessarily make criminals of those seeking an abortion for any reason. Clearly, this is not the will of the vast majority of Americans, but it is the intent of the vocal crusaders for the so-called pro-life movement.

Members of the House and the Senate have heard again and again from those who support legislation which would define life as beginning at conception. Yet little has been said of the horrendous personal implications of this statutory maneuver and no satisfactory answers have been given to the serious legal and social dilemmas raised. Would such a bill precipitate a constitutional crisis by directly challenging the Supreme Court's role as final arbiter of the Constitution and jeopardize the Federal system of checks and balances? Would a human life statute threaten constitutional safeguards on religious freedom and rights to privacy? Further, would a congressional redefinition of the 14th amendment set a dangerous precedent for issues beyond the abortion controversy? How would such legislation affect State court jurisdiction on abortion cases as well as the innumerable existing laws concerning inheritance, torts, distribution of social services, and criminal activities? Would such an action also mandate a ban on many widely used forms of birth control?

During consideration of these difficult questions, I urge my colleagues to heed the opinions of those who rightfully guide us in our decisions and to place in perspective the expressions of a small and unrepresentative minority.

In conclusion, I would like to share a very eloquent letter I recently received from one of my constituents which illustrates the emotions that statistics alone cannot convey. This letter should remind us once more of the anguish and blow to human dignity Congress would inflict by outlawing abortion.

DEAR SIR/MADAM: Last week my friend was raped. A beautiful, sweet, loving human being brutally assaulted and raped by two men. Or are they animals? And will she ever be the same? Can she walk tall knowing that she has been violated more than any man could ever know?

And of course, what if she becomes pregnant? Our new lawmakers seem to have this all figured out. I'd like to see the President's lovely wife lie mutilated on a dirty street corner in Brooklyn, naked in the cold air; helpless, beaten, close to murdered. I don't think Mrs. Reagan would care for this sort of entertainment. How would her husband feel?

Right To Life: I defy any man to suffer this agony and then bring its product into the world as a new member of society. Would this baby be loved? Could he grow up to be President?

I appeal to you who read this—if you truly believe that this is a healthy way to live, that this woman should not want revenge, that such a child should be brought into the world; if you truly believe that if your wives or loved ones were raped and that you would still condone the possible legislation against birth control, abortion, and "suspicious" miscarriages—if you truly believe this, then condemn me as an American who cares more for life than the filth and degradation your laws and lack of action are helping to make it become.●

TRIBUTE TO CARDINAL WYSZYNSKI, PRIMATE OF POLAND

HON. THOMAS M. FOGLIETTA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, June 8, 1981

● Mr. FOGLIETTA. Mr. Speaker, I would like to express my deep regret and sorrow over Cardinal Wyszynski's recent death. Not only Roman Catholics, but indeed the entire world, have suffered a great loss.

Cardinal Wyszynski's career was one of service and dedication to both the Catholic Church and the Polish people. As Primate of Poland, Wyszynski led the Catholics in saving their church from obliteration by Communist forces. Wyszynski was severely persecuted when he was held under house arrest from 1953 to 1956. He was a man who exemplified the strength of the church in the face of Stalinist persecution in the 1950's and who became a symbol of his country's quest for freedom.

At the same time, in his role as statesman, Wyszynski symbolized the triumphs and tribulations of his people and embodied the quest for sovereignty of the Polish people. By restraining his vocal countrymen from excesses in their fight for independence, Wyszynski took a leading role in helping to save the Polish people. He was so admired and respected by his countrymen that the atheistic Government of Poland eventually had to turn to him to calm the enraged citizenry. Always appealing to moderation and speaking with the voice of reason, Wyszynski attempted a balanced approach, helping to mediate disputes over labor grievances and advising workers of the dangers of intervention that could result from a strike.

Wyszynski's death is particularly disheartening in light of the current troubles of the Polish people. Were he still alive, Cardinal Wyszynski could continue to help lead his nation through its difficulties. We hope that Wyszynski's death can remind the Polish people of the importance of resolving conflicts peacefully, for above all, Cardinal Wyszynski was a peacemaker. I reiterate the words of Pope John Paul II in saying, "It is a painful thing that the time has come that words have to be said in the past tense."●

IN MEMORY OF DR. ENGLISH JONES, FORMER CHANCELLOR OF PEMBROKE STATE UNIVERSITY

HON. CHARLES ROSE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. ROSE. Mr. Speaker, my district recently suffered the loss of an outstanding educator and a great man, Dr. English Jones, retired chancellor of Pembroke State University in Pembroke, N.C.

For 17 years, Dr. Jones guided this institution in its growth from a small college to part of the North Carolina university system. Along the way, he managed to keep tuition costs down and harmony among students of three races.

Dr. Jones gave unselfishly of his talents and time to carve out a fine university in southeastern North Carolina. Many people owe him a great debt of gratitude for being instrumental in creating a place of learning that they could afford to attend in an atmosphere conducive to its purpose.

The following is an editorial about Dr. Jones which appeared in the Robesonian in Lumberton, N.C. I would like to share it with you:

[From the Robesonian, May 20, 1981]

DISTINGUISHED CAREER

The career of Dr. English Jones has ended. The institution he headed for 17 years lives on, greater in size and influence and service because of the work of this remarkable man.

Dr. Jones was the first Indian to become president of Pembroke State College, and the first chancellor of the university. He was uniquely qualified to administer the affairs of a small institution requiring economy in operation, and to capitalize on opportunities for expansion.

With a steady hand to keep the institution on course, Dr. Jones guided it through troubled times. During the war in Vietnam, it was virtually free of disruption by protest demonstrations. Racial integration became an accomplished fact there while other institutions still were being prodded to achieve it. Amid social changes, Pembroke State maintained stability of purpose as an educational institution serving the needs of the people in its area.

The confidence of state legislators was won by effective use of funds allocated to the institution. Buildings were constructed

at a cost which showed how much could be done for how little an expenditure. Getting extraordinary results with modest investment by the state, Dr Jones was entrusted with increasing appropriations to carry out well-defined plans.

Along with other state-supported colleges, Pembroke State became a university. It remained affordable. Students throughout this region and beyond, could still get a higher education at minimum cost. Expanding educational opportunities were kept within reach.

With a background of experience as a student, a World War II veteran, an agricultural extension agent, a teacher, a dean and an administrative assistant, Dr. Jones brought to the presidency of Pembroke State a combination of talents and a record of personal achievement. He had the knack of getting things done, and making tough decisions when necessary. He recognized ability, and engaged capable people—faculty members, coaches, department heads and other personnel to develop academic and athletic programs and carry on the multiple activities of an expanding university.

Dr. Jones seized opportunities for the university as though time were short. For him it was. In retirement, resting from his labors, he had much to look back upon and little ahead but declining health. His work was done. He had run the course with all the vigor he could summon and had won a monumental prize—the realization of his dream for the university. It is a dream which developed along with the man and survives in the brick and mortar of the institution he helped to build, for continuing service to his people and all the people in this area where he lived.●

A HISTORICAL PERSPECTIVE: GREEK-TURKISH DISPUTE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BIAGGI. Mr. Speaker, I would like to bring to the attention of my colleagues a letter which was written by a professor of history at Yale University, Dr. Deno J. Geanakoplos, regarding the historical dimension of the relationship between Greece and Turkey. This letter was written in order to more fully explain the concerns of the Greek community on Cyprus, an isle which had been illegally invaded by Turkey in 1974 with United States arms.

Mine was one of the first voices in Congress which raised the illegal and immoral nature of the Turkish occupation of Cyprus, which was followed by an arms sale embargo imposed by Congress. While this embargo has been lifted, we remain deeply concerned over the fact that Turkey has yet to account for the nearly 2,000 Greek Cypriots missing since the 1974 invasion.

This letter provides a scholarly and critical explanation of the ongoing tragedy of Cyprus and I commend it to the attention of my colleagues.

YALE UNIVERSITY,
DEPARTMENT OF HISTORY,
New Haven, Conn., March 3, 1981.

TO THE EDITOR OF THE NEW YORK TIMES EDITORIAL PAGE:

The article of your correspondent, published on Feb. 24 (and flippantly entitled "To Turks, Feud With Greeks is Pesky, Not Perilous"), seems to reflect an irenic spirit on the part of certain Turkish diplomats toward Greece, which, if true, is certainly laudable. Nevertheless, the article gave an overly one-sided presentation which can only mislead American readers who know too little about the historical background to the relations of the two nations, aside from the fact that they seem to be irreconcilable enemies. Thus, your correspondent reported responsible Turks as proudly saying that "we can't forget that we ruled Greece for nearly 400 years." True enough, but to balance that statement it should have been pointed out that no Turks whatever (neither Seljuks nor the present-day Ottomans) had even entered Anatolia (modern Turkey) until as late as the last quarter of the 11th century, and that for at least 800 years prior to the fall of Byzantine Constantinople to the Turks in 1453, Asia Minor had constituted the heartland of the Byzantine Empire, a great state "Roman" in government but essentially Greek in language and culture, and Greek Orthodox in religion.

The article was, moreover, simplistic in seeming to single out as the most serious block to peaceful relations the contested issue over the continental shelf and corresponding rights over the Aegean Sea. Despite the Turkish view that the Cyprus question should be excluded from present Turco-Greek negotiations, many Greeks cannot forget (what your correspondent did not say) that there are still 200,000 Greek-Cypriot refugees as a result of the Turkish invasion and occupation in 1974 of 40 percent of Cyprus by 80,000 Turkish troops (most of which are still there). Only one-fifth of the island's population is Turkish, the other four-fifths being Greek. Despite Turkey's alleged peaceful intentions—to quote the article "there is no evidence in Turkey of the kind of obsession found in Greece over a 'threat' from Ankara"—and, admittedly, preoccupation with serious internal problems—which we all hope she can soon solve—the correspondent neglected to mention the precarious plight of the Greek Orthodox Patriarch and his now rapidly diminishing flock in Istanbul. In violation of the Treaty of Lausanne (1922), guaranteeing protection to the Greek Patriarch in Istanbul, and to which Turkey was a signatory, the (single) theological school of the patriarchate has been closed as such by the Turkish authorities and the patriarchate constantly subjected to severe pressures and harassment. This is a matter of deep concern not only to the people of Greece but, more particularly, to the Greeks of America whose church is under patriarchal jurisdiction. Unless effective attention is directed to alleviate this problem by the World Council of Churches, the Vatican, and especially the UN Commission on Human Rights—for this is basically a question of human rights—the days of the Greek Orthodox Patriarchate in Istanbul, the home for over a millennium and a half of one of the world's oldest churches, may soon be ended.

In my view the Greek and Turkish peoples have much more in common, strategically, politically, and even culturally, than appears on the surface. But no genuine headway can be made, at least toward a better understanding on the part of the American public of the apparent intractability of the two countries, unless all aspects—and at both sides—are fully exposed. It is the duty of the media to its readers, and especially of such a distinguished news organ as the New York Times, to provide as balanced a presentation as possible of the difficult Greco-Turkish dispute, which in no small measure concerns the interests of the United States as well as its allies.

DENO J. GEANAKOPLOS,
Professor of Byzantine and Renaissance history.●

INDIAN RIDGE CELEBRATION IN HOBART, IND.

HON. ADAM BENJAMIN, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BENJAMIN. Mr. Speaker, Indian Ridge Pioneer Days, a 2-day event commemorating the 150 men and women who claimed land in Hobart, Ind., in the 1830's and 1840's, will be held Saturday and Sunday at the Indian Ridge Country Club, south of that northwest Indiana city.

One hundred and fifty years ago, before par four holes and sand traps were ever envisioned, the Indian Ridge golf course was home to the Pottawatomie Indians.

The Pottawatomie village was situated on a rise of land—Indian Ridge above Deep River. The site was also a battleground where the Pottawatomie and their bitter rivals, the Sac Indians, struggled for control of the hunting and fishing rights of the then bountiful region.

Their tribal wars were apparently frequent and furious. Collectors and amateur archeologists have found baskets of arrowheads on the ground around the village.

In 1832, the Indians signed the Treaty of Tippecanoe, giving away the remainder of their claims in Indiana, with a few exceptions. Twelve Indians chose to live in Lake County but pioneers later persuaded them to sell their land.

In 1833, George Sykes, one of the region's first white settlers and whose descendants still live in northwest Indiana, began clearing a parcel of land in Hobart Township.

In 1852, President Millard Fillmore granted the Indian Ridge property to U.S. Army Private Orrin Rose as a bounty for service in the War of 1812.

Sykes' son purchased the land in 1883 and cleared the area for farming. The Hobart area had then become populated with farmers. Timber and bricks were also major area businesses.

Fifteen years later, John Dorman, a Chicago businessman, purchased the land for a summer retreat and moved there. Dorman had the present Indian Ridge golf course constructed.

In 1931, Dorman and other residents put together a list of 150 names representing the heads of families who claimed land in the area around 1830. Dorman sent out invitations to over 500 persons to gather at the Indian Ridge site for the dedication of a marker—a 5-foot granite boulder with an attached bronze plaque—commemorating the struggle and success of those early pioneers.

Eight hundred attended the ceremony on June 18, 1931. The Hobart Memorial Post of the American Legion, under the direction of Vice Commander Floyd Harrigan, provided the color guard and the Ladies Aid Society of the Hobart Methodist Church served a picnic lunch.

Celebrants, many of whom recalled when life in the Hobart area was a struggle against nature, were entertained by patriotic and historical speeches, and by music provided by Dr. William Revelli and his national champion Hobart High School Band. Featured guests were Angie Glazien, of Merrillville, who recalled riding into Lake County on the back of her parents' covered wagon, and "Bronco John" Sullivan, of Valparaiso, a former Indian scout.

A time capsule containing the list of 150 pioneer families was placed beneath the marker. A wreath of flowers was placed at the foot of the stone in memory of the pioneers who devoted their lives to the development of the Hobart area.

The granite marker will be moved and rededicated on Sunday. The contents of the time capsule will be shown and new items of historical interest will be added and buried.

Indiana Ridge Pioneer Days—1981—is chaired by A. F. "Pete" Harrigan, a Hobart realtor who owns the Indian Ridge Country Club.

Jarvis Roper, son of Owen J. Roper, Hobart mayor in 1931 and chairman of the first pioneer day ceremony, will serve as honorary chairman.

Dr. Revelli, now in his eighties and recently inducted into the National Hall of Fame of Distinguished Band Conductors, plans to return and participate in the Hobart July 4th Celebration.

The activities include displays of antique automobiles, Indian relics from the Hobart Historical Society, and artwork of 12 artists from the Hobart Arts League.

The Family YMCA Indian guides and maidens will serve Indian fry bread and sell Indian craft items. The Hobart Heritage Club will display Indian face painting. There will be a barn dance, barbecue, candlemaking, and other activities.

The Lake George Improvement Association and the Hobart Republican Organization will operate refreshment booths.

The Lake County Sheriff's Tactical Unit will provide a firing squad.

The Lake Station senior swingers led by director Lola Andrews and Carla Walter Voight will perform a square dance.

The beauty queen selected on Saturday will join City Judge Anthony Cefali in reading the names of the 150 pioneers. The Boy Scouts, led by former Boy Scout Don Robinson who helped raise the flag at the original Pioneer Day, will unveil the monument. Hobart Mayor Calvin Green will place a wreath at the marker.

I will join the pioneer activities and present a flag which has flown over the Capitol. We will be joined by many city and area dignitaries to make this pioneer celebration a day to remember.

Mr. Speaker, I ask my colleagues to join all of the citizens of Hobart, Ind., its surrounding area, and myself, in recognizing and honoring these Americans who represent the very history of Hobart. The rededicated monument is a reflection of the hard work and achievement of its citizens.

The Hobart Gazette of June 25, 1931, reported that the original pioneer day of 1931 was a fitting ceremony to hallow the ground on which the Indians fought, pioneers struggled, and the real American was born, loving his country under the stern rule of freedom-loving pioneer parents of the middle western country where civilization was just beginning to dawn.

On Sunday, when Rev. Robert Bickel, of the First United Methodist Church leads the assemblage in prayer, it will be another awakening to another dawn because the residents of Hobart today are just as American, just as freedom-loving and just as rugged as the old Pioneers. And when the time capsule is opened again, the Americans then present will appreciate and respect their country and civilization—In Memory of the old Pioneers and today's Pioneers.●

LOS ANGELES CITY COUNCIL ENDORSES MANDATORY SENTENCING

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. ANDERSON. Mr. Speaker, as you know, I have introduced legislation, H.R. 27, which imposes a mandatory, minimum 5-year prison sentence upon those convicted of committing a Federal felony involving the use of a firearm. Currently, H.R. 27, cosponsored by over 170 of our colleagues, is pending hearings in the Judiciary Subcommittee on Crime.

Earlier this year, the Los Angeles City Council adopted a motion, offered by council members Ernani Bernardi and Hal Bernson, which endorses H.R. 27 and is included in the city's 1980–81 Federal legislative program. This action by the Los Angeles City Council is a positive step and recognizes the need at the local level to begin to get tough with those criminals who seriously misuse firearms. I urge those who have not cosponsored H.R. 27 to do so, so an atmosphere can be created whereby criminals know that if they use a firearm in the commission of a Federal crime, they will not be granted parole, probation, or a suspended sentence—but, instead will go to jail.

The city council's motion to endorse H.R. 27 is as follows:

Whereas in recent months Los Angeles has been plagued by a sharp increase in violent crimes involving the use of handguns; and

Whereas the City of Los Angeles experienced 1,043 homicides during 1980, an increase of 26.3 percent over 1979; and

Whereas this rash of senseless killings has included, in significant number, deaths resulting from handguns used in robberies and burglaries; and

Whereas under the present legal structure, some felons are able to maneuver their way back to the streets before their victims are released from medical treatment; and

Whereas H.R. 27 (Glenn Anderson), introduced in the House of Representatives on January 5, 1981, would amend Chapter 44 of Title 18 of the United States Code to extend and strengthen the mandatory penalty feature of the prohibition against the use of firearms in Federal felonies and for other purposes; and

Whereas H.R. 27 provides that whoever uses a firearm to commit a felony or carries a firearm during the commission of any such felony, if an element of such felony is the use of violence or threat of imminent violence, shall, in addition to the punishment provided for the commission of the felony, be sentenced to a term of imprisonment for not less than five years, nor more than 10 years for a first offense; and

Whereas H.R. 27 further provides that for a second such offense, imprisonment would be for not less than 10 years or to life imprisonment; and

Whereas H.R. 27 states that notwithstanding any other provision of the law, the court shall not suspend the sentence, there shall be no eligibility for probation, and the term shall not run concurrently with the imprisonment imposed for the commission of such felony and further, any person convicted under this law shall not be eligible for parole during the first five years of imprisonment in the case of a first conviction and the first ten years in the case of a second or subsequent conviction.

I therefore move that the City's 1980–81 Federal Legislative Program include support of H.R. 27 which would extend and strengthen the mandatory penalty feature of the prohibition against the use of firearms in Federal felonies.●

U.S. POLICY TOWARD THE PERSIAN GULF—I

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues information provided by the Department of State on our strategy toward the Persian Gulf and Southwest Asian region.

The information sets forth a fairly explicit definition of what our objectives are in the Persian Gulf and what our capabilities are to meet those objectives. Of particular note are descriptions of the status of our Rapid Deployment Force efforts and of the nature and impact of a U.S. military presence in the region.

These State Department answers are replies to questions I submitted to Mr. Richard Burt, Director of Politico-Military Affairs, subsequent to his appearance before the House Foreign Affairs Committee, Subcommittee on International Security and Scientific Affairs, on March 23, 1981. Because of the length of this exchange, the second half of it will appear in a subsequent record.

The answers of the first part of the exchange follow:

1. In testimony before the Committee on Foreign Affairs on March 18, 1981, Secretary Haig indicated that changes in the status quo in the Middle East/Persian Gulf region would be "a matter of vital concern . . . that would have to be dealt with with the full range of the power and assets available to us." He appeared to be endorsing the concept of the Carter Doctrine and the Rapid Deployment Force.

Question. To what extent do you subscribe to the principles outlined in the Carter Doctrine?

Answer. To the extent that the Carter Doctrine recognizes that the vital interests of the West are at stake in the region, that one of the major threats to those interests is the strategic Soviet threat, and that we need to be able to protect those interests—by force if necessary—I agree with it.

Question. How does U.S. policy towards the Persian Gulf differ from that of the previous administration?

Answer. Although the development of our policy for the region is not yet complete, our approach differs from that of the previous Administration at least in the following ways:

It is more comprehensive. We recognize that our policy cannot be directed just toward the Persian Gulf, or even something called Southwest Asia. Our interests are affected and threatened by events in the entire region which stretches from Turkey to Somalia, from Egypt to Pakistan. We need an integrated strategy for dealing with the region's closely interrelated political and military problems, including the Arab/Israeli conflict. But we also recognize that none of the political problems in the area can be resolved unless we move to restore the regional balance of power and secure local countries against Soviet/radical coercion.

We recognize that we need to go beyond the doctrine developed in the final years of the Carter Administration. There is much more that can and must be done to provide an effective presence, enhance our ability to deploy and sustain forces in the region, and increase our cooperation with our friends. We are prepared to do that extra work.

We will be a better and more reliable partner. We recognize that the cooperation of our friends is essential and that we cannot simply impose our policy desires on them. We are consulting with them extensively, and are formulating our policy deliberately. Although some adjustments may be necessary to meet changing circumstances, we will avoid the frequent changes in direction which, under the previous administration, so dismayed our friends.

Question. What steps are being taken to implement U.S. policy towards the Persian Gulf?

Answer. We are not awaiting the completion of our policy development before taking certain steps which will be necessary regardless of the policy we choose. First, we have entered into extensive consultation with our friends inside and outside of the region. Secretary Haig's Mideast trip was part of this process, as have been his meetings here and abroad with Western leaders. We have also moved to insure that the security assistance for certain critical states is adequate. This has required an increase in the fiscal year 1982 Security Assistance budget. Further we have requested increases in the funding during fiscal year 1981/82 for numerous projects required to improve our capability to deploy U.S. forces to the region rapidly and sustain them once there.

Question. What is the status of Rapid Deployment Force (RDF)?

Answer. Since its activation one year ago, the Headquarters, Rapid Deployment Joint Task Force has made considerable progress. Planning for contingency operations in Southwest Asia is underway, as are parallel planning efforts by the Service components which comprise the RDJTF. Steps to improve the RDJTF command structure were recently announced by Secretary of Defense Weinberger. The first change directed in the RDJTF's organization will be the assignment of XVIII Airborne Corps.

Headquarters, RDJTF and its Service components have planned and conducted exercises both in the United States and in the Persian Gulf area. Lessons learned from these exercises are being incorporated into operational plans and standard operating procedures. Finally, support requirements such as the upgrading of Reserve units, prepositioning and facilities access needs are being identified and pursued.

Question. What steps have been taken by the Administration to speed up and/or improve the deployment of the RDF?

Answer. The Administration has recommended significant increases in the fiscal year 1981 and 1982 defense budgets. Added requests for the RDF are $329 million in fiscal year 1981 and $2.1 billion in fiscal year 1982. Together with funds already programmed, these added resources will make improvements possible in several areas, including mobility, pre-positioning, materiel and equipment, and support facilities.

"Stretching" of the C-141 airlifter fleet will be completed and the entire fleet will be made capable of in-flight refueling. The wings of all C-5 Galaxy aircraft will be replaced, giving those aircraft, which can carry the largest items of military equipment, greaty extended service lives. A number of fast and modern cargo ships will be procured. Facility improvements necessary to support our peactime presence will be undertaken at Diego Garcia and in Oman, Kenya, and Somalia. These facilities would also be available in times of crisis. Prepositioning of materiel and equipment aboard ships in the Indian Ocean in support of Marine forces will be expanded and modernized through the procurement of new ships. Approval of the increases to make these improvements possible will significantly enhance our capability to deploy and sustain our forces in Southwest Asia.

Question. What is our current capability to project power into the region?

Answer. Upon completion of certain predeployment enhancement activities, the United States could currently deploy to Southwest Asia, within 30 days of warning, a corps-sized force with supporting air and sea power.

Mobility and logistics considerations—which are prime determinants of our reaction capability—are dominated by the great distances to and within that region, harsh geographic and climatic conditions, the relative paucity of logistic infrastructure, and limited U.S. access to regional facilities.

Question. How long will it take for the United States to have the capability to deploy forces in the Persian Gulf region to meet the most-likely-to-occur contingencies there?

Answer. There is a range of possible threats to our vital interests in the Persian Gulf region against which we might need to deploy military forces. Prudent military planning requires the capability and flexibility to deploy, employ, and sustain a variety of forces to meet those threats. At present, the United States can deploy on a timely basis the necessary forces to meet many threat scenarios.

The United States already has sizable forces in the area in the form of Navy carrier battle groups and Marine air and ground elements. Other air elements can deploy to the area within hours and CONUS-based ground forces can begin their deployment soon after notification.

However, improvements in airlift, sealift, and pre-positioning capabilities are required to meet the larger threats to U.S. national security interests in the region. Achieving a full capability to respond directly and adequately in the most difficult situations depends on implementation of program recommendations made by this Administration, including many pertaining to the RDJFT and our ability to deploy forces to SWA made in the Congressionally-mandated Mobility Study.

Question. What is our capability today in terms of the number of divisions and amount of material that we can deploy within a week's time, a month's time, two months' time?

Answer. The amount of warning time is one of the crucial determinants of our ability to deploy forces in a contingency. With ample warning, we would be able to establish efficiently the logistical infrastructure necessary for optimum sea and air lift. With reduced warning time, we might have to begin actual force deployments before establishing this infrastructure. That would make our efforts less efficient.

Within two weeks after a decision to deploy, we could have about a division-size ground force and supporting land and sea-based air power available in the Gulf region. Within one month, we might have placed an

additional division, more or less, on the ground, with commensurate increases in tactical airpower. Within two months' time, we could add an additional division or more, with air and logistical support, to our forces in the Gulf region.

Question. What are our objectives with regard to increasing the number of forces that can be deployed and shortening the deployment time?

Answer. Our goal is to respond effectively to any outside threat to the security of the Gulf region. That includes the capability of thwarting any attempt to present us with a fait accompli.

Long-term goals (fiscal year 1983-1987) are to improve the speed with which we can deploy a multi-division force to Southwest Asia and to upgrade the capabilities and sustainability of that force. The specific force mix, deployment schedule and build-up rates must remain classified.

Question. What is your timetable for full implementation of the RDF?

Answer. The RDJTF is operational today. A number of initiatives to improve the capabilities are proceeding. These include mobility, force, and facility improvements. These initiatives will permit significant expansion of the RDJTF's capabilities in phases throughout the decade. By 1987, if programs proceed on schedule, we shall have roughly doubled our capability to deploy and sustain forces in Southwest Asia.

2. Practically all of the countries in the Persian Gulf region are dependent upon external actors for arms, training, manpower; and technical know-how. These factors, coupled with continued Western dependence on Persian Gulf oil and increased Soviet military activity in the area have led the United States to greater military power projection into the Persian Gulf. Various components of the U.S. power projection include the RDF, facilities access agreements and possibly a permanent U.S. military presence in the region.

Question. What does the Reagan Administration perceive the role of the Rapid Deployment Force (RDF) to be in meeting the threats—Soviet, regional, and indigenous—to U.S. interests in the Gulf and Horn of Africa?

Answer. The Reagan Administration is developing an integrated strategy for meeting the threats to our interests in the region. Although that process is not complete, it is likely that we will conclude that some kind of rapid deployment or reinforcement capability is necessary to meet the threat which the regional states alone cannot meet—that posed by the Soviets.

Question. To what extent do the access arrangements initiated by the Carter Administration meet the needs of the RDF?

Answer. The final size and composition of the RDJTF for various contingencies has not been determined, so we cannot characterize the access we now have as adequate or inadequate.

Question. What are the views of the countries in the region to even this limited expansion of the U.S. military presence?

Answer. The views of the countries of the region to a U.S. presence are generally well known—they want us near but over the horizon. We have their political imperatives well in mind as we develop our strategy. We must still convince them that given our track record of the last few years, they have more to gain than to lose by associating with us.

3. Both former Secretary of State Kissinger and Secretary of Defense Weinberger have gone on record in support of permanent military bases in the region.

Question. What countries in the region—other than Somalia, Oman, and Kenya—have indicated a willingness to provide the United States with facilities access?

Answer. As you have seen in the press, Presidents Sadat and Nimeiri have indicated a willingness to allow temporary use of facilities in Egypt and Sudan in certain situations. In neither case, though, are we discussing "permanent military bases."

Question. Has any country offered to provide the United States with permanent bases?

Answer. We are not surprised that no country in the region wants a permanent foreign base on its soil. This does not mean that we cannot work out satisfactory arrangements which will serve our mutual interests while meeting the requirements of both sides.

4. Secretary of Defense Weinberger has stated that the United States needs "enough of a presence to lead the Soviets to conclude that it would be an unsuccessful risk for them to try the sort of thing they are doing in Afghanistan."

Question. How much of a military presence in the region is enough to convince the Soviets that "interference would carry unacceptable risks?"

Answer. An effective U.S. security strategy for Southwest Asia requires the capability to deter Soviet threats to regional security and to respond effectively to Soviet attacks if deterrence fails. A strong military presence helps us achieve both of these objectives.

Our peacetime military deployments enhance deterrence by confronting the Soviets with the increased risk that U.S. forces would become involved in any Soviet attack, thereby adding to Soviet uncertainty about their ability to predict the outcome of an attack. U.S. involvement also raises the risk that a Soviet attack in Southwest Asia would trigger a wider conflict.

At the same time, having forces immediately available for conflict—and exercising their capability in peacetime—improves our ability to perform military missions during the initial stages of a Southwest Asian conflict.

Our naval and amphibious forces in the Indian Ocean, including two carrier battle groups, provide us with a significant continuous military presence. In addition, we have made and will continue to make temporary deployments, such as the AWACS presence in Saudi Arabia, and conduct various training exercises. Given the forces the Soviets can bring to bear in the region, we intend at least to maintain this level of peacetime presence for the foreseeable future.

5. *Question.* How do the Soviets view U.S. efforts to increase its presence in the Persian Gulf-Horn of Africa region?

Answer. Publicly, the Soviets have said that U.S. efforts to increase our presence in the Persian Gulf-Horn of Africa region have nothing to do with the Soviet Union. Instead, they maintain, the growing U.S. presence in the area is designed to cow the oil-producing states into submission and to extend U.S. "hegemonism" to the area. The Soviets deny that there is any linkage between Soviet moves in Afghanistan and the U.S. buildup.

Question. What are the prospects of Persian Gulf-Indian Ocean arms control initiatives?

Answer. In the present atmosphere, prospects for Persian Gulf-Indian Ocean arms control initiatives are dismal. On the superpower level, Soviet arms control initiatives apply only to naval forces. This would do a good job of limiting U.S. military presence in the region—since the preponderance of our forces are naval—while leaving the massive Soviet land presence, Afghanistan, and Soviet military involvement in and assistance to regional states completely out of the picture.

We believe that U.S. efforts to suggest arms control measures for the region would be inappropriate in the present political and security atmosphere. The Indian Ocean talks with the Soviets were suspended by the United States in 1978 because of Soviet bad faith—while engaged in negotiations with us, the Soviets simultaneously conducted an unprecedented naval buildup in connection with their military involvement in the Horn of Africa conflict. Subsequent events, particularly the Soviet invasion and occupation of Afghanistan, clearly demonstrate that for the foreseeable future the Soviets are not prepared to negotiate arms control measures for the Indian Ocean area in good faith.

Multilateral efforts at Indian Ocean arms control, such as those being undertaken in the U.N. by the ad hoc committee on the Indian Ocean, stand even less chance of succeeding. In multilateral fora, superpower differences are piled on top of regional disagreements about what should be limited and by whom. Some regional States want to exclude the superpowers; others want to ensure that their stronger regional neighbors are never in a position to dominate them. Meanwhile, the superpowers themselves continue to disagree on bilateral arms control concepts, as well as on what arms control would mean for regional and extra regional powers. In the interest of maintaining good relations with regional sponsors of the U.N. effort, the United States has continued to work with committee members in an attempt to define a set of principles for the Indian Ocean region on which all can agree. However, in light of the record of the past few years, even this goal may be too lofty. We will continue, nevertheless, to give our best effort to the committee's work.●

MRS. MARY ROSENSTEIN

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. GRISHAM. Mr. Speaker, I would like to bring to the attention of the House the accomplishments of Mrs. Mary Rosenstein on the occasion of her retirement from the Family Service Association of the Rio Hondo area in my home State of California.

Mary Rosenstein is an outstanding example of all that one American can accomplish when she sets her mind to helping her community. In the vital area of mental health, Mary's contributions will long be remembered by those who benefited from her services and those who had the pleasure of working with her.

Mary was part of the original steering committee responsible for the organization of the Rio Hondo Family

Service Association, and has served with that agency since 1954. She began as a part-time caseworker, served for a time as acting executive director, and has been a full-time staff counselor for the past 15 years.

Outside of her work, Mary dedicated herself to community and civic activities, serving as president of her local PTA, and with the United Nations Association, the League of Women Voters mental health study committee and the regional mental health liaison committee. In addition to her many activities she found time to play the cello in the Rio Hondo Symphony Orchestra and raise a fine family.

In recognition of her work and activities, Mary was a recipient of the Las Distinguidas Award of the AAUW in 1978. Her career has truly been an outstanding example of dedication to work, family, community, and self-fulfillment. She stands as an example to us all.●

FRIENDS OF FREE CHINA

HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. DANIEL B. CRANE. Mr. Speaker, a tragedy involving millions of innocent people is taking place on a daily basis. Ideas, beliefs, and valuable thoughts are being hidden behind the cloak of communism. This is especially true in the People's Republic of China, better known as Red China. There, over 900 million people have had their inalienable right to free speech silenced by an unyielding Red curtain.

Communist China not only poses a major threat to freedom in Asia and the United States, but also to world security. There is hope, however, that the world may someday be relieved of the burden of international communism. Friends of Free China (FOFC), with the able assistance of Dr. Ku Cheng-kang, the honorary chairman of the World Anti-Communist League, is an organization dedicated to the promotion of world freedom and the defeat of communism.

Dr. Ku Cheng-kang, in an excellent speech to the Friends of Free China in Phoenix, Ariz., on April 28, 1981, pointed out that although the United States has given Red China much help of late, it is of utmost importance to remember that they still regard the United States as their major enemy. One should always be aware that Red China's interest is, at the core, in direct conflict with that of the United States, and the entire free world.

Because our own prosperity, well-being, and safety are always uncertain as long as we face the daily threat of the terror of communism, we must do whatever we can to aid and assist those who are willing to stand up for freedom. Since the future security of the world rests with free societies, and Dr. Ku Cheng-kang has made some excellent points as what needs to be done to preserve world freedom, I highly recommend his perceptive speech to you:

UNITED STATES-REPUBLIC OF CHINA RELATIONS AND CHINA'S FUTURE

Mr. Chopiwskyj, Ladies and Gentlemen, my last visit to this beautiful Arizona city was in 1969. Back here again now, I have been very much impressed by the development and prosperity achieved by Phoenix. Even more overwhelming are the deep concern and sincere friendship shown by you for the Republic of China, this time as well as the last. You have indeed touched me to the heart. I am truly happy this evening being with you, new friends and old friends. My hearty appreciation goes to each of you for your thoughtfulness and hospitality.

This is a gathering of Friends of Free China (FOFC) and you know that I am from the Republic of China. Because you all are very much concerned about Chinese issues, I would like to make an honest appraisal of the pertinent present situation, the trend, and the influence thereof on the United States and the world.

I. ISSUE OF CHINA TODAY

China's present issue is the unprecedented catastrophe in human history resulting from the Chinese Communist insurrection and occupation of the Chinese mainland. In a void of freedom are 900 million people. Properties have been taken away. More than 60 million innocent lives have been lost.

Basically the issue is one of confrontation and struggle between two diametrically different sets of ideologies, social systems and ways of life, one representing freedom and democracy and the other characterized by slavery and autocracy.

In the core of the issue is the Red Chinese persistence in their "four fundamental principles"—socialist road, dictatorship of the proletariat, Communist Party leadership, and Marxism-Leninism-Mao Tse-tung thought—even as they face the revolutionary anti-Communist surge of Chinese at home and abroad who insist that China's reunification must be in freedom with democracy.

Also involved are contradictory views about what Peiping (or "Peking") will or will not do about Taiwan. The regime has repeatedly stated that it will "liberate Taiwan," by force if necessary. The goal is to put an end to the Republic of China that hundreds of million Chinese regard as the source of hope as they fight against Communism and for freedom. On the other hand, many international sources have been misled by Peiping's peace talk united front maneuvers and entertain the mistaken idea that peaceful settlement is possible through negotiation. These sources are thus lending a helping hand to Peiping's ambitious attempt to keep the 900 million Chinese long in chains.

The issue thus revolves around the Red Chinese drive for aggression and expansion against the free world. With a quarter of the world's manpower resources under it, the regime wants to grow into another Soviet-like Red power.

The China issue being such, peaceful settlement through negotiation is quite out of the question. The Chinese Reds speak about peace talks, but their goal is to destroy the Republic of China, bring Taiwan, Penghu, Kinmen and Matsu under their control, and turn the Chinese in the presently free area into objects of enslavement and oppression just like the masses of Chinese mainland people. Peiping regards peace conference as a form of war to weaken the anti-Communist determination of free nations and destroy the free world unity.

II. GLOBAL INFLUENCE OF CHINA ISSUE

How the China issue develops has important bearings on the entire world.

If the 900 million people remain under Peiping's control as tools of "world revolution," serious threats to Asian-Pacific security and world peace will continue.

If, on the other hand, those people are given freedom, they will be a tremendous plus to the free world, because they can then start contributing to the region's security and to global peace.

Peiping has been and still is militant and bellicose. This is clear from the regime's race with Moscow for hegemony. Threatened by Peiping's international united front operation are not just Asia, African and Latin American free nations. All other free nations similarly face crises of war.

A China united in freedom and democracy will certainly play a positive role in checking Red advances against the free world.

The roaring campaign of 900 million Chinese mainland people for freedom and democracy will stimulate the anti-Red endeavor of other captive peoples and bring down the Iron Curtain everywhere.

III. DIRECTION OF CHINA ISSUE

The course of China issue hereafter will be characterized by widespread campaigns of Chinese mainland people for freedom of thinking, political democracy and life of well being. This will be an anti-Communist revolution to topple tyranny from under it and demolish the Iron Curtain from within.

The development as a matter of course will see stepped-up free Chinese effort everywhere to bring freedom to their captive compatriots. The desire of our people to have China's reunification in freedom and democracy will grow into an irresistible bulwark of national consciousness for anti-Communism.

China's reunification is inevitable but cannot be in manners contrary to majority Chinese wishes. The process has to be and will be on the foundation of freedom, democracy, peace and prosperity.

For a true solution of the China issue, totalitarian Red tyranny must be removed from the Chinese mainland and all of China built anew under a government of the people, by the people and for the people. This is what the Chinese in general want. This also meets the long-range interest of all democratic nations and the free world.

IV. CHINA'S FUTURE AND U.S.-ROC TIES

The China issue, no matter how you view it, has inseparably to do with the course of U.S.-ROC relations.

Because of ideological, social and life pattern differences, a China of totalitarian Communism will, as Peiping has all along done, regard the United States as the stronghold of capitalism that must be buried. The United States has over the years made a special effort to win Peiping over as a helping hand against the Soviets, but the Chinese Reds still regard America as their major enemy.

From geostrategic viewpoints, a China free and democratic will not only assure security in the Western Pacific but also work closely with the United States to safeguard human freedom and world peace.

From the standpoint of Sino-American common security, U.S. sale of sophisticated weapons to the Republic of China will enhance the ROC's defense capabilities and promote the two nations' common security. Sale of weapons to the Chinese Reds will add fuel to their militant flames. This should not be done if the security of the Taiwan Straits is to be assured and peace in the Western Pacific promoted.

In the free domocratic camp's grand strategy against the Red bloc, any attempt to ally with the Chinese Reds is fundamentally wrong, because the resulting blurring of the line between enemy and friend can only damage the free world formation.

Take a long-range view of China's future. China will become unified as all the upright Chinese strive on for freedom and democracy. Public disposition, not military might, is the factor of final China issue settlement. The United States, known for her stand for human freedom and respect for political democracy, should fully support the Chinese endeavor for free democratic reunification. I therefore sincerely hope that the United States will further strengthen her ties with the Republic of China and move toward normalization, which is the correct path to China issue solution and also the correct way to promote Sino-American relations in line with the long-range interest of our two nations.

Ladies and Gentlemen: People throughout the world respect the United States mainly because of America's stand for freedom and human dignity, not because of the American wealth and strength. America has successfully accomplished man's first space shuttle run. Mankind has been elevated to a new high realm of science and technology. Very regrettable, however, is that people still are being enslaved and trampled on by Red tyrants in wide areas of earth. We must unite all those behind and outside the Iron Curtain who stand for freedom. We must eliminate Red forces and build a lasting brilliant era of freedom, democracy, peace and prosperity for all mankind.

Let our endeavor for human freedom be crowned with a sweeping victory.●

NEW AMERICAN CITIZENS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LONG of Maryland. Mr. Speaker, it is with particular pleasure that I congratulate 18 residents of Maryland's Second Congressional District who have chosen to become American citizens, accepting all of the responsibilities that freedom and citizenship entail. I hope that my colleagues will join me in welcoming these new Americans and extending to them our wishes for a happy and prosperous life in the land we love.

They are Andrei Codrescu, Francisco de Vera, Wai Cheung, Kirpal Singh, Hwa Song, Irena Galka, Boris Sluzki, Shih Chen, Mary Isaac, Mr. and Mrs. Richard Lawrence in behalf of Rachael E. Lawrence, Jolanta Peretz, Cristina Laszlo, Chun Chu, Rekha Prasad, Marlene A. Gorriceta, Annamma Tharakan, Arun Virginkar, Pedro Lizardo.●

WOMEN BIGGEST LOSERS IN SOCIAL SECURITY CHANGES

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BROWN of California. Mr. Speaker, President Reagan has helped recently to intensify the debate over social security reform by recommending a number of changes in the program. No doubt remains that something must be done and soon to remedy a program which is in serious financial trouble. But before concurring with the administration's rhetoric about social security, I implore my colleagues to carefully scrutinize the effect of these changes.

As with the budget cuts, President Reagan is making recommendations which would adversely affect those who can least afford it. A task force, set up by the House Select Committee on Aging, recently held hearings on these proposed changes and determined that elderly women would be disproportionately vulnerable to the cutbacks suggested.

Still, many people today argue that we simply cannot afford to continue these programs to the elderly; that some people, unfortunately, will have to be hurt for the betterment of all. Yet elderly women are already currently the fastest growing poverty group in America. Are not they suffering enough? Shall we further undercut their economic well-being? Can we, one of the richest nations in the world, afford to ignore the economic needs of our elderly women? Of America's mothers and grandmothers?

I commend the following article to my colleagues for review:

[From the AFL-CIO News, June 6, 1981]

WOMEN BIGGEST LOSERS IN SOCIAL SECURITY SLASH

America's women would be the biggest losers if Congress agreed to the Reagan Administration's social security proposals, a House task force discovered.

The task force, set up by the House Select Committee on Aging, found that women are already clustered at the bottom of the social security benefit structure and are disproportionately vulnerable to the cutbacks the Administration has sought.

Rep. Mary Rose Oakar (D-Ohio), who heads the task force and presided at its hearings, said the Administration plan would have a catastrophic impact on older women especially.

Witnesses at the hearings included former Social Security Commissioner Robert M. Ball, who testified for the Save Our Security coalition that is fighting the Reagan cuts.

He was on a panel with two other former heads of the Social Security Administration, William Driver and Stanford G. Ross.

Ball cited as an example the effect of the Administration's proposal to eliminate the minimum social security benefit—the floor under benefits that now goes to some 3 million persons. Three-fourths of them are women, Ball pointed out.

He challenged the Administration's claim that the "truly needy" wouldn't be hurt because they could apply for SSI payments—the Supplemental Security Income available to the aged poor.

But SSI is available only to persons over 65, Ball said, and many of the women affected have had to retire at age 62 "because they had no alternative." Further, SSI is available only to those with less than $1,500 in personal assets, and many older people "just do not want to apply for welfare with its test of income and assets."

Cuts in disability benefits and tougher qualification standards would apply to men and women alike. But Ball said the stricter test of recent employment proposed by the Administration would disqualify proportionately more women than men because women workers are more likely to have had gaps in their working years, "particularly because of child rearing."

Ball reminded the panel that disability protection was substantially cut back last year, that 70 percent of all applications for disability insurance are disallowed, and that "this part of the social security system does not have a financing problem."

Another task force witness, President Eleanor C. Smeal of the National Organization for Women, testified that curtailment of age 62 early retirement benefits would be especially harmful to women.

Because of the earnings gap between men and women, she noted, women are already at the lower benefit levels. The Administration plan would drop the age 62 retirement benefit from the present level of 80 percent of age 65 payments to 55 percent.

But "a higher proportion of women than men retire before age 65, primarily due to ill health and loss of jobs," Smeal testified. Minority women, she said, will be especially penalized.

Other witnesses cited the high portion of elderly, single women dependent on social security payments as their chief income.

Oakar noted that Congress has already taken a step to reducing social security benefits by setting budget ceilings that almost compel adoption of some of the Administration cutbacks.

"Those of us in Congress who have been working to make social security more equitable and adequate for women were shocked, dismayed and deeply disturbed by the Administration's proposals," she said. "They will undermine the very concept of social security as a social insurance program for our nation's workers and their families."

An administration witness, Deputy Social Security Commissioner Robert J. Myers, argued that the proposed cuts "apply equally to men and women."

Myers acknowledged the point that women might come out worse than men under the Administration proposal. But this reflects "discrimination in the work-place and cultural differences between the lifestyles of men and women," he insisted, and these "are not problems which social security can solve."●

UKRAINIAN INDEPENDENCE DAY

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. GREEN. Mr. Speaker, I would like to introduce a resolution designating June 30, 1981, as Ukrainian Independence Day. This date is the 40th anniversary of the renewal of Ukrainian independence by proclaimation in Lviv, the capital of western Ukraine.

On June 30, 1981, the Ukrainians proclaimed their resistance to the Soviet aggressors who had previously annexed the Ukraine, and denounced the Nazi Germans who had also attempted to conquer the region. Although independence was shortlived, this renewal of independence has become the symbol of the continuous struggle of the Ukrainian people for freedom. It is significant to Americans of Ukrainian origins, and also to all other Americans who treasure their own freedom and respect the desire for freedom among others.

I believe this is a very appropriate holiday for the U.S. Congress to designate, and I am pleased to have the opportunity to introduce this resolution. I hope my colleagues will join me in reaffirming our commitment to freedom by supporting Ukrainian Independence Day.

H.J. RES. 280

To provide for the designation of the 40th anniversary of the renewal of Ukrainian independence, June 30, 1981, as Ukrainian Independence Day

Whereas the American people's deep commitment to freedom and independence has instilled within us a great respect for the aspirations for freedom of other people and nations throughout the world;

Whereas this year marks the 40th anniversary of the renewal of Ukrainian independence which occurred on June 30, 1941, and which, although short-lived, has become the symbol of the Ukrainian people's ongoing struggle for freedom;

Whereas the Ukrainian people look to the people of the United States, whose country is the world's citadel of freedom, for assistance and inspiration in their struggle for the recovery of their freedom and independence; and

Whereas it is appropriate that we, the people of the United States, demonstrate to the Ukrainian people that we, who benefit daily from our freedom, share their aspirations for freedom and independence, and that, being free, we are not indifferent to the cause of freedom elsewhere: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the 40th anniversary of the renewal of Ukrainian independence, June 30, 1981, is designated as "Ukrainian Independence Day" and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate ceremonies and activities.●

TOWARD A RATIONAL PRESIDENTIAL NOMINATION SYSTEM

HON. JULIAN C. DIXON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. DIXON. Mr. Speaker, I recently had the privilege of addressing a symposium sponsored by the 43d and 44th Assembly District Democratic Councils in Los Angeles on the subject "Nominating a Presidential Candidate—Is There a Better Way?" In addition to myself, participants included a number of local legislators, party officials, journalists, and political scholars.

The panel produced an extensive white paper outlining recommended changes in the primary and delegate selection system designed to bring a sense of order and rationality to what has become a cumbersome, exhausting process which has utterly failed to serve the interests of the American people. The recommendations adopted by the panel seek to shorten the primary system, make the nominating convention a truly deliberative body, and give elected officials and party activists an appropriate role in the selection of the party nominees. I found these discussions and recommendations thoughtful and intriguing, and commend them to my colleagues:

NOMINATING A PRESIDENTIAL CANDIDATE—A BETTER WAY

On Saturday, March 7, 1981, one hundred fifty people gathered in Los Angeles at a symposium entitled "Nominating a Presidential Candidate—is there a better way?" Having just survived a disastrous election, the people at this symposium were not there to despair, but to look for the lessons that could be learned. Their purpose was to develop modifications to the Presidential nominating process.

The first half of the day was devoted to a panel discussion by representatives of the various segments of the process: Party leaders, reporters, elected officials and academic observers. The panelists were: State Senator Alan Sieroty, moderator, State Senator Diane Watson, Southern California Democratic Chair Peter Kelly, Senate Democratic Leadership Circle Exec. Dir. Conway Collis, Former Democratic National Committeeman Paul Ziffren, LA Times Correspondent Bill Boyarsky, KNXT Commentator Bill Stout, Professor Herbert Alexander, and Professor Leonard Freedman.

Other speakers included Congressman Julian Dixon, State Democratic Party Chair Nancy Pelosi, and Milton G. Gordon, the Chairman of the Day.

The afternoon was given over to group discussions among all participants at the symposium. This White Paper is primarily a synthesis of those discussions. We feel that the collective wisdom of these activists and Party veterans represents a view that the Party should consider.

Much that was said that day is not in this White Paper because of the limitations of space. For instance, we all recognized that issues are as significant as the process in electing a good President. Many well conceived alternatives were brought forth but are not included in this paper. Most of these ideas will have to be confronted at another time, either in other symposia, conventions, or debates. We do not claim these to be the ultimate answers; they are simply the beginning.

PREMISES

The current process for nominating presidential candidates is unacceptable. The reforms enacted by the Democratic Party over the past twelve years have greatly reduced the ability of the Party organization to play an active role in the selection of its standardbearer. By opening the process to broader participation, the democratic reforms have, ironically, made the process more vulnerable to control by narrowly focused groups. By bringing the process "to the people", the Democratic Party has lost its leadership, collective vision, and ties to its past.

The pendulum of power has swung from the National Convention to the marathon season of primaries, caucuses and straw polls. Today the Convention has no vital role to play. It is simply a remnant of tradition—a rubber stamp on the choice of the primaries. We believe this must be changed. A new process must be enacted in which the primary election campaigns, although important, will be secondary to the actual Convention. The Convention must be made a deliberative body again, not just a ceremonial media event.

What follows are our proposals for adjustments to the process of nominating presidential candidates. They are proposals that will tend to restore a proper balance between the voices of elected officials and Party leaders and the wishes of the Party's electorate. In presenting our proposals we have included a summary of the current process and the various alternatives for reform. This is followed by what we believe to be the most effective solutions.

BINDING OF DELEGATES

At the 1980 Democratic National Convention all but a few of the 3,000 delegates were, by the rules of the Party, bound to cast their vote for a specific candidate on the first ballot. Regardless of the changing scene at home and in the world, the Convention could do nothing to alter the selections of the primary election process—selections which may have been made six or seven months prior to the Convention.

The current nomination process, by showing great respect to the sentiments of the primary election voter, tends to ignore the views of Party leaders and workers, elected officials and the effects of unexpected world events. However, the obvious alternative—freeing all Convention delegates to vote their personal preference—would be a slap in the face to the democratic reforms of the past twelve years. Such a change would reduce the primaries to "beauty contests".

We propose that one-third of the Convention delegates be bound to vote for the candidate that they represent on the first ballot and that the remaining delegates be uncommitted. This leaves a majority of the delegates to make their decisions based upon the events of the primary campaigns, current changes in the political climate and their own personal preferences.

We believe that this proposal will restore a deliberative nature to the Convention. It will be impossible for a candidate to lock up a Convention before it begins. Moreover, the candidate who receives the nomination

of such a Convention will be more likely to have the qualities of electability: broad support, political testing and Party legitimacy.

SELECTION OF DELEGATES

Today, all but a few delegates are selected through the caucus or primary election method. The remaining delegates are added through conventions at the state level. Nearly all the delegates are pledged to a specific candidate at least on the first ballot.

The state delegations selected by these methods are required to be split equally between men and women. They must also reflect the Party's affirmative action program, with alternates and add-on delegates used to achieve the necessary ethnic balance.

The current process has affected the level of discussion at the Convention. By aiding the political novice and hampering the Party veteran, the present system has rendered the Convention more vulnerable to manipulation. Many of the delegates are dazzled by the celebrity status of the candidates and their entourages. Changes are needed to allow for more participation by the experienced and influential members of Party organization.

We believe that the solution comes from a varied approach. Delegates should be selected in three categories. The first third of a state's delegates would be selected at the local level through the caucus or primary method. This category would be comprised of grassroots activists and newcomers. These delegates would be committed to a specific candidate. Caucus voters would not be required to adhere to ethnic quotas, although the values and ideals of the Party's affirmative action programs should be strongly encouraged throughout the delegate selection process.

A second third of each state's delegation would be appointed or elected by the state's Democratic Central Committee. This category could include Party activists, fund raisers and officials.

The final category would be made up of elected Democratic officeholders. Beginning with the Governor, the highest ranking elected officeholders would serve as Convention delegates until that number reaches one third of the entire delegation. The specifics for selecting this third shall be determined by the state Central Committee.

Under this proposal, the delegates selected by the Central Committees and the elected officials would come to the Convention unbound. The dynamics of the Convention would center around the gravitation of these delegates toward the major candidates represented by the popularly elected delegates. However, if no candidate makes a significant showing during the primary elections, the majority of the delegates are free to rally around a "darkhorse".

Under our proposal the state delegations will tend to achieve effective representation of all elements within the Party. The grassroots caucus elections provide equal opportunity to all interested Democrats. The state Central Committees will be able to balance their portion of the delegates, simply through the nature of the political process. The diverse elements of the Central Committees will demand and receive consideration in the makeup of the delegation.

TIMING OF PRIMARIES

The current process for nominating presidential candidates is too long. The primary season lasts more than six months—from the Iowa caucuses to Big Tuesday. The campaign is an exhausting ordeal for the candidates, the media and the voters. We propose that all the primaries and caucuses be held during April, May and June. This plan would ameliorate the "marathon" quality of the presidential campaign as it exists today, enabling the voters to focus on a distinct campaign period. We recognize that candidates may begin to run long before April, but this will shorten the most costly and exhausting phase.

GROUPING OF PRIMARIES

Today the state legislatures determine the dates for each caucus or primary. In 1980, nearly forty states held primaries or caucuses and their scheduling had more to do with tradition and self-interest than with order and convenience. No attention is paid to the rigors of campaigning cross-country, not to mention costs.

Congressman Bennett (D-Fla.) has introduced legislation that would group all the primaries according to regions. The states of each region would hold their primaries on a single date. We believe that this proposal would introduce sectionalism into the process. Candidates would be more likely to identify with specific regions and their self-interests, thus making it more difficult to nominate a "national" candidate.

Congressman Smith (D-Iowa) has introduced legislation that would establish one National Primary. We believe that this plan would create, in effect, another general election, with its preoccupation with television, exorbitant costs, and lack of meaningful discussion of the issues.

We propose that the Democratic National Committee establish four primary or caucus dates during April, May, and June. Any or all states would be free to hold a primary or caucus election on any of these four dates. This proposal would eliminate the undue importance which the New Hampshire primary and Iowa caucus enjoy today. States that choose to hold their contest on the last day would gain a sense of importance, for no candidate would be able to secure the nomination before the end of the primaries. In fact, no candidate will be able to win the nomination solely by his performance in the primaries.

SUMMARY

We propose that one-third of the Convention delegates be bound to vote for the candidate which they represent on the first ballot and that the remaining delegates be uncommitted.

We propose that delegates should be selected in three categories, one-third (committed to specific candidates) at the local level through the caucus or primary method, one-third by the state Democratic Central Committee, and one-third consisting of ranking Democratic officeholders.

We propose that all the primaries and caucuses be held during April, May, and June.

We propose that the Democratic National Committee establish four primary or caucus dates during April, May, and June.

CONCLUSION

We present this White Paper in hopes of creating a focus for action. It is not a cure-all for the problems of the Democratic Party. However, we believe that under the system that we propose, the candidate who wins the nomination will be representative of the entire Party, not just the grassroots activists nor just the Party bosses. We believe our proposal will raise the level of discussion and deliberation during the Convention. Although it may be harder to reach consensus on a candidate, it may be easier to build a successful elective coalition. No group can claim that the Party's candidate was selected without due representation.

We believe that our proposal will streamline the nomination process. The campaign will be shortened. The number of primary and caucus dates will be reduced to four. The cost and exhaustion levels may be reduced.

We believe that our proposal will strike a balance between the enthusiasm and innovation of grassroots participants and the savvy and wisdom of elected and Party leaders. Our proposed changes will produce a Convention which will represent all levels of the Party.

We believe that our proposals, in which only one third of the delegates are bound, will make the Convention a truly deliberative body. The delegates will have the power to influence and choose the nominee, rather than simply acknowledge a predetermined nominee.

A better method is needed to nominate the Democratic Party's presidential candidate. We believe this is such a method. We urge its immediate enactment.●

ACCOMPLISHMENTS OF AGNES HICKEY

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. GRISHAM. Mr. Speaker, I would like to bring to the attention of the House the accomplishments of Agnes Hickey, from Cerritos, Calif., on the occasion of her retirement as Cerritos city clerk after 25 years of dedicated service.

When Agnes began working for Cerritos, the town was known as "Dairy Valley," and its affairs were run out of a one-room office in the city hall of the city of Artesia. In November 1958, the residents of Dairy Valley voted to become a charter city. The original city staff consisted of one person who served as clerk and city manager—Agnes Hickey.

In 1967, Dairy Valley became known as Cerritos, and Agnes Hickey still ran the city clerk's office. By 1971, Cerritos was the fastest growing city in the State of California. As the city grew, so did Agnes' job and responsibilities.

Today, Cerritos has a population of over 52,000. At its center is a new solar-equipped city hall, and in that city hall is Agnes Hickey, still serving the people of Cerritos. She is custodian of the city's official records and administers Cerritos management program. Agnes attends each city council meeting and records the proceedings.

Agnes has been a witness to history and a participant in the growth of an American city. She is an example to her fellow citizens.

I am sure that Agnes' husband Rex, her children Michael, Charles, and Terry, and her three grandchildren Michelle, Nicole, and Beth, join this

House in wishing her well in her retirement years.●

ARMS CONTROL AND CHEMICAL WARFARE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LAGOMARSINO. Mr. Speaker, arms control and negotiations to achieve strategic arms agreement with the Soviets are noble and worthwhile goals. But they must be undertaken realistically and objectively. Past experience shows clearly that the only way to achieve a meaningful arms agreement with the Soviets is through firmness and consistency. This is precisely the point made in a recent editorial appearing in the Oxnard Press-Courier, a respected newspaper in my district.

I would like to share with my colleagues the comments of the Press-Courier both on arms control and chemical warfare which so directly affect our relations with the Soviet Union.

[From the Oxnard (Calif.) Press-Courier]

STRENGTH BEST HOPE

The Reagan administration is still formulating its grand strategy on the subject of strategic arms negotiations with the Soviet Union. But if administration appointments already made to crucial arms control policy posts are any indication, Reagan plans to take a tough stance indeed in any future bargaining with the Soviets.

If so, President Reagan and his senior advisers have learned the overriding lesson of the last decade of SALT negotiations with Moscow: Namely, that firmness offers the only hope of obtaining equitable, verifiable arms control agreements that, in fact, enhance American security.

The President's nominee for director of the key Arms Control and Disarmament Agency is Eugene V. Rostow, a Democrat and former State Department official during the Johnson administration.

But Eugene Rostow is no mere token Democrat in a Republican administration. He is superbly equipped to serve as ACDA director. Rostow has devoted much of his considerable energy and ability during the last five years to a potent pro-defense lobby group known as The Committee on the Present Danger.

As its name implies, the committee's abundantly documented view is that the failure of successive administrations—most especially that of President Jimmy Carter—to respond adequately to the Soviet military buildup has placed the United States in imminent danger.

Rostow's impressive grasp of both political and military considerations central to the challenge of negotiating successful arms control agreements with the Soviet Union ensures a firm hand at the helm of the Arms Control and Disarmament Agency.

Complementing the Rostow appointment is Reagan's selection of retired Army Gen. Edward L. Rowny as the administration's chief SALT negotiator.

Gen. Rowny, like Rostow, opposed the patently inequitable SALT II treaty negotiated by the Carter administration. Indeed, Gen. Rowny resigned as the Joint Chiefs of Staff representative on the arms negotiating team and requested early retirement from the Army so that he could be free to oppose the treaty in testimony before Senate committees.

No negotiating team headed by Gen. Rowny is likely to be steamrollered, or hoodwinked, by its Soviet counterpart.

The Reagen administration's tenure in office is almost certain to coincide with a Soviet-American showdown on SALT. If the Soviets are truly interested in good-faith bargaining leading to equitable, verifiable agreements, a new and better SALT treaty is possible. If not, the administration, the Congress and the American people will be better off for recognizing this sooner rather than later.

Officials like Eugene Rostow and Gen. Rowny are precisely those most likely to help shape a SALT strategy capable of smoking out Moscow's real intentions.

CHEMICAL WARFARE THREAT

Chemical warfare is the kind of subject most people would prefer not to think about. But ignoring the repugnant is a luxury the Reagan administration, Congress, and the Pentagon, can ill afford.

Former President Nixon unilaterally halted all production of U.S. chemical weapons—chiefly artillery shells containing nerve gas—11 years ago. The ban was continued by Presidents Ford and Carter.

Unfortunately, this self-imposed restraint, and four years of fruitless Soviet-American discussions on a prospective chemical warfare treaty, has had no apparent effect on Moscow. The Soviets have continued to add to their stockpiles of lethal chemical agents, including nerve gases, phosgene and hydrogen cyanide.

Soviet military manuals include extensive instruction of both offensive and defensive chemical warfare. Most Soviet artillery and surface-to-surface rockets are equipped to fire chemical munitions.

Virtually every Soviet division includes specialized decontamination units. And all Soviet armored vehicles manufactured during the last decade feature elaborate seals and air-filtration systems that permit operations in chemically contaminated environments.

As though all this were not sufficient evidence that Moscow takes chemical warfare seriously, there is compelling evidence that Soviet forces in Afghanistan and their Vietnamese allies in Laos and Cambodia have used lethal gases against guerrilla opponents and civilians alike.

Clearly, the United States no longer can neglect its own chemical arsenal, or assume that the Soviets would decline to use chemical weapons in some future conflict.

The Reagan administration has asked Congress for $20 million to purchase production machinery needed to manufacture the new "binary" nerve-gas artillery round. These would replace the deteriorating, Korean War-vintage shells that now constitute the bulk of U.S. chemical weapons stocks.

The $20 million item, approved by the House and by the Senate, is likely to be followed shortly by a second request for actual production funds. This too ought to be approved.

Volume production of binary shells coupled with the Reagan administration's plans to equip Army units with more and better protective gear against chemical attack is the minimally acceptable counter to Soviet capabilities.

Nazi Germany was deterred from using poison gas against the allies during World War II by the sure knowledge that its opponents were prepared to respond in kind. Absent the measures the Reagan administration advocates, no comparable deterrrent would exist to restrain the Soviets.●

JACK ANDERSON CALLS FOR A SMALL BUSINESS BILL OF RIGHTS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. KEMP. Mr. Speaker, the individual entrepreneur has, as Jack Anderson explained in a recent Washington Post column, historically been the backbone of the free enterprise system. Small businesses supply two-thirds of the new jobs in this country—and even more of the new jobs filled by teenage, minority, and other disadvantaged workers. Small businesses generate all of the net new jobs in my own region of the Northeast, where for every big business job created by growth there is another lost through decline. And a disproportionately high percentage of all innovations—the engine of economic growth—come from small business. If we choke the life out of small business we will choke the life out of our economy.

What we need is a new environment for small business: an environment which nurtures and encourages entrepreneurs by increasing the rewards for, and reducing the barriers to, creativity, investment, and risk-taking.

Above all we need a tax and regulatory environment that will encourage, rather than actively discourage, savings, investment, production, employment, and individual initiative. In an excellent article which appeared in the Washington Post on May 29, Jack Anderson outlines a plan for creating this entrepreneurial environment. "Needed: A Small Business Bill of Rights" calls for free market competition, reduced estate and gift taxes, regulatory reform, lower taxes on small business, and a fair treatment from the Government. I commend his article, and his program, to my colleagues.

The article follows:

NEEDED: A SMALL BUSINESS BILL OF RIGHTS

(By Jack Anderson)

Before the first asphalt went down on Wall Street, a love affair began to blossom between Big Government and Big Business. Yet the nation would be better served if the government would listen to the entreaties of a worthier suitor: the individual entrepreneur who has historically been the backbone of the free enterprise system.

In the best American tradition of worshiping financial success, many officials of the

Reagan administration have made it their first priority to attend to the needs of the corporate giants.

The American small businessman, meanwhile, could become an endangered species. He is reeling from the after-blast of skyrocketing inflation and interest rates while being battered by abusive tax laws and government regulations.

What small businessmen need is a Bill of Rights that will give them a fighting chance to coexist with the big guys. Here, then, is my own suggestion for a Small Business Bill of Rights:

Right to Compete: Individual initiative and enterprise must be encouraged, not discouraged. Anti-trust laws may need to be tightened to keep the big boys from selling below cost to drive smaller competitors out of business. Given half a chance, the pioneer traits of risk-taking and Yankee ingenuity will rise again.

Right to Be Heard: There are 14 million small and independent businesses in the United States, which employ 58 percent of all private-sector jobs and support 100 million people. Yet their voices are a barely audible whisper in the halls of Congress, compared to the cacophony of Big Business and Big Labor lobbyists.

Right to Inherit: One of the strongest motivations for starting a business is the hope that it can be passed on from one generation to the next. But estate and gift taxes have reached a confiscatory level that threatens the survival of family businesses and promotes sellouts to conglomerates.

Right to Reasonable Regulation: Many a beleaguered small businessman spends most of his time filling out government forms and complying with government regulations. The thousands of regulatory laws are written with Big Business in mind; it's unreasonable to expect General Motors and Mike's Garage to meet the same government standards and reporting requirements.

Right to Fair Taxation: The tax laws are full of loopholes that favor the big corporations. The small businessman who files as an individual or partnership is socked with double taxation of dividends and inadequate investment tax credits. If he manages to show a profit or break even in spite of these handicaps, inflation alone will push him into a higher tax bracket.

Right to Affordable Wage Scales: Though organized labor will raise howls of protest, it makes sense to give small businesses relief from minimum wage regulations. Workers will be better off if small firms are free to create new jobs.

Right to Equal Interest Rates: Discrimination against small business borrowers must stop. Bankers justify charging small businesses two or more points above the so-called prime rate, while giving big borrowers rates three or four points below the prime. The argument is that the little guys are bigger risks. But small businesses have no monopoly on failure—as Lockheed and Chrysler have demonstrated.

Right to Government Contracts: The record shows that small businesses are 24 times more efficient in creating new products and technologies. Yet only a paltry 3.4 percent of the Federal government's contracts for research and development go to small companies. All told, they manage to get only about 20 percent of government contracts.

Small can be beautiful. But if America's small businesses aren't given a chance to survive, future generations may never be able to see just how beautiful they were.●

STANDARDS OF LIVING ARE FALLING

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. McDONALD. Mr. Speaker, Dr. Hans Sennholz could well be considered the premier hard money Austrian school economist today. His writing and analysis have been a major contribution to this field of endeavor, offering sanity and clear direction for bankrupt notions. The following article is just such an example. I commend it to the attention of my colleagues:

STANDARDS OF LIVING ARE FALLING

(By Hans F. Sennholz)

(Dr. Sennholz heads the Department of Economics at Grove City College in Pennsylvania and is a noted writer and lecturer on monetary and economic affairs. His latest book, "Age of Inflation," describes our dilemma and offers recommendations for restoring a sound monetary system.)

It is a sad fact that most Americans have become poorer during the 1970s. They can no longer afford the amenities and luxuries to which they had grown accustomed. Many consumer goods are getting smaller or cheaper in quality although their prices continue to soar. We are urged to "conserve" and make do with less. Our new economic motto is "more conservation," which is a euphemistic term for "more poverty." Other industrial countries in Europe are experiencing similar difficulties. Their economies are stagnating or lingering in recession. Inflation is raging and unemployment is rising.

To most Americans the deterioration of living conditions is all the more incredible as their inborn optimism is calling for an ever brighter future. Surely, our history textbooks tell us of hard times during the major wars in American history or during the Great Depression. But they are not yet comparing our present situation with similar calamities in the past. And yet, some similarities are beginning to emerge.

The Great Depression was accompanied by a disintegration of the world economy. Economic nationalism ran rampant, cutting off channels of trade and commerce and impairing the world division of labor. According to most economic historians, this disintegration was an important cause that aggravated and prolonged the Great Depression. After World War II the trade barriers erected during the 1930s were gradually dismantled, which led to a phenomenal improvement in world economic conditions. For a quarter of a century it provided us with ever more materials and supplies. Total output of goods and services rose rapidly and our standards of living improved steadily. During the 1970s unfortunately, governments the world over turned back the clock as they gave new life to economic nationalism, especially in the developing countries, and brought radical changes of which most Americans are not yet aware.

TRANSFER TO OPEC

In 1973–74 an Arab oil embargo and a doubling of oil prices thereafter dealt a devastating blow to all industrial countries. Since then sizable increases in the price of OPEC oil added new uncertainties to an already cloudy outlook.

The net effect was a massive shift of income and wealth from the industrial countries to oil-producing countries. OPEC revenues rose sharply, as did production costs in industrial countries. The oil price increases not only dampened economic expansion in such countries as Japan and West Germany, but even brought it to a sudden halt in many others. The effect of this shift of income and wealth was alleviated somewhat since much of OPEC unspendable income was recycled into investments in both government securities and private banks in the United States and Europe. While OPEC countries were growing richer and the industrial countries becoming poorer relative to the world, the day of truth was postponed through rising indebtedness of the latter. In fact, OPEC lending not only obscured the shifting, but even helped to finance massive U.S. Government deficits for health, education, and welfare that consumed capital en masse. In short, it helped to finance the American decline.

Government spokesmen always blame the sharp increase in petroleum prices for the rampant inflation that has engulfed the U.S. But economists are pointing out again and again that the ultimate impact of the oil price increase depends on the reaction of individual governments. In countries that refrain from deficit spending and monetary expansion, there is little or no inflationary impact at all. Increased spending by consumers on petroleum products necessarily leads, because of limited incomes, to reduced spending on other goods and to lower prices. Surely, the people in Japan and Switzerland suffered losses in income and wealth as a result of rising petroleum prices. But many other prices fell as other spending declined.

In the U.S. all prices rose at various rates because massive federal deficits were monetized, that is, the federal debt was used to increase currency in circulation. This was carried out essentially by the purchase of Treasury obligations by the Federal Reserve System, thus releasing Federal Reserve notes into circulation or creating bank reserves that permitted commercial banks to expand their credit even further. Obviously, the federal government alone conducted the inflation and orchestrated the credit expansion. But it is extremely eager to point the finger of blame at someone else.

In fact, the federal government greatly aggravated the situation and accelerated the wealth transfer by shackling and crippling the domestic industry so that the U.S. became ever more dependent on oil imports. In 1972, before OPEC intervened, we were importing some 6 to 7 percent of our needs. Today we are importing nearly 50 percent. No policy sinisterly designed to promote the transfer of income and wealth to OPEC could have been more effective than that conducted by the U.S. Government.

On August 15, 1971, the Nixon Administration imposed comprehensive price controls that were generating the first energy shortage. The Ford and Carter Administrations perpetuated the controls and made matters worse with complex systems of allocation and distribution. In 1977 the Carter Administration created a new U.S. Department of Energy merging the Energy Research and Development Administration, the Federal Energy Administration and the Federal Power Commission. It introduced a comprehensive national energy plan that emphasized conservation rather than production, and imposed the biggest single tax in U.S. history, the Windfall Profits Tax. It

is surprising indeed that domestic production, reeling under such heavy blows, continues to meet one-half of our petroleum needs.

FROM PRODUCERS TO ALMSMEN

Almost without exception governments are tempted to treat the symptoms while they eagerly ignore or even foster the causes. To fight the symptoms is always rewarding politically. It may even alleviate the problems in the short run although it does not solve them. It merely postpones the hour of reckoning.

The economic expansion during the 1950s and 1960s permitted interventionist governments to develop massive transfer systems that favored some people at the expense of others. The federal government became a giant transfer agency that extracted ever more revenue from the economic activities of the working people and bestowed its largess to a growing army of almsmen. From 1946 to 1980 nondefense spending rose from just $15.2 billion a year to an estimated $433.2 billion. (The Budget of the United States Government, Fiscal Year 1981, p. 613)

Despite the staggering burdens of government the American economy proved to be surprisingly resilient as long as some capital could be formed and economic activity be expanded. But it was a fatal mistake to conclude that the economy could withstand any and all burdens which government chose to place on it.

A tax burden which is heavy during periods of expansion becomes destructive during stagnation and decline. When OPEC began to raise our costs of production, the load of federal levies became increasingly painful. To counteract or even offset the detrimental effects of OPEC machinations, instant tax relief would have been in order. But lo and behold, the federal government was not to be outdone by foreign extractions. It raised its own from $208.6 billion in 1972 to an estimated $523.8 billion in 1980. Its annual extractions now exceed the oil import expenses by one thousand percent.

The effects of this double-barrelled attack on economic activity could be readily seen. The returns of capital investments, that is, business profits, fell to scanty levels. Many enterprises suffered losses which mostly were hidden by the thick veil of inflation. Surely, some business profits stated in shrinking dollars continued to rise, permitting governments to extract ever higher levies. But in terms of purchasing power and real wealth many businesses merely struggled along or even deteriorated. They formed no new capital for expansion or modernization, built no new facilities and created no jobs.

The dearth of genuine profits forced business to cut back its expenditures on research and development. Again jobs were lost or fewer were created. When an industry thus falls behind technologically, it may encounter the fierce competition of foreign industries. It may be out-produced and undersold and therefore may shrink even further, causing heavy unemployment of capital and labor. To correct such a dilemma is extremely difficult and painful.

The situation becomes all the more tragic if it involves important industries that are employing hundreds of thousands of workers. For political reasons the government cannot afford to let such industries collapse or wither away. It is expected to come to their rescue. Our steel and automotive industries are examples in case.

The most popular rescue action consists of a dose of economic nationalism. The steel industry in distress demands higher tariff barriers, which would curtail the steel supply and permit it to raise its prices. The automobile industry suffering losses clamors for import restrictions, which would force the American people to buy more domestic cars at higher prices. Foreign trade is to be curtailed, international relations to be severed, and living conditions to be lowered so that the beleaguered industry may be permitted to continue its antiquated operations.

If no tariff protection can be granted because it would violate international treaties, the industrial captains and labor leaders may clamor for financial aid and support. The taxpayers are called upon to support with tax extractions what they do not patronize with their consumption dollars. Of course, the subsidies cannot restore the strength and viability of such industries. They tend to become a permanent burden to society which is impoverished not only by the subsidy but also by its loss of foreign products. In the end, the healthy industries that must carry the burden of support may be infected by the same dilemma, and the subsidized industries in search of ever more reliable support may beg to be taken over by the government. In any case, the people will pay the price in the form of ever lower living standards.

CLEANER BUT POORER

During the 1970s national governments throughout the world pledged a commitment to a cleaner environment. In the United States the administration of Jimmy Carter was especially sympathetic to the pleas of environmentalists. It sent wide-ranging environmental policy statements to Congress and made concrete legislative proposals to impose more air and water pollution controls, and regulate strip-mining, wilderness preservation, and energy.

At this place we need not dwell on the ideological causes that gave rise to the policy. But we must observe that in nearly all cases of environmental concern, the blame was laid on business concerns and the individual enterprise system. And governments always felt called upon to correct the situation through massive expenditures and severe production restrictions. (Cf. "Controlling Pollution," *The Freeman*, Feb. 1973, pp. 67-77)

The federal Environmental Protection Agency (EPA) is demonstrating great perseverance against American industry. It not only is issuing countless guidelines but also setting rigid effluence limitations for many classes of enterprises. The Agency's persistence received support and encouragement by a number of favorable court decisions that made U.S. corporations install many millions of dollars worth of wastewater recycling equipment and other antipollution devices. In nearly every case the U.S. district courts and the U.S. Supreme Court ruled in favor of EPA and strengthened its hand in dealing with industrial pollution.

It is difficult to estimate the total financial burden placed on American industry in order to secure a cleaner environment. Direct costs up to now probably exceed half a trillion dollars. Indirect costs consisting of time and effort spent on cleaning operations, of factories not built and jobs not created because business capital was spent on environmental devices, may amount to a trillion dollars. And this amount may double or triple again if we include all the production that was cancelled or not even attempted because the environmental costs made it unprofitable. Surely, the American people paid a high price for any improvement in their environment.

Environmental costs are business costs like any other costs that limit economic undertakings. Governments imposing new costs are limiting economic production, eliminating jobs and reducing incomes. It is dishonest to ignore the costs and deny the consequences.

THE PEOPLE MUST CHOOSE

A representative government like ours tends to reflect the choices of the people. During the 1970s the American people charted a course of policies that led to economic stagnation and gradual impoverishment. The facts are undeniable and indisputable. But most Americans probably acted and voted in utter ignorance of the costs and consequences of their choices, which affords us new hope for the future.

The surprising results of the recent election seem to indicate that many Americans are awakening to the challenge of the future. They are rejecting the road of the 1970s and instead are opting for a new beginning. If this means that they are choosing prosperity rather than stagnation, employment rather than doles, the road into the future is very clear. The federal energy policies must be reversed completely and the wealth transfer to OPEC be discontinued immediately. We must overcome and restrain the public hostility toward investment returns and business profits that are building plants and factories, creating jobs and raising wages. The countless restraints and restrictions on business activity and creative energy must be rescinded without delay. And finally, environmental improvements must be weighed against all costs, direct and indirect. If the costs exceed the benefits they must be reduced or removed. The federal bureaucracy which has been sitting in judgment of such matters has failed conspicuously. It must be disbanded promptly, and all environmental issues returned to the courts of law.

It is difficult to reverse public policies that are deeply rooted in popular ideas and beliefs. But it is possible through honest information and education.●

THE VOTING RIGHTS ACT

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. SEIBERLING. Mr. Speaker, the Voting Rights Act, perhaps the most significant civil rights legislation ever passed, will expire on August 6, 1982. Failure to renew it could jeopardize the ability of blacks, Hispanics and other minorities to fully exercise the most fundamental right of citizenship—the right to vote.

An article appeared in the Akron Beacon Journal recently on the Voting Rights Act. The article, written by Bill Rose of Knight-Ridder Newspapers, focuses on the gains made by black voters in Claiborne County, Miss., in the last 15 years because of the Voting Rights Act. But it also illustrates that

despite these gains, there remains a need for continued applicability of the VRA in Claiborne County and other communities like it in the South.

The VRA has been an effective and critical device for bringing all segments of society into the electoral process on an equal basis. But in many areas, that work has just begun. The Voting Rights Act should be extended, without substantial change, to insure that this process is continued.

The text of the article follows these remarks.

BATTLEGROUND

VOTING RIGHTS ACT EXTENSION MEANS MUCH IN THIS MISSISSIPPI COUNTY

(By Bill Rose)

PORT GIBSON, MISS.—Old South and New South do battle daily in the shady streets of this Mississippi River town that Yankee Gen. U.S. Grant called "too beautiful to burn."

At one end of Port Gibson is a crumbling courthouse with a statue of a Confederate soldier in front. At the other end, surrounded by big oaks dripping Spanish moss, is City Hall, housed in what looks more like a stately old mansion.

In the courthouse, repository of the Claiborne County government, all the public officials are black. In City Hall, they're all white.

Claiborne County is a microcosm of what has happened in the Deep South since passage of the federal Voting Rights Act of 1965: Where there are substantial numbers of black voters, black public officials have been elected.

In 1968, there were 276 black elected public officials in the 11 states of the Confederacy. In 1980, there were nearly 10 times that many, or 2,457 elected blacks.

But the Voting Rights Act is due to expire in August 1982, and black officials in the South were alarmed when one-time segregationist Strom Thurmond, R-S.C., became chairman of the Senate Judiciary Committee and announced this opposition to an extension.

Thurmond said the act is discriminatory because most of the states affected by its provisions are in the South.

He has support in Port Gibson.

"Whatever you do," said Mrs. G. T. Crisler Sr., elderly mother of the editor of The Port Gibson Reveille, the local weekly, "get us out from under that Voting Rights Act."

The black county tax assessor, Evan Doss, 33, wants Congress to extend the measure, as it did in 1970 and 1975.

"Without the Voting Rights Act," he said, "I and others like me wouldn't be in office."

The act bans literacy tests, poll taxes and other measures used in the South to disenfranchise blacks since the late 1800s. It also requires local governments to get federal permission for any change affecting voting patterns, no matter how minor. Indeed, moving a polling place to the store next door requires federal approval.

Since its passage, millions of blacks in the South have registered to vote, with the resulting dramatic increase in the number of black elected officials.

Nowhere is the change more evident than in Mississippi, characterized as the "closed society" as recently as 1964 but now a state with 387 black elected officials—more than any other Southern state.

In 1964, according to Claiborne County's black voting registrar, Julia Jones, only "three or four" blacks were registered to vote in the county. Now, more than 6,000 of the county's 9,000 voters are black.

Before 1965, Claiborne had no black elected officials. But after the act was passed, blacks gradually took command of the county government. Last year, with the election of a black sheriff, former high school football coach Frank Davis, 34, the change was complete.

But Evan Doss, in his 10th year as assessor, said that blacks continue to need the Voting Rights Act because many Claiborne County whites haven't shed their racism, just their tactics.

"The (white) power structure here is right now trying to see that whites regain control of the county," he said. "I'm their prime target."

After his election, Doss sought a countywide reappraisal of property, most of it white-owned. When the board of supervisors balked, Doss used black voter strength to push through a referendum.

"Some uncultivated land in this county was assessed at just $7 an acre when I got here," he said. "The majority of the farm land was assessed at $12 an acre and the highest was $15."

From the start, Doss was resented by white officials. Not long after his election, on a day when people waiting to buy auto tags were lined up out the front door of the courthouse, a white supervisor bustled into Doss' office demanding to buy his tag.

White residents claim Doss was spoiling for a fight with the supervisors over car tags and the publicity it would bring.

As Doss tells it, "I told him to go the end of the line and wait his turn. He left, then came back with a deputy and had me arrested."

Within 24 hours, a white circuit judge had convicted Doss on a charge of refusing to sell an auto tag. He was sentenced to 90 days in jail and a $1,000 fine. The Mississippi Supreme Court threw out the conviction, but not before Doss spent three days in jail.

As proof of a need for the act, Doss points to the all-white elected officialdom of the town of Port Gibson, which has a sizable black minority.

The city conducts at-large elections instead of by districts, which might give blacks a better shot at seats on the board of aldermen.

"And they put the right people on the polls to scare away black voters," Doss said. "If you go to the polls and there's your banker and you can't read or write and you owe $300, who are you going to vote for when the banker asks if you want to vote for the white candidate or the black candidate? Illiteracy is still a big problem."

Port Gibson Mayor W. P. Gordon, weary of the publicity the town has received since a bitter boycott of white-owned stores in the 1960s, refers reporters to Port Gibson Reveille editor Edgar Crisler, who concedes that "for better or worse," the Voting Rights Act "corrected the previous exclusion of black voters."

But Crisler contends that the black county government has abused the act by padding voter rolls with college students who aren't residents, arranging corrupt deals with cronies and rigging petitions for special elections.

"We've had some very capable (black) people in office and we've had some skunks," he said.

"The act was conceived in a mindset that blacks can do no wrong. Because of that, abuses have been ignored and glossed over."

The Reveille has consistently accused county officials of wrongdoing, even to the point of printing evidence that school officials awarded a contract to a company with a fictitious address.

Recently, when the school board presented county officials with a petition for a bond issue, Crisler checked it. One page bore the names of Ronald Reagan, Jimmy Carter, Bill Cosby and Sidney Poitier.

The most onerous part of the act, white officials generally agree, is a requirement that any law affecting voting be approved by the Justice Department or federal courts.

"We'd like to purge the county's voting rolls of the dead and the non-residents, but we would have to go to considerable expense of getting Justice Department approval first," a heavy burden for a small town, Crisler said.

The editor advocates strong literacy and residency tests, including a ban on college students voting unless they prove residency.

"That's exactly what we're afraid of," said Charles Evers, 58, mayor of nearby Fayette.

"Mississippi is not ready to come out from under the Voting Rights Act yet," said Evers, first black mayor of a biracial Mississippi town. "The Legislature is 90 percent white . . . The same rascals who ran things 15 years ago are still here and their opinions haven't changed that much."

Evers said that Mississippi has battled federal officials for years to enact an "open primary" law for state elections. Because blacks make up only one-third of the state population, that would lessen a black's chances of winning statewide office. (In an open primary, all candidates, regardless of party, run together. The top two meet in a runoff.)

"After they throw that open primary at us," Evers said, "then they'll pass a law that takes everybody who doesn't vote in two years off the rolls. Then they'll order a lot of re-registrations. Then they'll put on a law that says you can't vote if you can't read.

"The most important thing about doing away with the Voting Rights Act is that it sends a signal. It tells the white folks it's all right to be mean again.

"It's like when I first tried to register to vote."

He told how, in 1946, a white registrar said he could vote if he first passed a simple literacy test.

The "test" amounted to a single question: How many bubbles in a bar of soap?

"I didn't laugh then," Evers said. "And I'm not laughing now."●

FOREIGN TRADE ANTITRUST IMPROVEMENTS ACT OF 1981

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. RODINO. Mr. Speaker, on March 4, I introduced H.R. 2326, the Foreign Trade Antitrust Improvements Act of 1981. This bill will remove needless antitrust uncertainty regarding the international application of U.S. antitrust laws and thereby eliminate one perceived barrier to export trade by small and medium sized American firms. There are now

38 cosponsors in the House, and a companion bill, S. 795, has been introduced in the other body by Chairman Thurmond of the Senate Judiciary Committee. The Committee on Legislation of the Antitrust Section, New York Bar Association, has recently compared H.R. 2326 with the antitrust provisions of S. 735, the Export Trading Company Act, and reported its conclusions.

I insert the report in the RECORD:

REPORT OF FOREIGN TRADE ANTITRUST PROPOSALS

S. 734 and H.R. 2326, 97th Cong., 1st Sess. (1981) are designed to enable U.S. firms to compete in international markets with no greater antitrust restraints than those faced by their competitors.

Title II of S. 734 seeks this end by providing for Export Trade Associations which may obtain exemptions certificates for export trade activities. The Attorney General and the Federal Trade Commission may object to or seek to invalidate a certificate. Guidelines for operation are to be issued concerning Association activities. Private suits challenging such activities as not meeting eligibility requirements would be prohibited.

H.R. 2326 merely adds to the Sherman Act: "This Act shall not apply to conduct involving trade or commerce with any foreign nation unless such conduct has a direct and substantial effect on trade or commerce within the United States or has the effect of excluding a domestic person from trade or commerce with such foreign nation."

It adds to Clayton Act § 7: "This section shall not apply to joint ventures limited solely to export trading, in goods or services, from the United States to a foreign nation."

The objectives of these bills are important and desirable to avoid difficulties for U.S. competitors in worldwide markets.

We believe the approach of H.R. 2326 is preferable to that of S. 734, in that it:

(1) involves no additional bureaucratic procedures;

(2) involves no administrative delay;

(3) creates no potential for charges of favoritism;

(4) is self-effectuating;

(5) is readily understandable;

(6) involves less risk of unintentional exemption of illegal domestic activities as "methods of operation" which would become immune from private suit under S. 734;

(7) is more likely as a side benefit, to be seen as removing irritants to U.S. foreign relations.

We do not, however, take a position at this time on issues raised by the specific wording of these bills. Rather, our view is that, assuming action is believed necessary, the simple approach taken in H.R. 2326 is the preferable one.

Respectfully submitted.●

AN UNFAIR PENALTY IN CLEANING UP THE GREAT LAKES

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LAFALCE. Mr. Speaker, several years ago the United States and Canada entered into an international agreement setting up standards that should apply to both nations in a mutual effort to clean up the Great Lakes and to keep the lakes free from pollution in the future.

As a Representative from a district bordering the Niagara River and Lake Ontario, I strongly support this agreement and the goals toward which it was aimed. I agree that the United States has a national interest in working with Canada to preserve and protect these great continental resources.

But the key here is that this agreement, as with any international agreement, spells out national priorities and concerns. Yet one result of the United States-Canada agreement in this instance has been that localities in border areas have had to absorb much of the cost of meeting the terms negotiated between the Federal Government and the Government of Canada.

This is because the antipollution standards set forth in the agreement are even more stringent than those applying elsewhere in the United States under the Clean Water Act. And as a result, cities and towns located within the Great Lakes basin must provide a higher degree of treatment of municipal wastes than has to be provided in wastewater treatment plants located in other parts of the country. This higher level of purification is costly to achieve and these costs must, of course, be passed along to the homeowners, renters and businesses that use these sewer systems.

The costs in question are not insignificant. One community in my congressional district has estimated that the extra costs attributable to the agreement with Canada come to about 20 percent of its total operating budget.

As I noted before, Mr. Speaker, I think it was in the national interest to enter into this agreement with Canada and I support implementation of it to clean up the Great Lakes. But just as the Nation benefits from this arrangement, so too the Nation as a whole ought to bear the costs. I fail to see why local taxpayers should pay a premium of 20 percent or more to help carry out an agreement over which they had no say and which was, in fact, imposed upon them by the Federal Government. Accordingly, I have introduced a bill amending the Federal Water Pollution Control Act to provide for reimbursement of these extra costs by the Federal Government to local entities that now must pay them.

I am hopeful that this proposal will receive serious consideration as the Congress reviews our Nation's water pollution programs.

At this point, Mr. Speaker, I would ask that the text of my bill be printed in the RECORD. Thank you.

H.R. 3858

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title II of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new section:

"CONSTRUCTION AND OPERATION OF TREATMENT WORKS TO COMPLY WITH INTERNATIONAL TREATIES

"SEC. 218. (a)(1) The Administrator shall pay to any State, municipality, or intermunicipal or interstate agency which constructs any publicly owned treatment works so much of the cost of such construction which the Administrator determines, after consultation with such State, municipality, or agency, is attributable to the increased costs necessary to construct such treatment works to meet any standard or limitation respecting discharges of pollutants or control or abatement of pollution required by any international treaty or agreement, above the costs of construction necessary to meet the effluent limitation, or other limitation, effluent standard, prohibition, pretreatment standard, or standard of performance which would otherwise be applicable under this Act.

"(2) The Administrator shall pay to any State, municipality, or intermunicipal or interstate agency which operates any publicly owned treatment works so much of the cost of operation which the Administrator determines, after consultation with such State, municipality, or agency, is attributable to the increased costs necessary to operate such treatment works to meet any standard or limitation respecting discharges of pollutants or control or abatement of pollution required by any international treaty or agreement, above the costs of operation necessary to meet the effluent limitation, or other limitation, effluent standard, prohibition, pretreatment standard, or standard of performance which would otherwise be applicable under this Act.

"(b) Payments under this section shall be in addition to any other Federal assistance which a State, municipality, or intermunicipal or interstate agency may be eligible to receive under this Act.

"(c) There is authorized to be appropriated such sums as may be necessary to carry out this section for fiscal years beginning after September 30, 1981.".

SEC. 2. (a) Section 207 of the Federal Water Pollution Control Act is amended by striking out "and 209" and inserting in lieu thereof ", 209, and 218".

(b) Section 517 of such Act is amended by inserting "218," after "209,".

SEC. 3. The amendments made by this Act shall take effect October 1, 1981.●

AMBASSADOR YONG SHIK KIM

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. DERWINSKI. Mr. Speaker, I would like to insert into the RECORD an address by His Excellency Yong Shik Kim, Ambassador of the Republic of Korea, before the annual spring meeting of the Greater Washington Council of the United Board for Christian Higher Education in Asia.

Ambassador Kim is an outstanding diplomat, who has represented his country at the United Nations as well

as serving as its Ambassador to London.

His remarks on March 29 of this year, express the historic ties and the close friendship that exists between our two countries. His address follows:

MOTT OF WASHINGTON
& ASSOCIATES,
Washington, D.C., April 8, 1981.

His Exellency YONG SHIK KIM,
Ambassador of the Republic of Korea, 2320 Massachusetts Avenue NW., Washington, D.C.

GREETINGS: On this beautiful spring day, with the cherry trees in bloom here and in Korea and with Palm Sunday approaching, it seems a particularly suitable time to express to you my own appreciation, and that of everyone who was with us on Sunday, March 29th at Meridian House, for the balanced and appropriate presentation you gave us that afternoon.

Your remarks made us realize the extent of Christian influence on the Korea of yesterday, today, and tomorrow; and also it underlined to your audience the 5000 years of Korean homogeneous continuity. I was again reminded of the rugged quality of Korean individuality and steadfastness which is second to none in Asia—and is indeed rare in all the world.

We of the Greater Washington Council who were present shall long remember our happy and productive day. Thank you and Mrs. Kim for being with us.

Whenever appropriate please convey to your President my highest esteem and good wishes. All heads of state have difficult roads to travel these days. They need to be courageous and they should have the moral support of all men of good will and good sense.

I have ordered prints of some of the polaroid photographs taken during the afternoon by our mutual friend, the Chargé d'Affaires of the Representative of ROC, who was among the guests, as you remember.

With personal esteem and highest regard, I am always

Cordially yours,

GEORGE FOX MOTT.

EDUCATION FOR LEADERSHIP IN KOREA—ADDRESS BY HIS EXCELLENCY YONG SHIK KIM

It may come as a considerable surprise to many of you, but an important anniversary in the history of relations between the United States and Korea is now at hand. It is the beginning of the second century of friendship and diplomatic relations between our two countries.

I would like to trace briefly, if I may, the first century of our relationship; how it began and how it developed.

It all began officially on May 22, 1882, when an American naval officer of the U.S. Asiatic Squadron, Commodore Robert Schufeldt, carrying a letter from President Chester A. Arthur to King Kojong of Korea, signed a treaty of friendship, navigation and commerce with the Korean representatives assembled at the port city of Chemulpo. This was the result of many years of American effort to open Korea.

The date of that treaty is significant in that it was a time when the last of the far eastern countries had been opened to the treaty system by the western powers, and more especially by the United States of America. Admiral Matthew C. Perry had already appeared off Edo Bay in 1853, and had entered into treaty relations with the Japanese the following year. Commissioner Caleb Cushing, representing President John Tyler, had signed the Treaty of Wang Hia with the Chinese in 1844, in the wake of the Anglo-Chinese Nanking Treaty signed in 1842.

Thus the latter part of the nineteenth century began a new chapter in American relations with Asia and marked the great period in history when the East truly met the West. To the United States with a history of two centuries, one hundred years of friendship is hardly a short period.

Koreans generally have felt a close affinity with the Americans in Korea, especially with the missionaries and educators who often shared the sorrow and joy of a nation struggling to remain secure and independent. Nineteenth century Americans called Korea "a shrimp among whales" because of the unpropitious geopolitics which put Korea in the midst of powerful neighbors and intense international rivalries. To Americans and Europeans Korea was considered the diplomatic "hot spot." Then followed the long years of Japanese imperialism in which Americans were often suspected of aiding the Korean nationalists and the Independence Movement, in spite of official U.S. policy of neutrality.

The role of the Americans in Korea is significant in various ways; historically, we Koreans remember you as the first to bring certain things to Korea: For example, electricity was first introduced to our land by Americans, when the first U.S. Minister to Korea, Lucius Foote, wrote to the State Department requesting that the famous inventor Thomas Edison send the required facilities for the illumination of the Palace, in 1887. Steam generators and engineers arrived from the United States. The first streetcar was financed by an American named Gilborn in 1899. The first railroad was built by an American named Morse in 1896, linking Seoul to Inchon. The first automobile to arrive in Korea, in 1911, was an American Ford. The first white child born in Korea was the daughter of American Methodist Reverend Appenzeller. More importantly, the first modern educational insitutions for the young men and women of Korea were begun by American missionaries and educators as early as 1885.

Ewha Haktang, the first of the schools for young women, which is now the largest women's university in Korea, was established by Methodist missionaries in 1886. Four years later the Presbyterian Board opened a second girls' school, called Chong Sin. Also opened at the same time by the American Missionary Society was the Paejae school for boys.

And the first modern hospitals were American hospitals. Missionary Dr. Horace Allen, who often served as the Korean Court's physician, opened the first hospital, called Chai Chung Won or the House of Civilized Virtue, on April 9, 1885. The Presbyterian successor to this first hospital was the Louis H. Severance Union Medical College and Hospital, which was erected in 1905 and remains today as one of the best.

Who were these American missionaries who helped shape Korean history? They were the Allens, the Herons, the Scrantons, the Appenzellers, the Underwoods; Hulbert, Gilmore, Bunker; Miss Ellers, Miss Lillian Horton—all in their twenties when they came to Korea to proselyte. For most of them, their motto was "Preach and take the consequences," as said the Apostle Peter (Acts 4: 19-20).

The opera Madame Butterfly is a somewhat romantic, but nevertheless poignant and fairly accurate example of what can happen to individual human beings when nations begin to interact with one another, and young people from different cultures fall in love and find their personal lives influenced by the "clash of cultures." But good things can happen too, and in the case of my country, many good things happened.

The Americans brought to our shores western philosophical concepts and political ideas and encouraged Korean nationalism and desire to remain free from her powerful neighbors. Self-strengthening and modernization and a general transformation of the ancient Yi Dynasty Korea into the modern world were called for; but for many years the foreign and domestic circumstances were most unfavorable.

For fifty and more years after the Schufeldt Treaty, we Koreans remained the pawn in a great power struggle among China, Japan, and Russia. Korea, strategically speaking, is a land bridge to Asia—to Russian Far East and China. It is also a bridge pointed to Japan from the Asian mainland. Korea is a part of the sea approaches to both the Japanese Islands and the Asian land mass. It was for centuries a historic invasion route of various armies from neighboring lands. Thus, the Korean Peninsula was and is of tremendous strategic and political and geographical importance to any nation wishing to dominate Asia.

We Koreans have not in the past been a warlike nation. We were, in fact, the very opposite of an imperialist country. We were inward-looking and isolationist. We wanted to be left alone. For centuries we were known as the "Hermit Kingdom."

But history, geography, and especially vicious power politics among nations would not leave us alone and, as I have noted, Japan, Russia and China struggled for many years to maintain domination over us, with overt war in 1895 and 1896 between China and Japan, and in 1904-1905, between Russia and Japan.

While this protracted struggle for foreign domination of Korea was going on, there was another internal struggle in progress within Korea itself. Factionalism, especially between the conservatives and the progressives, was rampant, causing social unrest. Nation-wide turmoil occurred, such as the Tonghak Rebellion, spurred on by the new nationalism and revolt against the oppressive old feudalism. All the while, the central authority, the Royal Court, was plagued by intrigues and external pressures, rendering it ineffective and weak.

Yet in those very years, the early American Protestant missionaries helped light the spark of hope for a better and stronger Korea and assisted an awakening of the spirit of national independence that was to sustain us in our struggle for our land until the end of World War II.

Americans—and American missionaries—made many other contributions to the spirit of enlightenment and the eventual drive toward national independence. Americans assisted Korean in the founding Korean newspapers. It was an American-educated patriot, Philip Jason, who started one of the first three newspapers in Korea. It was printed in both Korean and English and was called The Independent.

Many of you know of the long years spent in America by the first President of the Republic of Korea, Dr. Syngman Rhee, who was originally educated at a missionary school. As a nationalist, as were most of the mission-educated Koreans, he worked end-

lessly to keep world attention focused on Korea's struggle to free itself from Japanese colonial rule. He has been called a Wilsonian democrat, since he took his doctorate under Woodrow Wilson at Princeton, but he was above all a Korean patriot.

Many of the Americans who assisted Philip Jason, Syngman Rhee, and other Korean advocates of independence were Americans with firm missionary roots in Korea. Their contribution to Korean independence cannot be underestimated. However, Protestantism fell on hard times later when the colonial Japanese rulers recognized clearly the threat represented by the teachings of Protestant churches and made a concerted effort to suppress them. Yet, the American Protestant influence on Korea has been far from a passing phase.

With the Liberation of 1945, various religious bodies in Korea rebuilt their organizations and expanded their influence. However, a number of new sects and religions also sprang up and the religious picture was uncertain and confused. The number of Christians grew rapidly after the establishment of the Republic of Korea in 1948.

One of the constant features of all Korean constitutions since the founding of the First Republic in 1948 has been the protection given to freedom of religious expression. The result has been something close to a religious explosion in Korea, especially during the sixties and seventies. And the growth of Protestantism has been most rapid.

In 1950, the number of Korean Protestants was at 1.3 million. By 1960 it had increased to over 3 million, more than double. It now stands at over 5 million. In 1950, there were only six thousand Protestant churches in Korea. By 1960, there were twelve thousand . . . again a doubling. By 1980, the number of churches had risen to almost twenty-two thousand.

These statistics are truly astonishing and stand as testimony not only to the firm religious faith of the Korean people, but also to the strength of Korean churches and their evangelizing spirit.

Most students of religion in Korea see several trends for the future. Already visible now is the tendency for like-minded Korean religious groupings to consolidate. There is also a pronounced trend toward ecumenism in Korea. Religious groups of whatever denominations and persuasions are tending more and more to cooperate and work together, especially in the fields of education, care of mothers and children, and social welfare.

On the whole, the picture seems to point to the eventual domination of the Christian faiths over those of Confucianism, in Korea's religious life. There is also growth of a new spirit which is being fostered by Korean Christian groups, a turning away from materialism and a re-affirmation of the higher aims of Christian spiritual life. The effects of this new spirit will be profound and long-lasting.

Many, many times in the past, the Christian has asked the question, "What hath God wrought? What has he done? What has he brought about? We Koreans ask, "What has the Korean religious experience done to Korea itself?"

I think the answer may be simple.

The first western impulse to reach Asia often resulted in an almost irresistable drive by Asians toward modernization. Modernization was regarded by many Asians as a means of ridding their countries of the three misfortunes which had beset them for centuries . . . poverty, disease and ignorance. And the Christian ethic is vitally concerned with all three. Modern techniques and methods held out the hope that these three menaces to the betterment and well-being of Asians could be successfully combated at last.

I think that you can see the effects of this great impulse in Korea. In thirty short years, after a devastating war, we have risen from a nation in ruins to one of the leading newly industrialized nations of the world. This could not have been accompanied without the positive attitude and ability for hard work which has been shown by my country men and women. But it also results from the tremendous adaptability of the Korean character. It used to be said that it would be impossible for the Koreans to build a modern industrial state. Well, we have shown that to be false. We have learned very well the lessons of what it takes to modernize. We also know that if any nation is to succeed in this modern world, it must be its own master. And we have learned that we must continue to be free if we are to remain in command of our own destiny. That is why you find Korea proudly allied with the United States as the guardians of the free world security system in Asia. We are still a strategically important country. We know that if we remain free, the world itself will have a better chance to remain free.

And we know that we have a duty and an obligation to remain free. A duty and obligation not only to ourselves but to the rest of the free world. That is the reason we are determined to stay on guard, with the United States, on the outposts of freedom in Asia.

We also know that we need to cherish peace. What we have accomplished in the past thirty years would not have been possible except in the absence of hostilities on the Korean peninsula. But the absence of hostilities alone is not true peace. The peace in Korea is fragile owing to the constant threat from the North. That is the reason why we are so dedicated to searching for a way to settle those issues that divide the two Koreas into opposing camps. The tension and the uncertainty across the demilitarized zone are all too real.

Last January, in an attempt to help solve the deadlocked unification issue of the two Koreas, President Chun Doo Hwan invited North Korea's Kim Il Sung to visit our country, without any preconditions. President Chun has also offered to go to North Korea for a visit on similar terms, if he was invited. During his visit to Washington this past February, President Chun promised President Reagan that he would persevere in his efforts to bring peace to the Korean peninsula. Whether there is peace or war on the Korean peninsula may very well dictate whether there is peace or war in the rest of East Asia and in other parts of the world. It is as simple as that.

I honestly believe that the historical friendship between Koreans and Americans, which began when the Americans came to Korea in their steamships a century ago, was figuratively the seed of a tree that was sowed to eternally bear fruit.

We Koreans will continue to cherish and protect this friendship which you brought to our shores so many years ago and which has since been forged anew through times of peace and war.●

HUMAN RIGHTS—SENATE REJECTS LEFEVER'S NOMINATION

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BONKER. Mr. Speaker, last Friday the Senate Foreign Relations Committee voted to reject the nomination of Ernest Lefever for Assistant Secretary of State for Human Rights and Humanitarian Affairs. Subsequently Mr. Lefever withdrew his name from consideration.

I commend to the attention of my distinguished colleagues two statements concerning that nomination. The first is by Senator CHARLES PERCY, the chairman of the Senate Foreign Relations Committee and the second is my testimony before Senator Percy's committee:

[The statements follow:]

STATEMENT BY SENATOR CHARLES H. PERCY

Concern for human rights is not just a policy of the United States; it is an underlying principle of our political system and a fundamental factor in the appeal of democracy to people throughout the world. Likewise, our concern for human rights in other countries is not simply a moralistic crusade to remake the world in our own image. Rather it is based on a realistic recognition that the way governments treat their citizens has a direct effect upon their own stability, their reliability as allies, and their danger as adversaries. We cannot credibly stand up in the world as the defenders of freedom and democracy if we condone the violation of basic human rights and fail to speak out when serious violations occur—wherever they occur. As the Wall St. Journal put it in criticizing Dr. Lefever's earlier testimony before this Committee: "we are not so weak that such silence is necessary" even where our friends are concerned.

All of us in the Senate are profoundly concerned about the systematic and widespread human rights abuses in the totalitarian communist states. Nonetheless, we have also been deeply concerned about abuses in friendly states, primarily because of the inherent immorality of abuses wherever they occur, but also because we recognize that a selective policy of speaking out against abuses only in communist countries cannot be effective. To be effective, the United States must speak out for human rights across the board. As a spokesman for the Soviet dissident movement expressed it: "The United States has achieved respectability and credibility in speaking out publicly and forcefully against human rights violations around the world. A continuation of this universal policy is essential to the human rights movement in the Soviet Union."

It was in this spirit and with this concern that the Congress of the United States enacted into law certain standards and criteria for the consideration of human rights abuses in our relations with other countries. Congress also created by statute the office of Assistant Secretary of State for Human Rights and Humanitarian Affairs and charged its director with the responsibility for assuring that human rights received adequate attention as a component in for-

eign policymaking. These actions received widespread public support from all across the political spectrum.

In recent months we have heard from President Reagan, Vice President Bush, and Secretary of State Haig on the Administration's policy toward human rights. I have no difficulty in expressing my unqualified support for the tone and direction of the Administration's approach. I strongly support the view that quiet diplomacy, when carried out with skill and sensitivity, and when backed by the selective use of public criticism and even sanctions, is the best policy to pursue. I think most members of the full Senate are prepared to give such an approach a try. But the credibility of the Administration's concern and the effectiveness of its policy will depend to a crucial degree upon the person designated as Assistant Secretary for Human Rights in the State Department.

I do not think Dr. Lefever is a suitable candidate for that role.

For years Dr. Lefever has been a vocal critic of the suggestion that human rights considerations have any place in our foreign policy. In his testimony before Congress just three years ago Dr. Lefever argued:

(1) That the United States had no right and no responsibility to express its concern—either publicly or privately—for the human rights of people in other countries.

(2) That efforts by the United States Government to influence the behavior of other governments—whether totalitarian or authoritarian—toward their own citizens were violations of the national sovereignty of other countries and therefore inconsistent with international law.

(3) That all laws of the United States relating to foreign affairs which contain a human rights standard of any kind should be repealed.

None of these arguments, I would emphasize, reflect the known views of President Reagan or Secretary of State Haig on the issue of human rights and foreign policy.

So what does Dr. Lefever say about these views now that he has been nominated to be the chief U.S. spokesman on human rights? In effect, he says he has changed his mind. On the question of repealing all laws which prescribe a human rights standard, for example, Dr. Lefever told the Foreign Relations Committee that he simply "goofed." His statement, he said, was too broad, he no longer stands by it. At the same time, he indicated that he would be suggesting certain changes or repeals of law but could not tell the Committee which ones or for what reasons. In fact, he displayed very little familiarity with the provisions themselves.

Dr. Lefever's testimony on this subject was typical of his entire testimony to the Committee—a series of broad generalizations without a willingness to discuss specific issues. Though he has changed his mind and is prepared to support a human rights policy of some kind, he is very vague about what this policy would be and how it could be executed successfully. That uncertainty was just as evident yesterday afternoon as it was in his testimony several weeks ago.

I simply do not think that is a sufficient basis for approving this nominee. On the basis of his long-held and firmly-expressed views on human rights and foreign policy, Dr. Lefever's confirmation would be an unfortunate symbol and signal to the rest of the world. Whatever he may now say, he is associated with a strident and vocal "hands-off" policy. His confirmation would be especially unfortunate if his intention, as the State Department's chief advocate of human rights, is to pursue quiet diplomacy as his general strategy. For he not only fails to display the personal empathy and diplomatic qualities necessary to make such a strategy work, he is publicly on the record with such statements as the following: "Beyond serving as a good example and maintaining our security commitments, there is little the U.S. government can or should do to advance human rights, other than using quiet diplomatic channels at appropriate times and places."

I do not think such a man can be a credible champion of human rights and for that reason I regretfully vote against his nomination.

STATEMENT OF HON. DON BONKER

I appear today in opposition to the nomination of Ernest Lefever as Assistant Secretary of State for Human Rights and Humanitarian Affairs. I do this with some hesitation since every President should have the right to appoint the individuals he wants to serve in his administration. But, after much study, and, as the Chairman of the only subcommittee of the House that has oversight jurisdiction for human rights, I must respectfully ask the Senate to reject Mr. Lefever's nomination.

I make my request based on several factors.

First, the person who is to occupy the Office of Assistant Secretary for Human Rights and Humanitarian Affairs must not only be the guardian of the laws, but must also be an advocate for making sure that the intent of the laws are fulfilled. During the past seven years, the Congress very explicitly made military and economic assistance subject to human rights performance. To assist itself, the Congress has required the preparation of annual human rights reports on recipients of aid and on all other nations. This underlines the historical concern of the Congress and the American people for basic, universal human rights as defined in international human rights agreements.

On July 12, 1979, Mr. Lefever testified before my subcommittee that the "United States should remove from the statute books all clauses that establish a human rights standard or condition that must be met by another sovereign government before our government transacts business with it . . ." Although Mr. Lefever now states that he regrets making that statement, we must ask ourselves what kind of an advocate he will make once confirmed. What are we to believe are his real beliefs?

It should be recognized that Congress, not any specific administration, originally insisted on making human rights standards an element of U.S. foreign policy. It was also due to Congressional initiatives that human rights provisions were passed into law. It is now up to the Congress to protect the implementation of these laws.

Second, the person who occupies the Office of Assistant Secretary for Human Rights and Humanitarian Affairs must possess a unique sensitivity and understanding of the human rights laws. By taking the lead on human rights, Congress felt that the American people wished to affirm their commitment to human rights, their desire to help improve the condition of human rights around the world and their determination to disassociate and distance themselves from governments that perpetuate consistent and gross violations of universally-recognized human rights. Studying Mr. Lefever's own written and spoken words, it is clear that he lacks the sensitivity and the commitment.

Third, the person who is to occupy the Office of Assistant Secretary for Human Rights and Humanitarian Affairs should have concern for the protection of human rights on a universal rather than a selective basis. Unfortunately, the Administration's designee in his written and oral statements has clearly emphasized that what should concern us is where human rights violations have taken place. Thus, human rights violations that occur in Communist countries merit our attention more than equally outrageous violations in other countries. This selective view surely will undermine the credibility of U.S. actions on behalf of human rights. It is unacceptable.

Fourth, how the Senate acts on this confirmation will most certainly send a clear signal around the world as to our future policies on human rights.

The Senate can show that despite the conflicting voices heard on human rights concerns, the United States has not weakened its commitment nor is it going to abandon human rights as an aspect of foreign policy.

The Senate can indicate to repressive regimes of the right or left that the Congress will now allow them to repress their people, violate personal integrity, deny basic economic needs or stifle political expression unchallenged.

The Senate can signal the policymakers, diplomats and career officers alike, that there should be continued attention to and adherence of human rights concerns. The human rights standards have served to educate and raise the consciousness of our officials to human rights conditions internationally. That can be undermined if the officials concerned perceive a lack of concern.

The Senate can indicate that the Congress continues to serve as the voice of conscience of the American people. Concern for human rights has been of immeasurable help in our relations with Africa and the Third World in general. Our human rights policies have saved lives; given encouragement to indigenous human rights movements in such diverse countries as Korea, China, Soviet Union and Argentina; contributed to a climate that promotes a solidarity movement in Poland; contributed to peaceful and democratic development where otherwise extremist forces might have prevailed; and, our human rights policy emphasizes the importance of the fact that human rights have given us an important weapon in our ideological struggle with the Soviet Union.

Human rights concerns have been part of a growing international consensus, e.g., the Universal Declaration of Human Rights; the International Covenant on Economic, Social and Cultural Rights; the International Covenant on Civil and Political Rights, etc. The U.N., OAS and the European Commission of Human Rights actively promote universal principles of human rights. Our support for human rights enhances U.S. influence in important international forums and with world public opinion.

Furthermore, human rights serves our long-term national interest because countries that respect human rights make stronger allies and closer friends.

The wrong signal, however, harms the individuals and groups concerned, leads to increased abuses and ultimately to unstable conditions.

In a world where arrest without warrant; detention without trial; "disappearance;"

genocidal acts; torture, summary executions and internal exile are becoming more and more the rule rather than the exception, you must act forcefully. You must not allow human rights to be trivialized and set aside by this appointment. You must not allow the human rights aspirations of people the world over to be misrepresented and demeaned. Again, I respectfully urge you to vote against this nomination.●

ISRAEL'S ATTACK ON IRAQ NUCLEAR REACTOR

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. MARKEY. Mr. Speaker, I am introducing today a concurrent resolution on the Israeli attack against the Iraqi nuclear reactor. Violence in any form is deplorable. However, we should not rush to condemn Israel too quickly. The real issue is the spread of atomic weapons capability caused by the export of sophisticated nuclear technology from the United States and Western European nations to countries such as Iraq, Libya, Pakistan, Taiwan, South Korea, Argentina, and others. Many of these countries value nuclear technology more for its bombmaking aspect than any legitimate energy or research purpose. The Israeli bombing of the Iraqui reactor is only the tip of a global problem with the most serious consequences for the national security of the United States. I am introducing the attached resolution in the House today, Mr. Speaker, that addresses in part the huge difficulty of U.S. nonproliferation policy. I encourage my colleagues to cosponsor this concurrent resolution by calling my office at 225-2836.

HOUSE CONCURRENT RESOLUTION —

Whereas Israel is a key national security ally of the United States;

Whereas Iraq, despite huge oil reserves, purchased a 70 megawatt nuclear reactor from France which uses substantial amounts of highly enriched uranium as fuel;

Whereas Iraq purchased from Italy highly sensitive plutonium separation technology;

Whereas both highly enriched uranium and plutonium can be used directly to manufacture atomic weapons;

Whereas the President of Iraq has made public statements implying that atomic weapons could be used against Israel; and

Whereas nuclear proliferation is one of the most serious dangers threatening mankind: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) the President should urge the governments of France and Italy not to sell sensitive nuclear technology or material to Iraq to replace the reactor and equipment destroyed by Israel's action of Sunday, June 7, 1981; and

(2) the President should reexamine the nuclear non-proliferation policy of the United States and should establish prohibitions on the export of nuclear material or technology which can be used to make atomic weapons.

(3) the President should determine the adequacy of the international system of safeguards to give timely warning in the event of a diversion of nuclear material to military purposes.●

THOMAS J. WATSON, JR.: A CALL TO END THE NUCLEAR ARMS RACE

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. BEILENSON. Mr. Speaker, while at Cambridge last Thursday for our son's college graduation, I had the opportunity to hear the magnificent Harvard commencement address by Thomas J. Watson, Jr.

Mr. Watson, our former Ambassador to the Soviet Union and former president of IBM, called for "a new effort to cap the strategic arms race * * * through a verifiable treaty which gives both sides the security they require." He spoke of "the illusion of soft-headedness: That anyone who favors an end to the arms race must be soft on U.S. defense or even soft on communism." But he said that "the illusion of softheadedness is thermonuclear McCarthyism, because the search for a way out of this morass—the search for an avenue of negotiation and survival instead of confrontation and weaponry—has a long and honorable heritage" including Presidents Harry Truman, Dwight Eisenhower, John Kennedy, and Gen. Omar Bradley, as well as, more recently, Presidents Nixon, Ford, and Carter.

I strongly commend Mr. Watson's address to my colleagues.

HARVARD COMMENCEMENT SPEECH BY THOMAS J. WATSON, JR., JUNE 4, 1981

What future lies ahead?

There are many things to be optimistic about. The view from the Kremlin is bleak, with nearly everyone on the Soviet borders hostile. The view from Washington sees mostly friends, admirers, or neutrals. The overwhelming vote in the U.N. on Afghanistan should encourage all of us.

On the other hand, an anthropologist writing the history of the past forty years since the first atomic explosion might well conclude that we human beings have been preparing for our own demise.

Like many extinct species, we have had a massive change in our environment. We have finally invented the ultimate weapon and in a mad technological race have connected thousands of them to two buttons—one in Washington and one in Moscow. And with two very slight pressures we can literally do away with the world's two most powerful nations, and leave much of the rest of our planet unfit for human habitation.

Is that our future? The answer hinges on many things. But it hinges above all on us: on the United States' policy on nuclear weapons—on what we and our leaders do about that policy in the days and months immediately ahead. And that is what I want to talk about today.

Let me start out by speaking to today's graduates and those of you who are young.

Throughout the past half century, young people have played many heroic roles. You went to World War II and brought down fascism. You fought and died in the mountains of Korea. Spurred by the challenge of the Russian Sputnik, you made brilliant contributions to American science and engineering, keeping America in the forefront of technology.

You fought heroically in Vietnam. And you worked courageously within the system, joined it in large numbers, became a potent political force, influenced public opinion, and helped bring that tragic war to an end.

We need—and shall always need—this kind of courage and conviction. And especially we need today the courage and conviction of youth to face up realistically to a change of course as a nation—our course on strategic arms control and our whole handling of the nuclear equation.

The hour is late. The imperative of realism and reason is urgent. And we confront many illusions.

First is the illusion of victory—the illusion that one side or the other can start a nuclear war and win it.

Sober commonsense analysis will tell anyone that this is impossible. Consider this illusion in its most popular package:

The Soviets launch a surgical first strike and destroy most of our Minutemen and Titan missiles in their underground silos. Thus they leave us few weapons capable of retaliation in kind—of wiping out their remaining underground missiles. And thus they force us to a choice: attack Soviet cities with our submarine missiles and bombers, thereby provoking a counterattack on American cities from Boston to Seattle; or surrender.

What's wrong with this picture? Lots of things. It assumes—against all commonsense—that the Soviet leaders, notoriously cautious about security, would bet their total nation on at least four foolhardy all-or-nothing gambles:

"The gamble—against all technological likelihood—that their first strike would be essentially perfect—that it would leave few if any Minutemen or Titans to retaliate in kind;

"The gamble that we would not use some of our remaining underwater and airborne weapons, nearly three fourths of our total warheads, to attack the thousands of vulnerable military targets in the Soviet Union other than missile silos;

"The gamble that when our President learned the Soviet misssiles were flying our way he would freeze and do nothing—that he would not send those targeted Minutemen and Titans flying towards Russia's remaining silos before the enemy missiles landed;

"And the ultimate gamble: That in desperate retaliation we would not rain down total destruction on Soviet cities, even though that might mean or own destruction as well."

Make no mistake: That scenario defies all sober analysis. It would be the most risky and ultimately costly gamble in history. By overwhelming odds, the result of any use of nuclear weapons would not be victory. It would be all-out war and total destruction. And in the words of President Kennedy, "The living would envy the dead."

The illusion of Soviet preemptive victory has a corollary: the illusion of achievable American superiority—the illusion that like the Red Queen in "Through the Looking

Glass" we can outrace the danger by going "faster, faster;" outproducing the Soviets in nuclear arms; playing a multibillion-dollar shell game in the desert; hoping that somehow with exotic weapons we can erect a protective umbrella over our country.

So-called nuclear superiority assures no safety—not for the Soviet Union; not for us; because what counts is not superiority but sufficiency—the guaranteed power to destroy the other side under all circumstances. And we both have it.

A quarter century ago, Donald Quarles, then Secretary of the Air Force, and a wise scientist in a Republican Administration, put it succinctly: "Beyond a certain point, the prospect is not the result of relative strengths of the two opposing forces. It is the absolute power in the hands of each . . ."

Think of it this way: Would you, if you sat in the Kremlin, attack the United States, even knowing that you could knock out 95 percent of our weapons, but realizing that the remaining five percent could destroy literally the whole Soviet Union?

Would you, sitting in Washington, attack even a smaller country which had only a thousand warheads knowing that if you missed only ten percent they could wipe out a hundred American cities?

You know the answer: There is no safety in numbers. The war planning process of the past has become totally obsolete. Attack is now suicide.

Yet the pursuit of the mirage of superiority persists. And over the years the two superpowers have piled weapon on useless weapon.

In 1945, when we exploded our first atomic bomb at Hiroshima, we had a four-year lead over the Russians. In 1952, when we exploded our first H-bomb, we had a ten-month lead. The Soviet Union closed the gap despite having a country severely torn by the ravages of a war of a ferocity never visited on our country. And it has kept up in the race, despite the burden of a hopelessly inefficient economy, by ruthlessly channeling its resources, and by calling upon the Soviet people for an endless acceptance of sacrifice.

Between us, our two countries now have explosive power equal to a million Hiroshima A-bombs. We have between us some 15,000 "city killing" weapons—one bomb, one city. Bigger stockpiles do not mean more security. Enough is enough. And we are far beyond that point now.

There is a third illusion, rooted in the belief that nuclear victory is possible and strategic superiority attainable. It is the illusion of nuclear omnipotence—that if we just have more weapons we can use nuclear threats to deter Soviet misbehavior anywhere in the world.

I can think of no quicker prescription for disaster. Our nuclear weapons are useless except for their mission of preventing direct attack on us.

Fourth is the illusion of futility: the illusion that we cannot sign treaties with the Russians because they systematically violate them.

Let us be clear about this: there are major differences between our two countries. Soviet values are diametrically opposed to ours. Contention between us on a global scale is a fact of life. Suspicion is the keynote of our relations.

But having said that, let me add this: on the evidence, the Soviets do keep agreements provided each side has an interest in the other's keeping the agreement; and provided each side can verify compliance for itself.

Look for example at the 1972 Anti-Ballistic Missile Treaty and the Interim Agreement—the two parts of SALT I. The Soviet Union has violated neither. For these treaties do not depend on trust or goodwill. They depend on cold self-interest and unilateral verifiability.

Fifth is the illusion of benign neglect, the idea that if we just muddle along, in the phrase of Dickens' Mr. Micawber, "something will turn up;" that the current aging Soviet leadership, for example, will soon be replaced by enlightened and reasonable men; that the Soviet system will crumble from within; or that we can indefinitely stall on serious negotiations, let the Soviets cool their heels waiting, and use the intervening time for our own advantage—to arm up.

Let us not delude ourselves. We can take no comfort from all these kinds of wishful thinking.

To be sure, the average Soviet Politburo member today is sixty-nine years old. But I have met many of the possible successors, and I can tell you: I foresee no real change. I do not see the Soviet Union becoming more pro-American. I do not see a revolution around the corner. I do not foresee the demise of the rigid system or the rigid thinking that runs it. And I see no chance that the Soviet leaders will be hoodwinked by protracted negotiations while we try to jump ahead in strategic arms.

Finally, we confront the illusion of softheadedness; that anyone who favors an end to the arms race must be soft on U.S. defense or even soft on communism. And we confront its corollary: the simplistic formula "arm up and stand firm," though war would mean losses of 50 to 75 percent on each side.

The illusion of softheadedness is thermonuclear McCarthyism. Because the search for a way out of this morass—the search for an avenue of negotiation and survival instead of confrontation and weaponry—has a long and honorable heritage.

That heritage includes Republicans and Democrats; military and non-military leaders, among them some of the greatest and most tough-minded of our time.

It began in 1946 under President Harry Truman with the proposal of a hardheaded financier, Bernard Baruch, for international UN control of atomic energy.

It continued with President Dwight Eisenhower, who, in his first major foreign policy address, denounced the tragic waste of armaments, and in his farewell message warned against the power of a military-industrial complex.

It includes another great five-star general, Omar Bradley, who nearly a quarter century ago called for the country to turn away from "the search for peace through the accumulation of peril."

That heritage embraces the last legacy of President Kennedy, the nuclear test ban treaty of 1963; the SALT I accords under President Nixon; and the SALT II treaty initiated by President Nixon, continued by President Ford, and completed by President Carter.

SALT II was guided to completion in large part by former Secretary of State Cyrus Vance, who sits on this platform with me today, and for whom I was proud to serve in Moscow. Though the U.S. Senate has not ratified the treaty, it was endorsed by former Secretary of Defense Harold Brown, one of the world's brightest authorities on modern armaments; by Gen. David Jones, head of the joint chiefs of staff; and countless others.

Thermonuclear McCarthyism is a slander against the wisdom of many great Americans.

Against all these illusions, what is the reality? The reality is that thermonuclear war in any form is suicide.

Our imperative is to change our course—to take the only road which offers a viable hope for the future: not a road to unilateral action of any kind, but a road toward the joint continuation of the SALT process; a road to a long series of mutually verifiable treaties.

I know from experience how maddening protracted negotiations with the Russians can be. I know what these negotiations will demand of us: in the words of St. Francis of Sales, "A cup of science, a barrel of wisdom, and an ocean of patience." But we have no choice. Because the longer we drift on without firmly capping the arms race, the graver the dangers we create:

"The danger that a suspected violation, some unforeseen new technology or a sudden quantitative surge will trigger a desperate response;

"The danger that we may further split ourselves from Western allies who fear we lack seriousness about negotiation, whether on SALT or on European Theater Nuclear Forces;

"The danger that each new warhead we or the Russians build inevitably increases the possibility of a thermonuclear accident;

"The danger that a growing dependence on nuclear weapons to defend our interests major and minor all over the globe will someday trap us in a choice between Armageddon and surrender;

"The danger that if we don't act now, we shall lose forever the chance to limit future new devices of unimaginable complexity."

The time for action is at hand. And that action must begin in Washington, D.C.—begin with the same urgency and effectiveness the Administration has shown in confronting our serious economic difficulties; the same urgency and courage the President has shown in already beginning a major buildup in our conventional forces.

President Reagan has pledged to "negotiate as long as necessary to reduce the numbers of nuclear weapons to a point where neither side threatens the survival of the other." Those negotiations have not yet started, and dangers escalate. Each week's delay makes the problem greater.

In response to George Kennan's recent drastic yet creative disarmament proposal, the designated head of the Administration's Arms Control Agency, Eugene Rostow, said not only that the Administration was "taking a serious look" at this proposal but added that "the whole miserable business is mad. We must find a way out."

President Reagan is riding a deserved high tide of popularity. I urge that he seize the moment to find that way out.

The time has come for all of us, under his leadership, to listen to the honored Americans—beginning with Truman, Baruch, Eisenhower, and Bradley—who have called for an end to the insanity of the arms race.

The time has come for all of us to reject the scenarios of the theoreticians mesmerized by computer projections into thinking that the leaders of the Soviet Union would bet their homeland on a lottery chance at victory.

The time has come to realize that our nuclear deterrent is robust under any possible

contingency. Let our politicians and arms technicians stop poor-mouthing it.

Above all, the time has come for a new effort to cap the strategic arms race—cap it through a verifiable treaty which gives both sides the security they require.

SALT II offers a good framework. Minor changes could be made at the negotiating table if necessary. But there is little time before technology and pressures on both sides push us into a new and unmanageable spiral.

We cannot wait for improved Soviet behavior around the world, or for better United States-Soviet relations. Control of strategic arms is not a concession to the Soviets. It must not be linked to irrelevant issues. Those who urge delay take an awesome responsibility on their shoulders.

Twenty-eight years ago in Sanders Theater across the street, a great American journalist, Elmer Davis, delivered the annual Phi Beta Kappa oration. It was a time of darkness and witch hunts and false accusations. And in calling upon friends of freedom to stand up and fight, he quoted the first book of Samuel, which tells of the fear of the Philistines as they faced a formidable foe.

"Woe unto us!" they said. "Who shall deliver us out of the hands of these mighty gods?" But when they looked around and saw that no one else was going to deliver them, they said to one another: "Be strong, and quit yourselves like men; and fight." And they did, and they saved themselves.

The title of that Phi Beta Kappa oration was: "Are We Worth Saving? And If So, Why?" The title of my remarks today might be: "Can We Be Saved? And If So, How?"

I have tried to suggest some answers. And despite the somberness of my theme, I remain an optimist.

I regard the first atomic explosion in 1945 as an arrival—a culmination of mankind's long advance to ever greater mastery over the forces of nature.

I regard that explosion also as a watershed; because it signaled man's capability for the first time to destroy himself and the earth he lives on.

But I do not regard that explosion of 1945 as a beginning of the end.

The time has come for all human beings to realize that we must live together or die together.

I believe we have the reason and the realism and the common sense to choose life.●

TRIBUTE TO DR. EDGAR PALAREA

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. ANDERSON. Mr. Speaker, on June 13, 1981, the Long Beach Medical Association will conduct its officers' installation ceremony dinner at the Long Beach Elks' Club. Foremost on the agenda of that dinner will be the honoring of outgoing president, Dr. Edgar Palarea.

Ed is a man who has become accustomed to excelling in the face of challenges which have confronted him since he moved from Guatemala to the United States as a small boy. He gained academic excellence at Forrest High School, then went on to Bowling Green University and the Tulane University Medical School. After obtaining his medical doctor degree in 1958, he interned at Seaside Memorial Center and Los Angeles Good Samaritan Hospital, then served his 3 year residency in internal medicine at Long Beach Memorial Hospital.

In between these commitments, Ed found time to serve his country as a member of the U.S. Air Force, where he attained the rank of captain. His medical expertise was effectively utilized as officer in charge of laboratories, electrocardiography, minor surgery, mass casualty, and a member of other military health and safety programs.

With a full-time medical career, most physicians would be unable to handle additional burden of civil involvement. But, Mr. Speaker, Ed has met the challenge of civic responsibility with as much energy as he has devoted to his medical responsibilities. He belongs to a long list of organizations, which includes the California Medical Association, the Long Beach Symphony Association, the American Cancer Society, and the Long Beach Police Officers' Association. Additionally, his lifelong love of botany led him to full participation in the American Horticultural Society.

Mr. Speaker, this list of accomplishments is but an excerpt of a résumé which spans over 31 pages. I know that the Long Beach Medical Association is grateful to have Dr. Palarea as its president, and we all remain in his debt for the contribution his work has made to our well-being.

My wife, Lee, joins me in wishing years of continued success for Dr. Edgar Palarea, his wife, the former Marilyn Jacobs, and their children, Victoria Diane, Melissa Allison, Richard Duvall, and Russell Edson.●

U.S. POLICY TOWARD THE PERSIAN GULF—II

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues additional information on United States-Persian Gulf strategy, which was provided to me by the Department of State earlier this year.

These State Department answers are replies to questions I submitted to Mr. Richard Burt, Director of Politico-Military Affairs, subsequent to his appearance before the House Foreign Affairs Committee Subcommittee on International Security and Scientific Affairs on March 23, 1981.

These particular replies focus on the impact of our security assistance in the region, assessments of the Soviet threat to the area, and the sources of instability in the region. The first part of this exchange appeared in a previous RECORD.

The information follows:

1. Over 60 percent of the Administration's proposed fiscal year 1982 security assistance goes to countries in the Middle East-Persian Gulf region. This represents an increase of almost 30 percent over the Carter Administration fiscal year 1981 request.

In commenting on the role of U.S. security assistance and arms sales in the area, a House Foreign Affairs Committee staff report observed:

In some instances additional arms may not significantly enhance the military capabilities of these states to deter the threats they face. Their limited manpower and other deficiences make it difficult for many of them to absorb and utilize effectively some of the military equipment they purchase

Question. How do you reconcile this observation with the Administration's request for significant increases in U.S. security assistance to the region?

Answer. While it is difficult for many of the states in the region to absorb some the military equipment they purchase, we recognize this fact and devote considerable effort to providing training—in many cases through civilian contractors—and scheduling transfers in such a way as to enable the recipients to use the equipment effectively. Our record of success in this regard is good.

Question. What are the risks for the United States as well as for security assistance recipients in this volatile region of increased arms purchases?

Answer. We recognize that there are risks associated with increased arms purchases, including the possibilities of diversion of funds from other useful projects, regional arms races, large American presences, and compromise of U.S. technology. We do what we can to manage the risks and believe that the benefits which result from security assistance far outweigh the risk that remains. On balance, we believe that our security assistance efforts are necessary for safe guarding our national security interests.

Question. If increased levels of security assistance "buy" the United States influence in the region, what can we expect that "influence" to achieve?

Answer. We are not seeking to "buy influence." We are seeking to help regional states to contribute to their own security and the security of the region. It is in our interest as well as theirs that they be able to do so.

Question. How do security assistance and arms sales to key countries like Saudi Arabia, Israel, Egypt, the Yemen Arab Republic and Jordan, in the region impact on the regional balance?

Answer. Since it is a fact of life that not all of our friends in the region are friends of each other, we must be careful not to upset the balance between them. In general we want to help all of our friends improve their capability to deal with Soviet proxy or client threats, and to enhance our mutual capability for dealing with more direct Soviet threats.

Question. How will increased levels of security assistance deter external aggression against countries in the region?

Answer. Security Assistance will help deter external aggression in two ways. First it will give regional states an improved capa-

bility to counter and defeat external aggression, thus raising the price which an aggressor might have to pay. Second, this increased capability will be translated into an increased willingness to resist intimidation.

2. The Committee staff report also observes: While there is among Persian Gulf leaders vastly increased awareness of the Soviet threat to the region, most leaders feel the Soviet threat is essentially a matter for the United States to deal with and this can be accomplished without involving them directly.

Question. Could you please comment?

Answer. Soviet power could be used in many ways and at many levels of violence in Southwest Asia. Soviet options include full-scale invasion, limited direct attacks, efforts to subvert or intervene in internal difficulties, attempts to coerce regional states with threats, and attempts to gain influence through manipulation of intra-regional disputes.

The cooperation and participation of regional states would be necessary to deal effectively with any of these threats. For example, even through the regional states would have little direct independent military effect against a massive Soviet invasion, US forces would need to rely on regional state military and naval facilities, logistics, and other forms of support. Strengthened regional military forces could deter indirect Soviet aggression, and region political stability could prevent the success of Soviet-sponsored subversion.

Question. In what ways does the Soviet Union threaten US interests in the Persian Gulf and Horn of Africa?

Answer. The US has vital interests in the Southwest Asia region:

We and our allies are dependent on the region for much of our oil.

The region is a strategic bridge between Europe, Africa, and Asia. As a trading and industrial power, we are interested in keeping that bridge open.

Our broad interest in regional and global order is at stake. If loosed, the existing tensions in that part of the world could spill over into global conflict.

Control of the Persian Gulf by the Soviet Union would permit the Soviets to manipulate the flow of oil and gas for political and economic objectives inimical to our own.

Even without a direct military intervention, the Soviets could exacerbate regional tensions by exercising political coercion based on unchecked military preponderance.

Question. Is this perception of the Soviet threat shared by our NATO allies?

Answer. The perception of Southwest Asia as an area of paramount interest to the international community and the security of the West is fully shared by our Atlantic and Pacific Allies. In both June and December 1980, the North Atlantic Council meeting at the ministerial level called attention to the implications for the entire Southwest Asian region of the Soviet invasion of Afghanistan. In their communique of December 12, 1980, the NATO Ministers declared that, "Members of the Alliance are prepared to work for the reduction of tension in the area and, individually, to contribute to peace and stability for the region, while protecting their vital economic and strategic interests."

Question. By the countries in the region?

Answer. Since the mid-1970s the Egyptians and the Saudis have warned of Soviet efforts to encircle them. In 1977 the Soviet involvement in the Ethiopian-Somalia war, these and other Arab countries pleaded with the Carter Administration to take the Soviet threat to them more seriously. Afghanistan did bring us to focus on the Soviet threat to the region more clearly, but our slowness to react to the perceived Soviet threat in the region heightened local concerns about our reliability.

Though local states are sensitive to threats other than purely Soviet ones (i.e., the threats posed by the continuation of the Arab-Israeli conflict) they recognize the full range of threats the Soviet pose to them.

The extent to which the regional states and the U.S. share common threat perceptions is reflected in the increasing degree of defense cooperation which we enjoy with regional states. We have signed facilities access agreements with Oman, Kenya, and Somalia. Egypt has agreed in principle to use of Egyptian facilities by U.S. forces in a contingency. At the request of the Saudi government, U.S. AWACS aircraft and crews are on station in the Gulf region.

3. *Question.* In the Administration's view how do regional sources of instability, such as the conflict between Ethiopia and Somalia over the Ogaden, and Iran-Iraq war, threaten U.S. security and economic interests in the region?

Answer. Regional conflicts, such as those between Ethiopia and Somalia or between Iran and Iraq, threaten our interests, among other ways, by increasing the probability of wider regional conflicts, by providing opportunities for Soviet interference in internal and regional affairs, by threatening the security of our friends, and by jeopardizing of access to vital raw materials. In addition, regional conflicts divert the attention of governments from the urgent tasks of economic development and dealing with the strains caused by modernization.

4. *Question.* Will a more visible U.S. military presence in the region retard or contribute to the resolution of these regional problems?

Will a more visible presence help or prevent the United States trying to play a role in resolving these conflicts?

Answer. The evidence of the Iran/Iraq war suggests that although U.S. presence may be of limited use in preventing or resolving a regional conflict, our deployment of AWACs and the presence of Western naval forces served to reassure our friends around the Gulf and thus played an important role in limiting the scope of the conflict and in preventing its spill-over into other areas.

5. *Question.* To what extent do the following indigenous sources of instability threaten US interests in the Middle East, Persian Gulf, and Horn of Africa?

Poverty, malnutrition, underdevelopment;

Unequal distribution of wealth;

Cultural and religious factors; and

Lack of access by the people to the political decision making process.

How will over $2.5 billion in security assistance to this part of the world mitigate these sources of instability and unrest?

Is it not the purpose of economic assistance programs to address many of these indigenous problems?

If so, why isn't the Administration proposing an increase in the fiscal year 1982 economic assistance program commensurate with the proposed increase in security assistance?

Answer. As the list above suggests, there are a number of possible sources of instability in the Middle East, Persian Gulf, and the Horn of Africa. Viewed in isolation, however, it is difficult to state with precision the potential threat that they might pose to US interests in the region.

Until now at least, and with the notable exception of Iran, most of the governments in the region have been able to make progress toward alleviating these problems and to retain a fairly high level of popular support. However, I think it is also clear that in recent years the Soviet Union has increasingly sought to take advantage of the underlying causes of tension present in many key regions in order to foster instability. This course of action has serious implications for US interests. We seek to create a secure environment so local states can address their internal problems.

Moreover, to the degree that we can employ our development and security assistance to alleviate the causes of unrest you have cited, we will be serving our own foreign policy and security objectives as well as helping recipient nations to better their social and economic conditions. With respect to the role which our security assistance programs play in this regard, I would note that a large part of the major Economic Support Fund programs we are requesting for countries in the region is specifically designed to combat the developmental and social problems you have noted.

Although budgetary constraints necessarily have had their impact on our fiscal year 1982 request for development programs, I would point out that the levels we are proposing constitute a 14 percent increase over those available in fiscal year 1981.●

STATEMENT ON INTRODUCTION OF H.R. 3857

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. GIBBONS. Mr. Speaker, today I am introducing legislation to reassure lessors of automobiles and trucks of their continued entitlement under the tax law to investment credits, depreciation deductions, and other capital cost recovery tax allowances. I intend to work to secure action by the Committee on Ways and Means approving the substance of this bill as a part of the capital cost recovery provisions of the tax bill which that committee soon will be at work developing.

The need for this clarifying legislation arises from release by the IRS national office in May 1980 of a "technical advice memorandum." The technical advice took the position that presence in a motor vehicle lease of a "terminal rental adjustment clause" of a kind traditionally used for more than 30 years by the fleet vehicle leasing industry should cause the lease negotiated by the parties for their business purposes not to be treated as that for tax law purposes. The position taken by the Service in the May 1980 technical memorandum was a reversal of the one it had generally followed on audit in the past. The change of position reflected in the technical memorandum was made without benefit of any prior

notice to the public or to Congress and without the holding of any public hearings to allow interested persons to state their views on the issues of economic and tax policy connected with the change. In spite of a U.S. Tax Court ruling in April of this year that the new position was wrong, the IRS is continuing to apply its new position in the audit of selected car and truck lessors.

My bill solves the problems created by the technical advice memorandum for future as well as past years. It does so in a way that does not prevent—but also does not require—the Treasury Department and Internal Revenue Service from making a careful study of the policy and technical issues that would be involved in not treating a business lease as such for tax purposes. The amendment would, however, require any proposals for change growing out of the study to be implemented only through submission to Congress for legislative enactment. Thus, motor vehicle lessors planning to invest billions of dollars in fleets of automobiles or trucks will have in the tax law the assurance they need actually to invest those billions in the way intended to be induced by our capital cost recovery tax program.

In accordance with the theory and result of the recent Tax Court decision in the Swift Dodge case, the bill should be viewed as declaratory of existing law.●

SOVIET ENERGY AND THE FUTURE OF THE WEST

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 9, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, recently I received an advance copy of a forthcoming article soon to appear in Policy Review, a quarterly journal published by The Heritage Foundation. Entitled "Soviet Energy and the Future of the West", authors Steven C. Goldman and Wayne A. Schroeder underscore the critical importance of Soviet energy developments to Western security and set forth a positive realistic approach to Western energy needs.

Last November, the Carter administration approved major U.S. participation in the Soviet Union's Yamal natural gas pipeline project. To be built and funded with Western financial, material, and technological resources, this project—if given final approval—involves the construction of a 3,600 mile pipeline from Northwestern Siberia to West Germany. Once completed, Western Europe expects to benefit from a promised delivery of approximately 1,500 billion cubic feet (bcf) per year of natural gas to help alleviate its dependence upon Middle East sources.

Western European countries are anxious to begin work on this project. At four times the size of the Alaskan pipeline, the Yamal project would create considerable business for those European energy equipment manufacturers presently in need of contracts. In addition, it would satisfy the need for the diversification of enegy supplies necessary to lessen European dependence on OPEC.

There are, however, inherently significant dangers in furthering Western European economic dependence upon the Soviet bloc. To an increasing extent, Western Europe has become vulnerable to economic blackmail. The Yamal pipeline deal—expected to supply 30 percent of West German natural gas imports—would dramatically increase this vulnerability and possibly undermine NATO.

To persuade the Europeans to reconsider their policy of growing dependence upon Soviet natural gas, it is necessary to convince them it is in their own long-term interest to do so. This requires a creative and realistic alternative program.

Authors Goldman and Schroeder present such a comprehensive program. Designed to reduce European energy reliance upon the U.S.S.R., increase United States-European energy and economic cooperation, and contribute to the strategic security of the United States, this plan would include the following:

First. An expanded U.S. coal export program which would contribute to U.S. employment and balance of payments objectives;

Second. An expanded European participation in the development of the U.S. coal export infrastructure and our synthetic fuel industry, thereby providing the economic boost these sectors of our economy require to meet their full potential;

Third. An aggressive U.S. re-entry into the nuclear reactor services market in Western Europe;

Fourth. The encouragement of increased North American energy relationships, in order to free up more OPEC energy for our NATO Allies;

Fifth. The accelerated development of Norwegian hydrocarbon supplies, financed by the alliance; and

Sixth. The encouragement of our NATO allies to purchase African liquefied natural gas (LNG).

Should this effort be undertaken, the gains for the United States and Western Europe would be tremendous. The security of all Western Nations would be strengthened. Western Europe would be assured of reliable energy supplies. Americans would be put back to work. The economy would receive a much-needed input. The bonds between the United States and its allies would be enhanced. And America would regain her proper role as the leader of the free world.

I commend this article to my colleagues. Part I is as follows. Parts II and III will be published tomorrow and the day after.

SOVIET ENERGY AND THE FUTURE OF THE WEST

(By Steven C. Goldman and Wayne A. Schroeder)

The United States and the Soviet Union are the two largest energy-producing and consuming countries in the world. During the last decade, the U.S. witnessed a sharp decline in its relative energy position and became dangerously reliant upon foreign imports. This reliance has had profound political and economic implications and had made us think of energy in strategic terms. During the 1970s, the Soviets did not experience severe domestic energy problems and remained major exporters of hydrocarbons.

In the upcoming decade, it appears that America's position will remain extremely precarious. But the U.S.S.R. will also begin to experience rapid deterioration of its energy position and it too will be confronted with severe strategic dilemmas. What are the dimensions of this Soviet energy crunch and what are its implications for the future of the West?

In April 1977 the CIA published a major report indicating that the U.S.S.R. was on the verge of a severe oil production crisis and that Soviet petroleum output will peak no later than the early 1980s. Furthermore, the report projected that Soviet oil production would decline from a high of about 12 million barrels/day (MMB/D) to 8-10 MMB/D by 1985. Currently, the Soviet Union is the world's largest oil-producing country and has been able to maintain its goal energy self-sufficiency while exporting to both Council of Mutual Economic Assistance (CMEA) partners and hard currency markets. The Soviet ability to accomplish these objectives would be severely constrained if worst-case projections regarding their petroleum industry were to hold true. A major oil production crisis in the U.S.S.R. would have the most profound consequences, because their coal industry is stagnant, their nuclear program is behind schedule, their renewables program (solar, geothermal, wind) is almost nil, and their only prospective bright spot is the gas industry.

It has been argued that the United States should be alarmed by this prospect for the following reasons:

1. *Soviet politico-military pressures on the Persian Gulf.* An energy-deficient U.S.S.R. might seek to solve its oil shortfall problems by applying increased pressure on the key producing countries in the Gulf, which could lead to direct Soviet military intervention.

2. *World oil market considerations.* Even assuming that Moscow refrains from using military force to obtain oil on concessionary terms, its entry into the world oil market would lead to general supply constraints and upward price pressures.

3. *Allied dependence on Soviet energy.* Our NATO allies are dependent upon Soviet oil and gas imports. In order to promote "strategic supply diversification" outside the Persian Gulf, they are seeking to expand greatly their energy relationship with the U.S.S.R. through the Yamal gas pipeline that will link the major gas fields of Northwest Siberia to Western Europe. Since the U.S. has no well articulated or reasonable

energy alternatives to offer our allies, and since we support the concept of "strategic supply diversification," the prospect of a Soviet energy crunch is not comforting. Furthermore, it can be argued that the U.S.S.R. is a more reliable supplier than the Arab oil-producing countries because they have refrained from using the price/supply lever in a political context and have treated energy trade as a largely commercial exchange.

Accordingly, many Western experts have argued that the U.S. should sell energy production equipment and technology to the U.S.S.R. in order to help them develop their energy resources. During the 1970s, Moscow imported large quantities of Western oil and gas production equipment, particularly during the latter half of the decade (see Table 1).

TABLE 1. SOVIET IMPORTS OF WESTERN OIL AND GAS EXPLORATION AND EXTRACTION EQUIPMENT

[In millions]

	Purchases from United States	Total purchases from the West
1972	$4.6	$19.4
1973	4.3	23.5
1974	.5	9.0
1975	49.5	150.1
1976	40.6	226.5
1977	29.3	121.0

Note: These figures do not include turn-key manufacturing equipment.
Source: Office of Technology Assessment, Technology and East/West Trade, p. 239.

There is no doubt that Western equipment and technology plays a key role in the Soviet energy sector. The U.S.S.R. is in need of Western assistance not only to search for new oil but also to maintain current production levels. Most U.S. oil and gas transfers were sales of priority equipment to be used primarily at mature producing fields. Perhaps the most conspicuous energy technology transfer to the U.S.S.R. occurred in 1978 when the Carter administration approved the sale of a Dresser Industries turnkey drill bit factory. Once completed, this sophisticated factory will produce drill bits in sufficient quantity to insulate the U.S.S.R. from the necessity of making further drill bit purchases in Western markets. More recently, the Carter administration signalled its support for the Soviet/West European gas pipeline by approving the sale of Caterpillar pipelayers to the U.S.S.R. for use on this project. Despite the other competitive aspects of U.S./U.S.S.R. relations, it has been U.S. policy to support energy development in the Soviet Union in the interest of preserving world peace and maintaining world energy security.

In implementing a liberal export control policy toward the U.S.S.R., American decision-makers uncritically accepted the notion that an energy-abundant Soviet Union is in our best interest. The U.S. has adopted this stance in large measure because American leaders underestimated the broad strategic and security problems associated with the growth of a Soviet energy giant. Unless a potential technology transfer had a direct input into the Soviet military machine, it was not considered as a strategic item. The following written exchange between Senator John Heinz (R-Pa) and former Under Secretary of Defense William Perry pursuant to the 1979 Senate Banking Committee Hearing illustrates this point vividly:

Senator HEINZ. In your view, would it be in the national interest of the United States to provide the technology necessary to facilitate the development of the energy resources of the Soviet Union, insofar as such technology would not have applicability to the military sphere. . . .

Under Secretary PERRY. . . . Strategically . . ., the debate is of limited importance. Substantial additions to Soviet oil production would not necessarily increase Soviet military capabilities directly. . . .

The time has come for us to reconsider this interpretation of a critical issue and to subject the conventional wisdom to closer scrutiny. A multifaceted and compelling case can be made in favor of adopting a restrictive U.S. energy export control policy, and promoting different energy options for our European allies.

In the past, arguments made in favor of restricting U.S. energy exports to the U.S.S.R. have been articulated predominantly in terms of those exports' military utility to Moscow. While this argument indeed has substantial merit, it should be tied in with a series of corollary, supporting arguments concerning the credibility of the Western security guarantee for the Persian Gulf, the negative implications of having U.S. allies dependent upon Moscow for a major portion of their energy supplies, and possibilities for increasing U.S./West European energy cooperation. A macro-political/economic analysis of the strategic implications of energy technology transfer to the Soviet Union will demonstrate that it is in the national security interests of the United States and the West to constrain Soviet energy development during the coming decade while developing an alternative energy security program.

HOW IMPORTANT IS SOVIET ENERGY?

Proponents of a liberal export policy maintain that the energy issue is of limited military/strategic importance because the Soviets will always give their defense industry top priority regardless of other considerations. There is no doubt that the Soviet Union considers military priorities before the needs of other sectors, and that the Kremlin has been willing to demand sacrifices from its consumers in order to satisfy the military's almost insatiable demands. However, there is no reason why the U.S. should make the Soviet resource allocation debate easier by selling equipment and technology that the U.S.S.R has chosen not to develop.

Currently, the U.S.S.R. Defense Minister is in an excellent bureaucratic position to argue in favor of priority allocations of resources and personnel on the grounds that military hardware cannot be purchased in the West—oil/gas production and exploration equipment, on the other hand, is available to the Soviet Union in Western markets. Therefore, given the fact that there are more limited incentives for the Soviets to reallocate resources away from their military sector and into their energy sector, it can be expected that current trends will prevail.

The Soviets have historically been unwilling to reform their economic system to provide the economic incentives needed for indigenous technological innovation in the civilian sector. While Soviet basic science is quite good, the Soviet economic system, based upon overcentralization and the inefficient principles of socialist planning, has stifled technological innovation at the design and manufacturing stages. The U.S.S.R. has not devoted its limited quality controlled resources to peaceful purposes. They have instead sought out technology and equipment transfers from the West as "quick fixes" which can allow them to maintain current economic priorities and continue their military build-up.

The release of Soviet resources for use in the military sector which otherwise could be tied up in civilian-oriented research and development is a profound consequence of past U.S. technology transfer policies in both the energy and industrial areas. As William T. Lee wrote in *Soviet Defense Expenditures in an Era of SALT:* "Seldom, if ever, has a country been able as the Soviet Union has to persuade the countries against which most of its military build-up is directed to finance so much of it."

U.S. export control policy should be reformulated to make the costs to Moscow for continuing this military build-up increasingly prohibitive. This is not to say that the military will not continue to have first call on Soviet economic resources. Rather, it is meant to force the Kremlin into making difficult judgments as to its long-term priorities. Diversion of Soviet resources toward indigenous energy research and development and away from military expenditure is the first element in this process. Restrictions on badly needed infusions of Western energy equipment and technology will have an impact on Soviet industrial development and overall economic growth. No prudent Soviet economic planner could afford to ignore the political consequences that static or negative economic growth would have on his own position with the Soviet bureaucratic hierarchy. While the Soviet military will continue to be the first priority in Soviet economic planning, it need not have so large or prominent a share. It is in the national security interests of the U.S. to retard the growth rate in Soviet military expenditure by the reasonable means that are available to us.●

HOUSE OF REPRESENTATIVES—*Wednesday, June 10, 1981*

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. FOLEY).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C., *June 10, 1981.*

I hereby designate the Honorable THOMAS S. FOLEY to act as Speaker pro tempore on today.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We come before You this day, O God, in thanksgiving for Your promise to be with us always, even to the end of the age. But as we exult in the blessings of life and liberty, we are too aware of those in whom this day brings uncertainty and fear. In spite of the woes and anxieties of our times, grant us the refreshing quality of new hope that Your word allows, that we may go forth with the faith that Congress doubt and the love that overcomes evil. In Your name we pray. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 88. Joint resolution designating the week commencing June 14, 1981, as "National Softball Week."

THE LESSON OF BAGHDAD

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, 19 years ago all Americans supported and applauded President Kennedy's grim determination to take any action necessary to remove from Cuba offensive missiles aimed at the United States. Today there is not a Member of Congress who would not support President Reagan were we confronted with hostile nuclear capabilities by Castro's Cuba. The American people would indeed rejoice if the U.S. Air Force in a brilliant, preemptive strike destroyed Cuba's nuclear facilities. We would proudly and rightly call it an essential exercise of legitimate self-defense.

Well, Mr. Speaker, last Sunday the surrounded and beleaguered Israelis did exactly what we would do in our part of the world should the occasion arise. Instead of filling the air with holier-than-thou pontificating, we should learn the real lessons of Baghdad: First, that we and our allies must put the goal of nuclear nonproliferation at the top of our national security agenda; and, second, that democratic and free societies should be admired and applauded when they demonstrate their determination and ability to fight for their own survival.

THOSE WHO LIVE BY THE SWORD DIE BY THE SWORD

(Mr. ROSE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROSE. Mr. Speaker, I realize that I am just a slow southerner, but it is just beginning to dawn on me that the chief ingredient of Israel's foreign policy is hutzspah.

As one Member of this body who has voted in the past for all sorts of aid to Israel, I have strong reservations about the vision of its leaders after the recent attack on Iraq. Israel needs a savior to lead it as never before, but one that understands the Biblical wisdom that, "Those who live by the sword die by the sword."

I am not sure the voters of Israel have much to look to in the upcoming elections, but I am sure of one thing; that is, an ever-increasing number of Congressmen in this body have voted them swords for the last time.

NEW BUDGET STUDY COMMENDED TO THE HOUSE

(Mr. DANNEMEYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANNEMEYER. Mr. Speaker, it has come to my attention that in the appearance of the distinguished Speaker on the ABC-TV program "Issues and Answers" over the weekend, the gentleman from Massachusetts expressed concern over the impact of President Reagan's bipartisan tax package on the budget deficit. The gentleman seemed to suggest that he was concerned about the effect that this deficit would have on the rate of inflation in our economy.

As one who has long believed that deficit spending is the principal engine of inflation, I am pleased to learn of the distinguished Speaker's comments in this regard. I would add, however, that budget cuts, tax cuts, and a balanced budget are not all mutually exclusive. Due to concern over budget deficits, however, I wish to bring to the attention of the gentleman from Massachusetts a budget study draft I am circulating which contains 272 specific, additional cuts in fiscal year 1982 spending which total some $52.3 billion. These added reductions would help ease the budget deficit in the coming and future years. It would also make it possible to provide the tax relief for all Americans which is so desperately needed.

In the spirit of bipartisanship, I commend this budget study to the attention of the House. On the Sunday television program, the issue of budget deficits was raised and today I believe I am helping to point us toward the answer.

MILITARY LEADERS MUST PROVIDE ADEQUATE, COST-EFFECTIVE PROTECTION

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, there is no doubt that the most essential role of the Federal Government is to provide for the national defense. Above all other responsibilities we undertake, our first concern must be to defend this Nation against external foes.

Until recent years, the resources we expended for domestic purposes were limited enough that our military expenditures did not have to compete for dollars. However, once the Federal Government embarked on a massive spending campaign to eradicate poverty, the balance between the two priorities meant that defense spending would often take a back seat to the politically popular programs of domestic assistance.

It is of course unfortunate that larger amounts of our productive capacity and our wealth must be committed each year to weapons of war. However, in the recent past we have dwelt too much on this aspect. We have often ignored in our discussion of these issues the simple fact that our spending is a response to much greater spending that is undertaken with the explicit goal of world subjugation. This country is a reluctant participant in the arms race but a participant, nonetheless, that stands between the free world and those who would destroy it.

I firmly believe that there is waste, fraud, and abuse in the military. Any bureaucracy of that size carries with it a certain amount of excess baggage. I do not doubt that we have undertaken projects that have resulted in unwise and unexpected expenditures. But we cannot rectify these mistakes at the risk of damaging our ability to defend ourselves. That is the real difference between military and nonmilitary spending: One provides us with an additional degree of comfort in a society that is rich in opportunity and accomplishment while the other stands between the very preservation of that society and ruin.

It is the spirit of times that often dictates whether what we are spending is appropriate. During President Kennedy's tenure we spent a larger percentage of the GNP on defense than we will under President Reagan and that establishment was referred to as the arsenal of democracy as opposed to pejorative military-industrial complex.

I believe that today, in this new era of enlightenment concerning military needs we can in fact go after waste, fraud, and abuse in the armed services as we will in other areas of Government. During my campaign, I was often asked why conservatives did not battle waste in the military with the same ferocity it was battled in welfare programs. My reply was that because defense was so often under attack by those whose aim was not so much to make it cost-effective but to make it less effective, it was necessary to remain silent about the fat in order to protect the muscle. A theory I did not necessarily agree with, but which I understood.

Under President Reagan and with more persons understanding the precarious nature of our deterrent I am confident that our defenses can be strengthened not only by increasing the dollars we spend but by making better use of those dollars. If this spending is accompanied by solid cost consciousness, a reduction in waste and mismanagement, and possibly a restructuring of the procurement process, then we shall witness an even greater enhancement of our strategic and conventional capability.

The whole idea is to make best use of the future budget increases by enhancing the cost effectiveness of presently funded programs. This can be done by identifying programs and practices in need of revision.

The Defense Department's procurement process is a gigantic, complex procedure which is badly in need of revision. Substantial savings can be realized by the implementation of incentives for both DOD and its contractors. These incentives should take the form of a carrot and stick which can spur capital investment, better planning, and more efficient production.

Secretary Weinberger has directed Deputy Secretary Carlucci to review the military's acquisition process in order to examine and apply some of the fantastic economics which are possible in procurement. A number of suggestions are already being put into effect by the Reagan administration, including some multiyear contracting and accelerated delivery time goals for hardware and civilian services.

The military departments have estimated that "upward of $15 billion can be saved over the next 5 years by multiyear procurement" and other efficiency oriented measures. These estimates give some idea of the enormous potential for savings which lie in an overhaul of procurement practices.

I have been recently selected as a member of the House Republican Defense Task Force. This task force has as its single goal, the improvement of this Nation's ability to defend itself. We have recently completed a report which drew upon some 500 pages of past congressional testimony. We found that many things could be done to improve the way we procure weapons. Some specific examples include:

First, allowing multiyear contractual arrangements, as well as some full funding for established programs, where cost effective.

Second, implementation of a 2-year budget cycle instead of the present 1-year cycle; this would encourage longer range contractual planning and arrangement.

Third, reduce regulation and complexity of contracts. This would yield a reduced amount of paperwork and increase the level of competition for contracts by attracting additional bidders.

Fourth, make attempts, wherever feasible, to expand contract bidding competition. Presently 45 percent of DOD contracts are not bid on by more than one contractor. This causes auditors concern about the possibility of excessive profits and reduced efficiency. Competition should be introduced for development as well as production. Introduction of competition often reduces procurement costs by 25 percent.

Fifth, finally, insure that experienced managers are in charge of weapons development and procurement—give them latitude to operate. Giving managers room to move is vitally important as it enables them to identify and select the most cost-effective alternatives.

The pervasive thrust of all the studies I have seen is that strong leadership and guidance in every branch of the Government and within the military can reduce wasted spending and enhance the use of budgeted funds.

The establishment of program discipline—and the discipline is the key to effective use of funds and reduction of waste—is fundamentally a leadership challenge. A challenge which must be met with a cooperative effort from both the military and Congress.

Congress must also do its share or the military's efforts will be wasted. Congress should put the Nation's interests ahead of political considerations. For example, the DOD in the last 5 years has suggested 634 base closings or reductions which would have resulted in a savings of $443 million. To date, Congress has not acted on these suggestions.

Strong leadership from both sectors and cooperation with, and from the Congress, and the administration, is necessary for developing a comprehensive spending reduction strategy. If such an effort is successful, we can significantly improve our military posture. The ensuing monetary savings—as much as $25 billion in the next few years, will benefit the Pentagon and further the administration's fiscal austerity plan as well.

While responsible spending of the taxpayer's dollars must be for any governmental department, an end in itself, this truism takes on added significance for the military.

We now have an administration which fully appreciates the critical importance of an effective and well-prepared defense. Among most of my colleagues on Capitol Hill, this is the prevailing consensus, and among the broadest portion of the American people, the realization exists that the best way to prevent war is to be prepared for it.

How long this consensus will last I cannot say. I do know, however, that the life and intensity of this consensus resides ultimately with the civilian and military leadership. I strongly believe that public confidence in the military will only last as long as the perception that our civilian and military leaders are providing adequate protection, which is above all, cost effective.

PERMISSION FOR COMMITTEE ON RULES TO FILE REPORTS ON SUNDRY BILLS

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight to-

night to file reports on the following bills:

H.R. 2614, Department of Defense supplemental authorizations, 1981;

H.R. 3413, Department of Energy, National Security and Military Applications of Nuclear Energy Authorization Act of 1982;

H.R. 3023, Naval Petroleum Reserves authorization for fiscal year 1982; and

H.R. 3481, Pretrial Services Act of 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

GENERAL LEAVE

Mr. EVANS of Georgia. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks with respect to the special order honoring and paying tribute to the Honorable Carl Vinson.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

A TRIBUTE TO A GREAT GEORGIAN AND A TRUE AMERICAN, THE HONORABLE CARL VINSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. EVANS) is recognized for 60 minutes.

Mr. EVANS of Georgia. Mr. Speaker, I have the distinct honor and privilege of asking unanimous consent for special orders to pay tribute to the Honorable Carl Vinson.

Last week at the age of 97, former Congressman Carl Vinson of Milledgeville, Ga., passed away. We are not here today to mourn his death but rather to celebrate the life of this most remarkable man and to preserve his accomplshments for all time.

Carl Vinson, having received a law degree from Mercer University in Macon, practiced law in his hometown of Milledgeville. He served as county solicitor, State representative in the Georgia House of Representatives, and as county judge.

It was in the year 1914 that Georgians of the Sixth District elected Carl Vinson, a man who would soon become "the champion of peace through strength" and "guardian of this Nation's security." It was here that the remarkable Mr. Vinson, elected as the youngest Member of Congress at the age of 30, was to remain for over 50 years of devoted service on behalf of the people of Georgia.

He was elected upon the outbreak of World War I in Europe. Mr. Vinson soon won a seat on the House Naval Affairs Committee where he began his dedication to military forces and a strong national defense. From 1931 to 1947 he served as chairman of this committee until the Republicans became the majority party in the House. In 1949, the Georgia Congressman became chairman of the House Armed Services Committee which he retained until his retirement at age 81.

As chairman of this powerful House Committee, Mr. Vinson exercised great legislative power for almost half of a century. The most important laws that we have on the books today, relating to defense, are products of the Vinson committee.

During his tenure, if there was ever one that could be termed an "iron fist in a kid glove" it was chairman Vinson, around whom admirals and top Pentagon officials quivered yet a man whom they deeply respected. He was as casual with these famous Government officials and heroes as he was with his constituents from his rural Georgia home. The chairman has been termed the "backstage boss of the Pentagon." Carl Vinson, the father of the U.S. Air Force, never liked to fly. He turned down Secretary of Defense yet 9 Presidents and 18 Secretaries of War attended the Vinson School of National Defense. Once when under consideration for Secretary of the Navy, the Armed Services Chairman said, "I've got all I can say grace over right here." Later when considered for Secretary of Defense he reaffirmed, "Shucks, I'd rather run the Pentagon from up here."

The profound respect he enjoyed from his colleagues never once affected his outlook. He, in fact, discouraged his colleagues on two separate occasions from holding floor tributes on his behalf. His sense of humility and humor were enjoyed by all. Once, when told of his vast influence he quipped, "I disclaim the influence attributed to me, but I trust that others will accept it as gospel truth!" According to a 1971 article in Reader's Digest:

> His power is evident in numerous Presidential communiques. President Roosevelt, writing to Uncle Carl about a prospective Navy law, ended his letter by penning an appeal in longhand: "Do please come talk over this personnel problem."

The popular magazine referred to him as "Uncle Carl" as did everyone with great affection. "Uncle Carl," "Mr. Defense," "Mr. Pentagon," and the "Swamp Fox"—all terms for the same man, the dean of the House of Representatives and the Georgia delegation. The name Swamp Fox was given because of his similarity to the original swamp fox, Francis Marion, the South Carolina planter who became a general and master strategist in the Revolutionary War. Carl Vinson was a master strategist of modern times.

Mr. Vinson served in Congress with eight Presidents and outlived them all. He had close working relationships with those from Woodrow Wilson to Lyndon B. Johnson. President Johnson once referred to the prominent Representative as "one of the great Americans of the 20th century." He lived through the horse and buggy days to nuclear development.

Former President Richard Nixon pointed out that the United States had just begun to develop nuclear carriers. The first one was named the *Nimitz* after an admiral, the second was named the *Eisenhower* after a President, and the third the *Carl Vinson* after a legislator. The dedication of the mightiest warship ever constructed, the U.S.S. *Carl Vinson*, was on March 15, 1980, at Newport News, Va., witnessed by the most impressive gathering of opinionmakers in many years. The $2 billion ship marked the first time a U.S. ship had been named for a living American, an American who was present at her dedication. This landmark to a magnificent man bears the quote, "No person representing the American people should ever place the defense of this Nation below any other priority—Carl Vinson."

As his great nephew, Senator SAM NUNN states it, "Carl Vinson's service began with a Springfield rifle and ended with the ballistic missile." Carl Vinson's dedication to a strong national defense was deeply rooted in his belief in peace as expressed in 1916 in one of his first major speeches to Congress, "I devoutly hope the casting of every gun and the building of every ship will be done with a prayer for peace."

A bulwark in the area of national defense, a legend in his own time, and a devoted companion to his friends has passed away; but his accomplishments will not be overlooked in the pages of American history. This country owes him a great debt. We, as Americans, are thankful to Carl Vinson for a secure nation, a strong military, and for over 50 years of service. I am in awe of his unsurpassed dedication to Georgia, the Congress, and the people of this Nation. I challenge all of my colleagues, in his name, to carry out his original mission with the same fervor of the remarkable Mr. Carl Vinson.

Thank you.

□ 1015

Mr. BRINKLEY. Mr. Speaker, will the gentleman yield?

Mr. EVANS of Georgia. I would be happy to yield to my colleague from the Third District of Georgia.

Mr. BRINKLEY. Mr. Speaker, I thank the gentleman for yielding.

First, Mr. Speaker, I would like to commend the gentleman from Georgia, the gentleman from the Eighth District of Georgia, for arranging this

special order today on one of Georgia's most distinguished sons, Mr. Vinson.

Mr. Speaker, we are meeting today to honor the memory of former Representative Carl Vinson of the State of Georgia, who died last week at the age of 97. We all know he was a great man, but, sadly, many of those who could describe him best are themselves no longer Members of this body.

For instance, among our State delegation, I have been here longest—and, on special days, like last Thursday when I stood here for many hours debating the merits of the Mil-Con Authorization Act, feel like I spent a full lifetime here myself. Yet, neither I nor any other Member of the House or Senate from Georgia now serving was privileged to serve even 1 day with Carl Vinson.

Another reason it is difficult to put his service into perspective is because of its length. Some comparisons come to mind as I examine the record of other Members who have served the Republic from my district, the third, since the War Between the States.

Charles Crisp of Americus, who served as Speaker of the 52d and 53d Congresses, was here for 14 years; his son, Judge Crisp, was here for 22; Mr. Pace and Mr. Forrester, like Speaker Crisp, served for 14 years. My own service is entering its 15th year. Yet, Carl Vinson had been a Congressman for 16 years when I was born, and, incredibly, his service here spanned a time period for as long as I have been alive.

So you see, Mr. Speaker, we are dealing with a true exception in the annals of Congress, and his service was so unique that we, admittedly, have trouble comprehending it.

Still, Mr. Speaker, if we lack the benefit of having witnessed much of his career, we do not lack an understanding of the benefits his career bestowed on our Nation.

Mr. Vinson served in good times, as well as bad—during two world wars and the Korean war; and during the Great Depression. But men like him with continuity and seniority were the glue that held the country together. He minded the store while at the same time being mindful of the people back home to whom he was responsible and accountable.

And, Mr. Speaker, we know that in recounting the scope of his service and the significance of his accomplishments, we have not really looked at the man, just at his footprints. For, in truth, the source of Carl Vinson's greatness, like that of all who fit into that most select category, lies not in the length he served or the ends to which he served but in the way he served.

That was the magic of the man we are honoring.

Mr. BARNARD. Mr. Speaker, will the gentleman yield?

Mr. EVANS of Georgia. I yield to my colleague from the 10th District of Georgia.

Mr. BARNARD. Mr. Speaker, it is an honor for me to join with my colleagues today to pay tribute to the man who served in the House of Representatives longer than anyone else in history, Carl Vinson of Milledgeville, Ga. Carl Vinson's record of more than 50 years of service in the Congress is extraordinary indeed, but the record of his accomplishments during that half century is equally unsurpassed.

In resolutions presented to the House of Representatives upon the passing of George Washington in 1799, Henry Lee described the great General Washington as "first in war, first in peace, and first in the hearts of his countrymen." Nearly two centuries later, these words are a fitting epitaph for Carl Vinson.

First elected to Congress in 1914, Carl Vinson quickly established himself as a leading spokesman for a strong America. Throughout the uneasy peace of the 1930's, his often lonely voice urged preparation for a war he did not want, but feared was coming. From 1930 to 1946 he chaired the House Naval Affairs Committee and in that capacity became the primary force behind the development of a two-ocean Navy. Had he not fought tirelessly during those years, and prevailed, in his quest for a Navy, second to none, America's task in World War II would have been infinitely more difficult, and the cost of victory much greater.

In the years following World War II, Carl Vinson—now chairman of the House Armed Services Committee—maintained his firm belief in preparedness as the key to peace. Mr. Vinson summed up his philosophy on the occasion of a celebration honoring his 90th birthday:

> In two thousand three hundred years of recorded history there have been only two hundred and seventy years of peace. The lesson is plain: We must always be prepared for war, for only in this way can we avoid war.

Always a man of peace, Carl Vinson knew that peace and freedom could only be maintained through strength.

No American in the 20th century has contributed more toward that goal than Carl Vinson. Many of our greatest leaders—Presidents, Cabinet officials, and legislators—took their lessons in national security from this man. As a monument to his legacy, our country's third nuclear aircraft carrier was, in 1980, christened the U.S.S. *Carl Vinson* on its keel a plaque bearing Mr. Vinson's own words:

> No person representing the American people should ever place the defense of this Nation below any other priority.

It is appropriate that the former Congressman from Georgia thus became the only living American to have a Navy ship named after him.

In the hearts of Georgians, Uncle Carl Vinson will be remembered as a devoted friend, a compassionate human being, and a loyal public servant. All Americans will remember him as a distinguished statesman whose dedication to his country was absolute, and whose wisdom and foresight made him a giant among legislators of the 20th century.

Mr. GINN. Mr. Speaker, will the gentleman yield?

Mr. BRINKLEY. I yield to my distinguished colleague from the First District of Georgia.

Mr. GINN. Mr. Speaker, I desire also to commend my colleague from the Eighth District of Georgia (Mr. EVANS) for arranging this special order today.

Mr. Speaker, I rise today to join my colleagues in recognition of the achievements of one of the greatest American legislators in the history of our Nation, the late Carl Vinson of Georgia.

I shall not attempt to recite Mr. Vinson's list of achievements as a Member of this body because they are already a legend in the Congress, and they will forever be a part of our history and our heritage.

I come instead to say that, in a sense, this is a day on which I believe the ordinary roles are reversed. We do not come now to honor the memory of Carl Vinson. We come in recognition of the fact that Carl Vinson was a man who brought honor to all of us, and to the institution of the Congress.

The House of Representatives and the Congress is no better or no worse than the men and women who serve in it. The Congress is not this great and beautiful Capitol Building or this majestic Chamber. Rather, the Congress is the people who are elected to serve in it, and the Congress is measured by the strengths and weaknesses of those people.

That is why Carl Vinson is a legend in these Halls. It is not because he served in the Congress for 50 years, longer than anyone in history. Nor is it because he was for 30 years a committee chairman.

Carl Vinson is a legend here because he was the best of the special human qualities which make our country great.

He was a man of great power who declined the trappings of power. He preferred the quiet beauty of his beloved Georgia and his farm.

He was a man who shaped the destiny of our Nation by fathering the modern Navy which subsequently preserved our freedom in World War II. But he was a man who, in retirement, would decline to take credit for most of his achievements.

He was a man who knew that victories are earned by hard work and knowledge, not by press releases and self-promotion. He was fond of saying that man is made to wear out, not rust out, and that is the way he lived his life.

He was a man who was proud of his heritage and who respected the past, but he was a man who pushed and shoved his colleagues into the reality of the future. He recalled that he began service in the era of the Springfield rifle, and he ended his service in the era of the Polaris submarine and the intercontinental ballistic missile.

Quite simply, Carl Vinson was a man whose roots were founded in his native Georgia, and whose vision was fixed upon the future.

He was one of those rare individuals who could see beyond the immediate to read the challenges and perils which lay over the horizon. That is why he fought to establish the modern Navy, and why he went on to foster the development of our great military air power.

Through it all, he turned aside personal honor and personal riches. He figured that his fellow Georgians had elected him to do his job as it should be done, and it never occurred to him to do any less.

Mr. Speaker, Carl Vinson was a man who came off the farm, earned an education, and was elected to public office through hard work and personal integrity. He honored that office by becoming a national leader, and he will honor the Congress forever by the record of achievement that he left behind.

I am proud to have known him. I am proud that he was a Georgian. But most of all, I am proud of what he did for his country.

There are no words we can speak or monuments we can build which would be a greater testament to him than the achievements which he himself attained.

Thank you.

□ 1030

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. EVANS of Georgia. I yield to my colleague from the Fourth District of Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, I rise to join my colleagues in paying tribute to Carl Vinson, the distinguished former Congressman from my State who died on June 1 at the age of 97. Carl Vinson served in this body for over 50 years, longer than any Member in the history of the House. But we are not here merely to honor longevity or endurance, for Vinson was an outstanding legislator, with a unique sense of duty and love of country, a firm appreciation for the necessity of civilian control of the military, and a keen idea of the role of a representative in our Government. Carl Vinson was a towering giant in the Congress and truly one of the great figures of American political history.

When Carl Vinson came to Congress in 1915, Woodrow Wilson was in the White House, World War I was just beginning, and America was only then embarking on the dramatic development which would transform it from a somewhat provincial and isolated hemispheric force into the world's preeminent military and economic power. Congressman Vinson played a crucial role in that transformation, as this country's foremost authority on defense matters.

Born in Baldwin County, Ga., on November 18, 1883, he was educated at Georgia Military College and Mercer University Law School. After serving as Baldwin County prosecutor, State representative, and Baldwin County judge, he was elected Representative to the 63d Congress in 1914, and reelected to 25 successive terms before his voluntary retirement in 1964.

Vinson soon became an expert in military affairs, rising to the chairmanship of the Naval Affairs Committee in 1931. During the dark days of the 1930's, while an isolationist America slept, he was an unstinting advocate of military preparedness. Described as the "long, loud, and lonely advocate of a big Navy," he pressed for enlargement of the Navy as America's major deterrent against aggression and laid the foundation for the two-ocean Navy. He pushed through further naval expansion in 1938, 1939, and 1940, improvements which allowed the Navy to rebound from the disaster at Pearl Harbor and become a vital factor in winning World War II. Carl Vinson knew that there can be no lasting peace without strength.

After the unification of the armed services and the concurrent congressional reorganization in the late 1940's, Vinson became chairman of the new Armed Services Committee, where he continued his support for a strong national defense. In 1949 he introduced and pushed through legislation calling for a 70-group Air Force. Mr. Vinson's firm grip on his committee, his unequaled mastery of defense information, and the respect of his colleagues allowed him to carefully steer military bills through the Congress. Speaker Rayburn often referred to him as "the best legislative technician in the House."

I would like to take a moment to relate to this body a personal memory about Mr. Vinson, which illustrates his ability to differentiate between narrow and national interests. While at the 1964 Democratic Convention in Atlantic City, I, and another Georgian, then a State legislator, met with Congressman Vinson. The State legislator was at that time contemplating a race for Congress, and was seeking advice and counsel. After a long political conversation, he finally asked Mr. Vinson whether a Congressman should represent the interests of his district or of the country as a whole? Mr. Vinson without hesitation shot back—

If you don't represent the Nation as a whole and have your horizons beyond the limits of your Congressional district, we don't need you in Congress.

He then quickly added—

By the same token, if you're not representing your district you won't be in Congress long enough to make a difference.

Carl Vinson represented both his district and this Nation, and made a difference that free Americans feel every day.

Mr. EVANS of Georgia. I thank my colleague.

● Mr. ROSTENKOWSKI. Mr. Speaker, it is with a sense of great loss and sorrow that I now pay tribute to the late Carl Vinson, the former chairman of the Committee on Armed Services.

It seems virtually impossible to overstate the accomplishments of a man who not only served in this Chamber for 50 years, but who was for an entire generation the dominant force in the formulation of our Nation's defense policy.

As the late Speaker McCormack said in reference to Chairman Vinson:

Pages of American history will carry the great record made by this great American and outstanding legislator.

There is no man who has done more for our national defense.

Having had the honor of serving with Chairman Vinson, I always admired his no-nonsense style and ability to expedite complicated legislation. To refer to him as anything other than a master of the legislative process simply would fail to do justice to his skills. Chairman Vinson's appetite for hard work, his diligence, his genuinely keen desire to be professional can only be viewed as the endeavors of a man who truly possessed stature.

Chairman Carl Vinson—a dedicated public servant, a man of unquestioned integrity, a credit to this institution—will long be missed by this Member of Congress.●

● Mr. BOLAND. Mr. Speaker, I appreciate this opportunity to pay tribute to the late Honorable Carl Vinson, who passed away on Monday, June 1, 1981, at the age of 97.

Chairman Vinson's 50-year career in the House is the longest in the history of the Congress. Even more remarkable than the length of Congressman Vinson's career is his monumental record of accomplishment. From his election in 1914 until his retirement in 1964, he served the people of Georgia and the entire Nation with dedication, diligence, and distinction.

As chairman of the House Armed Services Committee, Carl Vinson worked tirelessly to increase America's

ability to defend herself. No individual has left such a significant mark on our Nation's defense programs. It is unfortunate that Mr. Vinson was unable to see the nuclear carrier U.S.S. *Carl Vinson* become fully operational. This magnificent craft, our fourth nuclear-powered aircraft carrier, was launched in 1980 and is now being fitted out. Once fully operational, the U.S.S. *Carl Vinson* will be a fitting memorial to one of the greatest figures to inhabit the Halls of Congress.

I join the Members of the House in saluting Carl Vinson and expressing our sympathy to his family. He was a great lawmaker, a respected leader, and a distinguished patriot. He has left an impression on the Congress and the Nation which will never be erased.●

● Mr. BENNETT. Mr. Speaker, it is a distinct honor for me to speak in tribute to my former colleague and dear personal friend Congressman Carl Vinson. It was through his intervention that I was placed on the House Armed Services Committee, and I served with sincere pleasure under his great leadership for many years. He was a close personal friend and an inspiration to me as he strove to prevent war by seeing to it that if war should come our country would win it. "Peace through strength" was his motto. The message is as true today as it ever was.

It is rare for any of us in our lifetime to have known a legend, rarer still to have had the privilege of working with one. I treasure the opportunity I had of serving with Carl Vinson in the Congress for nearly two decades. When he passed away last week at the age of 97, I lost an old and true friend, and America lost a true statesman.

Carl Vinson served the good people of Georgia in the Congress for over a half-century. He has been gone from these halls for over 16 years now, but his belief in a bold national defense still serves as a beacon to all of us who believe in a strong America. Each day as I walk to that grand old committee room which bears his name, I am reminded not only of his commitment to strength, but to peace. His words of 60 years ago still echo here: "I devoutly hope the casting of every gun and the building of every ship will be done with a prayer for peace."

Carl Vinson was first elected to the House at the outbreak of World War I. He became chairman of the Armed Services Committee the year I came to Congress and served there until his retirement at the age of 81. And what a record he achieved.

He was the father of the Air Force and the founder of the Vinson School of National Defense. It is said he ran the Pentagon from his office on Capitol Hill. He served under eight Presidents and outlived them all.

Carl Vinson is gone now. No longer will he walk the red clay hills of Georgia or the marble Halls of Congress. Yet his memory and his dream will continue to serve as an inspiration to all of his countrymen as America stands ready, thanks to him, to meet the challenges of a new era.●

● Mr. DERWINSKI. Mr. Speaker, I join my colleagues in paying this special tribute to a man whom I had the great privilege of serving with in the House during the last three terms of his historic tenure in office. Carl Vinson, one of the most powerful political figures in Washington from 1914 to 1965, served in this body longer than any other person in the history of Congress. He left an indelible mark through his many contributions to the leadership of this country.

"Mr. Defense," as he was called as a result of his effectiveness in building a powerful military, Carl Vinson was a driving force behind the Navy's growth during World War II, and he was responsible for the launching of the two-ocean Navy. As longtime chairman of the House Naval Affairs Committee, Vinson was instrumental in pushing through appropriations to build up the Navy to its formidable proportions by World War II. The U.S.S. *Carl Vinson*, a nuclear carrier, was the first major Navy ship named after a person still living, which was a great tribute to his many contributions to the Navy.

Serving as chairman of the Naval Affairs Committee from 1931 until 1947, and then chairman of the Armed Services Committee from 1949 until his retirement, Carl Vinson's distinguished career represents a lifetime of governmental achievement. He was a man of power and influence, who held fast to his convictions and followed the course in which his judgment and good sense directed him.

The strength of his personality and his skill as a leader, a statesman, his dramatic career, and numerous achievements made him a striking, unique figure of our time.

The people of America have lost a dedicated public servant who undertook many tasks asked of him with boundless energy, enthusiasm, and effectiveness. Once Carl Vinson was determined to do something, he was relentless in his tireless efforts to achieve his goals. His long and distinctive leadership has made a lasting impact not only in the Congress but also on the entire country.

Carl Vinson was a man who was truly dedicated to being a most effective spokesman for our country, its institutions, and its people. His is a legacy all Amercians can be proud of.●

● Mr. ADDABBO. Mr. Speaker, in the history of this great country some men, men with very special qualities and goals, have risen above all others to strive to make our Nation great. They have been individuals of vision, character, sacrifice, and dedication. They have been Americans who have faced the challenges of our times squarely and with firm resolve, never ceasing their push forward until they had succeeded. They were loyal, honest, and oftentimes daring, although never reckless.

Mr. Speaker, last Tuesday, one such man passed away at the age of 97. His name was Carl Vinson, a name that will forever remain synonymous with military preparedness. I am sure I speak for many of us here today when I say our Nation has lost one of the finest Americans and public servants it has ever produced and that the House of Representatives has lost a man whose ideals and lessons will live forever in these Halls.

I had the distinct privilege of serving with Mr. Vinson before he retired from Congress. Never have I met a man more dedicated to keeping this Nation safe and strong, ready and moving forward. When he retired in 1965 after an unprecedented length of stay in Congress of 50 years, I lost a trusted friend and colleague, a man who loved his work and his country as no man before him.

From 1931 until 1947 he was chairman of the House Naval Affairs Committee and except for 1953 and 1954, when the House was in the hands of the Republicans, was chairman of the House Armed Services Committee from 1949 until his retirement. It was in those two capacities he devoted his energies into making our national defenses strong, mobile, and widespread. He was a man who fought hard for the U.S. Navy to have a two-ocean fleet, a fleet which today protects our vital interests around the world. He was a man of great initiative who perceived correctly the strategic importance of developing a formidable air force. There is virtually no area of our Armed Forces that do not bear the imprint of his years of service in Congress, including the U.S.S. *Carl Vinson*, a nuclear-powered aircraft carrier named in his honor while he was alive. No finer honor could have ever been bestowed upon a man more concerned with keeping our Armed Forces ready to defend our country.

Our Nation has lost a man who will never be replaced and I have lost a friend I shall miss very much. I am pleased that Carl Vinson died secure in the knowledge that he did his very best and that his country will long be greatful that he did.●

● Mr. FOWLER. Mr. Speaker, last week Carl Vinson died, but this occasion today should not be so much one of mourning for his passing as of celebrating his very full 97 years of life.

For the legacies of Mr. Carl's career are all around us and will continue to keep his memory alive long after we have departed the Congress:

The modern U.S. Navy, which in large part he created as chairman of first the House Naval Affairs Committee and later the House Armed Services Committee;

An unswerving commitment to military preparedness, but also to the principle of civilian control of the armed services;

A firm respect for and mastery of parliamentary procedures, including the seemingly out-of-fashion trait of courtesy; and

A living demonstration that government can meet legitimate national needs when directed by competent and dedicated public servants.

We are all in his debt, but those of us from Georgia feel a special pride for this man who, though a confidant of Presidents and a keeper of the mighty arsenal of American democracy, always remained a citizen of Baldwin County.●

● Mr. JENKINS. Mr. Speaker, on June 1, my State lost a great Georgian and our country lost a great American.

Carl Vinson lived to be 97 years old; he served in the U.S. House of Representatives longer than any other Member. His remarkable career, which encompassed the administrations of eight Presidents, spanned a period of unparalleled change and advancement in the area of defense weapons alone, from the crude and almost primitive to the most sophisticated.

Before retiring at the age of 81 years, Mr. Vinson chaired the powerful House Armed Services Committee for 14 years. The defense of our country was a first priority with him. His dedication to this principle earned him the name of "Mr. Defense." He acquired the name of "Swamp Fox" as a tribute to his canny flair for House strategy.

It was this understanding of the Congress and mastery of its workings, combined with his determination to make the United States a military power second to none, that led Fleet Adm. Chester W. Nimitz to say:

I do not know where this country would have been after December 7, 1941, if it had not had the ships and the know-how to build more ships fast, for which one Vinson bill after another was responsible.

For his unequaled contributions to defense, Mr. Vinson during his lifetime received every tribute. The House Armed Services Committee Room bears his name. He received the Medal of Freedom, the highest civilian award in our Nation. When the U.S.S. *Carl Vinson* was launched last year, it marked the first time in our history that a Navy ship was named for a living American.

For all his power, accomplishment, and honor, Carl Vinson remained a man of simple tastes and basic beliefs. For all the widely reported colorful eccentricities of his personality, Carl Vinson remained a man of feeling and character. He was a gentleman in the best sense of the word. He lived and conducted his work with honesty and great dignity. Herein lies the true secret of his greatness. Carl Vinson was an unpretentious model of personal integrity and energetic commitment to the national interest always.

The life of Carl Vinson was long; it was good; and it was productive. The life of Carl Vinson should be studied, lauded, and emulated. I did not have the privilege of knowing Carl Vinson very well personally, but I take pride in the fact that I share with him the common heritage of State and Nation.●

● Mr. McCLORY. Mr. Speaker, it was my privilege when I came to the Congress in 1963 to become acquainted with the late former Representative Carl Vinson, whose memory we extol today.

Mr. Speaker, the privilege of this association, the opportunity to observe Carl Vinson in action on the floor of this Chamber in behalf of measures promoting our national security, are among the most treasured experiences of my entire career of service in this body.

Carl Vinson was a decent, honorable, completely forthright and candid individual who earned a large part of his reputation by reason of the faith and confidence which other Members of this body were able to repose in him. His judgment was as infallible as human judgments are capable of being. His knowledge of our defense needs and potential exceeded that of any of his colleagues and equaled that of many who served professionally in the armed services of our Nation.

Mr. Speaker, this exceptional quality of leadership and representation in this great legislative body merits the praise and respect of all of our citizens. Indeed, Carl Vinson is honored even beyond our national borders by political and military leaders from around the world. We mark with sadness and deepest gratitude today the passing from the scene of a truly outstanding American.●

● Mr. NATCHER. Mr. Speaker, I join with my colleagues in the Congress today, in paying tribute to Carl Vinson, who was one of our distinguished leaders in the House of Representatives for many years. An able, dedicated Member of the House of Representatives and holder of the all-time record for service in this body, with over 50 years service.

He was a dedicated public servant who was familiar in every detail with the rules he helped to establish. As chairman of the Armed Services Committee for many years, he always succeeded in passing his bills, giving full answers to all questions that were propounded by any of the Members concerning any part of the legislation. His concept of public trust was without parallel and never did he hesitate to speak out against any proposal which he felt was not sound and not in the best interest of our people. Words are inadequate to fully appraise Carl Vinson's tremendous capacity for loyalty and love of his country. In every position he held, either private or public, he achieved distinction, and his service in all of his assignments was marked by a high sense of conscience and duty.

Carl Vinson will have a high place in the history of this country and in the hearts of his countrymen. His character, his achievements, and his faithful service will be an inspiration to generations yet to come.

Mr. Speaker, I extend my deepeest sympathy to the members of his family.●

● Mr. GINGRICH. Mr. Speaker, on Monday, June 1, we not only lost a great Georgian—we lost a great American.

To fellow Members of the House of Representatives Carl Vinson was a legend—as Mr. Defense and as a man who could win reelection 25 times.

But back home in Milledgeville, Ga., he was Uncle Carl. A real "Georgia boy," he was born in 1883 in Milledgeville, attended Middle Georgia Academy and Agricultural College—now the Georgia Military Academy—and received his law degree from Mercer University in Macon.

Mr. Vinson started his congressional career in 1914 and served until his retirement in 1965—longer than anyone in history. And that was just the beginning. Except for 1953 and 1954, when the Republicans controlled Congress, he was the chairman of the House Armed Services Committee from 1949 until his retirement.

Carl Vinson was a mighty figure in public life. In 1950, when mentioned as a possible Secretary of Defense, the House rose to give him an ovation. Mr. Vinson dismissed all suggestions that he take the post saying, "Shucks, I'd rather go on running the Pentagon from up here."

Carl Vinson was also a man who could look to the future when thinking about our country's defense. He was an early and strong supporter of airpower. And during World War II, Fleet Adm. Ernest J. King, Chief of Naval Operations, had such respect for the Georgia Democrat that he relied on him to put through programs that lacked support elsewhere in Government.

Our Nation's fourth nuclear carrier is named the U.S.S. *Carl Vinson.* But it is hard to imagine how many areas involving our present day Navy and armed services bear the mark of Carl Vinson and his years in Congress.

Carl Vinson was a good politician and he knew his own power, but he was more concerned that the military

remember that it served under the direction of a government elected by civilians.

I could go on and on talking about Carl Vinson the man, his achievements, and his career. But one of the best things we can say about Carl Vinson is that he led a full and rich life knowing that he could return to Milledgeville confident he had done his life's work well.

If you have never been to Milledgeville, Ga., it is a beautiful town nestled almost right in the middle of our great State. It is a good ways from Washington and not very close to the ocean. It is a high tribute to an outstanding leader that he could be such an important part of events and activities so far away, but still come home to Milledgeville, Ga., as "Uncle Carl."●

● Mr. DE LA GARZA. Mr. Speaker, having come to the Congress in 1965, the 89th Congress, I missed the opportunity of knowing and working with Congressman Carl Vinson—a man I greatly admired.

It is nothing less than fitting and proper that we today honor him because I feel no one will ever again match the record of service this dedicated gentleman made to his country. His tenure of 50-plus years is a record.

When I first came to Congress and was in the Cannon Building there were still those who had served with him in that building where he kept his office for so long before being one of the first tenants to move into the Rayburn Building where the House Armed Services Committee room is fittingly dedicated to him.

But despite all this I felt as though I knew him. In fact, my predecessor, Joe Kilgore, served under Chairman Vinson on the House Armed Services Committee. When he would come home he regularly mentioned this great American in his speeches. I feel as though he is a part of my heritage.●

● Mr. FORD of Michigan. Mr. Speaker, I am honored to have the opportunity to speak today in memory of a great man who has done much for the betterment of America, Carl Vinson. The former Member of the House of Representatives died last week after giving over half a century of service in the Congress.

Mr. Vinson was dedicated to maintaining a strong national defense for the protection of this country throughout his congressional career. From the time he was first appointed to the Naval Affairs Committee in 1914, until he retired as chairman of the House Armed Services Committee, Mr. Vinson remained steadfast in his conviction for guaranteeing that America would be "safe for democracy."

In 1965, as a freshman Congressman, I soon realized that the legacy of Carl Vinson and his role as a benefactor to this Nation was fresh in the minds of my colleagues. His hard work and perseverance, which helped prepare America for her dealings with the foes of the free world prompted the Georgian statesman to declare:

I don't go along with the prophets of doom. We are the world's leading nation. We will continue to be the world's leading nation.

Let us hope that the ideals and aspirations of this honorable man have not passed with him, but rather that the idea of a strong and free America will take root as an everlasting tribute to this great public servant, Carl Vinson.●

● Mr. HATCHER. Mr. Speaker, I wish to join with the other members of the Georgia delegation and the 97th Congress in paying tribute to former Representative Carl Vinson of Georgia who died last week at the age of 97. As a congressional leader, Georgia statesman, and Christian gentleman, Carl Vinson made a lasting contribution to this great Nation. His 50 years of service in the U.S. Congress serve as an inspiration to us all.

First elected to the Congress in 1914, Carl Vinson served with nine American Presidents ranging from Woodrow Wilson to Lyndon Johnson. As chairman of the House Naval Affairs Committee for 16 years and as chairman of the House Armed Services Committee, Vinson became the Nation's foremost proponent of a strong national defense and was the father of the United States modern Navy. Through this strength and leadership he helped to forge America into the premier world power of the 20th century.

Throughout his career, Vinson served his people with dignity and honor. He was indeed a model Congressman whose dedication and loyalty to his constituents was matched by a great love for his State and his Nation. He was a man of great humility, integrity, and conviction. He represented the very best that American Government has to offer.

In his first speech to Congress, Vinson established a strong foundation for his tenure in office by stressing the importance of a strong and stable America at peace. "I devoutly hope that the casting of every gun and the building of every ship will be done with a prayer for the peace of America," he stated. "I have at heart no sectional nor political interest but only the Republic's safety."

Today, let us remember these words as we remember the contributions of this great man. And let us recommit ourselves to the high ideals of American government for which he stood.

Carl Vinson truly served us well.●

● Mr. McDONALD. Mr. Speaker, a legend has departed this land. Carl Vinson was "Mr. Navy" to generations of navymen. Strong salty admirals had their knees turn to jelly it is said upon being informed they were to testify before Carl Vinson. We need more of his kind today. But for his work it might have taken a lot longer for our Navy to regain control of the seas during World War II. However, his interest was also in the broader range of defending our country and he was also known as Mr. Defense to some.

His service to his country, the Congress and his home State of Georgia was exceedingly long and honorable. He was the prosecuting attorney of Baldwin County from 1906 to 1909. He was a member of the Georgia State House from 1909 to 1912 where he served as speaker pro tempore in 1911. He served as a judge in the county court in Baldwin County from 1912 to 1914. Following this he served 50 years in the House of Representatives from 1914 till 1965. While in the House he was also called the Swamp Fox for his grasp of parliamentary procedures and strategies in guiding his bills through to passage.

It is indeed fitting that there is a nuclear aircraft carrier being fitted out called the U.S.S. *Carl Vinson.* This will be a really fine tribute to the man who contributed so much to our two-ocean Navy in the past. Hopefully, the U.S.S. *Carl Vinson* will sail proudly with a new two-ocean Navy, and the Honorable Carl Vinson can rest easily knowing his country is well defended.●

● Mr. MONTGOMERY. Mr. Speaker, I appreciate the gentleman from Georgia arranging for this special order this afternoon in order that we might pay tribute to the late Carl Vinson.

It was not my privilege to serve with Chairman Vinson, but as a member of the House Armed Services Committee I am very much aware of the tremendous contributions he made to America's national defense during his long and distinguished career in the U.S. House of Representatives. The spirit and philosophy of Carl Vinson for a strong Armed Forces as a means of preserving world peace is still very much evident in our committee.

Mr. Speaker, one of the most important legacies Carl Vinson left to his fellow Americans was his successful effort to build a strong U.S. Navy. He long ago recognized the need for the United States to be able to assure that the sealanes of the world remain open to free and open trade between all countries. And more importantly that the United States have access to critical raw materials that we do not have within our own borders. Today we do have a strong and capable Navy and I believe it is thanks mainly to Chairman Vinson.

There will never be but one Carl Vinson and we can be thankful that he dedicated his life to public service in the Congress. We who follow in Chairman Vinson's footsteps will never be able to fill his shoes, but by

trying to do so we will be committing ourselves to maintaining a strong and free America.●

● Mr. ZABLOCKI. Mr. Speaker, few if any have ever matched the achievements of Carl Vinson both in Congress, and as promoter and defender of the vital defense interests of this country. He was of the rare breed who is a master of legislative processes, and at the same time clearly sees the national policy needs and goals.

As a small town lawyer and politician from Milledgeville, Ga., he never lost his touch with the common folk back home during his record 50 years service in the House. Yet in Washington, he justly deserved the sobriquet "Swamp Fox" for his legislative skills in the National Capital.

Carl Vinson probably will be remembered most for his efforts over the years in behalf of our Armed Forces, starting with the pre-World War II years when too many Americans were infected with pacifism, isolationism, and antimilitarism. As chairman of the House Naval Affairs Committee before Pearl Harbor, he along with other distinguished Americans, President Franklin Delano Roosevelt and Speaker Sam Rayburn, labored hard to raise U.S. defense preparedness at least part way toward the strength they knew would be necessary in the years to come.

When I came to Congress as a freshman 32 years ago, "Admiral" Vinson was already long established as a power in the House of Representatives as chairman of the Armed Services Committee and as a leading guardian of the Defense Establishment. It was an honor for me to have been associated with him as a legislative colleague over the following years until his retirement in 1964. He still stands today as one whose example we should follow in terms of devotion to our country.●

● Mrs. HOLT. Mr. Speaker, I never had the privilege of knowing the late Carl Vinson, but I have felt his presence strongly in the 8½ years I have served on the House Armed Services Committee.

It is evident that Carl Vinson was a leader of immense vision and total commitment to our national security. He earned the deep respect of his countrymen and world leaders abroad.

The soft-spoken but awe-inspiring gentleman from Milledgeville, Ga., was a legendary figure who was instrumental in enacting monumental legislation to prepare the United States for World War II. He correctly foresaw the need for a great and modern U.S. Navy.

Mr. Speaker, all Americans are deeply indebted to this great person. He is gone. But his sense of commitment to a viable national defense capability will not be forgotten.●

● Mr. GIBBONS. Mr. Speaker, I had great admiration for Carl Vinson. He was, as everyone knows, a great American who loved his country and thought it should be second to none.

Carl Vinson had another side to his personality—and that was that he was a warm, considerate person. I had many delightful conversations with him, and I will long remember his advice and counsel.

All of us are proud of Carl Vinson, and the mark he made on history will be long remembered.●

● Mr. MAZZOLI. Mr. Speaker, I would like to join my colleagues in the House of Representatives in paying tribute to former Congressman Carl Vinson, who passed away recently.

Even though "Uncle Carl" had completed his celebrated 50-some years of service to the House, the people of Georgia, and the Nation. When I was elected in 1970, his name was still echoing in the Halls and Chambers of the Congress then—as now.

His work—especially in the area of national defense—deserves the accolades of all freedom-loving Americans who, in many ways, owe the safeguarding of these cherished freedoms through many of the turbulent years of the mid-20th century to this man. His powerful leadership of the House Armed Services Committee produced excellence in our military services as well as worldwide military superiority.

I extend to his family and loved ones my sincerest condolences.●

● Mr. CORRADA. Mr. Speaker, I join my colleagues today in paying tribute to Carl Vinson who passed away last week at the age of 97.

Although I did not have the pleasure of serving with him in the House of Representatives, his legacy, after 50 years of service, is felt by every Member of this body.

His service to our country and his dedication to maintaining a strong national defense is well known to all of us. For this we owe him a debt of gratitude and I am sure he will not be soon forgotten.●

● Mr. HARTNETT. Mr. Speaker, it is with great honor that I join my colleagues in a tribute to former Congressman Carl Vinson. Known as Mr. Defense, Congressman Vinson served in the House of Representatives longer than anyone in history, from 1914 to 1965. His dedication and commitment to our country's national defense was unsurpassed.

Following in the footsteps of Mr. Vinson, was Mendel Rivers, the former South Carolina Congressman who represented the district which I now serve. Both men were chairman of the House Armed Services Committee and are widely known for their great accomplishments toward preserving our national security and making America a superpower among the world.

Although a soft-spoken man, Mr. Vinson possessed a wealth of knowledge and understanding that will surely be missed.●

Mr. EVANS of Georgia. Mr. Speaker, I would like to announce at this point that I will be introducing a resolution to have the remarks of my colleagues in tribute to Congressman Vinson bound and would urge their cosponsorship of this resolution.

Mr. Speaker, I yield back the balance of my time.

PERSONAL EXPLANATION

(Mr. EVANS of Iowa asked and was given permission to address the House for 1 minute.)

Mr. EVANS of Iowa. Mr. Speaker, during the week of June 1, 1981, I was absent due to official business as a member of the Committee on Agriculture. During that time, I missed rollcall votes Nos. 54–64. Had I been present, I would have voted as follows:

Rollcall No. 54, on suspending the rules and passing H.R. 3499, the Veterans' Health Care Act of 1981, I would have voted "aye";

Rollcall No. 55, on suspending the rules and passing H.R. 2136, the construction and acquisition of national cemeteries, I would have voted "aye";

Rollcall No. 56, on suspending the rules and passing H.R. 3337, the Youth Employment Demonstration Amendments of 1981, I would have voted "aye";

Rollcall No. 57, on suspending the rules and passing H.R. 1100, the Prisoner-of-War Benefits and Health-Care Services Act of 1981, I would have voted "aye";

Rollcall No. 58, on suspending the rules and passing H.R. 3423, the Veterans Training and Business Loan Act of 1981, I would have voted "aye";

Rollcall No. 59, on suspending the rules and passing H.R. 2039, the veterans' home loan guarantees, I would have voted "aye";

Rollcall No. 60, on suspending the rules and agreeing to House Concurrent Resolution 76, expressing the sense of Congress for the Secretary of the Army to place a plaque in Arlington Cemetery for Armed Forces members who died in the Iranian hostage rescue attempt, I would have voted "aye";

Rollcall No. 61, on the preferential motion by Mr. CONTE to concur in Senate amendment No. 17 to the conference report on H.R. 3512, supplemental appropriations for fiscal year 1981, I would have voted "aye";

Rollcall No. 62, on the amendment by Mr. KOGOVSEK to deauthorize the Department of the Army from acquiring 244,000 acres of land in Colorado to be used for training purposes by Fort Carson, I would have voted "no";

Rollcall No. 63, on the amendment by Mr. BONIOR of Michigan to deauthorize the construction of the Pine Bluff, Ark., binary chemical weapons facility, I would have voted "no"; and

Rollcall No. 64, on final passage of H.R. 3455, military construction authorizations for fiscal year 1982, I would have voted "aye."

ENFORCE SPENDING CUTS

(Mr. SMITH of Alabama asked and was given permission to address the House for 1 minute.)

Mr. SMITH of Alabama. Mr. Speaker, I urge my fellow colleagues to take whatever action is necessary to hold outlays near the fiscal year 1981 target of $695.45 billion earlier set by Congress.

Any attempts to exceed the budget outlay target should be viewed as a deliberate sabotage of the expressed will of Congress and the American people.

The leadership is headed for a collision with the people's party if it tries to restore the $35 billion Congress asked the House and Senate committees to cut in the blueprint we adopted last month.

It is insincere—little more than a charade—to ask committees to meet their targets for program cuts while at the same time encouraging committee members to propose amendments that would restore money for social programs and exceed those targets.

The House leadership is mistaken when it says that the President does not understand the working class in America. It is the House leadership that is out of touch with the working people in this country. It is still singing the same old tune of higher taxes, higher spending, and confused priorities while three out of five Americans support the President's proposals to cut Federal spending and reduce taxes.

If the House leadership understood working America, there would be no need to compromise on whether or not taxes should be reduced. It would know that 7 out of 10 Americans, 69 percent, feel spending 2 hours and 49 minutes each day on the job from January 1 until May 10 just to meet tax obligations is beyond their call of duty.

What the administration is trying to do is simple. It is trying to avert economic assistance, bring under control a Federal deficit that was rolling along at nearly $60 billion a year when I took office, reduce the role of the Federal Government in our lives, and restore State and local responsibilities to State and local governments. The administration is trying to return commonsense, sanity if you will, to the problems that confront us.

The American people cleaned house last November and they have every right to topple the house the leadership built if Congress does not get its house in order and put to rest its wornout tax-and-spend approach to meet our every need.

UNITED STATES SHOULD NOT CONDEMN ISRAEL NOR SHUT OFF AID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 60 minutes.

Mr. KEMP. Mr. Speaker, before everyone rushes to judgment about Israel and its recent air strike on the nuclear reactor near Baghdad, and before the administration makes a decision on whether or not it should meet a planned delivery of F-16's to Israel, which I understand is imminent, I would like to share my prespective on this issue. I have just returned from Israel; I flew all night to be here for this session of Congress. I recognize that there are not many Members of Congress in the Chambers today because of this pro forma session, but I consider this issue so very important, and I want to answer some of the hysteria that surrounds this Israeli strike on Iraq's nuclear reactor.

I wanted to take this time therefore to bring the perspective of someone who has been on the scene for the last 5 days in Israel.

I was in Israel at the invitation of the Israel-United States Chamber of Commerce, and gave a speech Sunday in Tel Aviv to that prestigious group of Israeli business leaders. I met with Prime Minister Begin, Sunday morning and with the Finance Minister, Mr. Yoram Aridor a good friend of mine. I also had the pleasure of visiting with the shadow cabinet of Shimon Peres on Sunday, and was planning to leave for the United States Monday night when news came that the Israel Air Force had taken out what is called Tammuz I reactor, the Iraqi nuclear facility, which was to become operational, that is, active, in July or August, according to Israeli intelligence and other informed sources.

I canceled my trip back, decided to ask for a meeting with Prime Minister Begin—which he graciously granted. Tuesday morning, before his emergency Cabinet meeting at the Knesset, I met with Mr. Begin, General Sharon, and the Chief of Intelligence, General Sagi. I also had meetings with Ambassador Samuel Lewis and the Army attaché at the American Embassy in Israel, before flying to Matulla, a small town near the Golan Heights just south of the Lebanese border. There I met with Saad Haddad—Major Haddad is the leader of the Free Lebanese Army—and Christian Lebanese who are working with the Moslems and Druzer in Lebanon to free their country from the threat of takeover by Syria and the PLO.

Let me say, parenthetically, that I am going to make further remarks on the subject of Lebanon and the Lebanese crisis at a later time. But I would say that anyone in this Chamber or in this country who does not recognize that Lebanon, once a peaceful country, which would have been a signatory to the Camp David accords but for the pressure of Soviet interference and Syrian and PLO domination, has become a tragically war-torn and beleaguered country. It almost brings tears to one's eyes to talk about what is happening in Lebanon to Christians and Moslems alike who are trying to free Lebanon of outside trespassers.

□ 1045

Let me say further that Syria right now controls 45 percent of Lebanon, and the PLO controls 20 percent, so two-thirds of Lebanon is dominated by Syria and the PLO, clients of the Soviet Union.

We all pray and hope that Philip Habib's mission is a success. It is very important to this country, to Israel, and to people in the Middle East.

But I did want at least to say that behind the Syrian move into Lebanon is not only the irredentist view of "Greater Syria," which has been held by Syria for many years, but also the heavy hand of the Soviet Union. One always needs to take Soviet designs into account when viewing the Middle East from a perspective of reality.

I would like to summarize, Mr. Speaker, my views on the Israeli air strike on the reactor in Iraq, which has caused such consternation in many circles and on many newspaper editorial pages.

I hope my colleagues will not rush to judge Israel. I am disappointed, Mr. Speaker, that the State Department condemned Israel before all of the facts were in. But let me say that I am particularly concerned and disturbed, frankly, that there has been no condemnation of Iraq for its attempt to develop a nuclear arms threat, nor of France and Italy for encouraging Iraq.

I am sure that in many Arab countries right now, in their heart of hearts, people are glad that Israel took out that nuclear reactor. They will not say it. But clearly Iraq's incipient nuclear capability was a threat not only to Israel, but to its Arab neighbors as well, and a threat to the stability of the Middle East. Particularly in view of the rather extreme statements that have been made in the last few years by Saddam Hussein, the Iraqi leader, it seems to me that one should be very careful before making a judgment about Israel's attempt to, in Menachim Begin's words, prevent a holocaust in the Middle East. Newspapers today quoted him as saying, "There will never be another

holocaust in the history of the Jewish people. Never again, never again!"

One cannot help but admire a nation and a leadership that sees so clearly its self-defense and its needs for survival. That does not mean that one should endorse every act or every statement of Israel or its foreign policy. But as someone who has followed this issue for quite some time and has met personally with many of the Israeli leaders, both in the Labor and Likud Parties, I want to make this point here today: After exhaustive diplomatic efforts, not only by Israel, but by the United States, to get Paris and Rome to stop the transfer of nuclear technology and enriched uranium that would give Iraq the ability to develop nuclear weapons, and to dissuade the Iraqis from developing this type of capability, it is my belief, Mr. Speaker, that Israel's action was not only inevitable, but justified, in terms of its self-interest and self-defense. As time goes on, I believe that Israel's action will be proven justified in the eyes of the free world as well.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I would be glad to yield to my friend, the gentleman from Georgia.

Mr. LEVITAS. I thank my colleague, the gentleman from New York, for yielding. I want to compliment him both for taking the time to address this issue at a time when it needs to be addressed and also for the words that he has spoken. He is to be commended for the plea he has made to those of us in this body and to the administration to reserve judgment and to look at the facts surrounding this very critical event in the Middle East, the Israeli attack on the Iraqi nuclear reactor.

I think some of the points the gentleman has already made bear out a feeling that I have had since I heard the startling news, that is that the Israelis knew that their very survival was at stake. It was not a question of an aggressive, preemptive strike against a peace-loving neighbor with no hostile intent. It was a defensive measure, vital to the very survival of a small nation. It was not an aggressive act. It was self-defense. You do not have to wait until you have been hit to defend yourself. It may be too late then.

One has only to look at the geography of that part of the world. Israel is a tiny nation. The dropping of one or two or, at the most, three atomic weapons in that small area could totally destroy the State of Israel.

And is that farfetched? Indeed it is not, because of the very words of the President of Iraq over the past several years—that his purpose was the destruction of Israel.

We should recall that during the Kennedy administration's Cuban missile crisis, we were willing to confront the Soviet Union with a risk of war because of the threat posed to the United States by the presence of Russian missiles in Cuba.

Mr. KEMP. Let me take my time back for a few minutes to say that the gentleman is right on target with regard to the intent behind the drive to develop weapons. When Iran in September attacked Iraq's nuclear reactor, Saddam Hussein said to the Iranians, "Why do you worry? Our nuclear project is not aimed at you; it is aimed at Israel."

And the Iraqi Foreign Minster Hammadi recently said that he cannot tell the world, or the United States, that its purpose is not to develop nuclear weapons. And for an 86-month period, Iraq refused to allow the International Atomic Energy Agency to inspect the site of this reactor. At a time when Iraq is buying weapons-grade enriched uranium and seeking advice on how to build a nuclear weapons program, there should be a clear perception of the threat that the gentleman mentions. An Iraqi nuclear weapons capability poses a threat not only to Israel but to other Arab nations whose interests diverge from Iraq's anti-American posture.

I again yield to my friend, the gentleman from Georgia.

Mr LEVITAS. I thank my colleague for yielding, and I think the point he makes and the information he brings to bear on this underscores the point I was making.

There is another point I think has failed to receive adequate attention in this whole discussion, and again it relates to the relationship between the State of Israel and Iraq.

Iraq alone, of all of the nations involved in the 1948 war between the Arabs and Israel, did not sign the 1949 armistice agreement. Israel and Iraq are still in a state of war. How can an enemy in war protest the acts of its adversary?

Mr. KEMP. The gentleman is absolutely correct. Most of the nations surrounding Israel signed the armistice. Iraq is one of the few that technically is still at war with Israel, as the gentleman points out.

Mr. LEVITAS. And that is the point, I think, that must be made. Israel and Iraq are still in a state of war because Iraq failed to sign the armistice in 1949 and rejected the cease-fire at the end of the 1973 war.

So, therefore, Israel and Iraq are at war. It is only because the nations are not geographically contiguous that there is not ongoing hostility; that is coupled with the fact that Iraq has made its intentions toward Israel known.

The purpose of developing this atomic reactor in a nation as oil-rich as Iraq was certainly not to supply energy needs for that nation. It was quite clear. And I must say that there are many occasions when I wish and hope that our country exercises the same skill, the same will, and the same determination to protect our vital interests as the leaders of the State of Israel have done to protect theirs.

No one likes war. No one wants to see death and destruction. The death of any one person is tragic. Peace and stability in the Middle East is our goal. The most common word that you hear in Israel, is shalom, peace. Peace is more important to the State of Israel because of its location, because of its economy, because of its size, than almost any other country in the world. But the Israelis know that you cannot have peace unilaterally and you cannot have peace by being pushed around and waiting for your avowed enemies to destroy you. The Israelis have the will and the skill to protect their interests when they are threatened. In this instance, truly, the survival of the State of Israel was at stake, and the action taken was totally consistent with Israel's defense needs against a hostile enemy with whom they are still at war. In the last analysis this action may make a long-term contribution to peace, for peace comes through strength.

Mr. KEMP. Mr. Speaker, I commend the gentleman on his position in this matter.

The gentleman talked quite eloquently on behalf of Israel about the chances for peace in the Middle East. And I know the gentleman would also agree with me that, as the Soviet Union encroaches on the Middle East, with an eye to securing the oilfields, and a corridor to the Indian Ocean, and as the Soviets further trespass upon Africa, both north and south, it is of paramount interest to this country to be very careful not to view the actions of its allies from a one-dimensional perspective.

I was upset the other day at a letter released from the State Department which implied that Israel's attack on the PLO camp in Lebanon was somehow damaging the chances for the success of the Habib mission. Well, it is interesting that the Habib mission is still going on. Ambassador Habib is in Beirut today. He is going to go on to Damascus. He will end up this week with Mr. Begin in Jerusalem.

What threatens the success of Habib's efforts is not Israeli airstrikes, but the intransigence of a Syrian-PLO-Soviet coalition that exercises absolute control over two-thirds of Lebanon. Yet many of our opinionmakers in the United States seem to think that this external intervention is just an abstract concept. But the reality is harsh. There are 12 Soviet rifle divisions on the north border of Iran and Iraq, 20 divisions in Afghanistan, and the capability to activate another 30

divisions on the southern part of Soviet Russia. There is also the Soviet Navy in the Indian Ocean, in the Pacific Ocean, and in the Atlantic Ocean. Yet somehow our opinionmakers consider these issues to be just abstractions. They are not. And it takes a trip, sometimes, to a foreign country, maybe India, Israel, or Lebanon, to understand the real world and the very real problems confronting our Nation and our allies.

I want to make it clear, as I wind down my remarks, that I plan to introduce some further evidence into the RECORD at this point.

First a series of press statements revealing Iraq's intentions with regard to atomic weapons:

BAGHDAD, October 4, 1980 (Al Tawrah).—"The Iranian people should not fear the Iraqi nuclear reactor which is not intended to be used against Iran but against the 'Zionist enemy'." (Al Tawrah is the official organ of the Iraqi Revolutionary Command Council).

BAGHDAD, August 19, 1980 (Iraqi News Agency).—"President Saddam Hussein has stressed that a decision better than boycotting the states that move their embassies to Arab Jerusalem is to destroy Tel Aviv with bombs. He added that until the possibility of responding to the enemy with bombs becomes available, all available weapons must be used with the help of the Arab brothers. . . . The president concluded his speech by stressing that when the time comes for Iraq to vent its anger on the Zionist entity, it will do so."

LONDON, July 22, 1980 (The Times).—In a report on Saddam Hussein's meeting with journalists on July 21, 1980: "President Hussein implied several times that Arab nations would be able to use atomic weapons, adding after his denial of any intention to make a bomb—that enemy to be totally different in the very near future."

June 27, 1980 (The International Herald Tribune).—"Naim Haddad, senior member of Iraq's ruling revolutionary command council stated at a meeting of the Arab League in 1977: 'The Arabs must get an atom bomb. The Arab countries should possess whatever is necessary to defend themselves.'"

PARIS, January 31, 1980 (Al Watan al Arabi).—Saddam Hussein in an interview to the newspaper: "Any state which wants to use the atom for military purposes should reach a special scientific and technological level in all fields, not only in the nuclear field."

September 29, 1979 (Speech by Mr. Haidar).—Iraqi ambassador to Brazil on the occasion of the signing of a nuclear cooperation agreement: "If our enemy Israel is close to building an atomic bomb, or already has one, what prevents us from developing the same capacity?"

KUWAIT, November 30, 1976 (Al Kabas).—"Iraqi oil minister, Tayeh Abd el Karim, in a speech to OPEC ministers council on November 23, 1976 refused to comment on reports that 'Iraq will be the first Arab country to have the atomic bomb. However, he said, Iraq intends to use nuclear energy for peaceful purposes. The production of the atomic bomb should be a project which all Arab states should participate.'"

LEBANON, September 8, 1975 (Al Usbu Al Aradi).—"Saddam Hussein was reported to have declared that the acquisition of nuclear technology 'was the first Arab attempt towards nuclear arming although the officially declared purpose for the construction of a reactor was not nuclear weapons.'"

And second, Mr. Speaker, I read with interest the editorial in today's Wall Street Journal concerning Israel's strike in Iraq. In contrast to so many commentaries in this country and elsewhere that have condemned without bothering to understand, the Journal's analysis proceeds from a realistic assessment of the threat and the limited options available to Israel's leadership. I commend the Journal's insights to my colleagues' consideration.

The article follows:

MOURNING THE BOMB

An atom bomb for Iraq, we have learned in the last 24 hours, has become the latest great cause celebre of world opiniondom. Various governments, including our own, and a lot of pundits have been busily condemning Israel's raid on Iraq's nuclear reactor. Our own reaction is that it's nice to know that in Israel we have at least one nation left that still lives in the world of reality.

What is going on here: Iraq, awash in cheap crude oil, wants a big nuclear reactor. It rebuffs French suggestions to give up the original design and substitute one that does not need weapons-grade uranium, which is not suitable for use in reactors, but dandy if you want to use the reactor to breed plutonium for weapons. Faced with this evidence, the conclusion of world opinion has been—everything's OK, Iraq has signed the nuclear non-proliferation treaty.

This kind of silliness has a mysterious power to blind most who man foreign ministries, think tanks and editorial sanctums. Of course Iraq was building a bomb. Of course its intended target was Israel. Of course, given the Iraqi reputation for political nuttiness reaffirmed again in its starting a war with Iran, its atom bomb would also have been a danger to all its neighbors. We all ought to get together and send the Israelis a vote of thanks.

Israel, which is assumed to have its own atom bomb but not to have conducted a test explosion, was not acting out of some abstract concern with non-proliferation. It was pursuing its own national interest, and in its timing also no doubt Prime Minister Begin's political interest in the impending elections. Its pre-emptive strike was strong medicine.

This would not have been necessary, though, if the reality that marked the Israeli decision had been present in the United States' non-proliferation policy this last decade or so. These efforts more or less went out the window when the U.S. refused to take sanctions against India's "peaceful nuclear device," exploded in violation of an agreement with the U.S. After this show of irresolution, the U.S. could hardly expect to persuade, say, the French to pass up sales to Iraq. Soon the whole non-proliferation question was lost in the fog of international negotiation.

To give the worriers about Israel their due, there is always reason to be concerned that any military act could prove to be the spark in the tinderbox of the Middle East. But we have been under the impression that the Middle East wasn't a very peaceful place even before last Sunday. People were being blown up on the beaches of Beirut and in the redoubts of western Iran. To judge the extent of the silliness, notice that among the governments objecting is Iran, locked in war with Iraq. Is there any reason to doubt that there were sighs of relief in the Saudi palaces on learning that Iraq won't have a bomb soon.

Being concerned about the peace of the Middle East does not make it necessary to be easily deceived about the necessary components for peace. Without a doubt, the ability of Israel and Egypt to come to terms has contributed mightily to that end, and President Carter's role in aiding that agreement was a major foreign policy achievement. But Lebanon has become a madhouse and the Soviet Union, through its surrogate, Syria, seems intent on keeping it that way to keep the Middle East pot boiling.

In such a situation, it is not entirely implausible for the United States to send a shuttle diplomat to try to damp down the passions and seek out possibilities for a modus vivendi. But the best chances for peace, to the extent they exist, depend far more heavily on balance of power perceptions in the area itself.

The Israelis are not infallible, but their security for 33 years now has depended on making careful power judgments. They know that their best chances for avoiding bloodshed lie in frequently reminding their neighbors that they are strong and that their wishes are not to be taken lightly.

The Israeli approach to non-proliferation is limited and direct. But their outlook on the world and on what it takes to earn the world's respect offers a few lessons we ourselves could profitably learn.

Mr. LEVITAS. If the gentleman will yield further, I just want to make one other observation, because I think the gentleman was absolutely right in including two points: No. 1, the strategic interests and the interests of the United States that we have in this area and that are being served by some of the actions which our friends and allies, the Israelis, have taken in recent years, but, also No. 2, the problem of Lebanon. Sad, poor Lebanon. A troubled, tortured land. It does in fact bring tears to your eyes to see the rest of the world, almost without opening their mouths, without uttering a protest, stand by to see aggression against the poor people of Lebanon that is being foisted by the Soviet Union through their satellites and through their clients, the Syrians and the PLO.

Mr. KEMP. It is unbelievable.

Mr. LEVITAS. I have spoken for years about the need for this country to be concerned about the oppression and the attempted liquidation of the Christian community in Lebanon. And indeed they would have been liquidated had it not been for the actions of Israel in supporting and defending the Christian community of that nation. The rest of the world stood by almost silently while this tragedy of bleeding Lebanon unfolded. Perhaps now that the nations of the area and the Soviet Union realize Israel's determination, a real opportunity for peace in that troubled land may occur. Our prayers are with the troubled people of Lebanon and our prayers are for the suc-

cess of Philip Habib's peace mission so that peace and security can come to Christian and Moslem alike in Lebanon.

□ 1100

Mr. KEMP. The gentleman makes a very important point. There is not a Christian in Lebanon who does not recognize that he or she lives today because Israel is willing to support them and give them the assistance that they cannot get from any other nation, Jewish or Christian, anywhere in the world. I want to make just one other point, Mr. Speaker—that any action by this Congress to cut off assistance to Israel would be a mistake not only in terms of Israel's self defense needs, but would be contrary to the national interest of the United States.

It is not in our interest to shut off assistance, shut off aid, to slow down or to drag out or to cut off the sale of equipment to Israel, notwithstanding the need to hold out a hand of accommodation, friendship, negotiation, and diplomacy to Arab countries whenever they may be willing to grasp it.

I was in Israel shortly after Mr. Begin and Mr. Sadat met at Ophira. I think Mr. Sadat has taken a very courageous stand in speaking out on behalf of Camp David at a time when some, more timid, were suggesting that somehow Israel, in pursuing its own defense requirements, was threatening the success of that mission.

Mr. Sadat, at Ophira just a few days ago, suggested that Camp David was going to continue. I was pleased to be in Israel while both of those leaders were recommitting themselves to Camp David. It is a shame that Lebanon was not able to conclude an arrangement whereby it, too, might endorse Camp David. The Lebanese would be a part of the peace process were it not for the fact that Syria has had its eyes on Lebanon for so many years.

In conclusion, Mr. Speaker, Iraq's nuclear design was not an atoms for peace program. If it were, there might be a different reaction. There certainly would be a different reaction from me. But as has been pointed out by the gentleman from Georgia (Mr. LEVITAS), as well as by myself, and I am sure by others in the days ahead—if you look at the threat of Hiroshima-sized atomic bombs or a plutonium bomb in Baghdad; at the statements of Hussein and Hammadi, the Foreign Minister of Iraq; at the fact that the United States for 2 or 3 years has been trying to get France and Italy to stop selling enriched uranium to Iraq because of our great concern over the potential consequences. It seems to me that the judgment rendered against Israel and the condemnation of Israel, without regard for the facts, absent concern for what was going on in Iraq, absent denunciation of Iraqi leaders for their declarations of "holy war" against Israel, are serious mistakes.

I strongly urge the President to carry out the delivery of F-16's to Israel on schedule, and I further exacerbate this issue by isolating Israel in the free world community.

As I said, Mr. Speaker, I will be speaking about Syria and the attempts to work out an accord over Lebanon in coming days, but for now I wanted at least to speak out on this issue of such great moment.

ECONOMIC RECOVERY TAX ACT OF 1981

Mr. CONABLE. Mr. Speaker, today I am introducing, by request, for myself and Mr. HANCE of Texas, the President's tax reduction bill, designed to turn around the Nation's economy and move it in the right direction again.

Specifically, the bill provides for substantial reduction of rates for individual taxpayers; for accelerated capital cost recovery of investment in plant, equipment and real property; and for other significant improvements in tax law.

The legislation was drafted expeditiously, in order to have it introduced today, before the Committee on Ways and Means begins its tax markup. There may, therefore, be a need for technical adjustments to the measure in the days ahead.

Fundamentally, however, the bill remains, and will remain, exactly as it has been portrayed by the President. Its overriding aim is to chart a new and upward course for an economy burdened by failed concepts and too long on the downswing.

Following is a general explanation of the bill:

TITLE I—INDIVIDUAL TAX RATE REDUCTIONS

Sec. 101—25 Percent Phased Rate Reduction

Under each of the four present law tax rate schedules—married filing jointly, single, married filing separately, and head of household—individuals pay tax at marginal rates ranging from 14 to 70 percent. For earned income, there is a separate provision in the law that provides for a "maximum tax" rate of 50 percent.

Section 101 of the bill would reduce marginal tax rates for individuals across-the-board by 25 percent. This would lower marginal tax rates from a range of 14 percent to 70 percent under present law to a range of 11 percent to 50 percent. The new top marginal tax rate of 50 percent represents a reduction slightly more than 25 percent. Without the slight additional reduction in this top rate, however, the complexities associated with computing the maximum tax on earned income could not be eliminated.

The provision would phase in the 25 percent rate reduction by 5 percent on October 1, 1981, by an additional 10 percent on July 1, 1982, and by a final 10 percent on July 1, 1983. The top marginal tax rate would be reduced to 50 percent on January 1, 1982, in order to achieve simplification associated with the maximum tax on earned income as soon as practicable. Moreover, any delay could induce taxpayers with marginal tax rates currently greater than 50 percent to put off realizing income and making new productive investments until later years.

TITLE II—INCENTIVES FOR PLANT, EQUIPMENT, AND REAL PROPERTY

Accelerated Cost Recovery System

The Accelerated Cost Recovery System will provide for faster write-off of capital expenditures by means of simplified and standardized rules. The system will replace the present complex provisions for determination of depreciation allowances. It substitutes easily identified classes, each with a standard schedule of deductions to be taken over a fixed recovery period. The proposed legislation assigns machinery and equipment used in business and depreciable real estate to classes with recovery periods of 3, 5, 10, or 15 years and provides accelerated recovery over those periods.

Classes. Brief descriptions of the classes summarize the essentials of the system.

3-year property. This class consists of autos, light trucks, machinery and equipment used in research and development activities, and assets (such as special tools) with a guideline life under ADR of four years or less. Expenditures for these assets will be written-off in three years according to an accelerated schedule. An investment credit of 6 percent will also apply to this class, an increase of 2⅔ percentage points over the present law for property written-off in three years.

5-year property. All other outlays for machinery and equipment, including public utility property with present guidelines lives of 18 years or less, are assigned to a 5-year class. Additions to this class will be written-off according to an accelerated 5-year schedule. The full 10 percent investment credit will be allowed for this class.

10-year property. Public utility property for which present guidelines exceed 18 years and real estate covered by the ADR system with a lower limit of 10 years or less will be written-off on an accelerated basis over 10 years. As under present law, the 10 percent investment credit applies to public utility property in this class, but is not generally available for real property.

15-year property. Depreciable real estate (which is not 10-year property) will be assigned an audit-proof life of 15 years and will be written off on a composite basis according to an accelerated schedule. As under present law, no investment credit is allowed for property in this class.

Rates. The recovery percentages for 3, 5 and 10-year property will be based on use of the 150 percent declining balance method for the early years and the straight-line method for the remainder of the recovery period. The recovery for 15-year (real) property will be based on use of the 200 percent declining balance method (switching to straight line). The applicable rates are as follows:

ACCELERATED COST RECOVERY

[In percent]

Ownership year	Class of Investment			
	3-year	5-year	10-year	15-year
1	25	15	8	7
2	38	22	14	12
3	37	21	12	11
4		21	10	9
5		21	10	8
6			10	7
7			9	6
8			9	5

ACCELERATED COST RECOVERY—Continued

[In percent]

Ownership year	Class of Investment			
	3-year	5-year	10-year	15-year
9			9	5
10			9	5
11				5
12				5
13				5
14				5
15				5
Total	100	100	100	100

Accounting rules. Unlike present law, all of the cost recovery rules apply alike to new and used property, and no estimate of salvage value is added to the "vintage" account for its class and is kept in that account until fully written-off or retired. A "half-year convention" for the year of acquisition is built-in to the recovery schedule.

Flexibility. Taxpayers may use, instead of the prescribed rates, rates based on use of the straight-line method over either the otherwise applicable recovery period or the longer period used for earnings and profits purposes. In addition, the net operating loss and investment credit carryover periods are extended from 7 to 10 years.

Dispositions. Gain or loss is generally recognized on disposition of an asset. Gains on property in the 3, 5, and 10-year classes will be recognized as ordinary income to the extent of prior allowances (section 1245). Similarly, for property in the 15-year class (unless a straight-line recovery is elected) other than residential real estate and low income housing, section 1245 recapture will apply. For these latter types of property, section 1250 recapture will apply.

Special Rules

Earnings and profits. Cost recovery for earnings and profits purposes will be, for property in the 3, 5, 10, and 15-year classes, based on periods of 5, 12, 25, and 35 years respectively. Additionally, the straight-line method will be used.

Foreign assets. The recovery period for foreign assets will be the ADR guideline period as of January 1, 1981. The rate of recovery will be based on use of the 200 percent declining balance method in the early years and the straight line method in the later years of the recovery period. For foreign real property, recovery will be over 35 years under the 150 percent declining balance method (switching to straight line). Flexibility similar to that provided for domestic assets is provided with respect to foreign property.

Minimum tax. For noncorporate lessors of machinery and equipment in the 3, 5, and 10-year classes the excess of the recovery deduction over the deduction based on use of the straight-line method over 5, 8, and 15 years, respectively will be a preference item for purposes of the minimum tax. For real estate, the excess of the recovery deduction over the deduction based on a 15-year straight-line recovery will be a preference item.

Leasing. A safe harbor is provided for leasing transactions involving new personal recovery property for corporate lessors. In general, these transactions will not be denied treatment as a lease merely because the tax benefits of ownership are taken into account as part of the economic substance of the transaction or if the minimum investment is not greater than 10 percent of the cost of the property.

Investment Tax Credit

Recapture. Taxpayers must pay back, or "recapture," a portion of the investment credit in the case of early retirements up to the fifth year that an asset is held. In these cases, the taxpayer may keep a credit of 2 percent for each full year the property is held, up to the amount of credit originally claimed.

At risk. The proposal extends the at risk rules to the investment credit allowed under ACRS. However, an exception is provided for amounts borrowed from third party banks, savings and loan associations and insurance companies.

Effective Date

The Accelerated Cost Recovery System will be effective for property acquired or placed in service after December 31, 1980. However, for machinery and equipment, ACRS does not apply to property in use before January 1, 1981, unless acquired after December 31, 1980, in a transaction in which both the owner and user change. For real property, ACRS does not apply to property in use before 1981 transferred in a transaction in which the owner does not change, or to property acquired for pre-1981 property in certain substituted basis transactions.

Increase in Recovery Rates After 1984

The recovery percentages for 3, 5 and 10-year property will be increased for property placed in service after 1984. For property placed in service in 1985 the percentages will be based on the use of 175 percent declining balance method for the first year and switching to the sum-of-the-years digits method for the remaining years. For property placed in service after 1985, the rates will be based on the use of 200 percent declining balance method for the first year and switching to sum-of-the-years digits method for the remaining years.

TITLE III—MISCELLANEOUS TAX PROVISIONS

Subtitle A—Incentives for research and experimentation

Under section 301 of the bill, a nonrefundable income tax credit would be allowed for research and experimental wage expenditures paid or incurred by a taxpayer during the taxable year in carrying on a trade or business of the taxpayer, but only to the extent such expenditures exceed the average amount of the taxpayer's research wage expenditures in a base period.

The rate of the credit would be 25 percent of the incremental research wage expenditures for the year. Eligible wages would be those paid or incurred for services performed in conducting research and experimentation. In computing the credit, only wage expenditures for research conducted within the United States would be taken into account. Research funded by government and research in the social sciences or humanities would not qualify.

The provision adopts the definition of research and experimentation now used for purposes of deduction of research expenditures under Code section 174. However, it is intended that the Internal Revenue Service may, over time, provide further guidance as to the definition, consistent with the existing approach.

In the case of contract research, the person on whose behalf the research is done would be entitled to the credit. Accordingly, wages paid or incurred by the person doing the work would be attributable to the person making reimbursement therefor.

For individuals, the credit could only offset tax attributable to income from the trade or business with respect to which the research and experimental wage expenditure was incurred.

For the taxpayer's first taxable year to which the credit applies, the base period would be the first preceding taxable year. For the second credit year, the base period would be the preceding two taxable years. For the third credit year and thereafter, the base period would consist of the three preceding taxable years.

The provision would be effective for wages paid or incurred after June 30, 1981, in taxable years ending after such date.

Subtitle B—Investment tax credit for qualified rehabilitation expenditures

Under section 311 of the bill, the current law 10 percent investment credit for rehabilitation expenditures incurred in connection with existing nonresidential commercial and industrial buildings would be replaced by a three-tier credit. A credit of 15 percent would be available in the case of rehabilitation expenditures incurred for buildings that have been in use at least 30 years and a credit of 20 percent would be available with respect to the rehabilitation of buildings that are at least 40 years old. In addition, a 25-percent credit would be provided for certified rehabilitation expenditures incurred in connection with certified historic buildings. The 25-percent credit would be available with respect to all income-producing certified historic buildings, including those used for residential purposes; the 15- and 20-percent credit would be limited, like the credit under current law, to nonresidential buildings.

In order to qualify for the credit, expenditures must be incurred after December 31, 1981. In addition, they must be expenditures of the type that must be capitalized and they must be for property (or additions or improvements to property) which have a recovery period of 15 years under the new ACRS system.

The provision would simplify the requirement of current law that a credit may be taken only once every 20 years with respect to a building, or a major portion of a building, by requiring only that a rehabilitation be substantial. To qualify as a substantial rehabilitation, rehabilitation expenditures must exceed the greater of the taxpayer's adjusted basis in the building before the rehabilitation or $5,000.

Lessees would be eligible for the credit with respect to rehabilitation expenditures incurred by the lessee, provided that, on the date of completion of the rehabilitation, the remaining term of the lease is at least 15 years.

Rehabilitation expenditures incurred in connection with a certified historic building or a building in a registered historic district would not qualify for the credit, unless the rehabilitation is certified by the Secretary of Interior as being consistent with the historic character of the building or the district in which such building is located. This rule would not apply to a building in a registered historic district, if the building is not a certified historic building and the Secretary of Interior certifies that the building is not of historic significance to the district.

Expenditures for property eligible for the rehabilitation investment credit would not be eligible for the regular 10 percent investment credit. In addition the energy credit would not be allowed with respect to property which is eligible for the rehabilitation credit. Finally a taxpayer would not be per-

mitted to use accelerated methods of depreciation in conjunction with the credit.

Subtitle C—Marriage penalty deduction

Present law generally imposes a greater tax on a two-earner married couple than would be imposed if each spouse were single. Section 321 of the bill would reduce the current discrimination against two-earner families by providing a marriage penalty deduction equal to a specified percent of the lower earning spouse's earnings up to $30,000. The specified percentage would be 5 percent in 1982 and 10 percent in subsequent years. This deduction would be allowable whether or not the taxpayer itemizes deductions.

The marriage penalty deduction would not increase taxes paid by single persons and one-earner couples. Thus, it would not change the amount of tax savings achieved by a single worker who marries a non-employed spouse.

Subtitle D—Savings provisions

Individual Retirement Accounts

Under present law, an individual generally is entitled to deduct the amount contributed to an individual retirement account, annuity or bond (referred to collectively as "IRAs"). The limitation on the deduction for a year is generally the lesser of 15 percent of compensation for the year or $1,500. The $1,500 contribution limit is increased to $1,750 for a year if (1) the contribution is equally divided between an employee and the spouse of the employee and (2) the spouse has no compensation for the year. However, no IRA deduction is allowed for a taxable year to an individual who is an active participant during any part of the year in a qualified plan, a tax-sheltered annuity, or a governmental plan.

Section 331 of the bill would both increase the deductible limits of IRAs and extend their availability.

In the case of an employee who is not an active participant in a qualified plan (i.e., one who is currently eligible to make IRA contributions), the current limit would be raised to $2,000, and the percentage limitation would be 100 percent of compensation.

In the case of an employee who *is* an active participant in an employer-sponsored plan (*i.e.*, one who is not currently eligible for an IRA), a deduction would be allowed for contributions by the employee to an IRA. The annual deduction by an active participant would be limited to the smaller of $1,000 or 100 percent of the participant's compensation.

The current spousal IRA provisions would be deleted but the IRA limits would be increased to a total of $2,250 ($1,125 in the case of an active participant) where an IRA is established for a non-employee spouse.

Examples

An employee with $10,000 of compensation for a year who does not participate in an employer-sponsored plan could, under current law, contribute and deduct up to $1,500 to an IRA. Under the proposal, this employee would be entitled to a deduction for IRA contributions up to $2,000.

An employee with $10,000 of compensation for a year who is an active participant in an employer-sponsored plan is not allowed to make any deductible contributions to an IRA under current law. The proposal would allow this employee to contribute and deduct up to $1,000 to an IRA.

Retirement Savings for the Self-Employed

Under present law, a qualified retirement plan generally must be established by an employer for the benefit of employees and their beneficiaries. For plan qualification purposes, a sole proprietor is considered both an employee and his or her own employer, and a partnership is considered the employer of each partner. Thus, a sole proprietorship or a partnership may adopt a tax-favored retirement plan, referred to as an H.R. 10 plan or Keogh plan, for both common law employees and for the proprietor or partners.

The maximum deductible contribution to an H.R. 10 plan on behalf of a self-employed individual is the lesser of $7,500 or 15 percent of the individual's net earnings from self employment.

Although sole proprietors and partners with more than a 10-percent interest in the capital or profits of a partnership are prohibited from borrowing from an H.R. 10 plan, common law employees and partners with less than a 10-percent interest may borrow from the plan if certain loan conditions are met.

Section 332 of the bill would both increase the H.R. 10 plan deduction limits and change the rules regarding loans from the plan to certain participants.

The maximum deductible contribution to an H.R. 10 plan would be increased to $15,000. The percentage limit (15 percent of net earnings from self employment) would be retained. However, if the proposals to expand the availability of deductible employee contributions to an IRA are adopted, the effective maximum deductible contribution to an H.R. 10 plan would be increased to $16,000, with no antidiscrimination or percentage limits applied to the additional $1,000.

The prohibition against borrowing by sole proprietors and more than 10 percent partners would be expanded to all partners.

Permanent Exclusion of a Portion of Dividends and Interest

Under present law, individuals may exclude from gross income up to $200 ($400 on a joint return) of dividends and interest income received from domestic sources. However, the provision is effective only for taxable years beginning after December 31, 1980, and before January 1, 1983 (generally 1981 and 1982 calendar years).

Section 333 of the bill would make the partial exclusion of dividends and interest by individuals permanent.

Subtitle E—Exclusions of foreign earned income and foreign housing costs

Section 341 of the bill would provide simpler and more generous tax relief for foreign earned income to facilitate the employment of Americans abroad. Under the provision, individuals who satisfy either a foreign residence or foreign presence test could exclude the first $50,000 of foreign earned income per year plus 50 percent of the next $50,000. In addition, the provision would exclude from income expenses incurred for reasonable housing in excess of a base amount. The base amount would be 16 percent of the salary of a U.S. Government employee at civil service grade GS–14, step 1. These amounts would be pro-rated on a daily basis for individuals eligible during only part of a tax year.

Deductions attributable to excluded income would not be allowed and foreign taxes paid on the excluded income could not be claimed as a foreign tax credit.

The exclusions provided would be elective. Qualifying individuals could choose to be taxable on their full foreign earnings and claim the ordinary foreign tax credit.

The provision would also shorten the required period of physical presence in a foreign country to 11 out 12 months rather than 17 out of 18 months. It would retain the present rules allowing pro rata benefits in certain cases where civil unrest or similar adverse conditions required an individual to leave the foreign country before meeting the time requirements.

The benefits of the exclusions would be extended to include individuals whose foreign earned income is paid by the U.S. Government but who do not qualify for the benefits provided under section 912 of the Internal Revenue Code.

The provision would clarify the conditions under which a camp located in a foreign country qualifies as part of the employer's business premises for purposes of the exclusion provided under section 119.

The provision would take effect as of January 1, 1982. It would replace the exclusion allowed under section 911 and the deductions allowed under section 913 of present law.

Subtitle F—Estate and gift provisions

Increase in the Unified Credit

Section 351 of the bill would increase the unified credit from $47,000 to $192,800 over a 4-year period. The amount of the credit would be $70,800 in 1982, $96,300 in 1983, $121,800 in 1984, and $192,800 in 1985. These levels of the unified credit are equivalent to exemption levels of $250,000, $325,000, $400,000 and $600,000, respectively.

This provision would also change the estate tax filing requirements to conform to the increase in the unified credit in terms of an exemption equivalent. When fully phased-in in 1985, an estate tax return would be required only if the decedent's gross estate exceeds $600,000, rather than $175,000 as provided by current law. During the phase-in period, the filing requirements would be $250,000 in 1982, $325,000 in 1983, $400,000 in 1984 and $600,000 in 1985.

Finally, this section provides a special rule for property received by a decedent by gift within three years of the date of his death. In such a case the gift would not receive a stepped-up basis. This rule is necessary to prevent individuals from giving property in contemplation of the donee's death merely to obtain a tax-free step-up in basis.

Unlimited Marital Deduction

Section 352 of the bill provides an unlimited marital deduction for both estate and gift tax purposes. This would permit an individual to make lifetime and deathtime transfers to his spouse, no matter how large, without the imposition of a transfer tax. It would not change present law with respect to transfers of terminable interests: these interests would not qualify for the marital deduction. Gifts of community property, however, would qualify for the deduction.

Increase in the Annual Gift Tax Exclusion

Section 353 of the bill would increase the annual gift tax exclusion from $3,000 to $10,000 per donee. This would permit a husband and wife to transfer jointly $20,000 per donee each year without being subject to the gift tax.

These amendments would apply to gifts made, and decedents dying after December 31, 1981.

Subtitle G—Extension of and increase in credit against crude oil windfall profit tax for royalty owners

Under current law royalty owners receive a credit (or refund) of up to $1,000 against the windfall profit tax imposed on the removal of their royalty oil during calendar year 1980. The credit is available only to individuals, estates and family farm corporations and not to other corporations or trusts. The credit may be claimed in 1981 either as a credit against income tax or as a refund of excise tax.

Section 361 of the bill would provide royalty owners with a credit (or refund) against the windfall profit tax imposed on the removal of their royalty oil during each calendar year. The credit would not exceed $2,500. The proposal generally would retain the present law rules relating to eligibility for the credit and would make adjustments to accommodate the increase in the credit.

Under present law, both percentage depletion and the special windfall profit tax rates for independent producers generally are denied in case of properties transferred from one person to another. The current law credit does not contain a provision denying the credit in cases of the transfer of royalty interests in proven properties. This is because the Congress believed that no transfer limitation was required since the loss of percentage depletion on transferred properties will generally outweigh the benefits of a one year credit. However, since the proposal extends and increases the amount of credit there will be a significant incentive for royalty owners to transfer interests which do not qualify for the applicable credit. Accordingly, in order to prevent evasion of the credit limit and preclude proliferation of the credit, the provision contains a rule that denies the credit to royalty interests in proven properties transferred after June 9, 1981.

The royalty owner credit would apply to oil produced in calendar years beginning after December 31, 1980, in taxable years ending after such date.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Member (at the request of Mr. PARRIS) to revise and extend his remarks and include extraneous material:)

Mr. KEMP, for 60 minutes, today.

(The following Members (at the request of Mr. EVANS of Georgia) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. CONABLE, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost $1,560.

(The following Member (at the request of Mr. PARRIS) and to include extraneous matter:)

Mr. LEBOUTILLIER.

(The following Members (at the request of Mr. EVANS of Georgia) and to include extraneous matter:)

Mr. STUDDS.

Ms. MIKULSKI.

Mr. AUCOIN.

Mr. GIBBONS.

Mr. HOWARD.

Mr. WYDEN.

Mr. OTTINGER.

Mr. SOLARZ in two instances.

Mr. LEHMAN in two instances.

Mr. HAMILTON.

Mr. MATSUI.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 88. Joint resolution designating the week commencing June 14, 1981, as "National Softball Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. HATCHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 5 minutes a.m.), the House adjourned until tomorrow, Thursday, June 11, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1562. A letter from the Acting Under Secretary of Energy, transmitting the third semiannual report on alternative fuels production, pursuant to title II of Public Law 96-126; to the Committee on Appropriations.

1563. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-35, "To order the closing of a public alley abutting lots 819, 820, and 832 in square 43, bounded by 24th Street NW., G Street NW., 23d Street NW., and F Street NW. (S. O. 80-93) (Ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1564. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-36, "To order the closing of a portion of an east-west public alley abutting lots 98, 99, 100, 101, 102, 170, 105, 106, and 847 in square 628, bounded by E Street NW., F Street NW., North Capitol Street NW., and New Jersey Avenue NW. (S. O. 80-3) (Ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1565. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-37, "To order the closing of a portion of D Street NW., abutting lots 805, 804, 822, 823, 802, 2, 801, and 800 in square 348, between 10th Street, NW., 11th Street NW., and Pennsylvania Avenue NW. (S. O. 79-263) (Ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1566. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-38, "To order the closing of a portion of Massachusetts Avenue SE., abutting lots 30 and parcel 201/162 in square 5367, between Alabama Avenue SE., and Southern Avenue SE. (S. O. 80-154) (Ward 7)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1567. A letter from the Chairman, Council of the District of Columbia, transmitting District of Columbia Act 4-39, "To order the closing of an east-west public alley abutting lots 39, 40, 43, and 834 in square 75, bounded by Pennsylvania Avenue NW., 21st Street NW., 22d Street NW., and I Street NW. (S. O. 80-143) (Ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1568. A letter from the Acting Administrator, Energy Information Administration, Department of Energy, transmitting the third annual report based on the administration's financial reporting system for major energy producers, pursuant to section 205(h) of Public Law 95-91; to the Committee on Energy and Commerce.

1569. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on the transfer by the Goverment of Saudi Arabia of certain U.S.-origin military equipment to the Sudan, pursuant to section 3 of the Arms Export Control Act; to the Committee on Foreign Affairs.

1570. A letter from the Executive Director, Marine Mammal Commission, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1980, pursuant to 5 U.S.C. 552(d) to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FROST: Committee on Rules. House Resolution 154. Resolution providing for the consideration of H.R. 2614. A bill to authorize supplemental appropriations for fiscal year 1981 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles and for research, development, test, and evaluation for the Armed Forces and to increase the authorized personnel end strengths for military and civilian personnel of the Department of Defense for fiscal year 1981 (Rept. No. 97-134). Referred to the House Calendar.

Mr. DERRICK: Committee on Rules. House Resolution 155. Resolution providing for the consideration of H.R. 3413. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes (Rept. No. 97-135). Referred to the House Calendar.

Mr. HALL of Ohio: Committee on Rules. House Resolution 156. Resolution providing for the consideration of H.R. 3023. A bill to

authorize appropriations to the Department of Energy for fiscal year 1982 for conservation, exploration, development, production, sale, and use of the naval petroleum reserves and naval oil shale reserves (Rept. No. 97-136). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ARCHER:

H.R. 3869. A bill to amend the Internal Revenue Code of 1954 to allow the credit for production of natural gas from certain nonconventional sources only if such natural gas was sold at a lawful price without regard to section 107 and subtitle B of title I of the Natural Gas Policy Act of 1978; to the Committee on Ways and Means.

By Mr. AUCOIN (for himself, Mr. MURPHY, Mr. WYDEN, Mr. GINGRICH, Mr. COELHO, Mr. LEHMAN, Mr. KILDEE, Mr. AKAKA, and Mr. WEAVER):

H.R. 3870. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax for contributions of certain crops by farmers to certain tax-exempt organizations; to the Committee on Ways and Means.

By Mrs. BOUQUARD:

H.R. 3871. A bill to prohibit permanently the issuance of regulations on the taxation of fringe benefits; to the Committee on Ways and Means.

By Mr. BURGENER (for himself, Mr. ADDABBO, Mr. OTTINGER, Mr. MITCHELL of Maryland, Mr. BEILENSON, Mr. LAGOMARSINO, Mr. BINGHAM, Mr. MILLER of California, Mr. FOGLIETTA, Mr. MOTTL, Mr. FORSYTHE, Mr. KILDEE, Mr. LAFALCE, Mr. ROE, Mrs. CHISHOLM, Mr. PASHAYAN, Mr. SCHEUER, Mr. MOLINARI, Mr. WEBER of Minnesota, Mr. SOLARZ, Mr. RICHMOND, Mr. FRANK, Mr. DOUGHERTY, Mr. WOLF, Mr. CONYERS, Mr. LEHMAN, Mr. CORRADA, Mr. SIMON, Mr. VENTO, Mr. FAZIO, Mr. DIXON, Mr. MINETA, Mr. MCKINNEY, Mr. TAUKE, Mr. LOWERY of California, Mrs. BOUQUARD, Mr. DELLUMS, Mr. DWYER, and Ms. FERRARO):

H.R. 3872. A bill to provide for a national program of screening of newborn infants for metabolic disorders that could retard brain development and cause other seriously disabling diseases; to the Committee on Energy and Commerce.

By Mr. CONABLE:

H.R. 3873. A bill to amend the Internal Revenue Code of 1954 with respect to the time for payment of gift taxes; to the Committee on Ways and Means.

H.R. 3874. A bill to exempt from duty certain aircraft components and materials installed in aircraft previously exported from the United States where the aircraft is returned without having been advanced in value or improved in condition while abroad; to the Committee on Ways and Means.

By Mr. EMERSON:

H.R. 3875. A bill to extend from 5 to 10 years (until November 30, 1987) the period during which spouses and surviving spouses who are eligible for Government pensions may qualify for an exemption from the pension offset provisions in title II of the Social Security Act; to the Committee on Ways and Means.

By Mr. SMITH of Alabama:

H.R. 3876. A bill to eliminate the position of elevator operator in the congressional office buildings; to the Committee on House Administration.

By Mr. SWIFT (for himself, Mr. DINGELL, Mr. OTTINGER, Mr. CORCORAN, and Mr. MOTTL):

H.R. 3877. A bill to amend the Energy Policy and Conservation Act to provide for adequate supplies of helium for future energy efficiency and conservation purposes, and for other purposes; jointly, to the Committees on Energy and Commerce, Interior and Insular Affairs, and Science and Technology.

By Mr. RAHALL:

H. Con. Res. 147. Concurrent resolution expressing the sense of the Congress that Philip Habib, special envoy to the Middle East, should be commended for his tireless efforts to maintain the peace between Syria and Israel; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. MITCHELL of New York introduced a bill (H.R. 3878), for the relief of Dietrich H. Kohlrusch, Sigrid Kohlrusch, and Denise Kohlrusch, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 704: Mr. NAPIER and Mr. FITHIAN.
H.R. 706: Mr. NAPIER.
H.R. 907: Mr. PHILLIP BURTON.
H.R. 2451: Mr. SILJANDER, Mr. SHELBY, Mr. AUCOIN, Mr. GINN, Mr. EVANS of Iowa, Mr. COATS, and Mr. WYLIE.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3023

By Mr. WEAVER:

—Change lines 2 and 6 to read as follows: Line 2, after "development," insert "study,".

Line 6, strike "$225,903,000" and insert "$224,903,000".

And add additional paragraphs, beginning on line 10, to read as follows:

"(3) $1,000,000 shall be available for the study of existing or new naval petroleum reserves to determine the adequacy of naval petroleum reserves for the long-term national security; in particular "Department of Interior California Lease Numbered 53" shall be studied for inclusion in such naval petroleum reserves, and no sale or lease of such potential reserve shall be made during the time in which the study is undertaken.

"(4) The study shall be completed and the Secretary shall report his findings to the Congress one year from the date of passage of this Act."

H.R. 3480

By Mr. GILMAN:

—On page 13, after line 8, insert the following:

SEC. . The Legal Services Corporation Act (42 U.S.C. 2996 et seq.) is amended by redesignating sections 1013 and 1014 as sections 1014 and 1015, respectively, and by inserting after section 1012 the following new section:

"CIVIL ACTIONS

"SEC. 1013. (a) The Corporation may bring an action in the appropriate district court of the United States to compel the specific performance of any agreement between the Corporation and any recipient for the provision of legal services under this title.

"(b) The Corporation, the United States, or any State acting through its Attorney General or other chief law enforcement officer may bring an action in the appropriate district court of the United States for a temporary or permanent injunction or other appropriate relief for purposes of compelling compliance by a recipient with the provisions of this title or with any rule, regulation, or guideline promulgated pursuant to this title. A State may bring an action under this subsection only against a recipient located in such State.

"(c) A judgment or order in an action brought under this section shall not require the interruption of the provision of legal services to any eligible client by a recipient in any action pending on the date of such decision or order, unless the court explicitly so states in such decision or order. If the court does explicitly so state, it shall attempt to make equitable arrangements for the provision of legal services to any eligible client affected thereby."

—On page 13, after line 8, insert the following:

SEC. . The Legal Services Corporation Act (42 U.S.C. 2996 et seq.) is amended by redesignating sections 1013 and 1014 as sections 1014 and 1015, respectively, and by inserting after section 1012 the following new section:

"CIVIL ACTIONS

"SEC. 1013. (a) The Corporation may bring an action in the appropriate district court of the United States to compel the specific performance of any agreement between the Corporation and any recipient for the provision of legal services under this title.

"(b) The Corporation or the United States may bring an action in the appropriate district court of the United States for a temporary or permanent injunction or other appropriate relief for the purposes of compelling compliance by a recipient with the provisions of this title or with any rule, regulation, or guideline promulgated pursuant to this title.

"(c) A judgment or order in an action brought under this section shall not require the interruption of the provision of legal services to any eligible client in any action pending on the date of such decision or order, unless the court explicitly so states in such decision or order. If the court does explicitly so state, it shall attempt to make equitable arrangements for the provision of legal services to any eligible client affected thereby."

SENATE — Wednesday, June 10, 1981

(Legislative day of Monday, June 1, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Our fathers' God to Thee, author of liberty, to Thee we pray. Long may our land be bright, with freedom's holy light. Protect us by Thy might, great God our King.

How easily we forget Thy gracious providence that brought our forebears to these shores, that sustained them through bitter adversity. How easily we forget, and assume that our might, our wisdom, our ingenuity alone produced this great Nation. What will it take, O God, to make us know that we cannot do it alone? What calamity must fall before we humble ourselves and acknowledge our dependence upon Thee?

We make thousands of laws to help us keep the Ten Commandments, and then invent ways to violate them and make it legal. In our pride, we suffer the illusion that we are solving our problems while violence, crime, alcoholism, drug abuse, divorce, and venereal disease grow to epidemic proportions. We overconsume while millions never have enough. We reduce inalienable human rights into I-can-do-as-I-please or I-have-got-it-coming-to-me or privilege without responsibility. We talk peace and prepare for war.

Lord God help us. Quicken our minds to seek Thy wisdom, our hearts to repent, our wills to obey Thee. Return us to the noble dependence upon Thee by which our forefathers persevered against incredible odds to give us our grand national legacy.

In Jesus' name. Amen.

RECOGNITION OF THE ASSISTANT MAJORITY LEADER

The PRESIDENT pro tempore. The assistant majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, what is the order for this morning?

The PRESIDENT pro tempore. After the two leaders have been recognized there is an order for a 15-minute speech by the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.), followed by consideration of the food stamp bill.

Mr. STEVENS. Mr. President, there is no request for time on our side. I reserve the leadership time on this side.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield as much of my time as the distinguished Senator from Virginia may need in addition to his order which has been entered.

Mr. HARRY F. BYRD, JR. I thank the Senator.

RECOGNITION OF SENATOR HARRY F. BYRD, JR.

The PRESIDENT pro tempore. The Senator from Virginia is recognized.

SEAPOWER CHALLENGE

Mr. HARRY F. BYRD, JR. Mr. President, I take this opportunity to discuss a matter of considerable importance to our Nation—our naval forces, in particular conventional naval forces.

I do this at this time because of my personal past affiliation with the Navy, my longtime belief that adequate naval forces are essential to the survival of this country, my assignment to the Seapower and Force Projection Subcommittee, and because of the President's major emphasis on sea forces.

The U.S. Navy is in danger of losing its preeminent role in the world's oceans. In fact, if present trends continue, the Navy's traditional role as an effective instrument of national strategy in times of peace as well as war will be in serious doubt.

Sea forces played a major role in the establishment of our Nation. Indeed, many of the Founding Fathers came to this country by sea, so they had a personal involvement.

Historically, our colonial forefathers were apprehensive—and I hasten to add with good reason—when it came to military leaders. History was replete with military leaders rising to power and then taking over governments. Oliver Cromwell was a recent reminder to them of a very popular military leader who rose to a position of great power, and after this rise to power, his reign became a reign of persecution. Desiring an instrument of national policy, these colonial leaders sought to utilize the flexibility of naval forces without creating the risk of a military dictatorship. These early actions began our national naval strategy.

In the Articles of Confederation these colonists inserted: "When land-forces are raised. . . ." The Constitution states that Congress has the power to "raise and support armies . . ." with limitations of time on appropriated funds. With respect to the sea service the Constitution states that Congress will "provide and maintain a navy."

Accordingly, from the earliest of our history, Congress has been constitutionally required to "provide and maintain a navy." The Constitution does not prescribe an adequate navy, but obviously, our Navy should be adequate.

We may define adequate in this instance as "being able to pursue our national objectives to a successful conclusion."

Navies are instruments of power to support foreign policy objectives for the common good of nations. The need for naval strengths depends to a large extent on geography and on international commerce and trade in which a country must engage for its own common welfare. The needs for these instruments of power have never been constant. As threats to nations wax and wane, needs must be responsive.

We as a nation have not always maintained adequate naval forces, yet we have been able to build to adequacy. In the past, primarily because of our geography and our allies, we have been able to buy the time necessary for building up naval forces.

In 1939 we had 396 ships. It was not an adequate force considering the threat. The hour was late, but American ingenuity was able to meet the test. By the end of World War II, we had over 8,000 ships in the naval service. Our posture was one of overwhelming superiority. And the enemies were swept from the seas.

Our unchallenged naval superiority was to last for about 30 years.

Often an all-powerful nation tends to forget to think and plan and work as it should. Such was, I believe, our total military situation following World War II.

In the 1950's and 1960's it did not necessarily matter what we brought into our naval and military arsenals. We could buy tanks or ships or aircraft or rockets or whatever weapons systems we wanted. All of these just added to our overall superiority—for awhile.

Perhaps we were rich and fat and slipped away from realistic, intelligent planning and development of the best

strategy for the defense and preservation of America.

By the mid-1970's there was a clear challenge to our naval superiority. Challenge for naval supremacy is not a modern phenomenon.

At the outbreak of the Punic Wars in 264 B.C., Rome through the use of her legions had mastered all of her land enemies. But her new enemy was across the Mediterranean Sea—Carthage.

The Carthaginians, descendants of the seafaring Phoenicians, were skillful sailors and at home on the water. They stopped Roman sea communication and trade, raided Roman cities and towns, and even boasted that the Romans were not safe in bathing on their own beaches.

Rome suffered but did not despair. Rather, she copied the design of enemy ships that had washed up on her shores, and indeed improved upon the design.

Rome added a new idea—a secret weapon. The secret weapon was a "grappling iron" or grappling hook.

In a short period of time she had 100 galleys with five banks of oars and 20 smaller triremes.

When this Roman force put to sea, the Carthaginians—confident of the outcome—eagerly sailed to engage them.

The Roman ships went directly toward the enemy vessels, and when close abroad, they cast their grappling hooks on the ships of Carthage. With ships securely fastened, the legionnaires who had been riding the Roman ships swarmed on the decks of the enemy and overwhelmed them. Roman success was immediate.

The Mediterranean eventually became a Roman lake. With control of the sea, Rome in time transported her legions across the Mediterranean and destroyed Carthage. The Carthaginians were unable to recognize the threat in time to save themselves from extinction.

The history of Russia to a considerable extent has been one of staying within its own borders—wanting to expand but never quite able to do so.

But the Khrushchev regime brought about changes. The decision or perhaps series of decisions, originating with Lenin, was to move Soviet influence outward from the motherland. In so doing, it would outflank historical enemies—particularly China—and it would link with Third World countries.

The link with selective Third World countries would place the Soviets in a position to control or influence countries in strategic locations around the world.

This Soviet adventurism has resulted in moves to key areas—areas of major mineral deposits, access to key water passages, political voids where the Communists could capitalize.

To accomplish this, the Soviets had to turn to the sea. They have done that very well. For years Soviet merchant ships have frequented Third World seaports, spearheading foreign policy in countries targeted to be "satellited."

For some 25 years the U.S.S.R. has stayed on course. There is not one indication that Moscow plans to deviate from this strategy of using the sea to gain her objectives.

Rather every indication is that this policy will continue. So, I believe that in the late forties or early fifties major new successes in national policy objectives began to take place in the U.S S.R., and Soviet leaders have used well their military and naval forces as an instrument to fulfill their national policy.

The implementation of this policy not only meant the construction of naval vessels, but it meant the construction of a merchant fleet, not to compete with Western merchant marine forces but to develop trade and other relationships with Third World countries. It also meant the establishment of a fishing fleet and a special electronic intelligence-gathering sea force. In many respects these are the world's largest and best, and they are employed to maximize support of Soviet objectives.

There are some who trace the beginning of the Soviet challenge to a superior American naval force to the Cuban missile crisis of 1962. I submit that the decision was made before that event.

Shortly after the missile crisis, the world saw two classes of Soviet ships which should have alerted us to what was to come. The Soviets completed the first modern missile-cruiser which we call *Kynda*. This was the first modern major surface combat ship to carry both antiship and antiaircraft missiles. As such, this was the most powerful Soviet ship to sail the seas. At about the same time the Soviets completed a new missile-destroyer which we call *Kashin*. She was propelled by all-gas turbine engines, making her the fastest warship at sea. She carried antiaircraft missiles.

These were new grappling hooks.

Sea warfare was undergoing another change just as past developments have advanced the art of sea fighting.

These magnificent new ships probably took some 3 years to build. The planning period was perhaps another 4 or 5 years. Therefore, the idea of the Soviets to challenge sea superiority must be traced to the mid-1950's.

This timing coincides with July of 1955 when Adm. S. G. Gorshkov was ordered from his position as Commander of the Black Sea Fleet to Moscow. The following year this 46-year-old officer took command of Soviet naval forces. He is still there today, 26 years later.

At the time of Gorshkov's promotion major naval changes took place. Plans for the construction of aircraft carriers and battle cruisers were scrapped. The design of the Soviet Navy—submarines, ships, and aircraft—was such that these vessels would not copy the existing conventional sea forces to overcome America's lead at sea. Superior technological advances would be used so that the Soviet Navy would be able to destroy other ships at sea, both navy and merchant.

The Soviet leadership was not following a new naval doctrine. The doctrine of sea control is ancient. It has been used many times, including the final victory of our own revolution. The French fleet under Admiral Grasse made victory possible at Yorktown. When it denied the Royal Navy replenishment of besieged British forces, General Cornwallis was forced to surrender.

Gen. George Washington said:

> In any operation, and under all circumstances, a decisive naval superiority is to be considered as a fundamental principle; and the basis upon which every hope of success must ultimately depend.

Washington's statement is as true today as it was two centuries ago. I heartily endorse it.

This means that we must be able to destroy the enemy at sea, but in today's environment the Navy must be able to do more than that.

It must be able to project American power wherever that power is needed to support our national objectives.

The Soviet doctrine of controlling rich mineral and energy sources and key waterway bottlenecks threatens the very existence of Western civilization as we know it because of our dependence on overseas resources.

Responsibility for carrying the torch of freedom in the free world is in our hands. Allowing this flame to die would mean a return to the Dark Ages where the meaning of freedom would be lost.

The United States has throughout its history used military and naval forces as an instrument of national strategy in times of peace as well as times of war. It is the appropriate and timely application or threat of application of force that reduces the chances of a shooting war.

I would like to quote some figures from a book published by the Brookings Institution, "Force Without War." There are other authorities, but I shall quote figures from this publication.

It covers the period from World War II to 1975, and it analyzes the application or threat of application of American military and naval force short of war.

These authorities identify 215 incidents during this period when military and naval force was applied.

Naval forces were utilized in 177 of those 215 incidents, more than 80 percent of the time.

These incidents took place throughout many areas of the world. We are prone to forget that almost one-third of them were in the Western Hemisphere. The others were scattered over Europe, Asia, and Africa with a considerable number of incidents in the Mideast area.

Many of these were highly successful, and they prevented the spread or explosion of unrest and turmoil.

I might add that the Soviet Union has equally committed its forces in such incidents.

The application or threat of the application of force has and will continue to be a way to deter hostile foreign behavior.

Without becoming the world's policeman for every situation, we must have the will and the capability to apply appropriate force when it is in the best interest of our national objectives. The application of this power must also be timely and positive.

There are those who say we are better than or inferior to or even with the So-

viet Navy. Whether such statements are basic to the situation is questionable. Our Navy must carry out our objectives just as the Soviet Navy is carrying out Soviet objectives.

To attempt to visualize these naval forces engaging one another until one or the other could be judged the victor or the survivor, would be attempting to determine the undeterminable.

In the year 31 B.C. the fleet of Octavian, later the first Roman Emperor Augustus, faced the combined fleets of Marc Antony and Cleopatra at Actium. The winner of this historical battle would be the undisputed ruler of Rome and the world. That day has passed from us, and in our day and age we must be able to apply force not only against fleets, but where force is needed.

I might at this point refer to naval forces which are deployed to the Persian Gulf area. Naval forces are the only conventional force that could be successfully deployed to that area.

I might also state here that I think it most unfortunate for individuals to attempt to play U.S. seapower against U.S. land power. This is now and always has been an artificial argument, and I am hopeful that we have passed over this threshold to a more realistic decision-making process.

The President has once again turned our attention to seapower after many years of neglect. I congratulate him, and I support him. And I urge all of you to do the same.

During the past 20 years we have decreased our active naval fleet from 1,000 to 460 ships. Some of the 460 are old and delimited in capability. The aircraft carriers, *Coral Sea* and *Midway*, were launched over 35 years ago and are still regularly deployed. These two carriers are older than the youngest member of the Senate.

This 20-year period of neglect will prove costly to us, but it is a cost that we must bear.

The President and the Secretary of Defense advise that the objective is a Navy of 600 ships—battle groups built around 15 aircraft carriers. I support the concept of the aircraft carrier battle groups, for I believe that our strategic interests dictate the need for these forces. I, of course, reserve the right to be selective in the composition of the supporting elements of these battle groups.

The aircraft carrier is the centerpiece of our conventional naval strategy. It is the most mobile, flexible and politically-independent system available to the United States.

To those who say that the carrier is vulnerable, I say, every potential target is vulnerable.

However, the carrier with its ability to travel at high rates of speed presents a more difficult target for the enemy to pinpoint than other targets such as: airfields, military and naval installations, cities, and so forth. The carrier at sea is one of the least vulnerable targets.

The aircraft carrier is highly survivable. With active and passive self-defense systems and great mobility, it is deployable in hostile environments. The *Nimitz* class carrier, with 2,700 watertight compartments, is the safest of vessels at sea.

With the availability of today's advanced communications and transport, low-threat areas can change rapidly, in days or even hours, to high-threat areas. The Soviet military and naval forces and surrogate forces are widespread geographically, and we must be sure that our carrier forces can sustain themselves as they perform their role in national policy.

While we must regain superiority, I want to make it crystal clear that our efforts must be wise and prudent. We can ill afford to spend money unless we are sure beyond reasonable doubt that the weapons and weapons systems we buy are absolutely necessary for the support of national objectives of the United States.

The Defense Department cannot allow cost overruns, duplication, service and service union rivalry, mismanagement, or anything else to deter us from making every cent of every dollar count to the maximum extent. The new Navy must be efficient and effective, nothing less. As long as the administration fulfills this very necessary requirement, I shall strive to assist in the resurgence of our sea forces.

The Soviet Union is a formidable adversary. The intentions of the Soviet leadership are obvious. The momentum of Soviet aggression continues.

Those actions are loud and clear. The expanding influence in the Third World provides veto power over access and transport of minerals and energy needed by Western nations. Wherever possible to accomplish objectives, the Soviets support and encourage unrestrained terror which they call liberation.

A nuclear-powered battle cruiser, the largest warship built by any nation except for the carrier since World War II, has recently joined the Soviet Navy. Every indication is that in the not too distant future, the Soviets will complete their first nuclear-powered aircraft carrier. It should be clear enough that her ability to interdict the sealanes will in this decade be joined by a desire to project power at sea. As the Soviets expand their means of implementing their strategies, the tasks of the American Navy grows.

The Soviet Union may well hope to gain its objective without firing a bullet.

In closing let me say that we are in a struggle for our own survival and the survival of the free world—through economic strangulation as well as formal war.

To those who would stand by for further naval decline and to those who would change our naval forces to a defensive role, I say we cannot do that. Great navies of history have been offensive navies.

Times are very different today from the days of the struggle between Rome and Carthage, but the struggle for survival is similar. The principles of the sea have not changed.

Our forefathers realized that when they set up the field piece in the village square that they preordained that the battle would be fought there.

Patrick Henry said:

> I have but one lamp by which my feet are guided, and that is the lamp of experience. I know of no way of judging the future but by the past.

Now is the hour for us to use the lessons of the past and our resources wisely in order to restore the naval balance of power in our favor.

Mr. THURMOND. Mr. President, I ask unanimous consent that I may be recognized for 2 minutes.

The PRESIDING OFFICER (Mr. SYMMS). Does the Senator wish to put aside the 10:30 order?

Mr. THURMOND. Yes.

The PRESIDING OFFICER. Without objection, the Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I just want to take this opportunity to commend the able Senator from Virginia for making what I consider the finest speech on seapower that I have heard in my 27 years in the Senate.

The Senator from Virginia is an able member of the Senate Armed Services Committee and one of the most valuable members there. His father was a member of the Senate Armed Services Committee when he was here preceding the present HARRY F. BYRD, JR.

The Byrd family has been a great asset to this country. Father and son have been two of the greatest Senators with whom I have served.

This speech this morning that he has delivered on the floor of the Senate should be read by every Member of this body and by the public generally. The Senator from Virginia has the vision to understand that the goal of the Soviets is to spread their aggression throughout the world; their goal is to dominate the world. He realizes the importance of preparing this country. This morning he has given us a very fine address on the subject of seapower which is so vital to the maintenance of freedom of this country and the free world.

Mr. HARRY F. BYRD, JR. Mr. President, I am very grateful indeed for the generous comments of my good friend from South Carolina, Senator THURMOND. I am very grateful to him. I look forward to continuing to work closely with the distinguished and able senior Senator from South Carolina on these vital matters of national defense which are so important to our Nation and on which the Senator from South Carolina has taken such an important leadership role for so many years.

Mr. HELMS. Mr. President, I join the distinguished Senator from South Carolina in the tribute he made to the distinguished and able Senator from Virginia. HARRY BYRD and I have been close, personal friends since the day I arrived in the Senate. I knew his father before him, when I was a staff member in the Senate back in the early 1950's.

I know of no Senators who have more ideally stood for the principles of this country than Harry Byrd, Sr., and HARRY BYRD, JR.

I commend him on his address and on his tenure in the Senate, which I am sure will continue on and on. I am very proud of him.

Mr. HARRY F. BYRD, JR. If the Senator will yield, I wish to express my appreciation to the Senator from North Carolina for his very generous remarks.

Mr. HELMS. I thank the Senator.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. SYMMS). The Chair, on behalf of the Vice President, appoints to the Mexico-United States Interparliamentary Conference, Manzanillo, Colima, Mexico, June 11–15, 1981, in accordance with Public Law 86–420. the following: CHARLES H. PERCY, chairman; CHRISTOPHER J. DODD, vice chairman, and STROM THURMOND.

FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981

The PRESIDING OFFICER. Under the previous order, the Senate will now resume the consideration of S. 1007, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 1007) to amend the Food Stamp Act of 1977 to restrain food stamp program spending, to increase State agency flexibility, to focus benefits toward the most needy, to extend appropriations authority, to amend the Agriculture and Consumer Protection Act of 1973, and to extend and improve the commodity distribution programs, and for other purposes.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, is the Senator from North Carolina correct in his understanding that the McClure amendment will be pending as soon as the Senator from Idaho arrives and in fact calls it up?

The PRESIDING OFFICER. The Senator from North Carolina is correct.

Mr. HELMS. I thank the Chair.

Mr. President, I note the distinguished manager of the bill on the other side is on his way. I suggest the absence of a quorum with the time to be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Idaho is recognized to call up an amendment.

UP AMENDMENT NO. 141

(Purpose: To count as income for purposes of the Food Stamp Act any payments or allowances made to a household for the purpose of providing energy assistance)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 141.

Mr. McCLURE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 42, line 6, strike out "(10) any income" and insert in lieu thereof "and (10) any income (other than a payment or allowance made under any Federal, State, or local law for the purpose of providing energy assistance)".

On page 42, beginning with the comma after "program" in line 8, strike out all down through "law" in line 10.

Mr. McCLURE. Mr. President, today I am offering an amendment to the Food Stamp and Commodity Distribution Amendments of 1981 that will make the reporting of income more accurate.

First, I commend the Senate Agriculture Committee and its able chairman (Mr. HELMS) for putting together a bill that goes a long way in curing some of the abuses that have taken place in the food stamp program.

I say "some" because I think there are some that remain.

This bill provides a good start in getting the program under control. Again, I want to emphasize "a good start," because I do not think the job is done.

Mr. President, no one objects to helping people who are poor because of circumstance and who have no choice but to depend on the Federal Government for assistance for themselves and their families. But it has become painfully clear that the food stamp program is a perfect example of a government program gone berserk. Instead of limiting the program to people who cannot do without the assistance, we have allowed this program to grow to the point where 1 out of 10 people is receiving food stamps, and where 1 out of 7 is eligible. The entire food stamp system is full of abuse and the loopholes that now exist in the legislation must be closed if we are ever to get this $10-billion program under control.

Ten billion dollars, Mr. President, for a program that started out just a few short years ago at $30 million a year. Ten billion dollars now and growing. This bill goes a long way toward reversing the nature of that growth, but not totally eliminating that growth. There is no reason, absolutely no reason, why the American taxpayer, the working men and women of this country, should be funding a program that wastes as much as 20 percent of its budget. This legislation is essential to the well-being of our economy as a whole, and to the people who depend on food stamps. By tightening up on the program, we can only be helping those recipients who truly need the assistance.

As I said, Mr. President, I believe the committee has done an admirable job in closing many loopholes. There is one area that still concerns me, however, and I am offering an amendment today to further tighten up the bill.

My amendment will require that energy assistance payments be included in the income level for food stamp eligibility. The payment of low-income energy assistance benefits under existing law serves to improve the financial condition of the recipient family. That is what it is designed to do; that is what it does.

One of the key reforms of the 1977 Food Stamp Act was the inclusion of other public assistance payments as "income" and Congress should not continue to exclude energy assistance. The inclusion of these benefits in the definition of income would save as much as $50 million annually in the food stamp program because household income would have to be reported accurately as being slightly higher, thus scaling down benefits. Again this can only be of help to the poor, because households with higher incomes would be pushed above the cut-off point. I believe an accurate definition of income is essential to the credibility of the food stamp program. The exemption of energy assistance benefits allows higher and higher income households to qualify for food stamps and I urge my colleagues to vote in favor of my amendment.

Mr. President, this is just one of a long series of efforts on the part of Members of the Senate to get the income statistic stated correctly as a matter of qualification. Certainly, if it made any sense at all for us to adopt the provisions a few years ago that required the public assistance payments to be included as income, then, there is no reason to exclude the energy assistance benefit as a part of the income in the computation of income for the qualification for benefits. I hope the committee will accept the amendment, because I think it is consistent with the philosophy that we have already expressed in the Senate on direct votes with respect to public assistance payments.

Mr. HELMS. Will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from North Carolina.

Mr. HELMS. I commend the Senator on his amendment. The administration favors this amendment and certainly, I do. But I rather imagine that our distinguished friend from Vermont will not make that unanimous. I want the Senator to know that the administration does approve it and I approve it. I would be willing to accept it. If Senator LEAHY will accept it, we are in business.

Mr. McCLURE. Let me say to the Senator from North Carolina, Mr. President, that I want to express my appreciation for his statement. I do not wish to presume that the Senator from Vermont will not accept it, because it is certainly absolutely consistent with what we have done before in the computation of income to include public assistance benefit payments.

Mr. HELMS. Of course, it is consistent, and I again commend the Senator for offering the amendment.

Mr. McCLURE. I thank the Senator. Again, I hope that the committee might accept the amendment and we can go on from there.

Mr. President, I reserve the remainder of my time.

Mr. LEAHY. Mr. President, as the distinguished Senator from Idaho is probably not aware, I have been one of the two people who have fought hardest in the Committee on Agriculture to keep within the budget figures that the President had in his food stamp bill. In fact, I found myself, on numerous occasions in the committee, being a sort of lonely voice arguing for the administration's figures. They, in fact, came in under the administration's figures.

I forgot this morning to wear what I was wearing yesterday, feeling that I thought it was appropriate because of my work in trying to help the administration. I had my Ronald Reagan tie clasp on.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. LEAHY. Certainly, Mr. President.

Mr. McCLURE. Did Ronald Reagan give the Senator that tie clasp?

Mr. LEAHY. I do not want to disclose. It was given to me by the White House.

Mr. McCLURE. I wanted that knowledge, because you see, Mr. President, I have not gotten one yet.

Mr. LEAHY. I never got one from President Carter. Maybe the Senator got one there.

Mr. McCLURE. I never saw President Carter. [Laughter.]

Mr. LEAHY. He is a nice looking man. The Senator will probably recognize him from his photographs, anyway. The Senator should have come to the joint sessions. He would have recognized him there.

Mr. McCLURE. I saw him at a distance.

Mr. LEAHY. He looks just like his photographs.

Mr. HELMS. Mr. President, if the Senator will yield, perhaps we can get off the subject of how Presidents appear.

Senator LEAHY is exactly right, I say to the Senator from Idaho. He supported President Reagan every time the administration's proposals to spend money on food stamps were higher than the proposal in the committee. Se he was absolutely consistent on that.

Mr. LEAHY. That is not quite accurate, because the package that Senator DOLE and I proposed, which is basically the package finally accepted by the committee, came in under President Reagan's figures and had fairly considerable savings beyond that.

With respect to this particular amendment, Mr. President, a similar amendment was proposed in the committee. It was debated at great length, and it was voted down. One reason it was voted down was that this would substantially reduce assistance to households receiving energy assistance payments. It is a provision that would be especially harsh on the elderly.

In fact, one of the reasons we voted this proposal down in committee was that many elderly persons would have their food stamp benefits completely terminated during some winter months. Quite frankly, this is of concern primarily in those States—half the States in the Nation—that have severe winters.

What you are going to have is a situation which will be particularly cruel to the elderly, to that class of our citizens who justifiably worry the most about the basic necessities and maintaining their lives. They would know that with a provision such as this, a significant number of the elderly in this country would be faced with the possibility during the winter of whether they would heat or eat—whether they would heat or eat.

Furthermore, the Dole-Leahy bill on food stamp fraud and accountability cut very substantially into the areas of potential fraud or abuse in the food stamp program.

I believe that if the distinguished chairman will look at the figures presented by the Reagan administration and the figures Senator DOLE and I came up with, we ended up with considerable savings, even beyond those of the President.

I realize that we are probably getting off the track with some fairly facetious comments about President's tie clasps and appearances and whatnot.

I want the record to note that the Senator from Vermont, together with the Senator from Kansas, worked out a proposal, a series of proposals, on the food stamp program that actually came to a lower figure than that of the President—not, as I think inadvertently suggested by the distinguished chairman of the Agriculture Committee, looking for higher figures.

As I mentioned yesterday in the debate, when you have a State such as mine, where the temperatures reach 30 or 40 below zero and stay there for days on end, it is not a very comforting choice to have.

After all, the elderly comprise up to 45 percent of all the energy assistance participants. When the energy assistance program was initiated, the fact that many potential recipients receiving food stamps were considered in setting funding levels in energy assistance was specifically excluded from income for food stamp purposes.

The President has already proposed a 25-percent reduction in energy assistance in fiscal year 1982. I believe that what we are faced with here is the fact that the fuel assistance program is being proposed to be reduced anyway by 25 percent; and if we reduce it even more, so that for every $11 received in energy assistance there would be something like a $3 reduction in food stamps, the impact on the elderly will be most severe. Low-income energy assistance does not provide extra money for food purchases.

What we have is the basic question that will have to come in any discussion of food stamps, and it is this: Do we have before us a program, a nutrition program, a program to help eradicate hunger and malnourishment in this country, or not? If we feel that it does not do that, if we feel that it is not set up as a hunger program, if we feel that it is not one of the programs designed to really remove what is a shame in the most powerful and wealthiest country in the world—the shame of hunger and malnourishment—then do away with the whole program.

Do not kill it by selective cuts. Do away with the whole program and say that we are not going to make this effort to eradicate hunger and eradicate malnourishment. But if we are going to keep the program in being, at a time when the President speaks of safety nets and his dedication to safety nets, at a time when one of those safety nets, the fuel assistance program, is being proposed to be cut by the administration, then let us not cut it further by somehow saying that a program designed for food assistance is now going to have to be equated with fuel. They are separate programs. Do away with one or the other, but do not try to link the two.

So I would oppose it in that regard.

Mr. President, there is an editorial in the Washington Post this morning, a good editorial, entitled "Food Stamp Follies." It speaks of the cap on food stamps. As Senators may know, I, with others, tried to put that cap into a more realistic setting in this food stamp program.

We have had the anomaly of the administration opposing removing the spending cap, but at the same time saying that they are going to have inflation and unemployment so under control that the actual costs of the food stamps would go down. But just in case they were wrong, they were not about to encourage removal of the cap.

Mr. President, I ask unanimous consent that the editorial from the Washington Post be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FOOD STAMP FOLLIES

A preview of the coming attractions of next week's budget reconciliation floor debate will be provided in the next day or two when the Food Stamp Bill is expected to find its way to the Senate floor. While the bill will also meet the requirements of the budget resolution, food stamps will come up first for a separate debate because the legislation is due to expire.

The bill that has emerged from the Senate Agriculture Committee would cut food stamp benefits by almost $1.9 billion next year, $400 million more than the administration requested. If the bill passes as is, millions of poor people will suffer significant losses in purchasing power, most of them elderly, disabled or in families with children. This is not a happy prospect—but it could have been a lot worse. The committee did not adopt the administration's proposal to cut benefits to families with children receiving free school lunches, a plan particularly harmful to some of the nation's very poorest families. Instead it spread the losses more evenly by delaying cost-of-living increases, adding more administrative restrictions and reducing benefits to the working poor.

Having lost in his earlier attempts to achieve yet more massive reductions, Senate Agriculture Committee Chairman Jesse Helms is expected to be pushing some of his pet proposals on the floor. These include restoring the requirement that people buy their stamps—formerly a major source of administrative abuse and a barrier to participation among the elderly and rural poor—further reducing income limits and cutting benefits across the board. The full Senate should reject these proposals, as did the Agriculture Committee.

Perhaps that is all that can be expected in the present climate. There is, however, one other matter that the Senate should address. That is ending once and for all the silly game now played once a year or more over the spending cap added to the Food

Stamp Law in 1977. Each round of the game starts with a guess as to what the program is going to cost over the next few years. The guess is always lower than anyone really believes is necessary to serve all eligible people. Liberals go along with the underestimate in order to get agreement on the money needed immediately to run the program. Conservatives insist on the underestimate so as to have another chance to rail about a "runaway program" and offer restrictive amendment when, again, as the result of rising inflation or unemployment, program costs bump up against the ceiling.

The Agriculture Committee bill keeps this game going. The cap for this year has been raised at administration request by $500 million above the amount originally requested so that it is realistic in terms of the certainties of the near future. The limits for the next fiscal year and beyond remain at the roseate levels set earlier. Not only are these based on a highly optimistic forecast, but they make no allowance for the increase in food stamp costs—estimated at more than $500 million by the CBO—that will be caused by cutbacks in welfare, CETA, unemployment and trade adjustment assistance and other programs.

Whatever the attraction of familiar amusements, this is one game that Congress should decline to play anymore. If there is any safety-net program in this country, it is surely food stamps, the only program that serves all the poor and provides access to the most basic of all market commodities—food.

Mr. LEAHY. Mr. President, I commend this editorial to my colleagues. I could not agree with it more.

I hope we will be able to obtain a consensus during the day, on both sides of the aisle, to take more realistic steps on the cap, preferably to remove it, but at the very least, to put in a flexible cap, one that should be supported by the administration, if indeed they believe their own economic forecasts.

Mr. President, I reserve the remainder of my time.

Mr. McCLURE. Mr. President, I did not get exactly what the Senator said about whether or not he would accept the amendment, but I gather from the gist of what he said that he finds the amendment to be objectionable.

Mr. LEAHY. The reason I said I would oppose the amendment is that I will oppose the amendment—if that answers the Senator's question.

Mr. McCLURE. Somewhere in that welter of words I lost that statement.

Mr. LEAHY. I said it a couple times and I repeat it again. I do oppose this amendment.

Mr. McCLURE. I understand, but I got the gist of that anyhow even if the Senator had not used those words.

Mr. President, it seems to me to be folly to the point of being near ridiculousness to do what the committee has done in cutting out energy assistance payments by State and local governments or by including them in income tests for qualification for food stamps and at the same time exempting Federal energy assistance. The committee did just exactly that, and the distinguished Senator from Vermont now argues for the continuation of that illogical dichotomy.

Logic never is very persuasive in this Chamber perhaps, but I hope that we can at least be consistent. If, as a matter of fact, we do not want energy assistance payments counted as income let us not count State and local energy assistance payments as income and indicate that. As a matter of fact, some people might be excluded or find their food stamps reduced as a result of this amendment. Of course, they would. But to pretend that they are the truly disadvantaged is totally inaccurate because they are the ones who then, because of the combinations of incomes that they have from various sources, find themselves reduced in the amount of their food stamp payments or disqualified because their income meets the income test.

Is an energy assistance payment from the Federal Government different than other kinds of welfare assistance to the recipients? Is it different than other kinds of income? Or does it simply aggregate into the total amount of income available to a family and therefore logically have to be considered as a part of their income in determining how much they should receive in food stamp assistance?

To say "either heat or eat" is a beautifully demagog statement. It appeals to the unthinking, and perhaps the Senator from Vermont believes that the majority of the people in this country are unthinking, that they have not the capacity to see through the words and detect what is actually being done.

When 1 out of 10 Americans can qualify for food stamp assistance there is something crazy with that program. When the working men and women of this country have to contribute their taxes in order that 1 out of 10 of their neighbors can receive assistance then there is something gone wrong with the welfare system in this country, and to enclose the mantle as he attempted to do by saying that it will hurt the elderly, well there are some elderly who do not get food stamps. There are some elderly who pay taxes. There are some who receive food stamps who are not elderly but who do receive low-income energy assistance payments from the Federal Government.

Somehow, sometime we have to confront the fact that the food stamp program has become a monstrosity, not because it was aimed or intended or designed to be but because in its administration the program no longer is designed simply to provide that necessary level of assistance to recipients that we all want for those who are truly needy who because of circumstances beyond their control find the necessity of looking to their friends and neighbors for their support. None of us begrudge the payments that are necessary to sustain a reasonable standard of living and both heat and food for those who truly need the help.

But there are millions of working Americans who are tired of paying the bills for those who could but will not do for themselves and for us in the guise of that kind of humanitarian intention argue that we should exclude from their income something which is clearly a part of their income in order that we pay more money out to more people is simply symptomatic of the reason that we are in the trouble that we are in, that a program that started at $30 million a year is now $10 billion a year, that the national debt has grown to the point where we pay interest on it at the rate of $100 billion a year, that before the end of this year is out our national debt will be $1 trillion, a great legacy for our young people for the next generations that come along as they pay the interest on the debt and continue to try to cope with the programs that we have created.

We can at least try to bring some control to a program that has too largely run out of control.

This amendment, Mr. President, is a very modest addition to that effort in order to try to get some control and put some reasonable limits on the expenditures of the taxpayers funds through this program.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator from Vermont is recognized.

Mr. LEAHY. Mr. President, I simply wish to correct a couple things.

I realize that the food stamp program started out smaller than it is now, and it is conceivable that has happened in other programs.

This did not, of course, start out as a pilot program. And again if we had full employment in this country and no inflation, we would probably not need it at all.

I am thus counting on the current predictions made by the White House that we will have significant savings, and it is simply because they will get unemployment down very considerably and inflation practically to nothing. Those two things of themselves, if they are correct, will lower the cost far more than the amendment of the distinguished Senator from Idaho or anyone else.

It is an interesting thing, though, on how sometimes programs can blossom a bit.

I recall looking back over the defense budget. I believe the MX missile system started out at the first year ever that I think it was only $3 million or $4 million. Now we hear that there will be a ballpark figure of somewhere from $60 billion to $150 billion. That is an interesting ballpark when one thinks about it. Those are little more exact figures, $60 billion to $150 billion. Actually they want to leave a little bit of fudge factor in there. I assume that takes into consideration the fact that they sort of gobble up Utah, Nevada, and a few other States, and most of our ability to produce agriculture water there, and so forth.

I mention this just so that the people reading this record will not assume that the food stamp program is the only program that has ever grown. I mention the MX and the matter that is probably of great interest to people in Utah, Nevada, and the West as it is to the rest of the country as another program that might have grown a wee bit.

The other thing that was mentioned,

though, by the distinguished Senator from Idaho, is the exclusion of State and local energy payments. Of course, the administration proposed exclusion of State and local energy payments because some States were abusing the exclusion of energy assistance by calling part of AFDC energy assistance.

But we should also look at the history of the energy assistance program itself. We set up the program a couple of years ago and we set the funding levels explicitly then to augment the food stamp and welfare assistance already available, and I can see what is going to happen on this.

We take these programs up one by one, and we pick one and say, "Well, you know, you have all this stuff coming from another program," so we have to chop back here and then we go to the other programs and say, "Gosh, you have money coming from the first program," so we have to chop the second program and take each one of them in a vacuum.

If they were all here as an overall package we might be able to look at this a little bit better.

But the arguments that are being made in each one of the programs play each one off against the other. When the President proposed already a 25-percent reduction in energy assistance, to count it here as income would be a double penalty, and I happen to feel that contrary to the suggestion made by the Senator from Idaho that I feel that the people in this country do not think, I feel that they think very, very much and certainly the people of my own State do, a State that I visit virtually every week just to see how they feel.

I am sure the Senator from Idaho also visits his State every week, as I do my State, to see how the people feel. The people can count in my State, and they can read thermometers, and when I say the issue has been raised as to whether you are going to heat or eat, this is not my expression. This is the expression that I have heard from good, rock-ribbed, Conservative Republican Vermonters who are elderly and are concerned about amendments of this nature.

Mr. President, if the Senator from Idaho is willing to yield back his time in conjunction with the agreement, the informal agreement, that Senator HELMS and I have entered into, I am ready to yield back my time.

Mr. McCLURE. Mr. President, winters in Vermont are no different from those in Idaho. We have cold weather, and we have older people, and we have food stamp recipients. But it is not argued by most Idahoans, to my knowledge, that they ought to have a free payment from the Federal Government that is excluded from their income calculation so they can benefit by the receipt of food stamps.

Income is income, and the committee has seen fit to see that energy assistance income from the State and local level is income, but energy assistance from the Federal Government is not income. Certainly the amount of assistance, the amount of money, that is available to a family ought not to be varied because of the source of the income. A payment for one purpose would be included as income but a payment for another purpose is excluded from income. Why? Because some magic word says it is a Federal benefit. A Federal benefit does not cost anything, is not worth anything, should not count as income.

Try that on your taxpayers when on April 15 they fill out their income tax forms. Try that on your young people when they look at the size of the national debt that we have aggregated. Some people say it does not count, hardly worth talking about. It is only $100 million a year, $50 million a year. I have heard it argued on this floor by others that, "Well, it is less than $50 million, that rounds off, so it does not even count. We should not even talk about it."

Well, we should talk about it, and we should be talking about a program that certainly everyone recognizes as having grown. I said $20 million. That is what it was when it started a decade and a half ago. But let us look at the first 10 years of the program, when it grew to a total of a little over $4 billion. That is after 10 years. What has it done in the last 5? It has almost tripled. That is what we are talking about, and that is why it is necessary, Mr. President, to take some realistic moves to put some equity and some fairness into a program that begins to sap the vitality of this country.

Certainly those who live on public assistance do not live—many of them—at a very high standard of living, and those who do not live at a high standard of living would not be affected by this amendment one bit. If with this energy assistance payment their income remains low, they will still get food stamps. If, however, they have with the addition of this income, income from all other sources, and they get at the margins of income that begin to reduce their food stamp allotments or disqualify them from receiving food stamps, if their total income including this payment is enough that they would not be qualified to receive food stamps, why should they expect their friends and neighbors to give them money if, as a matter of fact, they have that amount of income, including this amount of energy assistance?

Yes, it gets cold in Vermont; it gets cold in Idaho. People have to eat and they have to heat, and we have made payments available to people from State and local levels to give them those minimum levels of income where they cannot do for themselves. Whether they are young and disabled, middle aged and sick, elderly and incapable of work, then they are entitled to the benefits of a generous and unstinting relief program. But when their income rises to the point where they would be disqualified because of the level of their income, why do we artificially say in order to give them more we will not count it as a part of their income?

Mr. HELMS. Mr. President, will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, the Senator from Idaho is absolutely correct. I have been intrigued during the years I have been in the Senate at how easy it is to be generous with other people's money.

The major news media of this country sort of have a dividing line of Members of Congress, those who vote to appropriate greater and greater sums of money who are the compassionate ones; and those of us who do not are flinty, ultra-conservative, hardhearted reactionaries.

But I suggest, Mr. President, that the best thing we can do in this Congress for the American people of all ages and all economic levels is to get the economy in shape, to restore stability, stop inflation, so that people will have some idea of what their money is going to be worth.

You know, Mr. President, the people who are the hardest hit by inflation are the poor. Yet we continue to overfund these programs, to put in this little patchwork and that little patchwork, and they say, "Oh, wait, this is just a little bit, just $100 million here," or "$50 million there," or "$200 million there," and, as a result, we are confronting a national debt of $1 trillion, the interest on which costs as much as operating the entire Federal Government cost a decade and a half ago.

From time to time, Mr. President, I have had a little experiment on this floor to see how much compassion there really is. I remember some years ago when the question of bringing the Vietnamese refugees to America was before this body, and I heard all grades of protestation that we must do this and we must do that, and I agree.

I belong to the Baptist Church, and I think we all ought to have personal compassion. So when the appropriation proposal was submitted to this floor I went to the telephone and I called a distinguished North Carolinian, who has been a friend of mine for a long time. His name is Billy Graham. I said, "Billy, we have this problem of the Vietnamese refugees coming to this country and we all want to look after them." He said. "We certainly do."

I said, "Would you be willing to head up a private movement to raise the funds; extend love and care to these people and set up in general a project likely to involve, on a genuine humanitarian basis, millions of Americans?" He said:

I will certainly undertake it and I don't think there will be any problem about it. I appreciate your bringing it to my attention.

I came on this floor, Mr. President, and I sent an amendment to the desk and the clerk read it. And attached to that amendment was my personal check for $1,000. And I was going to have to go to the bank and borrow the $1,000, but I sent the check forward in good faith. I told the Senate that the way to do this is from our hearts. And if each Senator will contribute $1,000 of his money, and if each Member of the House will do the same—and I would mention, Mr. President, that our salaries are not inconsiderable in terms of the average income in this country. But if all Members of Congress were to show their good faith, demonstrating that they were willing to spend some of their own money on this business of compassion, that we would have $535,000, obviously, for seed

money for this private project to be headed by Billy Graham.

I wish you could have seen the tempers that erupted. "The very idea," Senators said, "proposing that we spend some of our own money." I think I got seven votes on the amendment. And I did not expect any more than that, but I wanted to make a point.

Now a lot of folks do not know that Davy Crockett served in the Congress. He was quite a distinguished Member of the House. One day, a private relief bill came up to give the widow of a naval officer a special pension. All of the glowing accolades were offered eloquently about what fine service had been rendered by this Navy officer and it was a we all got to pitch in and help that widow.

Old Davy sat over there in the corner of the Chamber and he thought a little while and he got up and he said:

Now, Mr. Speaker, there is no Member of this body with less money than I. The question is not whether we are sympathetic with the widow, but whether we have the constitutional right to do this.

He said:

Where in the Constitution does it say that we can do this?

He said:

I will make this proposition to my brethren in the House of Representatives: That I, poor as I am, will join in and raise the funds for the widow.

And Davy Crockett had the same reaction that I had on this Senate floor: "This guy must be crazy," they said, in effect. "What do you mean we are supposed to spend our money?" And of course Davy was hooted down, just as the Senator from North Carolina and the Senator from Idaho and others have been hooted down.

But I say to you, Mr. President, for so long as we continue on this road of having the Federal Government in charge of compassion, we are going to continue to have the very same problems that we are having right now.

Now I am fairly active in a couple of churches, one here and one in my hometown of Raleigh. I have told both of my preachers that you fellows are missing the boat. Our churches too often and to too great an extent have come to regard compassion as a function of the Government. You find too many of our preachers involved in politics.

My friend, the evangelist Jim Roberts down in Texas, said to a group of 20,000 one night, "When have you gotten your hands dirty, getting out there in the trenches?"

Oh, yes, I would like to be able to vote to give everybody everything. But the truth is you cannot do it. And we have a program that is exploding in cost here.

Senators can trot in here and talk about the elderly. That is fine. I am getting there myself. But the point is that we are working against the elderly and we are working against the poor when we continue to elevate this Federal spending, this Federal debt.

I have been amazed at some of the media attacks on Ronald Reagan for budgetary slashes, cutting to the bone, when the fact is that Ronald Reagan has not proposed to reduce Federal spending. All he has done is to propose to reduce the rate of growth of Federal spending.

And I am not sure a lot of people understand that. But I hope that they will understand that the greatest compassion that we can show to the people of this country—old, young, sick, poor—is to bring order and stability to the economy and to move far more rapidly than we are likely to move in terms of balancing the budget, because then and then only will we be doing something for the people of this country.

And the amendment of the Senator from Idaho is exactly right. How can you make the preposterous proposition that income from the Federal Government is not really income? Any schoolboy could tell you that income from whatever source is income. And if we are going to be intellectually honest on this bill or any other bill, we at least ought to acknowledge that.

Now if you want to do something more for the elderly, do it up front, but do not try to paper it over with a suggestion that income from the Federal Government, a welfare payment from the Federal Government, is not income in terms of calculating the eligibility for food stamps.

I have said all that I have said with the utmost respect and affection for my colleagues. I recognize that there is this tendency to say, "Well, this Federal spending, this Federal budget, this appropriation, all of these are in the abstract." But they are not in the abstract. They are a reality and the bottom line of that reality, Mr. President, is the $1 trillion Federal debt that we are facing.

Again I commend the Senator from Idaho on his amendment. I am perfectly willing to accept it. If there is a rollcall vote on it, I will vote for it.

Mr. LEAHY. Mr. President, I was sorry to hear the distinguished Senator from North Carolina say that he was hooted at, hollered at, by Members of the Senate and that they had suggested that he had taken leave of his senses. I had not realized that that was over the issue of him offering to give money to a church, to a relief fund. I certainly would not be one to suggest that he had lost any of his senses on that issue.

The distinguished Senator from Idaho has urged us not to let this debate break down into either rhetoric or demagoguery. With that suggestion coming from a more senior Member, I will not respond to a debate with a David Crockett, Billy Graham, the national debt, or anything else, because I think it is good advice coming from the other side not to get into rhetoric or demagoguery.

I will simply say that Senator DOLE, myself, and the Senate Agriculture Committee oppose this amendment, it having been raised before the committee, early debated, and voted down by a wide partisan coalition.

In yielding back my time, I would say that at the time the vote on the amendment comes up, the committee, Senator DOLE, I hope a majority of the Senate, and myself will oppose it, I yield back the remainder of my time.

Mr. McCLURE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. Under the previous order, the vote on this amendment will follow in sequence behind the two votes that have already been scheduled.

Mr. LEAHY. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. LEAHY. I understand in yielding back our time that on all votes after the first one at 3 o'clock there is still reserved to Senator HELMS and myself 10 minutes equally divided should we choose to use it.

The PRESIDING OFFICER. The Senator is correct.

Who yields time?

Mr. LEAHY. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time for the quorum call be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. HELMS. Mr. President, I suggest the absence of a quorum, with the time to be equally charged.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 142

(Purpose: To authorize the Secretary of Agriculture to conduct pilot projects for the purpose of simplifying the processing of food stamp applications for certain AFDC and SSI recipients)

Mr. BOREN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Oklahoma (Mr. BOREN) proposes an unprinted amendment numbered 142.

Mr. BOREN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 69, between lines 17 and 18 insert a new section as follows:

"PILOT PROJECTS TO SIMPLIFY THE PROCESSING OF APPLICATIONS FOR CERTAIN AFDC AND SSI RECIPIENTS

"SEC. 324. Section 17 of the Food Stamp Act of 1977 is amended by inserting a new subsection as follows:

"(d) The Secretary is authorized to conduct two pilot projects in which households that consist entirely of recipients of aid to families with dependent children under part A of title IV of the Social Security Act, and

households that consist entirely of recipients of supplemental security income under title XVI of the Social Security Act, whose gross income does not exceed 130 percent of the nonfarm income poverty guidelines prescribed by the Office of Management and Budget, shall be deemed to satisfy the application requirements prescribed under section 5(a) of this Act and the income and resource requirements prescribed under sections 5(c) through (g) of this Act. Allotments provided pursuant to section 8(a) of this Act shall be based upon household size and the benefits paid to such household under part A of title IV, and title XVI, of the Social Security Act, respectively: *Provided*, That the Secretary shall also make such modifications in the value of such allotments as may be necessary to assure that in each pilot project area, average food stamp benefits by household size for households receiving aid to families with dependent children and participating in the pilot project, and for households receiving supplemental security income and participating in the pilot project, are not reduced below what such average benefits would be under this Act for each such category of households, respectively, in each such pilot project area, for the period or periods the pilot project is in operation. The Secretary may conduct such projects on a statewide basis in two States, or in political subdivisions within such States, and shall evaluate the impact on recipient households, administrative costs, and error rates.".

Mr. BOREN. I yield myself 4 minutes on the time allotted to the amendment.

Mr. President, today I offer an amendment to the Food Stamp Act which would provide authorization for two State pilot projects which would substantially reduce paperwork and result in a savings in administrative costs in operating the program.

In my own State of Oklahoma, officials in the Department of Human Services estimate that my amendment, by allowing pilot projects, would save approximately $1 million in State administrative expenses and $1 million in federally funded administrative expenses out of a total administrative expense budget of $10 million for the food stamp program in Oklahoma.

That would approximate something in the area of a 20-percent administrative saving.

The reason for this saving is that approximately 40 percent of the food stamp caseload in States like Oklahoma are also receiving supplemental security income, or SSI and aid to families with dependent children, AFDC.

At present, SSI and AFDC recipients must fill out a separate application, giving the same information to authorities, in order to qualify for food stamp benefits. My amendment would simplify procedures by allowing those participants in SSI and AFDC who are involved in the pilot project and meet the income requirements of food stamps to automatically be qualified for food stamp benefits. This would alleviate the unnecessary burden of filling out numerous applications, which must be printed and reviewed by the staff, giving exactly the same information as recipients have previously filed under the other Government program. State administrators of the food stamp program feel that the pilot projects would greatly assist them in reducing paperwork and cutting needless costs.

Everywhere that we can find ways to cut administrative costs we should do so. It would bring us closer to the goal of reaching a balanced budget without having to reduce benefits for those who truly need them.

Mr. President, I have reviewed this matter with those on our side of the aisle and I think that the amendment is fully acceptable to the managers of the bill on this side of the aisle. I ask the distinguished chairman, the Senator from North Carolina, for his reaction to it and express the hope that it might also be acceptable to that side of the aisle.

The PRESIDING OFFICER (Mr. GRASSLEY). The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I regard the Senator's amendment as a good one. It certainly is worth trying. It will not cost anything, which is novel around this place. I commend the Senator on it and I am prepared to accept the amendment.

Mr. BOREN. I thank my colleague from North Carolina very much and I say to him not only will it not cost anything but I hope that it will result in savings and those of my State feel that they can demonstrate savings there. If that pilot project works, perhaps it is procedure that we can extend to all 50 States and make substantial savings.

Mr. HELMS. Mr. President, if the Senator will yield, I think it was the Prince of Denmark who was once said to have remarked that that is a consummate about which we wish.

I wish him well with his amendment because if the amendment succeeds then the taxpayers will prosper to that extent.

Mr. BOREN. Mr. President, if there are no further comments I yield back the remainder of my time.

Mr. HELMS. I yield back the remainder of my time and move the adoption of the amendment.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment (UP No. 142) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOREN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged equally.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. The Senator from Oklahoma (Mr. BOREN) has an amendment.

The PRESIDING OFFICER. The Senator from Oklahoma.

UP AMENDMENT NO. 143

(Purpose: To exempt the elderly and disabled from the income standards of eligibility limitation set at 130 per centum of the poverty income guidelines)

Mr. BOREN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Oklahoma (Mr. BOREN) for himself and Senator PRYOR, Senator BENTSEN, and Senator CHILES, proposes an unprinted amendment numbered 143.

Mr. BOREN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 32, strike out lines 20 and 21 and insert in lieu thereof the following:

"(2) striking out in subsection (c) 'The income standards of eligibility shall be' and inserting in lieu thereof 'Except for households containtaining a member who is sixty years of age or over, or containing a member who receives supplemental security income benefits under title XVI of the Social Security Act or disability payments under title II of the Social Security Act, the income standards of eligibility shall be 130 per centum of'.".

Mr. BOREN. Mr. President, I yield myself 4 minutes of the time allotted on the amendment.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. Mr. President, I rise today to offer an amendment which would exempt the elderly and disabled from income eligibility guideline changes included in the Food Stamp and Commodity Distribution Amendments of 1981. If this exemption is not approved, approximately 67,000 U.S. households with elderly and disabled members will lose benefits because of the lowered income eligibility limits included in this legislation.

I am pleased that my colleagues, Senator PRYOR, of Arkansas, Senator BENTSEN, of Texas, and Senator CHILES, of Florida, are joining me as cosponsors of my amendment.

This amendment would result in a maximum cost of $35 million. The food stamp bill, passed by the Senate Agriculture Committee, saves approximately $370 million more in fiscal year 1982 than was requested by the President and the first concurrent budget resolution.

In addition, even with an exemption for the elderly and disabled, the Senate-passed food stamp bill would exceed savings assumed by reconciliation legislation in fiscal year 1982–84.

Since we have more than met our budget requirements, there should be no reason to oppose this amendment because of the cost. The cost has already been well compensated for.

I would add parenthetically, Mr. Presi-

dent, that as a member of the Senate Committee on Agriculture, Nutrition, and Forestry I voted consistently to make savings in the food stamp program that go beyond the savings which were mandated and required of us in the committee, and one of the reasons why I voted for additional savings was to make room for this exemption for the elderly and for the disabled.

While there is much fraud and abuse in many programs and while I feel strongly that able-bodied persons should work and that we should take such actions as cutting food stamps to Puerto Rico, where 58 percent of the entire population has previously been receiving food stamps, I do not believe that the citizens of my State or the citizens of this country want me or the entire Senate to pull the rug out from under the elderly and the disabled.

These persons cannot go out and get a job to make up for cuts in this program. The healthy, young, and able-bodied can bear these cuts and take care of themselves much more easily than can the elderly or disabled.

For this reason, and because of the minor cost of my amendment, I feel that we must exempt the elderly and disabled from the lowered eligibility limit of 130 percent of poverty included in the Senate Agriculture Committee's bill.

It is a matter of targeting the cuts and continuing to meet the needs of those who are most deserving, to meet the needs of those for whom the program was truly begun in the first place, and I would urge my colleagues to consider that we have already met our responsibility—we have more than met our responsibility—and it is my hope that this amendment will be agreed to.

At this time I am pleased to yield as much time as he requires to my colleague, the distinguished Senator from Arkansas (Mr. PRYOR) and a cosponsor of this amendment.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. PRYOR. Mr. President, I appreciate my friend from Oklahoma (Mr. BOREN) yielding to me at this time. I applaud him for offering this amendment and for bringing this matter to the attention of the Senate at this time.

Mr. President, today the Senate is considering S. 1007, the Food Stamp and Commodity Distribution Amendments of 1981. This legislation, over which the Senate Committee on Agriculture, Nutrition, and Forestry has spent long hours of deliberation, represents a major effort on the part of the committee to reduce program costs by more than $8.5 billion over the next 4 years, and makes major program changes in an effort to further reduce waste and fraud. I am proud to have played a part in this process.

In considering S. 1007, the committee established a gross income eligibility limit at 130 percent of the applicable Federal "poverty level." I supported this requirement during committee debate, and I continue to support it.

However, there is one aspect of the eligibility requirement with respect to the elderly and disabled which must be corrected. For this reason, I am joining with Senator BOREN in sponsoring an amendment which would exclude the elderly and disabled from this eligibility requirement. Instead, these individuals would be subject to the provisions of current law. This amendment would require minor additional outlays of $35 million. But I do think our colleagues should be on notice that even with the adoption of the Boren amendment the Committee on Agriculture's recommendation for the food stamp program will be still several million dollars under what our proposal was asked to do.

Mr. President, of the more than 22 million persons enrolled in the food stamp program, approximately 1.9 million, or 9.1 percent, are aged 60 and over. There is no question that this group is among those hardest hit by rapid rises in the cost of food, energy, and health care. Yet, this is also a group for whom an adequate diet is essential because of special nutritional requirements and medical needs.

Among those elderly and disabled who would be hardest hit by the eligibility requirement are those elderly couples who are dependent upon social security benefits for their retirement income. Presently, the average social security benefit for an elderly couple is only $563 per month. Under current law, assuming the 11.2-percent cost-of-living adjustment in July, the same elderly couple would receive approximately $626 per month. This couple would be well under the maximum gross income limitation of $844 per month and would maintain eligibility for food stamps.

However, should this couple be subject to the new income eligibility standards, they would no longer be eligible for food stamp benefits. The new gross income limit for a two-person household for receipt of food stamps is $616. This limit will place an unnecessary and, in most cases, insurmountable burden on the elderly and disabled living on fixed incomes.

It is expected that the new income eligibility standards will remove approximately 5 percent of all individuals from the food stamp roles. Our best estimates suggest that, with no exclusions, this 5 percent will include approximately 140,000 elderly and disabled individuals—the two groups most ill prepared to face such drastic benefit reductions. Mr. President, it is these two groups who have consistently been assured by President Reagan that they will not suffer benefit reductions through the budget-cutting process. I believe that it is imperative that we act now to restore food stamp benefits to this deserving population.

Mr. President, I plead with my colleagues to adapt the amendment offered by the distinguished Senator from Oklahoma.

I yield back my time to the Senator from Oklahoma.

Mr. BOREN. Mr. President, I yield myself such time as I may require.

Mr. President, I want to commend the Senator from Arkansas for his statement and to say once again that this amendment is a responsible one. It allows this bill reported out of the committee to stay not only within the limits of spending set by the President, not only to meet the mandated cuts of the Budget Reconciliation Act, but still to go far beyond those.

I think what the American people have asked us to do is to carefully sculpt and cut away the waste in programs.

All of us realize that many of the social welfare programs which have been designed in this country have missed the target. They have missed the mark. They have gone far beyond what they were supposed to do. Funds have been wasted. The people of this country are sick and tired of it.

But, at the same time, they expect this Congress to meet its responsibilities very carefully. And when people say to me, "We are sick and tired of the abuse in the food stamp program," what they are really saying is, "We are tired of seeing someone who is young and able bodied standing in front of us in the grocery store line buying food that we, ourselves, cannot afford to buy, expensive items, and paying for them with food stamps that we, the taxpayers, are paying for."

While the people have spoken loudly on that issue, while I have had literally thousands of my own constituents talk to me about that kind of abuse of the program, I have yet to have one person, one single person, come up to me and say, "We do not want the genuinely disabled, the people who cannot work, to be deprived of food stamps." I have not had one person advocate that policy to me.

I have not had one person say to me, "We want the elderly who are beyond working age, who cannot go out and get themselves a job and even if they wanted to would not find jobs available," I have yet to have one person say to me, "Be sure to go back to the Congress and cut the food stamps of the elderly."

All we are saying is, let us specifically exempt the elderly and disabled from the cuts which are being made in this program, cuts which I support, cuts which, in many respects, are long overdue. Many of us in this body have been arguing for them not only this year but in previous years; some of us for as long as the program has been in existence.

So I would just urge my colleagues to take a careful look at this amendment and to realize that it is fiscally responsible and it is offered in a spirit of budgetary conservatism, but it is what I would call compassionate conservatism. I think that is what the people of the country are calling for and that is what the hour calls for.

I urge the adoption of this amendment. I reserve the remainder of my time.

Mr. President, I suggest the absence of a quorum and ask unanimous consent that it be charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

Mr. HELMS. Mr. President, I have been in consultation with other Senators who are interested in the Boren amendment. Needless to say, we are sympathetic to what the Senator wants to do, but the fact remains that this little amendment will cost $35 million a year over a period of 4 years, if my arithmetic is correct. So it is a $140 million question we are dealing with.

I have offered the Senator from Oklahoma and the Senator from Vermont a proposition which I hoped they could not refuse, though thus far they have.

In order to eliminate the budget impact of $35 million a year, I propose that we cut the eligibility from 130 percent of poverty to 128 percent of poverty. But as yet my dear friend from Oklahoma has not seen fit to accept that proposition.

I might say for the record, Mr. President, that there is substantial support in the Senate for going far below that 128 figure. Whether there is enough support for us to prevail, I do not know, frankly. I have not done a head count on it. But the proposals have gone as low, as I understand it, as 100 percent, and then to 115 percent. I offered this figure in the committee, excepting the elderly and the disabled. The 128, I will say to my good friend from Oklahoma, will have such minimal impact upon the average family. We are not talking about the elderly in terms of impact because they would be excepted. Is that right?

Mr. BOREN. That is correct.

Mr. HELMS. I am sorry I cannot keep all the figures in my head, but my understanding is that for a family of one, the level would be $5,516. For a family of two it would be about $7,250, I am informed.

I say again to my friend from Oklahoma that if, after consultation with his colleagues, he would drop that to 128, I will accept his amendment and we will not have to have a rollcall vote on it. I will renew my offer to the distinguished Senator from Oklahoma in that regard.

Mr. BOREN. Mr. President, I appreciate the offer which has been given by the Senator from North Carolina, our distinguished chairman. As he knows, I very often find myself in agreement. We are nearly always in agreement on proposals to try to end the fraud and abuse in the food stamp program and in other programs. But I have consulted with others who have joined with me on the amendment, others on this side of the aisle. There is concern about further reductions in the income eligibility at this time.

We are making some very substantial changes in the food stamp program. In the committee, we have reduced the figure below the request of the President and the administration more than $370 million. Those were proposals that I supported. They are very substantial changes, and, I might add, I think long overdue. The Senator from North Carolina has been one of those who has argued year in and year out for these changes to be made. I have sympathized with him and supported him in that effort.

However, I feel in this case we should simply proceed since we have made enough savings already to satisfy the budget. We can make further changes again next year when we will be able to better judge the impact of the cuts which we are making at the present time.

Because there are those who have joined with me and who are supporting me in this amendment who would be troubled by that kind of change, I will say to my good friend from North Carolina that I simply feel obligated to press ahead and offer the amendment as it is. I understand that he may feel obliged to suggest some changes in it. It would be my decision to attempt to go ahead. I do think we have substantial enough savings to meet our responsibilities.

I would also point out that as a committee we are still under the savings required by the reconciliation bill. I am told by the staff there have been some additional calculations made by both the majority and minority staff on the amendment which I offered in the committee on another bill recently in terms of reduction in staff of the Department of Agriculture. Those reductions also would more than offset the $35 million which is being discussed here.

So we will still be able as a committee to be well within the requirements of the administration and well within the requirements of the Reconciliation Act.

I simply do not want to in any way imperil the exemption which I feel should be granted to the elderly and disabled from the cuts in this program. I would say to the distinguished chairman that it is with regret, because we are much more often in agreement than we are in disagreement on these matters, that I wish to proceed with my amendment as I originally offered it.

Mr. HELMS. I hope the Senator will modify his remarks to emphasize that the elderly and disabled are not involved in this. They would be exempted notwithstanding. So we are talking about other than the elderly and the disabled.

Mr. President, I may or may not offer an amendment to the Senator's amendment. It is going to depend on whether we can persuade the Budget Committee to give us approval of the Senator's amendment, which I supported, in terms of the administrative costs in the department. If we can recoup those funds I probably will take a different view on the amendment.

As chairman of the committee, the Senator knows that I have the responsibility of keeping us within the reconciliation. If the Senator will look at fiscal year 1984, there are virtually no savings.

Perhaps we can work it out. Why not proceed and we shall yield back the time on this and if the Senator wants to get the yeas and nays now, fine; if he wants to wait, he will not be precluded from doing that later.

Mr. BOREN. I think what I shall do, Mr. President, is wait to see if this matter might be resolved before requesting the yeas and nays.

Mr. HELMS. I recommend that.

Mr. BOREN. If it can be that we shall not need a rollcall, we shall work on that.

I am very optimistic. I am told that we have been in communication with the Budget Committee staff on the staffing reductions that we have suggested on which the chairman certainly supported me—and I am certainly appreciative of that support. Staff reductions at the department, I think, will be sufficient to keep us in the committee's overall figures, within the limits. I know that is the responsibility we have and I know the chairman has the full weight of that responsibility.

I appreciate that, Mr. President, but I shall defer asking for the yeas and nays until we obtain the final result from the Budget Committee.

At this time, Mr. President, I yield back the remainder of my time.

Mr. HELMS. I yield back the remainder of my time.

Mr. President, I suggest the absence of a quorum, with the time to be equally charged.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the Boren amendment be laid aside temporarily.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I yield to the Senator from Iowa.

Mr. GRASSLEY. Mr. President, I thank the Senator from North Carolina for yielding.

As a member of the Committee on the Budget, I compliment the Committee on Agriculture for their reform of the food stamp program. They are cutting $1\frac{1}{10}$ billion from the program. I think they have met the responsibility of the Committee on the Budget very well. After the 7 years that I have been in Congress and each of the times that this issue has come up before, never believing that it could be done, seeing is believing. That is all the more reason to compliment the Senator from North Carolina for a job I did not think could be done, but has been successfully done.

Mr. President, I am in general support of S. 1007, the Food Stamp and Commodity Distribution Amendments of 1981. For too long, Congress has ignored the calls of the people of our country to rid curselves of food stamp abuses and waste. Instead, prior to the 97th Congress, the majority of my colleagues chose the easy path in response to this controversial issue by legislating minor alterations that did nothing to prevent the costs of food stamps from skyrocketing from $5.5 billion in fiscal year 1978 to an estimated $11.3 billion in fiscal year 1981.

Now, however, because of the courage

and foresight of the members of the Senate Agriculture Committee, this legislation has met the budget reconciliation limits through fiscal year 1984, thus saving our taxpayers an estimated $1.8 billion in fiscal year 1982 and over $2 billion annually during the following years. This leadership in such a controversial area helps set a positive precedent that other authorizing committees will be able to follow in bringing their programs within reconciliation requirements.

There are those who will argue that this bill goes too far, that the revisions are too severe, and that we are turning our backs to the needs of the poor. As a member of the Senate Budget Committee, I completely disagree. Although it has been long apparent to many of us, several of my colleagues have only recently begun to realize that the Federal Government's wild spending practices of the past have fueled our country's problems with spiraling inflation and with a deteriorating economy. Because of this past irresponsibility of the Federal Government, our taxpayers have become increasingly burdened, the ranks of our unemployed have grown, and our poor have grown more dependent upon Government assistance to survive. In short, our past policymakers have operated under the assumption that our poor and unemployed would rather have handouts than jobs, and that our taxpayers are more than willing and able to pay for this folly. It should be no surprise that these past policymakers have been tragically mistaken.

People from all sectors of our country have made their mandate to Congress and the administration clear. They want our budget brought under control. This mandate requires revision of many of our programs, including that for food stamp assistance. S. 1007 fills this mandate. It provides needed control, yet protects those who are truly in need of assistance.

Mr. President, I believe that the bill we are considering today represents a good start toward the development of an effective, well-focusd program. I say good start, not because I believe that significant progress has not been made, but because there may be some additional reforms that should be considered today that might improve our control over food stamps even further. Also, there will be need to continue to monitor this program closely during the coming months and years to watch for other problem areas that need alteration. Overall, however, I am very pleased and urge support of this legislation.

Mr. HELMS. Mr. President, I thank the distinguished Senator for his generous comments and I hope that, before the day is out, we can effect even more savings than those he has discussed.

Mr. HEINZ. Mr. President, today the Senate is considering the Food Stamp and Commodity Distribution Amendments of 1981. In my capacity as chairman of the Senate Special Committee on Aging, I have reviewed the bill's provisions and would like to offer some comments about the impact these provisions could have on the Nation's elderly citizens.

In recent years, several legislative changes have been made to the food stamp program that have increased eligibility, participation and benefit levels among our older Americans. The most significant of these changes has been the elimination of the purchase requirement in 1977 which has increased their participation in the program by 42 percent. It is currently estimated by the Department of Agriculture that of the Nation's 22.4 million food stamp recipients, 2.4 million are over 60 years of age.

Clearly, this program has been of enormous benefit in meeting the basic daily living needs of these individuals who have a limited control over their economic circumstances. Currently available statistics indicate that at least another 1 million elderly are eligible for program participation.

The Agriculture Committee has been faced with the difficult task of controlling the rapidly growing cost of the program in an equitable manner minimizing the impact of those cuts on the poorest and most vulnerable of our citizens. They have quite remarkably exceeded their mandate by saving $400 million more than the reconciliation instruction requires.

Mr. President, let me commend the committee for a number of important decisions that they made during markup. In particular, I am pleased that the committee voted against the partial restoration of the purchase requirement. Although the elderly would have been exempted, it would have established the groundwork for future action removing that exemption. Equally important, the committee maintained the general policy of targeting food stamp benefits to older Americans through the medical and shelter expense deduction mechanism.

While I am generally supportive of the provisions of S. 1007, let me also note that there are some items I am concerned about.

First, I am concerned about the committee's decision to use a gross rather than net income measure to determine program eligibility. Under current law, net income is used to determine eligibility for the elderly. Downward adjustments to gross income are made for such items as medical and excess shelter expenses. S. 1007 eliminates these adjustments establishing a single, absolute gross eligibility standard of 130 percent of poverty.

In testimony received by the committee in March, the Department of Agriculture estimated that approximately 4 percent of the elderly households, 67,000 older citizens, would be eliminated from the program under this provision. On the average, these 67,000 recipients receive slightly more than $40 a month. Certainly, I am concerned that these beneficiaries will no longer be able to participate in the program. However, I am most concerned about the inherent inequity of using a gross rather than net income measure to determine eligibility. Many elderly with gross incomes above 130 percent now qualify for food stamps because of their high medical or shelter expenses, or both. Thus, S. 1007 will make many elderly with lower spendable incomes than other elderly, after the payment of necessary medical, housing, and heating expenses, ineligible for food stamp benefits. As policymakers dealing with millions of recipients, the few thousand individuals affected in this way may seem insignificant.

But the effect will not be insignificant to those that will lose their needed benefits and have no other possible source of income to compensate for this loss. For this reason, I am supporting Senator BOREN'S amendment to exclude older citizens from the gross income eligibility test established by S. 1007 as reported by the Agriculture Committee. Through adoption of this amendment, the general policy of targeting food stamp benefits to older Americans would be applied in the determination of eligibility as well as benefit levels.

Second, I am concerned that freezing the standard deduction at $85 until July 1983 will have a proportionately greater effect on lower income food stamp households than higher income recipients.

Third, I am concerned that the $35 threshold for deducting medical expenses will not be lowered to $25 in 1982 as required by last year's food stamp legislation. It can be argued that this savings will not directly affect older beneficiaries because they are not yet receiving the benefit of last year's liberalization of the law. Yet, they deeply feel the impact of rising medical care costs. When compared to other Americans, they spend a far greater percentage of their incomes on these costs. Lowering the threshold is one mechanism used in adjusting benefit levels to respond to high health care expenses. Although benefits will not be reduced, the effects will be felt as income dollars are stretched further to meet basic daily living needs.

I know that many members of the Agriculture Committee and the Senate as a whole support revisions to the food stamp program that would result in even more stringent measures of eligibility and reduced levels of benefits for both the elderly and nonelderly. Some of these proposals will be debated on the Senate floor today. While I have reservations about S. 1007 as reported, because of its possible effects on older Americans, I believe it does represent a reasonable compromise between many individual Senators with vastly differing views on the food stamp program. As a compromise it is therefore a responsible piece of legislation worthy of the support of the Senate during these difficult times in which a priority must be placed on controlling Federal expenditures.

UP AMENDMENT NO. 143

Mr. BOREN. Mr. President, I yield myself as much time as necessary from the time on my amendment.

I ask unanimous consent that we resume consideration of my amendment which was temporarily laid aside.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Without objection, it is so ordered.

Mr. BOREN. Mr. President, earlier in our discussion of this amendment, a dis-

cussion between myself and the distinguished chairman of the committee, we had a discussion of the necessity of the Committee on Agriculture staying within the limits set forth by the budget reconciliation process; not only must we stay within the limits required in savings under the food stamp program, but that we must also stay within the total amount of savings mandated to the committee and all programs under its jurisdiction.

In that discussion, I noted that it was my feeling that savings contained in the amendment which I offered in committee, which had been adopted by the committee on the budget reconciliation proposal reducing the number of authorized personnel positions in the department, would be more than adequate to take care of the cost of approximately $35 million of exempting the elderly and disabled from any cuts due to changes in income standards under the food stamp bill now under consideration.

A memo was given to me on June 6 by Carol Cox of the Budget Committee staff which indicates:

> The Agriculture Committee does have jurisdiction over personnel ceilings for positions in the Department of Agriculture; so the Agriculture Committee could effect savings in laws in its jurisdiction by reducing the number of authorized positions.

The amendment which I offered in committee would bring about a 9-percent reduction in authorized positions in the department with the exception of those positions related to direct service in the field to the public and to the agricultural community.

From the figures given in terms of present salary levels, which of course would not be as large as those projected out to 1983 and 1984 presuming cost-of-living increases, it is estimated that in the headquarters alone, using 1981 salary figures, just in the headquarters in Washington, almost $28 million in savings could be achieved. The 9-percent reduction across the board in the Department at 1981 figures would range as high as $221 million.

So those are the outer ranges of the estimates. If we include regional headquarters on top of the $27 million saved in Washington and if we consider that some other slots would not be directly related to service to the public and to the agricultural community, it would——

The PRESIDING OFFICER. All of the time on the amendment for the Senator from Oklahoma has expired.

Mr. LEAHY. I yield to the distinguished Senator from Oklahoma such time as he may need. I yield it off the bill.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. BOREN. I thank my colleague.

It would be, therefore, clear, very conservatively, in excess of $35 million. That would be a very conservative side of the estimate. It could be much higher than that, several times that figure, that would be saved by this amendment. It would enable the committee to stay within its guidelines of the reconciliation bill and the programs under its jurisdiction.

And having found these statistics in terms of the savings of that amendment and in light of the Budget Committee staff statement that the committee could achieve savings by reduction in personnel ceilings, it would be my hope that the chairman might now find it possible to accept this amendment.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the distinguished Senator from Oklahoma and I have conferred at some length. As he will recall, my concern about his amendment was the additional $35 million cost per year for 4 years, or $140 million total. But he and I both have supported a cutback in the bureaucracy, not only in the Agriculture Department, but across the board in this town and across the country.

And my problem with his amendment originally was in terms of the reconciliation, because I did not want the Honorable PETE DOMENICI to come storming in here and saying, "You are out of order." Senator DOMENICI made clear that the Budget Committee would look not only at our reconciliation, but the reconciliation of all committees as submitted to this floor.

But, originally, we were informed by the Budget Committee that the savings in personnel would not count. As the Senator will remember, we went up the road and down the road on that thing for a couple of days in the committee. Now we have a fairly secure assurance that indeed it will count, certainly to the extent of covering the additional cost that the Senator's amendment entails.

For that reason, Mr. President, I certainly have no objection to the intent of the amendment. And I am perfectly willing to accept the amendment.

Mr. LEAHY. Mr. President, has the Senator completed?

Mr. HELMS. Yes.

Mr. LEAHY. Mr. President, I also looked at this amendment. I think it is a good amendment and if my colleague is willing, I ask unanimous consent that I may be named as a cosponsor of the amendment with him.

Mr. BOREN. I make that request, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, I think it reflects again what we have stated earlier, that within the overall package we are below the budget figures, we are below even the recommended figures of the administration. I think it is a good amendment. I think good legislative history has been worked out here. I have no objection to it. I suggest, if there is time left on the amendment, it be yielded back and we pass it by voice vote.

Mr. HELMS. I would offer only this caveat to my two friends: This presumes the savings of at least $35 million per year. And if that meets the approval and confirmation of the Budget Committee, fine.

I yield back the remainder of my time and ask for a vote on the amendment.

● Mr. LEVIN. Mr. President, I support the amendment offered by the Senator from Oklahoma.

The bill before us today establishes a gross income eligibility limit of 130 percent of the poverty line for all participants, including the elderly and disabled. Under current law, a household's net income must be at or below the poverty line to be eligible for food stamps. However, households with special expenses and earned income may qualify for enough deductions that they can receive benefits despite having gross incomes above 130 percent of the poverty line.

Mr. President, some experts have indicated that the proposed imposition of a maximum income eligibility test will have a large impact on the elderly. OMB has estimated that 400,000 households with gross incomes over the level of 130 percent of the poverty line would be removed from the program. Witnesses before the Senate Agriculture Committee projected that at least 125,000 of these participants may be senior citizens. Recent data shows that at present, most individuals with incomes over 130 percent of the poverty line who receive benefits are either social security recipients with high health care or shelter costs or working families with high shelter or child care costs. In the case of the social security recipients they have been provided with benefits because the law allowed them to deduct from their income any amount over $35 spent for health care and all shelter costs which exceed 50 percent of net income.

According to the American Association of Retired Persons, the gross income limit would place "a totally inflexible ceiling on eligibility; an older person with an income just a few dollars over 130 percent of poverty would be ineligible to receive benefits. The proposal thus ignores the fact that elderly persons spend a disproportionate amount of their income on such necessities as medical care and shelter costs. Those elderly persons who qualify for stamps now because the program takes these expenses into account will be ineligible as soon as this provision takes effect."

The amendment before us would maintain current law for elderly and disabled persons. Mr. President, adopting this amendment will result in a relatively modest cost when compared to the severe impact on the neediest elderly in this country.

I hope that my colleagues will join me in supporting the amendment offered by the Senator from Oklahoma.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma (Mr. BOREN).

The amendment (UP No. 143) was agreed to.

Mr. HELMS. I move to reconsider the vote by which the amendment was agreed to.

Mr. BOREN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. Mr. President, I see no burning zeal on the part of any Senator to call up another amendment at the moment. That being the case, I suggest the absence of a quorum with the time to be charged equally.

The PRESIDING OFFICER. Is there objection? Without objection, the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. SPECTER). Without objection, it is so ordered.

Mr. BAKER. Mr. President I observe that it is 3 minutes after 2 p.m. and there is no amendment pending now, as I understand it.

We have an order that at 3 p.m. we will begin voting on those amendments on which votes have already been ordered with a 10-minute intervening debate equally divided.

So the Senate is headed toward a time when we are going to start voting on amendments. We are going to end up at a time for final passage at 7 p.m., and if there are amendments to be offered some Senators may find it very difficult to have any debate at all on those amendments.

So, I hope that those Senators who may be within the hearing of my voice, either in the Chamber or in their offices, will take account of the fact that time is running out. I am not encouraging them to offer amendments, but I am simply saying that as a practical matter when we get to 3 p.m. we are coming down the home stretch and there is not going to be much time remaining for debate after this time.

There is an order, is there not, that there will be a vote on final passage not later than 7 p.m. today?

The PRESIDING OFFICER. There is such an order.

Mr. BAKER. I thank the Chair.

Mr. President, once again I urge Senators who have amendments to be offered to this bill or have debate on the bill itself to appear on the floor and offer them because it is now 5 minutes after 2 p.m., approximately, and we are going to run out of time very shortly.

Mr. LEAHY. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. LEAHY. I add from this side of the aisle total concurrence with what the majority leader has said.

I also remind Senators again from this side of the aisle that it has been by practice on amendments when they have come up from here to urge that they be handled as expeditiously as possible and that it has been my practice as the manager for the minority to yield back time on amendments to try to cut them down. Notwithstanding that practice, the majority leader is absolutely correct. If anyone has substantive amendments to come in after 3 p.m. they are going to have a very difficult time getting any kind of an adequate hearing.

I stress that we are ready to proceed and consider any amendments that might be available.

Mr. BAKER. Mr. President, I thank the Senator from Vermont and commend him for his diligence in moving this bill as I do the distinguished manager of the bill and the chairman, the Senator from North Carolina (Mr. HELMS), and the chairman of the Finance Committee, who also serves on the Agriculture Committee, Senator DOLE, and other Senators as well. The purpose of my remarks was to underscore the urgings of the distinguished managers of the bill on both sides that Senators get on with the business of offering amendments if they are going to do so.

I have no ax to grind and I will reserve judgment on each amendment as it is offered as far as I am concerned as a Senator from Tennessee. But in my role as leader, I urge Members to come to the floor now and to offer their amendments because it is not my intention to agree to a unanimous-consent request to change the orders and times that have been put down to which Senators agreed previously.

With that statement, Mr. President, it is with reluctance but nevertheless necessity, I believe, to obscure no Senator on the floor who appears to be ready to offer an amendment. I then once more suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. HELMS. Mr. President, I ask unanimous consent, notwithstanding the time agreement and allocation of time for the consumption of time by the respective sides, that beginning at 2:50 p.m. the remaining 10 minutes before the rollcall vote be equally divided for discussion of the Symms amendment which will, as I understand it, be the first amendment to be voted on.

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. I join in the request of the distinguished Senator from North Carolina. I think considering the fact that we are going to have a rule similar to that in each of the other amendments, and considering the fact that this was debated yesterday and all time was yielded back on it yesterday, it would be good for the whole body to have that kind of debates. So I join in the request of the distinguished Senator from North Caroline.

Mr. HELMS. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, with reference to the pending legislation, as the distinguished majority leader has indicated, I would hope that Senators who have amendments would bring their amendments to the floor. There will be votes starting at 3 o'clock and those are very important votes.

There has been some discussion of whether or not there might be some way to resolve the differences insofar as those amendments are concerned which might avoid the necessity of rollcall votes. But this Senator believes that the issues are such that they must be decided by the Senate.

The first issue to be decided is whether or not we should restore the purchase requirement. In the view of this Senator, that would be a grave mistake. It would exclude or could exclude up to 3 million Americans, the poorest of the poor, particularly those who reside in rural areas in every State in this Nation.

While I certainly appreciate the efforts of the distinguished chairman of the committee to try to resolve some of the differences, it is the opinion of this Senator that this matter was addressed in the committee and efforts to restore or partially restore the purchase requirement failed by a vote of 10 to 7. It was a close vote. This Senator has no idea what the vote will be on the Senate floor, but I would urge my colleagues to vote against the amendment.

The elimination of the purchase requirement did bring more people in the food stamp program. That is why it was offered in the first place. To stand here and suggest that somehow that was an irresponsible act and that the food stamp program costs too much money, I would also say, as I have indicated yesterday, that we reduced the cost of the program in excess of the President's request. We will save about $800 million over the next 4 years, through 1984, than requested by the President.

I believe the committee has done a good job. For the most part, there is total agreement on the committee. There was no disagreement. But in certain key areas we had different views and those views were expressed and votes were taken.

I would hope that we would abide by the decisions made by a majority of the committee members and that we can defeat the amendment now being proposed.

Senator MELCHER, I understand, has a couple of amendments that I cannot support. I am not certain, but I think Senator MOYNIHAN may have an amendment. I hope and urge those Senators to let us get along with the business here and perhaps wrap up this bill early this afternoon.

Mr. LEAHY addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I yield myself such time from the bill as I may require.

Mr. President, I could not concur more with the remarks of the distinguished Senator from Kansas. I think that our colleagues should keep in mind some basic facts when we are talking about the food stamp legislation.

The food stamp legislation is not here on the basis of a popularity poll. I have never heard of anything that is more abused in the rhetoric and especially during campaign years—and campaign years now seem to go starting from the Wednesday after the Tuesday elections in November straight through to the following Tuesday elections 2 years later or 4 years later or 6 years later, as the case may be.

I mentioned yesterday that, as a member of the Senate Agriculture Committee, as a member of the Nutrition Subcommittee and now the ranking member of it, I have heard and received from all over the country the tales of the food stamp recipients that drive up in large Cadillacs and buy expensive pieces of beef and leave.

Well, after adding those up and having looked at the last sales reports from General Motors, I think General Motors would be delighted to think that they have actually sold the number of Cadillacs that are supposed to be driven right now by food stamp recipients. The Cadillac motor company is certainly not within the knowledge of that position that General Motors has ever made the number of Cadillacs to be used by the food stamp recipients around the country.

The fact remains that we have a program that is one of several programs instituted by our Government to try to relieve the problems of hunger and malnourishment in this country.

Let us stop for just one moment and consider why we have the food stamp program. As the wealthiest, most powerful nation in the world, it is and it has to be an area of constant shame to us as a society to have to admit that there is widespread hunger and malnourishment in this country.

Any one of us could leave this Chamber and within 20 minutes see areas around here in the Nation's Capital. We have some very real and some very serious hunger problems. I daresay that we could go into any one of the 50 States represented here and within 20 minutes or so find similar situations in every single State in the Union.

It is a distressing fact that hunger and malnourishment exist in the United States. It is not a fact that goes away because we wish it away.

I could not help but be amused, in perhaps a rueful way, while reading an article the other day about an organization in this country that has raised millions of dollars to eradicate hunger. How are they going to eradicate hunger? Because the members of that group will just say, "We shan't have hunger in our days. We wouldn't have hunger in our times. We will wish it away. We will just say that we are, as human beings, against hunger."

Well, who in Heaven's name, except for those who are pedaling some of the latest diet fads, who in Heaven's name is in favor of hunger?

I wonder if we do not, as a Government, sometimes make the same mistake as this particular, perhaps well-intentioned, organization in this country, thinking that hunger will go away simply because we have determined in our own souls and minds that we do not like hunger so, therefore, we just kind of wish it away by using people who belong to such organizations who have never gone hungry except by choice.

And that is something we have to remember as Members of this body, that not one of us, certainly since we have been a Member of this body, have even gone hungry, except by choice. Perhaps some of us, on occasions, should make that choice more often. But, be that as it may, it is only by choice.

The fact is that is not a choice open to a very, very large percentage of people, millions of people in this country. They can survive only because we have the WIC program, for example, a program that has come under attack in recent days because it helps pregnant women and it helps them both prior to birth and subsequent to birth and helps the child.

It is interesting, at a time when we will raise enormous debates on the question, for example, of abortion, we will, at the same time, try to cut funds in those kinds of programs and encourage women to have their children and help them to help their children.

But the WIC program is there because of a proven necessity in this country, a proven situation in which we know we have had lack of nourishment among pregnant women and their children.

On the school lunch program, again we know where it has existed and existed well, the ability to learn has improved, the health of the population has improved, and the dual advantage to our country in the improved health of young people and the improved learning ability has far, far overpaid the cost of the school lunch program.

And, again, we have the food stamp program. The people I have talked with in my State, in the State of Vermont, are not the stereotype of somebody driving up in an expensive car using food stamps. Rather, they are an elderly couple living in a third-floor walkup, a husband with limited resources. They are invalids, trying to work at a part-time job. They are mothers trying to support children. They are people who have worked to support themselves for years and have paid taxes doing it, who are temporarily out of a job but who still have family obligations to sustain. And they are people who will be hungry absent the food stamp program.

Mr. President, consider the fact in talking about WIC, for example, that here is a case where we have shown that every dollar spent in prenatal cost has saved about $3 in health care costs. Who knows what food stamps have saved in health and special education costs.

What are the responsibilities of a society as a society?

If we determine two things—one, that we do not have a responsibility to the hungry and malnourished of this country, or if we determine that the food stamp program is not a way of helping the hungry and malnourished in this country—then do away with it. Have an up or down vote on it. We will have that at the end in the final vote, at 7 o'clock, I believe. If we feel this is not a program that helps, then vote it down. Get rid of the program. Do not try to kill it by one move after another.

Quite frankly, a number of these amendments, especially the reinstatement of the purchase requirement, which I will be speaking to later on, will do precisely that.

I reserve the remainder of my time.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

UP AMENDMENT NO. 144

(Purpose: To allow only those drug abuse or alcoholic rehabilitation centers to rereceive food stamps when their total funding is no more than 20 percent from Federal sources (private, nonprofit centers would be eligible if more than 80 percent of their funding was private or with State assistance)

Mr. MELCHER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 144:

On page 40, beginning with line 19, strike out everything down through line 22, on page 41, and insert in lieu thereof the following:

"SEC. 203. Section 3(i) of the Food Stamp Act of 1977 is amended by adding at the end thereof a new sentence as follows: 'Notwithstanding any other provision of this Act, narcotics addicts or alcoholics who live under the supervision of a private nonprofit institution for the purpose of regular participation in a drug or alcoholic treatment program shall be considered residents of institutions for purposes of this section if such private nonprofit institution receives more than 20 percent of its total funding from departments or agencies of the Federal Government, including Federal funds paid to such institutions by States or local agencies.' ".

Mr. MELCHER. Mr. President, I offer this amendment at this time with full knowledge that we cannot complete debate on it before we start voting. But I offer it at this time in order to get the attention of the Department of Agriculture and, specifically, of those people who come up here to the Hill both during the time when we are marking up a bill in the committee and when we have the bill on the floor. I want them to get their act in order and be able to tell the individual Senators and their staffs just what is meant by this amendment, where the objections are to this amendment, and what their recommendation is for this amendment.

By the way, Mr. President, I ask unanimous consent that I can reserve the remainder of my time on the amendment to be utilized after the votes that are stacked have been completed. Is there objection to that?

Mr. HELMS. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. When the administration offered their suggestions to amend the Food Stamp Act, as I recall, tinkering around with the centers for drug abuse and alcohol centers was not really of a high priority. It was not even part of their game plan. Anyway, the committee tinkered around with it.

There are two arguments that have been made. One argument was that food stamp recipients who were patients in a drug abuse center or alcohol treatment center were of a transient nature, so the center would be using the food stamps to help pay the grocery bill for everybody there, including those to whom the food

stamps actually belonged. But maybe the patient left and the food stamps kept coming to the center. Well, that is one argument. That concerns some sort of fraud and abuse. They want to close off that fraud and abuse by stamping out their eligibility.

Well, if you have a sore thumb, do you cut off your hand? If you have a sore thumb, do you even cut off the first joint? I do not know. I would not. But this is on the argument that there is some fraud and abuse opportunity and we are going to knock out the whole deal.

The second argument that was made to knock out the whole deal was that after all, these centers, which are nonprofit, are probably getting a lot of Federal dollars anyway, so they can pay the bill with the Federal funds they receive.

To answer that argument, my amendment simply says that if a center gets 20 percent of their total cost from any Federal source, no food stamps. So we answer that one.

I do not know how many of these centers ever get 20 percent of their total cost from any Federal source. I think very few of them.

Why do we have this in the present law right now, as we stand today?

In 1973, residents of drug and alcohol treatment centers who met all other food stamp eligibility requirements were allowed, under the food stamp amendments, to become eligible to receive food stamps. That was in 1973. The stamps are received by the treatment centers on behalf of the residents. The centers use the food stamps to prepare and serve meals. The food stamps are not put in the hands of the residents themselves. If they are eligible, the center actually gets the food stamps. This provision was added into the law in 1973 with the strong backing of former House Agriculture Committee Chairman W. R. Poage.

I served in the House committee at that time. Chairman Poage was not known as a flaming liberal. Chairman Poage was known as a very down-to-earth Texas conservative Democrat. Anything that got into the Food Stamp Act that he had a special touch to was placed here because he thought there was a real down-to-earth need.

He thought there was a real down-to-earth need in 1973 because he wanted to draw more drug addicts and alcoholics into rehabilitation centers and off the streets. The way the law was amended in 1973 and the way the law stands today in 1981—and if we follow my advice on this amendment, we shall keep it that way—we limit it to those centers that are licensed and certified by the State. In other words, they are not just anybody's idea of a drug abuse center or alcoholic treatment center; they are those centers that are licensed and certified by the State. The use of food stamps in these centers was very successful.

Mr. President, I said that I wanted to lay down the amendment, I wanted to start the debate on the amendment, knowing full well we could not complete it before it is time to go onto other things and vote on those votes that are stacked up; that I wanted the administration to get its act together. I wanted it to tell us exactly if they have any problems with policing this in these drug abuse centers and alcoholic rehabilitation centers.

I have called the Inspector General's office; I have talked to the attorney in the Inspector General's office that is in charge of it. He tells me that he knows of no real problem, but he will review to see whether or not there has been any significant investigation, any significant case during the past 2 years. We were not told that there was in the hearings on the bill. We were not told there was during markup of the bill. But I have heard today, in the halls out here, from an administration representative, that he thought there were ongoing investigations by the Inspector General in the Department of Agriculture of a serious consequence that related to these centers. If there are, I would like to know about them; if there are not, I would like to clarify that.

Mr. President, I think that is fair enough and I think it is fair enough for all of the rest of the Senators besides myself. I think it is fair for the public, too. I think it is a fair way of looking at what we are about to do in the treatment of drug abuse and alcohol rehabilitation centers and the people who are there taking that treatment, in regard to whether or not they should be eligible for food stamps.

Mr. President, I reserve the remainder of my time.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, so that I may be fair to Senator MELCHER, I would not want this rollcall time to be charged, to any degree, on his time. Therefore, from the time that Senator MELCHER completed his remarks, I ask unanimous consent that it be charged equally on the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

I suggest the absence of a quorum equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 63

Mr. LEAHY. Mr. President, a parliamentary inquiry. How much time does each side have at this point?

The PRESIDING OFFICER. Two and a half minutes.

Mr. SYMMS. I yield Senator DOLE 1 minute.

Mr. DOLE. That is all right. I will wait.

Mr. SYMMS. Mr. President, this amendment addresses the subject of the food stamp purchase requirements. The point was made yesterday, it has been fully debated, and it is a matter of record, but I should like to make a couple of closing comments.

I will quote a very distinguished Member of the other body, a lady who was one of the primary authors of the original food stamp program, Representative LEONOR SULLIVAN of Missouri. I had the privilege to know her in the other body, and she is a very outstanding American. She said:

> No one—no one—should receive food stamps free, no matter how small their income. That was another mistake made in 1970. They should be required to pay something for the food stamps—whatever they can afford to spend for food out of their limited income, even if it is only 50 cents or $1 for a month's food. Otherwise—and this is now the case in some situations—the stamps are considered a kind of "funny money" which are merely handed over as a gift from some mysterious source and do not have to be regarded as something you work for and buy. Anything handed over free in that fashion, whether it be food stamps or anything else, invites cheating and abuse.

I believe it is important to point that out.

This amendment will exclude the blind, the disabled, and those in the lower 20 percent of the income category who receive food stamps. If we are to get control of this program, it is imperative that we reinstate the purchase requirement; because since that purchase requirement was removed, commencing in early 1978—it was passed in 1977—the program has nearly doubled in a short length of time. There is no discipline remaining.

For example, the caseload increased from 15.3 million to 23 million people. CBO attributed fully 70 percent to 80 percent of that growth to the elimination of the purchase requirement.

CBO further noted that elimination of the purchase requirement has transformed the food stamp program from a nutrition program to a direct income transfer program.

Mr. President, I made the point yesterday, on the floor, that in the other body at the time the purchase requirement was removed, the then chairman of the House Committee on Agriculture——

The PRESIDING OFFICER. The time of the Senator has expired, and we must complete debate by 3 o'clock.

Mr. LEAHY. I will respond at this time, because it will be my only chance.

The reason we removed the purchase requirement, Mr. President, was why I would assume removal would receive the most support in this body. It removes administrative costs. It removes fraud. It removes waste.

One can look at today's Washington Star, on the front page—a whole list of the claims against food stamp vendors.

That is one of the areas where fraud remains in this program. The fraud was not the question that somebody may be spending a dollar one way or the other on food stamps. When we had the cash programs, the fraud was with vendors such as a church that owes $990,000. That is fraud.

It is not the fraud of someone buying an extra loaf of bread or not.

What we are trying to do is to remove these administrative costs and the problems of security of funds. I think that we have made a great step forward, one that not only cuts administrative costs, but benefits the elderly and rural areas.

I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I simply make the point that having been somewhat responsible for eliminating the purchase requirement I am not yet ready to surrender to those who say we made a mistake. I do not think that will ever happen.

I simply suggest we are talking about the truly needy, those that President Reagan talked about, the so-called safety net, the rural poor, and this amendment would impact mostly on the rural poor in Western States, Midwestern States, and Southern States. I think it would be a grave mistake now to restore even on a partial basis the purchase requirement. I hope we defeat the amendment.

The PRESIDING OFFICER (Mr. GORTON). All time has expired.

Mr. BAKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. On which amendment are we voting?

The PRESIDING OFFICER. Printed amendment No. 63 offered by the Senator from Idaho (Mr. SYMMS).

Mr. BAKER. Mr. President, what other amendments follow on after that according to the previous order?

The PRESIDING OFFICER. Printed amendment No. 64 offered by the Senator from North Carolina (Mr. HELMS); unprinted No. 141 offered by the Senator from Idaho (Mr. MCCLURE).

Mr. BAKER. Mr. President, I thank the Chair.

The PRESIDING OFFICER. That is followed by unprinted amendment No. 144 offered by the Senator from Montana (Mr. MELCHER).

Mr. LEAHY. Mr. President, we have 10 minutes between each vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho (Mr. SYMMS).

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 33, nays 66, as follows:

[Rollcall Vote No. 140 Leg.]

YEAS—33

Abdnor	Grassley	Nickles
Andrews	Hatch	Nunn
Armstrong	Hayakawa	Proxmire
Baker	Helms	Quayle
Biden	Humphrey	Roth
Boren	Jepsen	Stennis
Byrd, Harry F., Jr.	Kasten	Symms
	Laxalt	Thurmond
Denton	Long	Tower
East	Lugar	Warner
Garn	Mattingly	
Goldwater	McClure	

NAYS—66

Baucus	Ford	Moynihan
Bentsen	Glenn	Murkowski
Boschwitz	Gorton	Packwood
Bradley	Hart	Pell
Bumpers	Hatfield	Percy
Burdick	Hawkins	Pressler
Byrd, Robert C.	Heflin	Pryor
Cannon	Heinz	Randolph
Chafee	Hollings	Riegle
Chiles	Huddleston	Rudman
Cochran	Inouye	Sarbanes
Cohen	Jackson	Sasser
Cranston	Johnston	Schmitt
D'Amato	Kassebaum	Simpson
Danforth	Kennedy	Specter
Dixon	Leahy	Stafford
Dodd	Levin	Stevens
Dole	Mathias	Tsongas
Domenici	Matsunaga	Wallop
Durenberger	Melcher	Weicker
Eagleton	Metzenbaum	Williams
Exon	Mitchell	Zorinsky

NOT VOTING—1

DeConcini

So Mr. SYMMS' amendment (No. 63) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 64

The PRESIDING OFFICER. The question recurs on amendment No. 64 offered by the Senator from North Carolina (Mr. HELMS). Under the previous order, there will be 10 minutes of debate evenly divided. Who yields time?

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I yield to the distinguished Senator from Vermont.

Mr. LEAHY. Mr. President, along with Senator DOLE——

Mr. HELMS. Mr. President, the Senator is entitled to be heard. May we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order.

Mr. LEAHY. Mr. President, I understand the parliamentary procedure is that we are on the second of the three amendments which were stacked for 3 o'clock.

The PRESIDING OFFICER. The Senator is correct.

Mr. LEAHY. Mr. President, the amendment before us would freeze the standard deductions. It should be noted by my colleagues that the committee has already taken very substantial steps in freezing deductions, but freezing this way reduces benefits for nearly all households, about 86 percent. Quite frankly, the reason I cannot support it is that it does violate the safety net concept to protect the poorest of the poor from budget cuts.

The 1977 act provided for the standard deductions to replace a variety of itemized deductions that had been allowed under prior law. We took those itemized deductions out, Mr. President, and put in the standard deduction. If that is now frozen, food stamp allotments will not reflect increases in a variety of expenses and the decrease in disposable income participants have left for food.

In the Northeastern States a large percentage of households already claim the maximum shelter deduction. At a time when energy prices are rising rapidly, these households will become significantly worse off in comparison to other households if no deductions can be made in their standard deductions.

Mr. President, at this point I yield to the distinguished Senator from Kansas with whom I joined in committee in opposition to this amendment.

Mr. DOLE. Mr. President, I will just take 1 minute. I will again make the point I have before on this floor, that we have exceeded the savings requested by the President in this program. It is not that we have not cut the food stamp program—we have cut more than $1.8 billion. The savings have been made. We do freeze the deductions for 2½ years in the committee bill.

All this was thrashed out in committee, and this was the final product of the committee's work. Now we are trying to undo that work on the Senate floor.

I do not quarrel with that, except to say there should not be any illusion that we have not cut the food stamp program. We have cut it more than we have cut the Export-Import Bank and a few other things that affect big business.

I would make the point that the President talked about a safety net. The President has talked about the truly needy. This amendment would affect the truly needy. I would hope that we could defeat this amendment and go on to the next amendment, defeat that amendment, and then go on to the other amendments that may be pending.

We did our work in the committee. We saved in excess of the President's request. I would hope that those who are concerned about this program—even though it is not popular, and the people in the program probably do not vote, do not contribute, do not show up in your office—know that these people do have a need, and the President recognized that need. This was one of the categories he talked about when he talked about the truly needy.

I hope we might have support across the board. We will make further reductions if that is necessary in later years. The Congress is going to be here next year and the Congress will be here the year after that.

We are talking about indexing taxes. I would hope we would also index the deductions of the poor people.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, what is the time situation?

The PRESIDING OFFICER. Three minutes and 45 seconds remain to the Senator from North Carolina and 2 minutes remain to the Senator from Vermont.

Mr. HELMS. Mr. President, the Senate has already made one mistake this afternoon by not restoring the purchasing requirement. The Senator from Kansas——

Mr. LEAHY. Mr. President, may we have order? The Senator is entitled to be heard.

The PRESIDING OFFICER. May we have order in the Chamber?

Mr. HELMS. The Senator from Kansas and others are recommending that we make the second mistake, compounding the first.

What we are talking about in this amendment is indexing. I say again, as I said over and over again this morning, that indexing is ruining the economy of this country. We are now approaching a trillion dollar deficit.

Senators can do as they please, but I do not want them to go home and say "We did this" and "We did that."

By the way, I will say to those Senators who say they met all of the administration's requests, which is not true, that this amendment is an administration request.

Any Senator who votes against continuing the freeze on indexing on this program is making a mistake.

The indexing is frozen until July 1983 under the committee bill. If this amendment is approved and if the circumstances warrant in the future, the Senate can vote to increase the deductions then and make a judgment. But if we do not adopt this amendment, then, like Tennyson's Brook, we shall glide on, and we shall make no adjustment in the food stamp program. We are talking about a program that has doubled in cost in the last 3 years. It is costing, for this year, a little over $11.3 billion.

So, Mr. President, I hope Senators will be attendant to what they are doing. On their desks are copies of a fact sheet on this amendment.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LEAHY. Mr. President, I shall say simply this: We have already frozen the deductions until mid-1983. If President Reagan is right in his economic assumptions, we do not need this amendment. If he is wrong in them, then we come back in 1983 and change it. Basically, if you believe the President's economic assumptions, you can safely vote against this amendment.

● Mr. LEVIN. Mr. President, I am opposed to the amendment offered by the Senator from North Carolina to reinstitute the purchase requirement for food stamps. In 1977, Congress eliminated the purchase requirement recognizing that it was a major obstacle to the participation of poor people the program was designed to serve. Previously, these individuals could not scrape together sufficient moneys to buy into the program. Mr. President reinstitution of the purchase requirement would exclude them from this much-needed program in alleviating hunger in America.

The amendment would have a severe impact in poor rural areas, and will restore a whole system of paperwork and administrative costs at a time when program simplification is a government objective.

Additionally, restoring the purchase requirement would lead to increased fraud and abuse in the program on the part of participants and vendors.

According to the USDA, elimination of the purchase requirement reduced paperwork considerably. It reduced Federal paperwork burdens by 58,000 work hours a year, and State paperwork burdens by 10 million work hours per year.

This amendment would have the most serious adverse effect in rural areas. The most dramatic participation increases due to elimination of the purchase requirement occurred in the more rural food stamp project areas. USDA data reveals that between November 1978 and May 1979, as a result of the elimination of the purchase requirement, participation in the most rural areas increased by 42 percent while participation in the largest, most urban areas increased only 8 percent by comparison.

A partial restoration of the purchase requirement is strongly opposed by State and local food stamp administrators, because it would require operation of a dual program—one for the elderly and disabled and one for all other participants. Further, Mr. President, in testimony before the Senate Committee on Agriculture, Nutrition, and Forestry, USDA Deputy Secretary Lyng indicated that the administration does not favor restoring the purchase requirement.

Mr. President, if this amendment succeeds, we will be turning away at least 3 million of the most needy persons in this country.

I urge my colleagues to vote against this ill-conceived and unworkable amendment.●

Mr. LEAHY. I yield back all my time.

Mr. HELMS. Mr. President, I yield back all of my time. I have said all that needs to be said.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to amendment No. 64 of the Senator from North Carolina. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 30, nays 69—as follows:

[Rollcall Vote No. 141 Leg.]

YEAS—30

Armstrong	Humphrey	Quayle
Byrd, Harry F., Jr.	Jepsen	Roth
Denton	Laxalt	Rudman
East	Long	Simpson
Garn	Lugar	Stennis
Grassley	Mattingly	Symms
Hatch	McClure	Thurmond
Hayakawa	Murkowski	Tower

NOT VOTING—1

DeConcini

So the amendment (No. 64) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 141

The PRESIDING OFFICER. The question occurs on UP amendment No. 141, offered by the Senator from Idaho (Mr. McCLURE). Under the previous order, there will be 10 minutes of debate, evenly divided.

Who yields time?

Mr. McCLURE. Mr. President, I will be very brief. I think as the pattern develops it is obvious that the majority of the Senate is not really concerned about further constraining the growth of the food stamp program.

Mr. MOYNIHAN. Could we have order? The Senator is speaking and it is important.

The PRESIDING OFFICER. The point is well taken. The Senate will be in order so that the Members can hear the debate.

The Senate will be in order.

The Senator from Idaho.

Mr. McCLURE. Mr. President, this amendment is not the same as the last two amendments and I hope will be considered on its own merits and not simply be a knee-jerk reaction of voting yes or no in exactly the same pattern as we have on the last two amendments.

The first two amendments have dealt with rather fundamental questions with respect to the food stamp program. This amendment deals with a very small aspect of it, that is whether or not we are going to count all income for a family in determining whether or not they are eligible for food stamps. The committee wisely and correctly decided that the energy assistance payments made by a State or local government would be included in the income of the family in determining qualifications for and the level of food stamps to be received.

This Senate in 1977 voted that all other public assistance payments received by a family would be determined as a part of their income for the determination of the level of food stamp assistance to which that family was entitled.

My amendment simply seeks to say that the Federal energy assistance will be treated in exactly the same way as other welfare payments and other assistance payments and other energy assistance payments by the State and local governments.

If there is to be any consistency and any logic in the basis of the determination of income, we should adopt this kind of an amendment, and I hope the Senate will do so.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HUDDLESTON. Mr. President, speaking on behalf of the committee majority on this matter and Senator

LEAHY, the floor manager from this side who is not present right now, let me say the illogical aspects of the approach that has been suggested by the Senator from Idaho. First of all, the fuel assistance program is designed to meet a specific need. There would be no fuel assistance adjustment available to the people if there were not increases in the cost of fuel designed to use this money. So it does not in any way provide the recipient with any additional money that he can use for food purchases. So it seems to me the two should not be tied together. If there is no need for fuel assistance, then that should be addresed in its own context and not addressed in connection with the food stamp program.

We urge the defeat of this amendment. It would take off the rolls without question a number of elderly people in the country. In most cases the fuel assistance comes in large or relatively large payments during 3 months of the year, during the heating season. So all of the income then would be lumped into those months and many persons may find themselves totally denied the food stamp assistance during that particular time.

So this is not, in my judgment, a reasonable approach. It would eliminate perhaps some $50 million of food stamps going out mostly to the elderly people of the country. I do not believe that is where we need to bear down on our additional cuts.

So I suggest that we, as we have done in the two previous amendments, recognize that the Agriculture Committee has done a good job of cutting back on this program, restraining its growth, but still trying to meet some of the basic needs of the people of the country.

Mr. McCLURE. Mr. President, the Senator from Kentucky indicates that it is illogical to say that we have granted a payment for a special purpose, that that should be included as income. I say to the Senator that is precisely and exactly what the committee did with respect to State fuel assistance payments. It is exactly and precisely what this Senate did in 1977 in voting by a majority of both this body and the other body to include public assistance payments, welfare payments of all kinds in the computation of income. The only people who will be affected are those whose income by virtue of these payments is elevated to the point that they would not otherwise qualify for food stamps. In other words, their income is high enough that they would not qualify. If what we want to do is preserve the opportunity to focus this to the poorest of the poor we will adopt the amendment. If what we want to do is spread more Federal money around without regard to what the need is, we will vote against the amendment.

Mr. HUDDLESTON. Mr. President, how much time remains on this side?

The PRESIDING OFFICER (Mr. WALLOP). The Senator from Kentucky has 2 minutes and 15 seconds; the Senator from Idaho has 1 minute and 30 seconds.

Mr. HUDDLESTON. I know of no other Senator on this side seeking time.

I respond that the reason the committee took the action it did in relation to the State funds was that there was indication that States were attempting to use this method for receiving additional Federal funds and some abuse was indicated as at least possible if not already taking place.

The approach to that problem was somewhat different than the approach to the Federal fuel assistance payments.

Mr. President, I yield back the remainder of our time.

Mr. CHAFEE. Mr. President, will the Senator yield?

Mr. McCLURE. I yield to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, I rise today in strong opposition to the amendment to S. 1007 which proposes to count Federal energy assistance payments for low-income households in determining food stamp eligibility.

In 1979, Congress approved legislation which excluded all levels of low-income energy assistance as countable income for the purpose of determining food stamp eligibility. We realized that skyrocketing fuel costs were taking a tremendous bite out of a low-income household's budget, leaving little to spare for other basic necessities such as food, clothing, and medical costs. These very households, and more particularly those located in the Northern States, were having to face the cruel choice of whether to feed themselves or heat their homes—a choice which none of us in this Chamber have ever had to make or would ever want to make.

Energy assistance payments should not be construed as free cash. These payments are intended to make up just a small portion of the increased price of fuel due to the recent decontrol of oil prices. These payments do serve, however, to offset rising energy costs which continue to take a bigger chunk out of a poor household's disposable income.

Last year, 29,000 Rhode Islanders, determined to be in serious need, received Federal energy assistance. Of those 29,000, approximately 5,000 welfare recipients, receiving fuel shut-off notices, received a State assistance payment in order to ease their hardship. What do I mean by hardship? I refer to those households who, during the single coldest month in my State, will have to spend as much as $300 for energy, but they are only receiving the maximum SSI payment of $280. Clearly, Federal, State, and local energy assistance efforts are critical for the very survival of these people.

Let us be realistic, Mr. President, and let us be fair. We must not further debilitate those individuals and families who can barely make ends meet now. With unemployment on the rise, food costs high and the energy outlook uncertain, let us not further penalize our indigent citizens by taking food from their table.

In addition, in view of the administration's proposal to block grant the low-income energy assistance program and reduce funding by 25 percent, in view of the proposal contained in S. 1007 which temporarily freezes indexing of the standard and shelter care deductions, my State, as well as most of the Northern States plagued by long, cold winters, will surely suffer.

I am hopeful that this amendment will be soundly defeated and that the provision to count State and local energy assistance as well will also be put to rest in conference.

Mr. McCLURE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Idaho.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 25, nays 74, as follows:

[Rollcall Vote No. 142 Leg.]

YEAS—25

Abdnor	Hayakawa	Quayle
Armstrong	Helms	Roth
Byrd, Harry F., Jr.	Jepsen	Stevens
	Laxalt	Symms
Denton	Lugar	Thurmond

NOT VOTING—1

DeConcini

So Mr. McCLURE's amendment (UP No. 141) was rejected.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 144

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Montana (Mr. MELCHER). Twenty-three minutes remain under the control of the Senator from Montana. The Senator from North Carolina controls 30 minutes. Who yields time?

The Senator from Montana.

Mr. MELCHER. Mr. President, the amendment concerns the alcohol treatment centers and the drug abuse treatment centers.

The bill, as it is now, would eliminate

consideration of the patients as recipients of food stamps. The present law allows that. The provision was added into the law in 1973 with the strong backing of former House Agriculture Committee chairman W. R. Poage.

In addition, the 1973 amendments permit nonresident patients being treated at these centers to use food stamps to pay for meals at the food centers. This has also been successful, drawing more addicts and alcoholics into the treatment program.

Unfortunately, S. 1007 deletes these 1973 provisions. Residents in drug and alcohol treatment centers would become automatically ineligible for food stamps unless they moved out of the center.

The result would be that treatment centers would be able to serve less food and handle fewer patients. More alcoholics and drug addicts would be returned to the streets before they are rehabilitated.

In addition, nonresident patients would no longer pay for meals at the center with food stamps. As a result, many centers would no longer be able to serve meals to nonresidents. As a consequence, nonresident patients would spend less time at the treatment center and more time on the streets.

In fact, S. 1007 even removes a provision of current law that exempts an addict or alcoholic from the work registration requirement for the period of time that the addict or alcoholic is participating in the treatment program. This is simply shortsighted. An addict who does not reside at the treatment center but is a patient there would lose food stamps for himself and all of his family if he did not abandon his treatment program to comply with the work registration, job search or workfare requirement.

Society is better served by rehabilitating these persons and making them into useful, productive citizens. That is, allowing them to go ahead and complete their treatment. They are more likely to find permanent employment and become taxpaying citizens rather than persons dependent upon Government aid if they go through the rehabilitation treatment.

There is some claim that there is an overlap in benefits here because some institutions are eligible for donated commodities. However, the commodities provided are generally limited to those in the stocks of the Commodity Credit Corporation, which is principally nonfat dry milk, butter, and cheese. The Department provides institutions with less than $3 per person per month, or about 3 cents per meal, in these commodities.

This hardly constitutes an overlap and it cannot substitute for food stamps. My amendment takes care of that by making sure that if these nonprofit organizations that run these centers are receiving more than 20 percent from any source or any combination of sources which are Federal funds, the persons there would not be eligible for food stamps.

The Department has not found any significant abuse in alcohol or drug treatment centers. They have had a survey going for the past 2 years. They have made six or seven different comments to try to tighten up the auditing in those particular centers where they found inaccurate, incomplete, and irregular accounting. But to simply remove all these nonprofit centers and the patients therein from the eligibility for food stamps I do not think is warranted at all.

The Inspector General, after the survey, has never recommended this to the Congress, and I talked to the Inspector General's Office today in the Department of Agriculture. They continue not to recommend any steps such as envisioned in S. 1007 to be undertaken at this time to remove the patients in these alcohol and drug treatment centers as being eligible for food stamps.

During the period of recovery from alcoholism, good nutrition is particularly important. Public hearings held by the Department of Agriculture in 1977 had a number of witnesses who testified that the food stamp program was important to the success of alcohol treatment in the programs of institutions that rehabilitate alcoholics.

Mr. President, it is fair for me to point out that the savings envisioned by the administration by eliminating food stamps for the patients in these centers would save $9 million a year. In fact, if projected with inflation, it would mean $12 million in the fourth year.

I do not know how accurate that figure is, but to the extent that we are dealing with patients who are in nonprofit centers for either drug abuse or alcoholic treatment, I think the least we can do today is to continue this help for those patients who are eligible and who are receiving food stamps.

I am not sure that that comes to $9 million. I suspect, with the type of amendment I have offered, part of that $9 million in Federal outlay is eliminated. But whatever the outlay is per year, I think we ought to be willing to assist those patients to that extent. I think it would be a wise investment on the part of the Federal Government. Remember, we are dealing with patients who are in a nonprofit center for either drug abuse or alcoholic treatment. Those bills are paid by other people, the big bill for running those centers, not by the Federal Government.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, I yield to the Senator from Kansas such time as he may require.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, again this is an area that was addressed in our committee deliberations. I certainly have no real quarrel with the intent of the amendment, but, again, we acted on the basis of USDA comments. There were allegations there was a certain amount of fraud in this group which the Senator from Montana has been discussing.

In an effort to compromise part way with the Department and with others who had an interest, a number of groups, we did restore the food stamp benefits to residential homes for the blind, disabled, and shelters for battered women.

That is in the law. I guess the cost of that is somewhere around $4 million annually.

Of course, as I understand it, the groups referred to by the Senator from Montana would still be eligible for surplus agricultural commodities.

The administration indicated in their presentation to the committee that it is difficult to maintain a satisfactory audit. I know the Senator from Montana gave me a copy of information which purports to be documented cases of abuse and waste in the program. It may be that the Inspector General has not followed through. I have not had any contact with that office, as the Senator from Montana has. But in the example cited in the information provided by the Department, the California and Washington Audit Survey of Drug and Alcoholic Rehabilitation Centers conducted in 1979 by the OIG indicates that some centers continued to receive and use food stamps issued for recipients who had left the centers up to 5 months earlier. Some centers were not returning their required one-half month allotment of food stamps to recipients who departed the centers prior to the 26th day of the month.

Also, from a review in Massachusetts in 1979, several treatment centers were authorized by the FNS without having been properly licensed or certified by the appropriate State agency, resulting in issuance of stamps to ineligible individuals.

In Oregon, the State agency was not verifying presence of residents in treatment centers or requiring lists of participants from centers. Results were no means of verification of proper participation in centers during reviews or audits. There were also instances of centers not returning coupons to residents or State agency upon departure of residents.

In Idaho, the State agency was not requiring mandatory lists of center residents, resulting in no means to verify proper participation. Centers were using coupons to pay the centers outstanding debts to a wholesaler. Centers were charging resident food stamp recipients an amount of food stamps each day as a requirement of residence, thus treating the food stamps as income. Centers were continuing to receive food stamps for departed residents.

Mr. President, admittedly, this is not a big item.

Mr. MELCHER. Will the Senator yield at that point?

Mr. DOLE. I am happy to yield.

Mr. MELCHER. Mr. President, I think the Senator has correctly listed the findings of the survey that the Office of the Inspector General made.

Mr. DOLE. There are a couple of others I did not refer to.

Mr. MELCHER. I think there is a total of seven.

Mr. DOLE. Yes. there were a couple of others I did not refer to.

Mr. MELCHER. The total of those seven is the entire list of recommendations and observations that the Inspector General made on the survey of these centers, these nonprofit centers.

While I deplore the lack of correct auditing of those particular instances that have been read, I think it is worth noting that the Inspector General found no reason to make a criminal charge. That is number one.

Second, as stated, the Inspector General has stated that the problems that exist do not constitute criminal problems. I think it speaks for itself in that these nonprofit centers, after a very detailed survey by the Inspector General, came off quite well. I deplore the fact that they were not audited properly, but it is the Inspector General's observation as of today that they do not concur in the belief that the law should be changed.

Mr. DOLE. I thank my colleague from Montana. The other cases not referred to were the case of Fresno, Calif., where the center purchased 100 percent of food with food stamps, while only 37 percent of residents were certified to receive food stamps. The center was receiving $800 a month on behalf of 11 certified food stamp residents and using the $800 to purchase food for 30 residents.

In San Diego in November 1979, the center purchased 85 percent of its food with food stamps, while only one-half the residents were certified to receive food stamps.

Mr. President, I am not certain any indictments will come of this. I am not certain—probably the Senator is right. Nothing has been done. Maybe there have not been any criminal violations, but there are some taxpayers involved. This is the very thing that some of us have been indicating, that, rather than take across-the-board cuts in the program, we ought to look to areas of abuse and areas of waste, if not outright fraud. This is, in my view, an example of how we can stop some of that. I assume, in the process, some truly needy people will be impacted.

This, in a multibillion-dollar program, is not a great deal of money, but it seems to this Senator, as it did in our committee deliberations, that this is one area where we can probably sacrifice, in light of efforts to tighten up the practices and to stop some of the waste and abuse in the program.

Some of us who have our necks out a mile on the food stamp program are a little tender—whether anybody is going to be prosecuted or not—about some of these reports of abuses in the program. It is not in the interest of the program or those who administer the program, in my view. Even if there are only six cases—I do not know how many they checked. Maybe there are only six surveys, but we have asked for more information from the Department. I certainly hope that the amendment is defeated.

We have other amendments coming up, but this one I hope the Senate will reject—not because it is not offered in good faith; not because there are not some who would benefit in a proper way if the amendment were adopted. But based on what appears to be a rather gross abuse of the program, it seems to this Senator we ought to terminate that possibility. We still leave resident centers for disabled children and homes for battered wives and children. We can monitor those programs and see if they are properly administered. If not, I assume that, next year or the next year, those will be eliminated.

Mr. President, I yield the floor.

Mr. MELCHER. Mr. President, the distinguished Senator from Kansas mentioned that taxpayers are involved. I will say they are involved, whether it is food stamps or some of these other programs that come from the Federal Treasury and that the taxpayers pay for. But let us look at this in the broadest aspect. If these nonprofit drug abuse centers and alcoholic treatment centers are in existence, they are being paid for out of somebody's pocket. And we are not talking about Federal drug abuse centers or Federal alcohol treatment centers. We are talking about non-Federal ones that are not paid for with the Federal taxpayer's dollar; they are not paid for out of the Treasury.

Just to clear up that confusion that existed within the committee when we considered this, as if there were some overlapping, that somehow, these nonprofit centers were getting some Federal funds, that is the purpose of my amendment. When you say they even get up to 20 percent, that is the threshold. If they get up to 20 percent, their patients would not be eligible for food stamps. We clear that up in the amendment. So what we are talking about is, is it possible for those patients in those centers to get food stamps if they are otherwise eligible?

That is all we are talking about. So, to the extent that we would be allowing those people to get food stamps, we would be helping these programs.

We are talking about programs that involve costs throughout the country for drug abuse and alcoholic treatment of well over $100 million a year, total cost, perhaps several hundred million dollars, to be paid by other people—taxpayers in a State, taxpayers in a county, taxpayers in a city, or charity. It is good. This is just a small part of assisting in that.

Can we afford to do this? Well, we surely can afford to do it and stay within the Reagan budget. Even with what we added back in here, we are still cutting $600 million out of the food stamp program—$600 million more out of the food stamp program than was asked for by the Reagan budget. So I guess we can afford to do this, if it is the will of the Senate and we think it is in the public interest.

I say to my colleagues that it is in the public interest to assist in alcoholic treatment centers and drug abuse treatment centers.

The reason this provision was put in the law is that a good diet is essential to people trying to get rid of their dependence on alcohol and drugs.

The administration claims that there is a potential for abuse in the program because clients of these agencies come and go, while the rehabilitation centers hold the food stamps. That is what the Inspector General found. The fact is that poor accounting, sloppy accounting, should not be tolerated. But I do not believe it is fair to end the program because we have not kept track well enough of accounting for the food stamps.

The Inspector General's office tells me today that they do not recommend cutting out this help to drug abuse and alcohol centers. They recommend keeping the law as it is. That would be their recommendation, if they were allowed to make it.

They were asked whether they would agree to a policy to recommend taking them out, and they refused to do so, to make that part of their policy.

Back in 1977, Congress saw that some of the centers were cashing in the stamps at banks and using the money to buy equipment, so we changed the law and got rid of that abuse. The law now says that rehabilitation centers may only use the food stamps in grocery stores.

The administration also says that these private, nonprofit centers should get the food they need through other sources of funding.

I have talked about how these centers would be financed. They would be financed either out of State taxes, local taxes, county taxes, city taxes, or charity.

These are not federally financed centers. They are community-based, private, nonprofit centers that must rely for funding on their local areas.

Furthermore, what little indirect aid they may get from Federal welfare programs is minimal and may be cut by other committees of the Senate.

We should take note that some of these programs that would be helped are being cut by other actions, which will have some adverse impact on these centers.

We are talking about only $9 million a year for the first couple of years, and the outyears, I understand, will go up to $12 million. Yet, to the recipients of this food assistance, it very well could mean the difference between a successful recovery from being an alcoholic or from drug abuse or failure. If we turn them to normal, productive lives, I would say that the advantage as taxpayers is one of great value and would far exceed the small minimal amount we are putting in to help in food stamps.

I hope the Senate will approve the amendment.

Mr. President, I have no requests for time, and I am ready for a vote.

I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Mr. President, I yield back all time on this side.

Mr. MELCHER. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Montana (UP No. 144). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI) is necessarily absent.

The PRESIDING OFFICER (Mr. COHEN). Is there any Senator in the Chamber who has not yet voted?

The result was announced—yeas 24, nays 74, as follows:

[Rollcall Vote No. 143 Leg.]

YEAS—24

Baucus	Kennedy	Pell
Cannon	Leahy	Pryor
Chiles	Levin	Randolph
Cranston	Mathias	Riegle
Dodd	Matsunaga	Sarbanes
Hart	Melcher	Tsongas
Huddleston	Metzenbaum	Weicker
Inouye	Moynihan	Williams

NAYS—74

Abdnor	Exon	McClure
Andrews	Ford	Mitchell
Baker	Garn	Murkowski
Bentsen	Glenn	Nickles
Biden	Goldwater	Nunn
Boren	Gorton	Packwood
Boschwitz	Grassley	Percy
Bradley	Hatch	Pressler
Bumpers	Hatfield	Proxmire
Burdick	Hawkins	Quayle
Byrd, Harry F., Jr.	Hayakawa	Roth
	Heflin	Rudman
Byrd, Robert C.	Heinz	Sasser
Chafee	Helms	Schmitt
Cochran	Hollings	Simpson
Cohen	Humphrey	Specter
D'Amato	Jackson	Stafford
Danforth	Jepsen	Stennis
Denton	Johnston	Stevens
Dixon	Kassebaum	Symms
Dole	Kasten	Thurmond
Domenici	Laxalt	Tower
Durenberger	Long	Wallop
Eagleton	Lugar	Warner
East	Mattingly	Zorinsky

NOT VOTING—2

Armstrong	DeConcini

So Mr. MELCHER's amendment (UP No. 144) was rejected.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 145

(Purpose: To strike the block grant provision relating to Puerto Rico)

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. Mr. President, I send to the desk an unprinted amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 145:

On page 74, beginning with line 3, strike out all down through line 8 on page 80.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that my distinguished colleagues, Senator D'AMATO, Senator CRANSTON, Senator WILLIAMS, and Senator BRADLEY be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, this is a simple amendment about an immensely complex and important issue. The Committee on Agriculture, Nutrition, and Forestry has proposed a major change in the food stamp program.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate.

The PRESIDING OFFICER. The Senator from New York will suspend until we have established order.

The Senator from New York.

Mr. MOYNIHAN. I thank the Chair.

The committee proposes in the bill before us a major change in a major social program of the United States which sets one group of American citizens apart from all other American citizens, treats them differently and treats them not as well.

We have chosen, with the scantiest of hearings, no general debate, no genuine consideration of the implications, to say that the American citizens who are residents of Puerto Rico are not entitled to that level of food stamp assistance which all other citizens by right of citizenship are entitled to.

I would remind the Chair and this Chamber that at times of national emergency in this country, we have not exempted the residents of Puerto Rico. When a draft was in place in wartime, they were drafted at the same rate and were killed and wounded in war at a higher rate than any State in the Nation.

We have chosen in this measure to reduce the eligibility of American citizens who are also residents of the Commonwealth of Puerto Rico, from the 70-percent level that the committee chose to set for the country as a whole, a reduction of about 10 percent to 55 percent. Fifty-five percent is what you get if you are a resident of Puerto Rico in this program.

Mr. President, I know the mood of the Senate. I sense the mood of the Senate that this cannot now be changed. I hope and expect it will not be agreed to in conference, though I understand the dynamics that have led to that judgment.

But I cannot conceive what prompted the committee action—and I know it did so, if I may respectfully state, against the advice of the respected chairman of the Finance Committee and the Agriculture Committee's ranking member—to suddenly decide that not only will Puerto Ricans be treated differently as to their entitlements, but that an altogether new, untested, unplanned, and unprepared for regime will be established, whereby a block grant of $825 million is set for the Commonwealth of Puerto Rico on the 1st of April next. And an administrative task which would defy any State of this Union, and similarly and correspondingly the Commonwealth of Puerto Rico, will be imposed on that island. This $825 million level will extend to fiscal year 1985, through 5 fiscal years, such that by the end of this time the people of Puerto Rico would be down to approximately 45 percent of the entitlement of their fellow citizens.

Mr. President, I cannot imagine this body would wish to do this. I appeal to its sense of fairness to reject the measure.

I see my distinguished friend, the minority whip, is on the floor, whose cosponsorship of this amendment gives me confidence in it. I hope he will comment on this.

Mr. CRANSTON. I would like to very much.

Mr. President, I applaud the work of the distinguished Senator from New York, Mr. MOYNIHAN, in defending the interests of the people of Puerto Rico in this matter. He and I have discussed Puerto Rico's economic problems upon many occasions in respect not only to food stamps, but in respect to other aspects of the present budget and tax program.

I want to say that I strongly support the efforts of the Senator from New York and I am glad to join with him as a cosponsor to delete from the committee bill the provisions that would deprive residents of Puerto Rico of equal treatment with respect to the food stamp program.

The committee bill would convert the food stamp program for Puerto Rico into a block grant and to a 25-percent reduction in funding and much deeper cuts than will be imposed upon the rest of the Nation. That is very inequitable, very unfair.

Puerto Rico is the most impoverished community in American society. We show a total disregard for the needs of the impoverished people of Puerto Rico if we take this kind of purely discriminatory action in regard to them.

I strongly believe that we do a great disservice to our national security interests, also, in the Caribbean, Central America, and Latin America when we deal in this manner with Puerto Rico. What will be the reaction in the Caribbean to this act of discrimination against the island in the Caribbean that is closest to us?

The Senator from New York has repeatedly shown great sensitivity to the unique needs of Puerto Rico. I am very pleased to join him in supporting and cosponsoring this amendment to restore an even-handed approach to deal with the food stamp program in Puerto Rico. I strongly urge all Senators to join in supporting this amendment.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I believe I am correct in my recollection that this portion of the bill relating to Puerto Rico was the only rollcall taken in the committee which was unanimous. Now there were other voice votes which were unanimous, but I do not recall another rollcall vote in connection with this bill that was unanimous. If my recollection is correct, it was 16 to 0.

Now, let us examine a little bit of the arithmetic of this matter. Ten percent of the entire food stamp program is devoted to Puerto Rico, and 56.7 percent of Puerto Ricans are on food stamps as of March of this year.

I had some visitors from Puerto Rico in my office not long ago. They said that the growing of food by the Puerto Ricans is on a toboggan slide. They can get food through food stamps, so why bother to grow it?

Now this was a Puerto Rican speaking. And he made clear that the food stamp program, as now operated in Puerto Rico, is destroying incentive and escalating costs.

As for corruption, I do not think that it could be challenged that the level of

mismanagement, waste, and abuse in the food stamp program is greater in Puerto Rico by far than in any of the States. It has been plagued by reports of mismanagement and abuse, cited by both the General Accounting Office and the Department's Office of the Inspector General.

As a result of that, the committee, after due consideration, determined the necessity to place food assistance in Puerto Rico on a block grant footing, to enable creation of a program responsive to that Commonwealth's particular needs and to help control overall food stamp program costs.

As an interim step, the income eligibility standard in Puerto Rico would be lowered effective October 1, 1981, as Senator MOYNIHAN has said. Immediate implementation of a food assistance block grant would be disruptive. The new, lower income eligibility standard would, in effect, be set at 55 percent of the standard applicable to the 48 contiguous States and the District of Columbia. And this would be accomplished by setting the poverty levels for Puerto Rico at 55 percent of those on the mainland.

Block grants would be funded at a level equal to 75 percent of anticipated fiscal year 1982 food stamp program costs in Puerto Rico, or $825 million annually, $413 million of which would be for the last half of fiscal year 1982.

These provisions were a combination of proposals suggested by the distinguished Senator from Kansas (Mr. DOLE) and the distinguished Senator from Arkansas (Mr. PRYOR). I imagine that each of them, or perhaps both of them wish to address themselves to this amendment.

Mr. President, the adjustment of the spending practices of the Federal Government is never easy, but somehow we must get a handle on the rate of spending.

In the case of Puerto Rico, Senator DOLE, Senator PRYOR, and the rest of us took into consideration the per capita income and a lot of other figures. It was not a thoughtless or heartless action that was taken. It was a thoughtful action that was taken.

I hope the amendment of my friend from New York will not be agreed to. I yield to the distinguished Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, let me say to the distinguished Senator from New York, as I understand the amendment of the Senator from New York, it would just eliminate the block grant immediately.

Mr. MOYNIHAN. The Senator is correct.

Mr. DOLE. I think he probably read the sentiment that it would not prevail. My problem is that if, in fact, there should be a block grant, there should be time to institute a block grant. That is where, even though the vote was unanimous, there was some difference between this Senator and the Senator from Arkansas, because the original proposal was that there would be a block grant October 1, 1982. It is my understanding that the Department cannot even implement it that quickly.

But the distinguished chairman is correct. I think there was a feeling on the committee that, in this case, we had to make some reduction.

My view, and I think the best alternative, is to retain Puerto Rico's participation in the food stamp program and make reductions in the eligibility standards in Puerto Rico. That was the approach I originally sponsored. If at all possible, we should reduce that eligibility level in stages.

But if, in fact, and it is a fact, we now have a block grant proposal in the legislation, it would seem to me that it would be advisable to delay implementation until at least the fiscal year 1983, which is October 1, 1980. This would allow Congress to study the proposal.

The administration has recently announced the White House Task Force on Puerto Rico.

We could also consider other details in implementing any block grant mechanism.

We had a long discussion in the Senate Agriculture Committee. The Senator from Arkansas (Mr. PRYOR) has been working long and hard on this particular area and was very persuasive in the committee.

As the Senator from New York knows, there is a special problem in Puerto Rico. Many of the things he cited are exactly correct. On the other hand, operations of the food stamp program in Puerto Rico accounts for about 10 percent of national program costs. About 58 percent of the Puerto Rican population receive food stamp aid while the national average is only 10 percent. No State has a participation rate higher than 21 percent. That is the State of Mississippi. Food stamp pay now represents nearly 10 percent of the Commonwealth's personal income.

So there was a feeling, I must say, that there has been a great deal of abuse of the program in Puerto Rico, a great deal of waste in the program in Puerto Rico. The General Accounting Office has so indicated. There was mismanagement and abuse cited by the Inspector General as well as the General Accounting Office.

The committee felt that one way to get control of the program was to have a block grant program, and to give the State or Commonwealth officials the authority to more closely monitor the program.

That was the approach agreed upon in the committee. The Senator from Kansas may have preferred another approach. Having said that, it would seem to me—and I have not discussed this at all with the Senator from Arkansas who feels very strongly about it—that what we have done by making the date April 1 rather than October 1 is to make it almost impossible for the Department and Puerto Rican officials to properly implement a block grant program.

That was the objection the Senator from Kansas had, but, on the basis of making some improvement, the Senator from North Carolina is correct, we did vote unanimously in our committee.

This block grant is a problem—and it is a problem, frankly, as the Senator from New York indicated—that not too many are concerned with, but he is concerned with it and Senator D'AMATO is concerned with it. The rest of us should be concerned with it, too, because who knows what will happen if, in fact, we have gone too far. In the opinion of this Senator, that has not happened except that we do not allow enough time to implement a block grant if in fact that is what the administration finally proposes to do. As far as this Senator knows, the administration has not sent us a block grant proposal. There has been no discussion of a block grant proposal. It may be that in the final analysis, the administration will propose some other way to reach some of the problems in the Puerto Rican program.

I yield back any remaining time.

Mr. PRYOR. Mr. President——

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I yield to the Senator from Arkansas such time as he may require.

The PRESIDING OFFICER. The Senator from Kansas has no time to yield.

Mr. DOLE. I have been delegated by the distinguished Senator from North Carolina in this case to yield time.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, it is with great reluctance that I oppose the amendment of my friend from New York, Mr. MOYNIHAN. He and his cosponsors are some of the most articulate members of this body, and, certainly, Senator MOYNIHAN is one of the most deeply compassionate men I have ever known.

Yesterday I spoke briefly on the Senate floor urging my colleagues not to make additional cuts in the food stamp program than those recommended by the Senate Committee on Agriculture. I did so because I felt that we had cut deeply enough into this program to achieve the cuts, the efficiencies, the economies, that we were out to achieve. Yet, if we cut further, I felt yesterday, as I do today, that we would be cutting the heart and soul out of the food stamp program.

Today I have to rise again, Mr. President, and urge that we stay with the committee's recommendation for the Puerto Rican food stamp program.

Mr. President, for a moment I would like to discuss the history of the food stamp program in Puerto Rico. Some of this is going to be repetitious, I am certain. The Senator from Kansas, the Senator from North Carolina, and others, have already made some of these points.

To put this program into perspective, it is necessary to look at the original purposes of this program, to look at its goals, and then to compare its purposes with what its actual effect is on life in Puerto Rico.

I am going to try to demonstrate in these few moments, Mr. President, what this program has done economically, what it has done politically, what it has done socially to the Commonwealth of Puerto Rico.

First, I would like to state that in my opinion we are doing Puerto Rico no favor by continuing a food stamp program that now claims over 57 percent of

the Commonwealth's population as recipients.

Second, I think that we should remind ourselves that residents of Puerto Rico currently pay no Federal income tax.

The Senator from New York talked about setting the Puerto Ricans apart from the other citizens of this country. One reason for that, I would say to my distinguished friend——

Mr. MOYNIHAN. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senator's point is well taken. The Senator will suspend until there is order in the Chamber.

Mr. PRYOR. One reason there is a distinction today between that individual living in Puerto Rico and that individual living in this country is that the Puerto Rican citizen pays absolutely no tax to the United States of America. Yet one-tenth, $1 out of every $10, that are spent for the food stamp program, is going to the Commonwealth of Puerto Rico; $1 billion out of a $10 billion program.

Furthermore, not only do Puerto Ricans not pay any Federal income tax, but most corporations in Puerto Rico are totally exempted from taxation. The revenue collected from the corporate income tax is almost nil in Puerto Rico.

The food stamp program was extended to Puerto Rico in 1975. Thus, the program has been in effect only 6 years. Yet, in that 6-year period we see that 10 percent of the personal income of the Commonwealth of Puerto Rico is derived from a new economy that we have created with the food stamp program.

Mr. President, the Reagan administration, early this year, proposed a block grant concept in Puerto Rico in fiscal year 1982. The Agriculture Committee took this concept, discussed it, dissected it, debated it, talked about every conceivable option and alternative that we have, and fashioned this particular proposal. I can say with all candor to my friend from New York that this is the best conceivable alternative that we can fashion under the circumstances that exist today.

Under this proposal, income eligibility would be set at 55 percent of the income eligibility of the continental United States. On April 1, 1982, the Puerto Rican food stamp program would be converted to a block-grant program which would be funded at a level of 75 percent of the anticipated fiscal year 1982 food stamp program costs in Puerto Rico, or 75 percent of $1.1 billion. This amount, $825 million, would be the cap for the Puerto Rican program for the next 4 fiscal years. It should be remembered that we are also putting a cap on the overall food stamp program. So to do it in Puerto Rico is not, I think, unfair or causing any injustice upon the people who live there.

Mr. President, this is not the only program that we have today in Puerto Rico. The Farms Home Administration made more farm home loans in the Commonwealth of Puerto Rico last year than it made in the State of Arkansas, for example.

The Commonwealth of Puerto Rico participates fully in the Small Business Administration programs. The record shows that the people of Puerto Rico participate in a variety of Federal assistance programs.

Finally, Mr. President, on March 16, 1981, one of the most articulate and most sincere witnesses that I have ever had the privilege of hearing testified before the Senate Agriculture Committee. His name is Dr. Richard Weisskoff, an associate professor of economics at Iowa State University in Ames, Iowa.

I shall read some of the testimony he gave before the committee. I know if Senator MOYNIHAN and others had had the opportunity to hear the testimony of Dr. Weisskoff with regard to the effect of the food stamp program on the economy in Puerto Rico, they would join us in attempting to fashion a new and, hopefully, a more constructive approach. I would like to share two or three of the thoughts which Dr. Weisskoff gave the committee on March 16. He said:

1. The extension of the Food Stamp Program to Puerto Rico in 1975 was inappropriate to the needs of the Island.

2. The extension of the Food Stamp Program to Puerto Rico was done hastily. The effect has been economic and moral disaster for Puerto Rico.

3. In the years since 1975, the official unemployment rate in Puerto Rico has risen from 12 percent to nearly 20 percent.

4. In Puerto Rico today, only 36 percent of all adults are working; nearly two-thirds of the adult population are not working either because they find no work—called "unemployed" in the statistics—or have stopped seeking work—called "not in the labor force" in the official statistics.

This, Mr. President, is since the inception of the program, only 6 years ago.

Dr. Weisskoff continues:

5. When food stamps were introduced into Puerto Rico, prices of food rose 18 percent, according to the Government's own statistics.

6. The U.S. Census of Agriculture for Puerto Rico indicates that between 1974 and 1978, land in farms fell 14 percent and cultivated cropland fell by 20 percent. The banana crop fell in physical terms by 78 percent, oranges by 57 percent, plantains by 54 percent, root crops—viandas—by an average of 27 percent and coffee by 21 percent.

In 1950, 82 percent of Puerto Rico's land was in farms and 40 percent of its work force labored in agriculture. By 1978, only 48 percent of its land remained in farms and only 5 percent of its labor force remained in agriculture.

Mr. President, let me say we have done our best in the Agriculture Committee to bring a constructive, meaningful approach to the food stamp chaos in Puerto Rico. Again, I repeat that I do not think we are doing Puerto Rico any favor by continuing the present program. I sincerely hope the Senate will not support the Moynihan amendment but support the committee bill.

Mr. MOYNIHAN. Mr. President, I yield 10 minutes to my colleague from New York.

Mr. D'AMATO. Mr. President, this amendment is aimed at, I believe, bringing about a sense of balance and fair play in a situation which, if allowed to continue as the bill proposes, will bring about economic havoc, social unrest, and will be perceived by many throughout the world, in the Spanish-speaking countries in particular—in Central America—as a deliberate slap in the face of Spanish-speaking people and the people of the island of Puerto Rico.

The administration has not proposed a block grant formula for any other place in the country or any other of its possessions. The administration has not asked for this bill. Indeed, the administration in this block grant program has called for an April 1 implementation date which is totally impossible. The government of Puerto Rico has indicated it will be impossible to administer.

What are we saying to people? Are we saying that Puerto Ricans have one law to be governed by and the other possessions and citizens of this Nation are to be governed by another?

What are we saying about unemployment? I heard the distinguished Senator from Arkansas raise the point about unemployment having gone from 12 to 20 percent. Is he suggesting that there is a correlation between food stamps and increasing unemployment? Or is there a correlation in the necessity for food stamps for those who are unemployed? I suggest that that would be more applicable.

What are we saying about the inoperability of the program? Our administration has taken hold in a bold, new attempt to bring fiscal restraint and fiscal responsibility, and the people expect that. Let us see that the program is administered carefully and prudently and that the Department of Agriculture does its job.

To obviate our responsibilities by calling for a block grant program that will be impossible to administer and to set up by April 1, I believe, is arbitrary and shortsighted, and there will be consequences that will go far beyond any minuscule savings that may be advanced as a cause for this kind of implementation.

I could not help be moved by the persuasiveness of my colleague from Kansas in suggesting that a possible implementation date of at least October be a fallback position, one in which at least we give the Island of Puerto Rico and its administrators the opportunity to be able to see to it that that block grant program can be administered fairly and effectively, notwithstanding the fact that it still will be interpreted as a move by this administration to do away with its responsibilities and its sensitivity to the unique position of the people of Puerto Rico.

I ask my distinguished colleague from North Carolina to reconsider his position in opposition to this amendment, particularly in light of the fact that it will be difficult to justify the implementation of a program that has everything going against it and little to speak for it.

Where is the precedent that we have seen in terms of a block grant program for food stamps in the United States? Is there an experimental program we can point to, as the administration calls for? What chance of success does this program have, given the date of implementation, April 1? How will it be perceived in terms of our Caribbean neighbors? We are attempting to turn about and revitalize a foreign policy that has been less than adequate.

What do we say to the truly needy and to the truly indigent of the Island of Puerto Rico? They are the victims of a new experimentation and there are those who have availed themselves of farmers' home loans to the extent they have? Should that work as a detriment to the poor and the truly needy?

So I suggest, No. 1, that my colleague from New York is right in saying that equal treatment is what the people of Puerto Rico are entitled to, and equal treatment is not a block grant formula that is designed solely for Puerto Rico and its people.

Second, at the very least, I hope we will be able to come up with a date that will make it possible for this program to be carried out logically, to be given a chance.

I say to my distinguished colleague from Arkansas that if he believes that the block grant method is one that can make savings, one that can see better that the local administration will distribute those funds to the truly needy, then let us give that administration the opportunity to draw up plans, to design a program and implement a program which will truly be effective, and let us not rely upon a politically expedient date that has absolutely no sense to it by saying April 1—a program that cannot be implemented and has no chance of success.

With this block grant program, if it is implemented April 1, this administration, this House, and Congress will do a great disservice not only to the Island of Puerto Rico and its people but also to the perception that people have, countless millions of this Nation, and its indication of its responsibility in so doing.

So I support wholeheartedly what my colleague from New York has said, and I ask my colleagues to rethink their position. This is not a position of wastefulness that my colleague from New York has advanced. It is a well-reasoned position. It is a well-balanced position. It is a well-justified position. It is a humane position.

Mr. MOYNIHAN. Mr. President, I thank my distinguished colleague from New York for what he has said. He is right, and this Chamber is going to be wrong if it does not listen and respond.

Mr. President, over how many courthouses in this land is there the inscription: "Equal Justice Under Law." Is that not an attribute of citizenship in this Republic, or are we changing it?

The Senator from Arkansas, my distinguished friend, has offered us the view that there is a Professor Weiskopf who thinks that food stamps have not been good for Puerto Rican society. The junior Senator from California and I can only welcome the invocation of a Ph. D. on this floor. It is not every day we hear it. But one would like to know more of this gentleman's views. I know some of those views, and I can assure my colleagues that his proposition about what would be good for Puerto Rico would not meet with much approval if it were applied to my State or any of the other States of this Nation.

That is the proposition—saying that the Puerto Ricans, somehow, do not tax themselves.

I offer it as my firm understanding that, according to the Mushkin tax model of tax effort, with which Alice Rivlin was associated in developing in 1963, Puerto Rico has the highest tax effort of any State government in the country, save New York and Massachusetts.

As to the proposition that there is fraud, waste, and abuse—that never failing source of anxiety in this Chamber—if it is the Department of Agriculture that is responsible, I have an understanding that they have an error rate of 9.2 percent. About average for the country, lower, I understand—I do not assert this and will amend the record if I am wrong—lower than the State of North Carolina.

Mr. President, I will read into the RECORD, because it should be recalled, the Democratic platform plank on Puerto Rico, of last year:

> We are also committed to respect the cultural heritage of the people of Puerto Rico and to the elimination of discriminatory or unfair treatment of Puerto Ricans as American citizens under federal programs.

The Republican platform says essentially the same thing, the Republican platform being even more open to the prospects of statehood for the Commonwealth.

I am not here to accuse anyone, but at a time when the President has said that the Caribbean has to be an area of renewed and powerful interest for our country, why should we choose this moment to take this act and do what the Government in Puerto Rico says it cannot administratively succeed in doing.

Mr. President, I am aware that there are not the votes in this Chamber to support even the modest proposal that I and my colleagues have made, and I am not especially happy that this moment should have come, but in view of the most urgent request put to me by Governor Romero Barcelo, who said he could not meet this deadline, I ask to withdraw my amendment.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment.

UP AMENDMENT NO. 146

(Purpose: To delay effective date of block grant for Puerto Rico from April 1, 1982, to October 1, 1982)

Mr. MOYNIHAN. I send another amendment to the desk, an unprinted amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

> The Senator from New York (Mr. MOYNIHAN) proposes an unprinted amendment numbered 146:
>
> On page 74, line 4, strike out "April" and insert in lieu thereof "October".
>
> On page 74, line 14, strike out "April" and insert in lieu thereof "October".

Mr. MOYNIHAN. Mr. President, I ask unanimous consent presumptively, as I cannot be sure of this, that my original cosponsors be joined with me and that they be given the option if they do not wish to do so to withdraw their names later.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, this does one simple thing. It gives the Government of Puerto Rico at least time enough to do what we should not be ordering in the first instance for them to do anyway. Do not deny a judgment of a freely elected government on that island that it cannot do this arbitrary thing in the time allowed. This would simply give the full fiscal year ahead to plan what may have to be done if the House of Representatives should agree and in that event will be done. It will be done with good cheer and loyalty by the Government of Puerto Rico. But in the name of all that is democratic and equitable in our society do not force them to do what they say they cannot do in the time given. This at least allows a major change to take place within a 17-month period that surely it will require.

Mr. President, I yield the floor for the moment withholding such time as I have remaining.

The PRESIDING OFFICER. Who yields time?

Mr. BOREN. Mr. President, I wonder if whoever is managing time in opposition will yield to me 5 minutes.

Mr. DOLE. I yield on behalf of the Senator from North Carolina 4 minutes.

Mr. BOREN. I thank my colleague from Kansas.

Mr. President, as I understand the present amendment it will move the date from April 1 to October 1 and, therefore, it would also reduce the savings involved because the effective date of the reductions would be moved back 6 months. It would mean adding about $15 million back into the Puerto Rican food stamp program.

I have listened with respect to my colleagues from New York. I am sure they are absolutely sincere in the proposal that they are making, but I have also listened with disbelief at some of the arguments that have been made here in the Chamber this afternoon, absolute disbelief. Some of the greatest understatements in the history of American politics have been made here this afternoon, that there has been some waste, that there has been some abuse of the food stamp program in Puerto Rico. Some? There has not been some waste, there has not been some abuse. What we are dealing with here is an absolute national disgrace.

If the people of this country, the total population of this country could be informed about what is going on in terms of the food stamp program of Puerto Rico, they would absolutely rise up and march on this Capitol building to demand that something be done about it not on April 1 but on yesterday.

We have heard about equality of treatment. Let us talk about equality of treatment. Fifty-seven percent of the people of Puerto Rico are on food stamps, 57 percent. Let us not just cite

that statistic calmly. Let us think about it. That is almost 60 percent of the entire population. Not one State in this country can come close to even having half of that proportion of its citizens on food stamps, and we talk about equal treatment.

One-tenth of the entire food stamp budget of the United States, almost $1 billion, out of approximately a $10 billion program is going to Puerto Rico. And we have heard cries about equal treatment. We have cut back the food stamp benefits in this country in an effort to bring this budget into balance and to bring spending under control. We have asked the people of this country to make sacrifices. We have tried to end abuses and then we hear cries for equal treatment to Puerto Rico which gets a tenth of all the food stamp money in this country. We have heard these cuts described as Draconian—Draconian less than a 20-percent cut. Now listen to this. We are talking about only sending Puerto Rico a little over $800 million this year, $800 million, four or five times the proportion of any other State in this country. And that is a Draconian cut?

I think Mr. Webster would absolutely roll over in his grave to hear the term "Draconian" misused in that way.

We have heard the term disruption. We are liable to disrupt what is going on in Puerto Rico, disrupt 57 percent of the people being on food stamps, disrupt what it has done to the work ethic in Puerto Rico. If that is disruption, Mr. President, may we have disruption all around this country, may we begin to disrupt the kind of abuse of social programs that has gone on all too long in this country.

I have opposed many of the additional cuts that have been offered to the food stamp program. I myself offered an amendment today to make sure that we exempted the elderly and the disabled from food stamp cuts. Many of the things that are going on in this country today in terms of reaction against social programs are going on because programs that were valuable in the beginning, valuable in their purposes and set out to meet real human needs, have been abused to the point that many in our population are even saying we want to wipe them all away, even those that are doing good, even those that are meeting real human needs. They want to wipe them all away because they are so fed up with the kinds of excesses that we see exemplified in the food stamp program in Puerto Rico.

I think we are doing a service when we make these kinds of changes which the committee has recommended. We are doing a service to the preservation of the right kinds of social programs in this country when we reform the abuse, the waste, the mismanagement, and the overextension of social programs that are eating away at the very ethical, moral, and economic fiber of this country.

So I think the mandate that has been given to this Congress is to make these kinds of changes. They are not Draconian. Indeed they do not yet go far enough. We are told they do not have time to adjust. April 1 is too far off—11 months, 10 months, from this date. Certainly in 10 months we should be able to plan. We have been asked in this Congress to try to turn the whole thrust of the Federal budget around within a very few months by this administration.

We can take action on monumental changes in the budget implemented in the budget resolution on a tax cut package of a magnitude of the one we are now considering in 3 or 4 or 5 months. Surely in 10 months, the Government of Puerto Rico can come up with some kind of proposals to have a block grant program to get this thing under control.

We have not, I submit, Mr. President, had too many expressions of concern in this Chamber about what is fraud and abuse. We have had too little, and it is time that we act upon them.

The PRESIDING OFFICER (Mr. HUMPHREY). The time of the Senator has expired.

Who yields time?

Mr. MOYNIHAN. Mr. President, it would be possible to say things at this point in this Chamber that would be too strong for the subject at hand, and I do not propose to do that. But I hope I will be thought to be restrained in my remarks when I say that it is inconceivable to me that this legislation would be even under consideration if the Commonwealth of Puerto Rico were represented by two Senators in this body. We would not dream of doing this to a State of the Union and yet we do it to fellow citizens with whom we are united in a commonwealth relationship. I regret that this is so.

Mr. President, I am happy to yield such time as he may desire to my distinguished friend and colleage from New York.

Mr. D'AMATO. Mr. President, I have heard about waste, fraud, abuse, our efforts at attempting to deal with it, move into a block grant program as an effort to give local responsibility to local government, return it to local government. But to date I have not seen any of these block grant programs implemented or dates called for right here in the United States in our States.

I am for eliminating waste, abuse, abuse of the food stamp program. I campaigned against those kinds of things.

If this is such a wonderful program, though, why do we not have a block grant food stamp program for all of our States? Why just Puerto Rico? Why should we not have a block grant program for all 50 States and all of the Commonwealths so that the local Governors can see to it, and the State legislatures can see to it, that the program is administered fairly? Why do we single out Puerto Rico?

The nuances of this move are not going to be interpreted in a correct manner because I believe my colleagues who say we are spending too much, it is disproportionate, I suggest to you that we are going to take a rather naive view of world politics in terms of how this will be perceived internationally and its relationships, and the repercussions that will stem from this are going to be far beyond what some of my colleagues can possibly imagine. That is rather obvious.

Let me suggest that it is totally unreasonable to oppose a modest date for implementation. We just take these nice sounding words "block grant," and we know when we talk about other programs, the give and take, the tremendous concerns that our small cities have in terms of wondering what the legislature and what the Governor of that particular State are going to do with the block grant formulas in terms of what we talk about in community development, in terms of sewage aid and construction aid, in terms of all the programs this administration talks about vis-a-vis block grants.

Can we reasonably expect the Commonwealth of Puerto Rico to be able to implement a program of such magnitude within the next 10 months, design a block grant program for implementation, when we do not even know what we are talking about when we use the word "block grant?"

I would suggest as an aside we have not seen anything yet when we begin to get the flak and the fallout from those counties and from the State legislatures and cities that find there is a Governor who uses the so-called block grant program as he deems fit, but that is for another day and another time.

I do not believe anyone can really conceivably think that this program can be set up in a meaningful way, be administered correctly with the proper safeguards by April 1.

I would implore my colleagues that it is not enough to talk about doing away with waste and abuse. If we want to be fair to those principles we speak to, then let us make sure those local governments have the opportunity to set up a program, and 6 additional months are not something that will create havoc, but will make possible the implementation of a program that we can take some pride in and say that here is an example of what local government can do when given the proper time and framework, when it is said that the Congress of the United States is serious about it, that we want the implementation of a program, that "we give it to you, but we give it to you with a reasonable amount of time to move forward."

We have nothing to gain by opposing what I consider to be a modest amendment seeking additional time for the Commonwealth to implement this program, nothing to gain by opposing that. We have all to lose if we seek this date of April 1, it being unreasonable, by being classified as being uncaring, by setting back our foreign policy, and in terms of fiscal conservatism not saving a whit of what we stand to lose.

Mr. MOYNIHAN. Mr. President, I ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. Mr. President, if I may take 30 seconds to conclude, this is a reasonable request with respect to the administrative needs of the Commonwealth of Puerto Rico as communicated to us, and it is a minimum request.

Mr. President, if it becomes the judgment of the U.S. Senate that the American Government is not capable of administering its programs, then we have made a large decision about our future.

Lastly, Mr. President, I would like to call attention to the fact that it was a Republican President who set as a goal the elimination of hunger in the United States, a Republican President who did that, and I must say if on this side of the aisle we commence to depict such efforts as a national disgrace then I shall not be surprised if we are a minority for a good many more long years than the present Congress.

If it is a national disgrace to try to feed the hungry, let that be a judgment not of my party, not in my time in it, and I would like to honor the Republican commitment—and that of the Senator from Kansas who has indefatigably kept at it over the 1970's. I wonder what has become of our concern for one another.

Mr. President, it is my understanding that the distinguished managers of the legislation might wish to, as we say, stack this vote for a time certain.

Mr. LEAHY. I have been informed that there is objection on the side of the majority, not the distinguished chairman of the committee, but apparently an objection has been posed, and it would be impossible, so I am ready to vote.

Mr. MOYNIHAN. Mr. President, if we are willing to yield back the remainder of the time, I am willing to yield back the remainder of my time. I yield back the remainder of my time.

The PRESIDING OFFICER. Does the Senator from North Carolina yield back the remainder of his time?

Mr. HELMS. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG) and the Senator from Tennessee (Mr. BAKER) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Michigan (Mr. LEVIN), and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

I further announce that if present and voting, the Senator from California (Mr. CRANSTON), would vote "yea."

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 36, nays 56, as follows:

[Rollcall Vote No. 144 Leg.]

YEAS—36

Baucus	Danforth	Heinz
Bentsen	Dole	Huddleston
Biden	Eagleton	Inouye
Bradley	Glenn	Jackson
Chafee	Gorton	Kennedy
Cochran	Hart	Leahy
Cohen	Hatch	Long
D'Amato	Hatfield	Mathias
Matsunaga	Pell	Stevens
Metzenbaum	Sarbanes	Tsongas
Mitchell	Sasser	Warner
Moynihan	Specter	Weicker

NAYS—56

Abdnor	Goldwater	Packwood
Andrews	Grassley	Percy
Boren	Hawkins	Pressler
Boschwitz	Hayakawa	Proxmire
Bumpers	Heflin	Pryor
Burdick	Helms	Quayle
Byrd, Harry F., Jr.	Hollings	Randolph
	Humphrey	Roth
Byrd, Robert C.	Jepsen	Rudman
Cannon	Kassebaum	Schmitt
Chiles	Kasten	Simpson
Denton	Laxalt	Stafford
Dixon	Lugar	Stennis
Domenici	Mattingly	Symms
Durenberger	McClure	Thurmond
East	Melcher	Tower
Exon	Murkowski	Wallop
Ford	Nickles	Williams
Garn	Nunn	Zorinsky

NOT VOTING—8

Armstrong	DeConcini	Levin
Baker	Dodd	Riegle
Cranston	Johnston	

So Mr. MOYNIHAN's amendment (UP No. 146) was rejected.

UP AMENDMENT NO. 147

Mr. LEAHY. Mr. President, I send an amendment to the desk on behalf of myself and Senator DOLE and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Vermont (Mr. LEAHY), for himself and Mr. DOLE, proposes an unprinted amendment numbered 147.

Mr. LEAHY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 70, strike out line 8 and insert in lieu thereof the following: "September 30, 1985, with the authorization ceiling for each such fiscal year to be adjusted upward or downward on each succeeding April 1 by (A) $150 million for each full percentage point or fraction thereof that the average Consumer Price Index for food at home for all urban consumers of the Bureau of Labor Statistics as projected for that fiscal year by the Office of Management and Budget as of April 1 of such fiscal year exceeds or is less, respectively, than such index for such fiscal year as projected as of June 1, 1981 by the Office of Management and Budget and (B) $650 million for each full percentage point or fraction thereof that the unemployment rate as projected for that fiscal year by the Office of Management and Budget as of April 1 of such fiscal year exceeds or is less, respectively, than the unemployment rate for such fiscal year as projected as of June 1, 1981 by the Office of Management and Budget.".

Mr. STEVENS. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. STEVENS. Mr. President, will the Senator yield for 1 moment?

Mr. LEAHY. Certainly, without losing my right to the floor.

Mr. STEVENS. Mr. President, it is my understanding the order provides for the vote on final passage to occur not later than 7 p.m. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. It is my understanding that the Senator's amendment may take all of the time prior to that time, until 7 o'clock, if he wishes. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Does the Senator intend to take that amount of time?

Mr. LEAHY. I assure the distinguished deputy majority leader if I could have about 5 minutes or so I think I could explain the whole thing and be ready to go.

I would ask if I might ask for the yeas and nays at this point.

Mr. STEVENS. That was to be my query. Does the Senator wish the yeas and nays?

Mr. LEAHY. Yes. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Then whatever time the Senator takes and after the rollcall occurs, after that there will be no more debate permitted under the agreement; is that correct?

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. But it is possible another Senator might offer another amendment.

The PRESIDING OFFICER. That is correct.

Mr. STEVENS. Might I ask the Chair to inquire if there are other Senators who intend to offer an amendment following the amendment which is pending?

Mr. MELCHER. If the whip will yield, the answer to that is yes.

Mr. STEVENS. I thank the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, if I might have order in the Chamber——

The PRESIDING OFFICER. The Senate will be in order.

Mr. LEAHY. Mr. President, so everybody will understand, the amendment offered by Senator DOLE and myself does not eliminate the cap. It does not increase the caps contained in S. 1007. All that it does is to provide for the caps to be adjusted up or down on the basis of the food price inflation and unemployment.

Each Senator has a copy of an editorial from this morning's Post on their desk. One of the things it discusses is the up the hill and down the hill question of the caps every year that we go through, and that we sort of play games, depending upon whether you are coming from the left or the right on it. What we have tried to do is put a realistic and honest cap formula—not a liberal one, not a conservative one, not a Republican one, not a Democratic one, but a realistic one.

The caps in S. 1007 are based on the administration's economic assumptions for the next 4 years.

Mr. President, might I have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. LEAHY. Having been here since 10 o'clock this morning, no one is more

eager than I am to get out of here. Maybe we can speed things up a little bit.

It is difficult to predict food prices (which are influenced by factors such as weather, crop yields, et cetera) exactly for 4 years in advance. Similarly, unemployment is also difficult to predict exactly, and can be affected by such factors as OPEC oil prices, foreign currency fluctuations, et cetera. Since food stamp costs are very sensitive to even small changes in food prices and unemployment, it is important that these factors be taken into account in establishing food stamp authorization ceilings.

The Congressional Budget Office and the administration use a formula to calculate the impacts of food prices on the food stamp program. Each 1-percent increase in food prices adds $150 million in annual food stamp costs. Each 1 percent in unemployment (as would occur if the unemployment rate rose from 7 percent to 8 percent) adds $650 million in annual costs.

This amendment provides for the cap to go down, below the levels in S. 1007, if food prices and unemployment are lower in any of the next 4 fiscal years than OMB is now estimating. The cap would go up, if food prices and unemployment are higher than is currently estimated.

This does not in any way change the concept of the cap. There would continue to be a cap each year which would limit program expenditures. And if the economy performs as the administration expects, no adjustment in the cap will occur.

This does assure, however, that if food costs more than currently predicted, our response will not be to make 20 million poor Americans, including the elderly and disabled, eat less. Under S. 1007, as it now stands, this is what will occur if food prices rise above the predicted levels to any significant degree.

Similarly, it assures that if more Americans are out of work than are now expected, our response is not to make the poor, the elderly, and the disabled eat less.

If food stamp costs rise for any other reason, there would be no upward adjustment of the cap under this amendment. It makes modifications only in response to changes in food prices and unemployment.

Mr. President, this amendment does not represent indexing of the cap. In indexing, if prices rise 4 percent, wages or benefits also go up 4 percent. Under the provision, if food prices rise 4 percent, the cap will be lowered, because 4 percent is less than the food price inflation currently assumed by the administration.

And finally, simply because the cap could go up under this amendment, it does not automatically mean more money will be spent. The food stamp program is not an entitlement. Congress would still exercise review through the budget and appropriations processes.

Mr. President, this amendment is a necessity. As I pointed out in my opening statement, the "caps" in this bill are inadequate based on information already available. There is no margin for error in these caps whatsoever. The 2½-percent margin for error that the administration claims is in these caps, really is not there at all for the following reasons:

First, the estimates upon which these caps are based are obsolete. The administration recently revised its fiscal year 1981 estimate of costs upward by over $500 million based on newly available data on program participation and benefit levels since January 1, 1981. This revised estimate for fiscal year 1981 was utilized by the committee to set the "cap" for fiscal year 1981. However, when the administration revised its fiscal year 1981 estimate, it did not adjust estimates for fiscal year 1982–85. The result is that the committee's "caps" for fiscal year 1982–85 are inconsistent with its "cap" for fiscal year 1981. Based on cost data already available, the "caps" for fiscal year 1982–85 should be raised at least several hundred million dollars in each year. I expect that these adjustments will be reflected in the reestimates which ordinarily are sent to Congress in July.

Second, the administration's cost estimates make no explicit allowance for offsetting food stamp costs due to expected cuts in other income security programs. CBO estimates that the cuts proposed by the President (and likely to be enacted by Congress) in programs like AFDC, unemployment insurance, CETA, and others would result in new food stamp costs far in excess of the 2.5-percent margin for error proposed by the administration.

Third, the administration estimates are based upon the President's economic assumptions, which, by anyone's definition, are optimistic. The food stamp program is so sensitive to economic conditions that even if the President's economic assumptions are only slightly off, food stamp costs could be significantly higher than the administration predicts. If, for instance, CBO's more moderate economic assumptions are utilized, food stamp costs would be about $600 million more than the administration predicts in fiscal year 1982 and over $1 billion higher in fiscal year 1983. The "caps" included in S. 1007 leave no flexibility whatsoever to deal with the unpredictability of the economy.

Proponents of the "caps" in S. 1007 also argue that CBO's estimates of program costs in fiscal year 1982 reinforce the notion that the caps are adequate. This is not true. On submitting its estimate of bill costs, CBO was very careful to qualify its estimate by stating the following:

> Estimates of the cost of this bill shown above, which were made using economic assumptions adopted by the conference on the first concurrent resolution on the budget, are below the authorization ceilings specified in the bill. If the rate of unemployment and the rate of inflation do not decline as rapidly as reflected in the economic assumptions, the authorization ceilings may become insufficient to allow full funding and obligations would be limited to those levels specified in the bill. In addition, this estimate assumes current law for related income security programs. Enactment of the administration's proposals to reduce spending in programs that affect incomes of current or potential food stamp program participants may cause authorization ceilings to become binding.

CBO goes on to say:

> Program participation in the early months of calendar year 1981 has run somewhat higher than projected by CBO. Furthermore, increases in benefit payments occurring after the January 1981 cost-of-living adjustments exceeded increases projected by CBO. Based on this currently available information, an upward reestimate of future food stamp needs is likely when CBO undertakes its next comprehensive review of spending estimates.

Thus, what CBO is saying is that the caps in this bill really are not adequate. They are based on the President's economic assumptions and if the President is wrong about unemployment and inflation, they will be insufficient.

The caps in this bill assume current law for all related income security programs. If the Congress enacts (and it surely will) all of the cuts in AFDC, unemployment insurance, CETA, and other programs now pending, this factor alone would cause food stamps costs to rise above the caps in this bill.

And finally, CBO says that in just a few weeks they will be providing a new, official estimate of costs for fiscal years 1982 through 1985, which is higher than their current official estimate. Basically, they are telling us that they will be updating their estimates for those years to make them consistent with their recently updated fiscal year 1981 estimate.

Given all of these factors, I believe it is imperative that we enact this amendment so that, at a minimum, food stamp spending caps will be flexible enough to respond to economic conditions. Just this morning, the Washington Post editorialized about the folly of Congress setting unrealistic food stamp caps year after year. We must simply put an end to this year after year wrangling over the food stamp cap.

Mr. President, I would, however, like to state for the record that this amendment would not guarantee that the future food stamp spending caps will be adequate. As I have pointed out, there are problems with the caps in this bill which are unrelated to projections of unemployment and inflation. This amendment would only cure the problems with these caps which are due to inaccurate economic forecasting.

However, there is a good chance that this amendment will allow sufficient caps to be set. More importantly, it would establish the principle that ceilings on food stamp expenditures simply cannot and should not be set without looking at overall economic conditions.

I think that this amendment would make clear that the Secretary cannot institute across-the-board benefit reductions under section 18b of the Food Stamp Act unless, and until, he has taken economic conditions into account. No benefit reduction could be ordered before he has made the April 1 determination called for in this amendment. If on April 1, he finds that the new caps he establishes would be insufficient to support full benefits for the remainder of

the year, he could then move to reduce benefits.

Mr. President, this amendment does not mean that there will be a penny more in food stamp spending than under the bill as it currently stands. If the President's economic assumptions are correct, the caps would not be adjusted one bit.

Furthermore, even if the caps are adjusted, it does not mean that Congress must spend more money on food stamps. The food stamp program is no longer an entitlement. If the spending cap is lifted, Congress would still have to act to provide additional appropriations. If Congress believes in any year that additional expenditures are not warranted, it would be under no obligation to appropriate additional funds.

I urge my colleagues to support this very reasonable amendment.

Mr. HELMS. Mr. President.

The PRESIDING OFFICER. Has the Senator from Vermont relinquished the floor?

Mr. LEAHY. I yield to the distinguished Senator from Kansas, who is a cosponsor.

Mr. DOLE. Mr. President, I support the amendment introduced by the distinguished ranking minority member of the Nutrition Subcommittee, which will provide for a flexible spending cap for the food stamp program. This amendment entails no change in the spending cap figures now included in the food stamp bill. It will not eliminate the cap or raise the spending ceilings outlined in this legislation. However, it would allow those figures to be adjusted for inflation and unemployment in the years ahead.

I am confident, of course, that the administrator's economic assumptions on which the spending caps are based are accurate, and that readjustment of the caps will not be necessary. But even a brief look at the legislative history of the food stamp program gives cause for concern.

Under the economic assumptions of the Department of Agriculture in 1977, the cost of the food stamp program for fiscal year 1981, was projected to be $7.4 billion, but economic conditions that were worse than expected added an additional $3.9 billion in costs, bringing the 1981 budget figure to more than $11 billion. As we in Congress are acutely aware, the food stamp program is extremely sensitive to fluctuating conditions in the economy.

Mr. President, CBO has estimated that every 1-percent increase in food prices costs the food stamp program an additional $150 million, while every 1-percent rise in unemployment means an additional $650 million in program expenditures. This year's coal strike alone would have created another $90 million in food stamp outlays had it lasted through September.

We are all familiar with the variations on a theme that can occur on a daily basis in developing budget estimates. Given this unpredictable scenario, I think it would be acting responsibly to build in a little more flexibility than we currently have.

Had the previous caps not been raised and supplemental appropriations not been requested, such unpredictable economic factors could have meant the reduction or even the elimination of benefits for numerous food stamp recipients across-the-board. The introduction of a flexible spending cap would not only help us to avoid this possibility should the economy not perform as well as expected, but would allow us to adjust our expenditures downward if the administration's expectations are fulfilled.

Mr. President, the food stamp program has been the target of much criticism this year for waste and abuse and for its increasing cost. But it is important to remember that the program has also been an effective step in providing much-needed nutritional supplements to the Nation's poor. Today, we are offering this amendment to the food stamp bill to help insure that the spending caps approved by the Senate Agriculture Committee do not undermine that effectiveness in the years ahead.

Mr. President, I think the Senator from Vermont has explained it very well. It works both ways. If this approach is right, we will have no problem—it will even potentially reduce the cost of the program.

If, in fact, inflation increases and unemployment increases, the cost of food increases for poor people as well as for those of us in this Chamber. If, in fact, unemployment increases, there will be more people eligible for food stamps. This is a flexible cap that will work both ways in order to accommodate the economy.

Mr. SYMMS. Will the Senator yield?

Mr. HELMS. I yield to the Senator from Idaho.

Mr. SYMMS. Mr. President, I thank the Senator from North Carolina for yielding.

What this amendment does, so we can get it out so we all understand it, is make the food stamp program a full-blown entitlement program so we just pump the money in, because it really means there is no cap.

Under the present law, I point out to the Members of this body, the Lugar amendment that was offered in the 1978 authorization act, which is the same amendment that I offered in the other body, states that if the administration comes up against the cap, then they are supposed to start spending the food stamps on the neediest people and start restricting the outflow to those in the high end of the poor, if you will. I think that, if this amendment is passed, what we are doing is just opening up the door and making it a full-blown entitlement program. There is projection for the neediest, for the blind, for the incapacitated, the handicapped, for those people who are at the low end of it presently. If this amendment is in there, we might as well face reality: What we are doing is turning the whole program loose and saying the administration can just spend everything they have and if we run out of money, they can come back and we will put more in.

Is that not correct, I ask the Senator from North Carolina?

Mr. HELMS. It is even worse than that, Mr. President. If the Senate wants to make an entitlement program out of this, the pending amendment is the way to go. If we want to say, "Katie bar the door, let's go, have no restraints, no restrictions," this is the way to go.

The point, Mr. President, is that if this Congress acts prudently on the food stamp program, or even moderately prudently, there is a cushion in this bill ranging from $400 to $800 million below the caps that are already contemplated. So there is not any need for this amendment in the first place. In the second place, we are moving toward an entitlement.

I ask the distinguished chairman of the Committee on the Budget (Mr. DOMENICI) to comment on this amendment and see how he feels about it.

Mr. DOMENICI. Mr. President, I thank the Senator for yielding to me. I want to say to my good friend from Kansas that I think he knows that today, I have not said much about the budget aspects, because this bill and the reconciliation that will follow it are well within the budget. I commend the committee for that.

Second, I say to him, I had sort of gotten the feeling, based upon his actions here today, that he, too, was for the committee. I followed his lead and I voted against amendments that changed it either up or down, based upon his lead. I am sorry that, on this one, he is on the other side, because this is a substantial change. I wish I could follow him again.

Mr. President, I think this time we ought to follow the committee. Let me indicate clearly that if this were in reconciliation, it would obviously breach the budget. On the other hand, it is not. This is an authorization bill.

Second point: We are passing a multiyear bill based upon good information. We have excellent advice as to what this is going to cost in the outyears. We are trying to follow the administration's lead and, according to them and CBO, there is already an excellent cushion between $200 million and $400 million for extra caseload and other expenses of this program. If we want to control the budget, the one thing that is absolutely making it impossible is indexed programs and uncontrolled programs. We are now at 60 percent of the budget that is either entitlements or uncontrollables in the legal sense.

That is what we are doing here, Mr. President. We are just compounding that problem. We are building in the needs of this program based upon the best estimates that we have, based upon economic assumptions, how many people are going to be unemployed, how many people need it. That ought to be Congress prerogative. With a program such as this, we certainly ought not to add the Consumer Price Index to it.

I would favor adding more money to the bill, Mr. President, rather than this. If we think our estimates are wrong, put some more in. But do not turn it closer and closer to an entitlement program, build in indexation, throw away the best

estimates, and then wonder why the budget gets out of control, why we come down here from month to month, wondering where it is going to end up.

Mr. President, this is the kind of innocuous amendment that we could repeat history on. Somebody says it will only cost $100 million and we look 6 years later and it is $4 billion. They are rampant in the budget. I urge the Senate to let Congress control the cap, let Congress do as it has done before: If the cap needs to be broken, let Congress vote to break it, whether it is on CPI, needs of the program, or whatever it is. But do not add another automatic to the already burdensome automatics in the budget.

Mr. STEVENS. Mr. President, will the distinguished Senator yield to me?

Mr. DOMENICI. Yes, I yield.

Mr. STEVENS. Mr. President, I ask unanimous consent that the debate on this amendment terminate at 10 minutes to 7; that Senator MELCHER be given 10 minutes on his amendment when he lays it down; that the vote on the Leahy amendment occur at 7 p.m.; that there be a 10-minute rollcall vote on the Melcher amendment thereafter; and that the 10-minute rollcall be followed by the vote on passage.

Mr. President, I add to that that no other amendments be in order.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Mr. President, reserving the right to object——

Mr. STEVENS. Other than technical amendments to be offered by the manager.

The PRESIDING OFFICER. Is there objection?

Mr. LEAHY. Mr. President, reserving the right to object, will the distinguished acting minority leader amend that to allow me 1 minute on my——

Mr. HELMS. Let him have the minute. It will take 1 minute for him to ask for it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Mr. President, with all due respect to the argument of my good friend the chairman of the Budget Committee, this amendment does not mean there will be one penny more in food stamps spending. If the President's economic assumptions are correct, spending will go down. Before there could be one more cent, Congress would have to appropriate the money. This is not an entitlement program.

I wish people would actually read this amendment. It does not make an entitlement.

I yield to the Senator from Mississippi.

Mr. COCHRAN. Mr. President, I support the amendment offered by the Senator from Vermont. This is not an effort to finance the food stamp program. The cap has been in place for 3 years, and as the chairman of the committee has stated, the costs of this program have doubled during those 3 years.

To restrict the amount of money going into the food stamp program, we redraw the eligibility standards to determine who gets the money and how much.

This amendment does not eliminate the cap. It does not increase the caps contained in S. 1007. All that it does is provide for the caps to be adjusted up or down on the basis of food price inflation and unemployment.

The caps written into S. 1007 are based on the administration's economic assumptions for the next 4 years. It is difficult to predict food prices—which are influenced by factors such as weather, crop yields, et cetera—exactly for 4 years in advance. Similarly, unemployment is also difficult to predict exactly, and can be affected by such factors as OPEC oil prices, foreign currency fluctuations, et cetera. Since food stamp costs are very sensitive to even small changes in food prices and unemployment, it is important that these factors be taken into account in establishing food stamp authorization ceilings.

The Congressional Budget Office and the administration use a formula to calculate the impacts of food prices on the food stamp program. Each 1-percent increase in food prices adds $150 million in annual food stamp costs. Each 1 percent in unemployment—as would occur if the unemployment rate rose from 7 percent to 8 percent—adds $650 million in annual costs.

This amendment provides for the cap to go down, below the levels in S. 1007, if food prices and unemployment are lower in any of the next 4 fiscal years than OMB is now estimating. The cap would go up if food prices and unemployment are higher than is currently estimated.

This does not in any way change the concept of the cap. There would continue to be a cap each year which would limit program expenditures. And if the economy performs as the administration expects, no adjustment in the cap will occur.

This does assure, however, that if food costs more than currently predicted, our response will not be to make 20 million poor Americans, including the elderly and disabled, eat less. Under S. 1007 as it now stands, this is what will occur if food prices rise above the predicted levels to any significant degree.

Similarly, it assures that if more Americans are out of work than are now expected, our response is not to make the poor, the elderly, and the disabled eat less.

If food stamp costs rise for any other reason, there would be no upward adjustment of the cap under this amendment. It makes modifications only in responses to changes in food prices and unemployment.

Finally, this amendment does not represent indexing of the cap. In indexing, if prices rise 4 percent, wages or benefits also go up 4 percent. Under the provision, if food prices rise 4 percent the cap will be lowered, because 4 percent is less than the food price inflation currently assumed by the administration.

UP AMENDMENT 148

(Purpose: To make technical corrections)

Mr. HELMS. Mr. President, I ask unanimous consent that it be in order that I send to the desk technical amendments agreed to on both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes technical unprinted amendment numbered 148.

Mr. HELMS. Mr. President, I ask unanimous consent that reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 39, line 9, insert "in" after "striking";

On page 40, line 17, strike "AND" and insert "OR";

On page 40, line 22, strike the first "and" and insert "or";

On page 55, line 13, strike "collection" and insert "collections";

On page 57, line 22, strike "rendition" and insert "rendering";

On page 72, line 13, strike "supplementary" and insert "supplemental";

On page 73, line 9, insert "section" after "in";

On page 76, line 25, strike "paragraph" and insert "subparagraph";

On page 79, line 7, strike "occured" and insert "occurred";

On page 79, line 22, insert a comma after "assets".

The PRESIDING OFFICER. Without objection, the amendments are agreed to.

UP AMENDMENT NO. 149

(Purpose: To delete section 207(5) of the Committee substitute and keep present law on the work registration exemption provided to the mother, grandmother or caretaker of a child under the age of 12 rather than the exemption to apply only to the mother, grandmother or caretaker of a child under the age of 6)

Mr. MELCHER. Mr. President, I call up my amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an unprinted amendment numbered 149.

Mr. MELCHER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 47, strike out the semicolon on line 1 and all that follows down through the end of line 4, and insert in lieu thereof a period.

On page 46, line 20, insert "and" immediately after semicolon.

Mr. MELCHER. Mr. President, this amendment has no cost figure connected with it. This is an amendment that is on this bill not at the behest of the administration but at the behest of some members of the committee who thought it would make it more uniform with other programs. There is no saving involved so far as the administration is concerned, so far as CBO is concerned.

I will explain what the amendment is about.

Until 1977, the Food Stamp Act provided that mothers with children under the age of 18 were exempt from the work

requirement. In other words, the law said they could stay home and care for their families.

In 1977, the law was changed to require that mothers seek work when their children reach age 12, if those families were to be eligible for food stamps. No saving of money was assured when this change was made; it was just a switch in policy.

Mr. President, the amendment I offer does not cost any money. We have been talking about money in this program all afternoon.

I should like the attention of the Senate on this matter, and I should like the Senate to understand what we are talking about.

We are talking about reducing the age requirement of children from 12 to 6 in order for the mother or the grandmother or the caretaker of those children to be able to have food stamps in the house, if they are otherwise eligible, and have to seek work.

There are 75,000 mothers or grandmothers or caretakers in households receiving food stamps, with children who are 7, 8, 9, 10, or 11.

Why did the committee say, "Let us reduce it to 6"? They thought they would like it to be uniform with the AFDC—Aid to Families With Dependent Children. That is a good point, but there is a difference.

In the welfare program, we spend about $300 million a year to help these mothers who are taking care of children and who are on AFDC. We do not have that in food stamps.

There is another difference: In the food stamp law, under current law, if you are the head of the household and you are a woman, you have to seek a job, actively seek a job, until you are 60 years of age. That is why I say this involves grandmothers. If the grandma is staying home to take care of these kids who are aged 7, 8, 9, 10, or 11, if we change this, she will have to go out and seek a job.

There is one other difference, too: It connects itself with AFDC. The AFDC social workers who are trying to help these mothers get a job, get job training, or get their children in a job center are there to be helpful. We do not have that in the Food Stamp Act and there is no one to sort this out.

The PRESIDING OFFICER. The time of the Senator from Montana has expired.

The Senator from North Carolina has the remaining time.

Mr. HELMS. I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I believe that the Senator from Montana has indicated correctly that the AFDC program requires work registration—under the WIN program—for parents with children under 6 years of age. There is a child care disregard of actual cost of care each month.

The food stamp program, as amended by the Agriculture Committee, would track this age requirement of 6 years. The food stamp program also provides a separate child care deduction each month. In agreeing to this change, the committee recognized the desirability of making the AFDC and food stamp programs "track" as much as possible since, frequently, the programs are administered by the same local welfare agency. In addition, the committee recognized the fact that by age 6, most children are enrolled in school, thereby reducing the need for fulltime child care.

Finally, the most recent Bureau of Labor Statistics figures show that labor force participation for mothers of children under 6 years of age is 47 percent. This compares with 14 percent in 1950. Increasingly, mothers of small children are entering or reentering the work force, most often by financial necessity. Recipients of food stamps should face the same work requirements as AFDC recipients and working taxpayers receiving no Federal assistance.

That, in essence, is the reason for the change.

I do not quarrel with some of the arguments made by the distinguished Senator from Montana; but I believe that, in view of the many changes we have made in this program, this is one we can do without. This is one on which I believe the committee acted properly.

I hope the amendment will be defeated.

Finally, Mr. President, since there has been some reference to the previous amendment, the so-called cap amendment, I ask unanimous consent that the amendment be printed in the RECORD; because, as indicated by the distinguished Senator from Mississippi, we are talking only about authorizations.

I yield back the remainder of my time.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

UP AMENDMENT NO. 147

On page 70, strike out line 8 and insert in lieu thereof the following:

"September 30, 1985, with the authorization ceiling for each such fiscal year to be adjusted upward or downward on each succeeding April 1 by (A) $150 million for each full percentage point or fraction thereof that the average Consumer Price Index for food at home for all urban consumers of the Bureau of Labor Statistics as projected for that fiscal year by the Office of Management and Budget as of April 1 of such fiscal year exceeds or is less, respectively, than such index for such fiscal year as projected as of June 1, 1981 by the Office of Management and Budget and (B) $650 million for each full percentage point or fraction thereof that the unemployment rate as projected for that fiscal year by the Office of Management and Budget as of April 1 of such fiscal year exceeds or is less, respectively, than the unemployment rate for such fiscal year as projected as of June 1, 1981 by the Office of Management and Budget.".

Mr. MELCHER. Mr. President, will the Senator yield 1 minute?

Mr. DOLE. I yield.

Mr. MELCHER. There is a great deal of difference between the aid to families with dependent children program and the food stamp program. They do not track the same. The age requirement for grandmothers who work until age 60 is different from the requirement under AFDC.

There are 75,000 households involved in what we are speaking about. There is no saving of money involved. They might live on small acreages and have no opportunity to find a job.

We are foisting on the bureaucracy some added work at no saving. This is unfair to women, to grandmothers, to administrators who try to enforce it, and it is unfair to the family life of the youngsters we are going to disrupt. Most important, it is unfair in the children's lives. I hope we can strike it out or agree to my amendment. There is no cost to the Treasury.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER (Mr. D'AMATO). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, is this a 10-minute vote?

Mr. SYMMS. Mr. President, a parliamentary inquiry.

Mr. HELMS. Mr. President, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, is this a 10-minute vote?

The PRESIDING OFFICER. They are all 10-minute votes.

Mr. LEAHY. Mr. President, a parliamentary inquiry. Which one is first?

The PRESIDING OFFICER. The first question is on the amendment of the Senator from Vermont (Mr. LEAHY), UP No. 147.

Mr. LEAHY. Then, it will be the Leahy-Dole amendment for 10 minutes, and the yeas and nays have been requested?

UP AMENDMENT NO. 147

The PRESIDING OFFICER. The yeas and nays have been ordered.

The question is on agreeing to the amendment of the Senator from Vermont (UP No. 147). On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), is necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Michigan (Mr. RIEGLE), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators wishing to vote?

The result was announced—yeas 41, nays 53, as follows:

[Rollcall Vote No. 145 Leg.]

YEAS—41

Andrews	Ford	Metzenbaum
Baucus	Hart	Mitchell
Bentsen	Hatfield	Moynihan
Bradley	Heinz	Murkowski
Bumpers	Hollings	Pell
Burdick	Huddleston	Pressler
Byrd, Robert C.	Inouye	Randolph
Chafee	Jackson	Sarbanes
Cochran	Kennedy	Specter
Cohen	Leahy	Stafford
Danforth	Levin	Tsongas
Dole	Mathias	Weicker
Durenberger	Matsunaga	Williams
Eagleton	Melcher	

NAYS—53

Abdnor	Gorton	Packwood
Baker	Grassley	Percy
Biden	Hatch	Proxmire
Boren	Hawkins	Pryor
Boschwitz	Hayakawa	Quayle
Byrd, Harry F., Jr.	Heflin	Roth
	Helms	Rudman
Cannon	Humphrey	Sasser
Chiles	Jepsen	Schmitt
D'Amato	Kassebaum	Simpson

Exon	Mattingly	Tower
Garn	McClure	Wallop
Glenn	Nickles	Warner
Goldwater	Nunn	Zorinsky

NOT VOTING—6

Armstrong	DeConcini	Johnston
Cranston	Dodd	Riegle

So Mr. LEAHY's amendment (UP No. 147) was rejected.

UP AMENDMENT NO. 149

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG) is necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Michigan (Mr. RIEGLE), and the Senator from Arkansas (Mr. PRYOR) are necessarily absent.

The PRESIDING OFFICER. Are there any Senators in the Chamber wishing to vote?

The result was announced—yeas 30, nays 64, as follows:

[Rollcall Vote No. 146 Leg.]

YEAS—30

Baucus	Hatfield	Melcher
Biden	Heflin	Metzenbaum
Bradley	Heinz	Mitchell
Bumpers	Hollings	Moynihan
Burdick	Huddleston	Pell
Chiles	Inouye	Randolph
Dixon	Jackson	Sarbanes
Ford	Kennedy	Specter
Glenn	Leahy	Tsongas
Hart	Matsunaga	Williams

Eagleton	McClure	Weicker
East	Murkowski	Zorinsky
Exon	Nickles	

NOT VOTING—6

Armstrong	DeConcini	Pryor
Cranston	Dodd	Riegle

So Mr. MELCHER's amendment (UP No. 149) was rejected.

Mr. BRADLEY. Mr. President, before the Senate votes for the reauthorization of the food stamp program, I must express my deep concern about the legislation before us. The bill reported by the Agriculture Committee makes deep cuts in food stamp benefits—some $8.5 billion over the next 4 years. Moreover, the bill achieves more in savings over these years than the budget reconciliation instructions require. I believe that the changes in the program which will yield these savings are unwise and unfair and create yet more holes in the "safety net" of programs intended to assure the health and welfare of elderly, disabled, and low-income Americans.

While the bill reported by the committee omits the most regressive changes proposed by the administration, most notably the reduction in a household's benefits by the value of the school lunches its children receive, the legislation still constitutes a major setback for those in need.

First, capping eligibility for food stamps at a gross income level of 130 percent of poverty, as the committee bill provides, will eliminate tens of thousands of lower income Americans from the program. In my State, some 7,200 households will become ineligible. Moreover, the rigid 130-percent cap creates a problem for those individuals and families who are just under the limit: For the working poor, pay increases and job promotions can become unattractive, in light of the total loss of benefits which may follow. To exceed the cap by $1 brings instant ineligibility. This is the so-called notch effect, which plagues several of our otherwise well-intentioned Federal programs.

A second feature of S. 1007 which reduces benefits for even the neediest recipients of food stamps is the 2-year freeze on the amount of the standard deduction and the deduction for shelter costs, both of which are adjusted under present law to recognize the ravages of inflation on the incomes of elderly, disabled, and low-income recipients. The provision which delays adjustments in the benefit level similarly takes its toll on all those receiving food stamps. Congress has already reduced inflation updates from twice a year to only once. The imposition of further delays deprives people who cannot reduce their food expenditures of inflation-related increases in their benefits.

Finally, I must object to the provision in the committee bill which would count State and local fuel assistance as income in determining food stamp benefits. I simply cannot understand the reasoning behind this change, which can only discourage State and local initiatives to provide aid to needy households. For New Jersey's elderly and disabled food stamp recipients who also receive a State lifeline utility credit, food stamps may be reduced by 30 cents for every dollar of energy assistance received. Energy costs are not going down, and Northeastern winters are not growing less severe. Next winter will not be a pleasant one for low-income families in the colder regions of our country.

Mr. President, I realize that there are some in this Chamber who favor even more painful changes in the food stamp program, even as I judge the legislation before us as far too severe. I know that this bill represents a compromise which no one is pleased with, but which may be the best we can achieve under present circumstances.

Therefore, it is only with grave reservations that I support passage of S. 1007, in order to continue the food stamp program which provides vital assistance for so many elderly, disabled, and low-income Americans.

Mr. ROBERT C. BYRD. Mr. President, I compliment the distinguished Senator from Vermont (Mr. LEAHY) for his efforts in connection with S. 1007, the Food Stamp and Community Distribution Amendments of 1981. As the ranking member of the Nutrition Subcommittee of the Agriculture, Nutrition, and Forestry Committee, Senator LEAHY has sought to improve the food stamp program so that it serves the needs of poor Americans. He has been skillful and patient in pursuit of this goal.

In addition, the ranking member of the full committee, the Senator from Kentucky (Mr. HUDDLESTON) has fully participated in the development of this important legislation and his contributions aided the Senate's consideration of this measure.

The chairman of the Agriculture Committee, Mr. HELMS, has shown his customary courtesy during consideration of this bill.

I commend Senator DOLE, the chairman of the Nutrition Subcommittee of the Agriculture, Nutrition, and Forestry Committee, for his dedicated and thorough work on this measure.

Congress is working under very tight budget constraints. That fact is evident in this bill. S. 1007 represents a significant reduction in the cost of the food stamp program over the next 4 years. The challenge facing the Senate is to insure that these reductions are as fair as possible. I believe that Senator LEAHY and Senator DOLE have worked to achieve that end. They are to be complimented for their efforts.

Mr. STENNIS. Mr. President, this is an important bill and covers a problem of the Federal Government that cannot be ignored, as it covers the Federal relief program and provides necessary food and shelter for countless thousands of people who are destitute and almost helpless through no fault of their own.

Even though the bill is far from what I would desire to support, many improvements in the program have been made through the efforts of many of our Members. We shall work for further reductions and shall support lower appropriations. The bill permits States to require work in exchange for food stamps. It should provide some assistance as to the costs of imposing this highly important requirement.

Definite steps to cut fraud and abuse have been provided in authority to impose stiffer penalties, as well as using information collected by unemployment insurance offices and the Social Security Administration to validate applications. Illegal recipients have to pay back double what they have received.

Cash is no longer given as change and receipts will be given instead. The bill provides for savings of $702 million more than the President requested, with an actual reduction in the cost of the program of over $600 million in 1982. For the next 4 years, the reductions in authorizations are $8.6 billion.

I regret that we failed to get adopted the amendment providing for a "purchasing requirement" of a portion of their income in order to be eligible to participate, an amendment I strongly, support as well as an amendment to permanently "freeze" the indexing of deduction levels.

The bill does freeze the "indexing" until July 1983.

The bill fails to provide adequate policing, and fails to provide identifications of actual ownership of the stamps.

The bill represents many material improvements in a field where we must have some program.

I am voting for the bill with full reservations as to what level of support I shall give to the appropriations under the bill; and shall work for improvements in enforcing the program in the future.

Mr. THURMOND. Mr. President, I rise today in support of S. 1007, the Food Stamp and Commodity Distribution Amendments of 1981. This legislation makes some much-needed and long overdue changes designed to bring the food stamp program under control.

Mr. President, the food stamp program is the second most costly social program funded by the Federal Government. It is a perfect example of a well-intentioned program that simply has been allowed to grow far beyond anything envisioned at the time of its creation. The tremendous growth and accompanying increases in the cost of the program make clear the need for cost-saving reforms such as those embodied in this legislation.

The cost of the food stamp program has doubled in the last 3 years alone. One out of every 10 Americans—22 million people—now participate in the program. Since 1977, Congress has established annual caps on funds appropriated for the food stamp program. Yet, virtually every year since that practice was initiated, unexpected growth in the program has resulted in the cap again being increased later in the fiscal year, under the threat of a possible interruption of benefits in the absence of such action. This trend should not be allowed to continue.

Mr. President, it is only through efforts to tighten eligibility requirements, eliminate fraud and abuse, and target assistance to those who need it most that we will be able to curb the spiraling growth in the cost of the food stamp program. This legislation represents a step in that direction. Over the next 4 years, the changes incorporated in S. 1007 will achieve savings of over $8 billion—exceeding the President's budget request and the assumptions contained in the Senate-passed first concurrent budget resolution for fiscal year 1982.

I am particularly pleased that S. 1007 contains language similar to that of two bills I have introduced in this Congress, S. 293 (prohibiting food stamps for strikers) and S. 495 (prohibiting household income-splitting). By prohibiting the issuance of food stamps to households containing one or more striking workers, and preventing the splitting of a household for the purpose of qualifying for food stamps as two or more households, the Senate will be eliminating two of the most blatant and unfair abuses currently existing in the program. On the other hand, Mr. President, I believe this legislation falls short of what should be accomplished in a number of areas. It is regrettable that the Senate did not adopt several amendments which would have substantially improved this bill. It is my hope that other needed reforms of the food stamp program can be achieved in the future.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG), is necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Arkansas (Mr. PRYOR), and the Senator from Michigan (Mr. RIEGLE), are necessarily absent.

I further announce that if present and voting, the Senator from Michigan (Mr. RIEGLE), would vote "yea."

The PRESIDING OFFICER. Is there any other Senator in the Chamber who desires to vote?

The result was announced—yeas 77, nays 17, as follows:

[Rollcall Vote No. 147 Leg.]

YEAS—77

Abdnor	Glenn	Moynihan

NOT VOTING—6

Armstrong	DeConcini	Pryor
Cranston	Dodd	Riegle

So the bill (S. 1007), as amended, was passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Food Stamp and Commodity Distribution Amendments of 1981".

TITLE I—MAJOR FOOD STAMP REVISIONS

ADJUSTMENT OF THE THRIFTY FOOD PLAN

SEC. 101. Section 3(o) of the Food Stamp Act of 1977 is amended by striking "and" before clause (6) and all that follows down through the end of clause (6), and inserting in lieu thereof the following: "(6) on April 1, 1982, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the fifteen months ending the preceding December 31, (7) on July 1, 1983, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the fifteen months ending the preceding March 31, (8) on October 1, 1984, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the fifteen months ending the preceding June 30, and (9) on October 1, 1985, and each October 1 thereafter, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twelve months ending the preceding June 30.".

GROSS INCOME ELIGIBILITY STANDARD

SEC. 102. (a) Section 5 of the Food Stamp Act of 1977 is amended by—

(1) striking out "subsections (c) and (e)" in subsection (b) and inserting in lieu thereof "subsection (c)";

(2) striking out in subsection (c) "The income standards of eligibility shall be" and inserting in lieu thereof "Except for households containing a member who is sixty years of age or over, or containing a member who receives supplemental security income benefits under ttile XVI of the Social Security Act or disability payments under title II of the Social Security Act, the income standards of eligibility shall be 130 per centum of"; and

(3) striking out from the first sentence of subsection (e) "In" and inserting in lieu thereof "Further, in", and inserting "for purposes of determining the household's benefit level only," after "household income,".

(b) Section 8(a) of the Food Stamp Act of 1977 is amended by inserting "(d) and (e)" after "section 5" in the first sentence.

ADJUSTMENTS OF DEDUCTIONS

SEC. 103. Section 5(e) of the Food Stamp Act of 1977 is amended by—

(1) striking out in the first sentence everything that follows "the Secretary shall allow a standard deduction of" and inserting in lieu thereof the following: "$85 a month for each household, except that households in Alaska, Hawaii, Guam, Puerto Rico, and the Virgin Islands of the United States shall be allowed a standard deduction of $145, $120, $170, $50, and $75, respectively.";

(2) striking out the second sentence and inserting in lieu thereof the following: "Such standard deductions shall be adjusted (1) on July 1, 1983, to the nearest $5 increment to reflect changes in the Consumer Price In-

dex for all urban consumers published by the Bureau of Labor Statistics, for items other than food and the homeownership component of shelter costs, as appropriately adjusted by the Bureau of Labor Statistics after consultation with the Secretary, for the fifteen months ending the preceding March 31, (2) on October 1, 1984, to the nearest $5 increment to reflect such changes for the fifteen months ending the preceding June 30, and (3) on October 1, 1985, and each October 1 thereafter. to the nearest $5 increment to reflect such changes for the twelve months ending the preceding June 30.";

(3) striking out the proviso in clause (2) of the fourth sentence and inserting in lieu thereof the following: "*Provided*, That the amount of such excess shelter expense deduction shall not exceed $115 a month in the forty-eight contiguous States and the District of Columbia, and shall not exceed, in Alaska, Hawaii, Guam, Puerto Rico, and the Virgin Islands of the United States, $200, $165, $140, $40, and $85, respectively, adjusted (1) on July 1, 1983, to the nearest $5 increment to reflect changes in the shelter (exclusive of homeownership costs), fuel, and utilities components of housing costs in the Consumer Price Index for all urban consumers published by the Bureau of Labor Statistics, as appropriately adjusted by the Bureau of Labor Statistics after consultation with the Secretary, for the fifteen months ending the preceding March 31, (2) on October 1, 1984, to the nearest $5 increment to reflect such changes for the fifteen months ending the preceding June 30, and (3) on October 1, 1985, and each October 1 thereafter, to the nearest $5 increment to reflect such changes for the twelve months ending the preceding June 30,".

EARNED INCOME DEDUCTION

SEC. 104. Section 5(e) of the Food Stamp Act of 1977 is amended by striking "20 per centum" in the third sentence and inserting in lieu thereof "15 per centum."

RETROSPECTIVE ACCOUNTING

SEC. 105. (a) Section 5(f) of the Food Stamp Act of 1977 is amended to read:

"(f)(1)(A) Household income for those households that, by contract for other than an hourly or piecework basis or by self-employment, derive their annual income in a period of time shorter than one year, shall be calculated by averaging such income over a twelve-month period.

"(B) Household income for those households that received nonexcluded income of the type described in subsection (d)(3) of this section, shall be calculated by averaging such income over the period for which it is received.

"(2)(A) Household income for migrant farmworker households shall be calculated on a prospective basis, as provided in paragraph (3)(A).

"(B) Household income for all other households shall be calculated either on a prospective basis as provided in paragraph (3)(A) or on a retrospective basis as provided in paragraph (3)(B), as elected by the State agency under regulations prescribed by the Secretary.

"(3)(A) Calculation of household income on a prospective basis is the calculation of income on the basis of the income reasonably anticipated to be received by the household during the period for which eligibility or benefits are being determined. Such calculation shall be made in accordance with regulations prescribed by the Secretary which shall provide for taking into account both the income reasonably anticipated to be received by the household during the period for which eligibility or benefits are being determined and the income received by the household during the preceding thirty days.

"(B) Calculation of household income on a retrospective basis is the calculation of income for the period for which eligibility or benefits are being determined on the basis of income received in a previous period. Such calculation shall be made in accordance with regulations prescribed by the Secretary which may provide for the determination of eligibility on a prospective basis in some or all cases in which benefits are calculated under this paragraph. Such regulations shall provide for supplementing the initial allotments of newly applying households in those cases in which the determination of income under this paragraph causes serious hardship.

"(4) In promulgating regulations under this subsection, the Secretary shall consult with the Secretary of Health and Human Services in order to assure that, to the extent feasible and consistent with the purposes of this Act and the Social Security Act, the income of households receiving benefits under this Act and title IV-A of the Social Security Act, is calculated on a comparable basis under the two Acts. The Secretary is authorized, upon the request of a State agency, to waive any of the provisions of this subsection to the extent necessary to permit the State agency to calculate income for purposes of this Act on the same basis that income is calculated under title IV-A of the Social Security Act in that State.".

(b) Effective October 1, 1983, paragraph (2)(B) of section 5(f) of the Food Stamp Act of 1977, as amended by subsection (a), is amended to read:

"(B) Household income for all other households shall be calculated on a retrospective basis as provided in paragraph (3)(B).".

(c) Section 5(d) of the Food Stamp Act of 1977 is amended by striking "5(f)(2)" and inserting "5(f)" in lieu thereof.

PERIODIC REPORTING

SEC. 106. (a) Section 3(c) of the Food Stamp Act of 1977 is amended by inserting before the period at the end of the second sentence "except that the limit of twelve months may be waived by the Secretary to improve the administration of the program".

(b) Section 6(c) of the Food Stamp Act of 1977 is amended by—

(1) inserting after "households" in the first sentence of paragraph (1) ", including all households with earned income, except migrant farmworker households, all households with potential earners, including individuals receiving unemployment compensation benefits and individuals required by section 6(d) of this Act to register for work, and all households required to file a similar report under title IV-A of the Social Security Act, but not including households that have no earned income and in which all members are sixty years of age or over or receive supplemental security income benefits under title XVI of the Social Security Act or disability and blindness payments under titles I, II, X, XIV, and XVI of the Social Security Act,";

(2) striking "5(f)(2)" in paragraph (1) and inserting "5(f)" in lieu thereof; and

(3) inserting after paragraph (3) the following new paragraph:

"(4) Any household that fails to submit periodic reports required by paragraph (1) shall not receive an allotment for the payment period to which the unsubmitted report applies until such report is submitted.".

(c) Effective October 1, 1983, section 6(c)(1) of the Food Stamp Act of 1977 is further amended by—

(1) striking in the first sentence "that elect to use a system of retrospective accounting in accordance with section 5(f) of this Act"; and

(2) striking the second sentence.

REPEAL OF INCREASES IN DEPENDENT CARE DEDUCTIONS FOR WORKING ADULTS AND MEDICAL DEDUCTIONS FOR THE ELDERLY AND DISABLED

SEC. 107. Sections 104 and 105 of the Food Stamp Act Amendments of 1980 (Public Law 96-249) are repealed.

TITLE II—OTHER FOOD STAMP PROGRAM COST REDUCTIONS

FAMILY UNIT REQUIREMENTS

SEC. 201. Section 3(i) of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence "; except that parents and children who live together shall be treated as a group of individuals who customarily purchase and prepare meals together for home consumption even if they do not do so, unless one of the parents is sixty years of age or older"; and

(2) striking "neither" in the second sentence and inserting "no" in lieu thereof.

BOARDERS

SEC. 202. Section 3(i) of the Food Stamp Act of 1977 is amended by—

(1) striking in clause (1) of the first sentence "or else pays compensation to the others for such meals,";

(2) striking in clause (2) of the first sentence "or else live with others and pay compensation to the others for such meals"; and

(3) adding before the period at the end of the second sentence ", or else live with others and pay compensation to the others for meals".

DRUG ADDICTION OR ALCOHOLIC TREATMENT PROGRAMS

SEC. 203. (a) Section 3 of the Food Stamp Act of 1977 is amended by—

(1) striking subsection (f), the definition for "Drug addiction or alcoholic treatment and rehabilitation program";

(2) in subsection (g)(1), striking "(5), (7), and (8)" and inserting in lieu thereof "(6), and (7)";

(3) in subsection (g), striking clause (5), and redesignating clauses (6), (7), and (8) as clauses (5), (6), and (7);

(4) in the third sentence of subsection (i), inserting "and" before "temporary residents", and striking out ", and narcotics addicts or alcoholics who live under the supervision of a private nonprofit institution for the purpose of regular participation in a drug or alcoholic treatment program";

(5) in subsection (k)(2), striking "(5), (7), and (8)" and inserting in lieu thereof "(6), and (7)";

(6) in subsection (k)(3), striking "(g)(6)" and inserting in lieu thereof "(g)(5)".

(b) Section 6(d)(2) of the Food Stamp Act of 1977 is amended by—

(1) striking clause (E); and

(2) redesignating clause (F) as clause (E).

(c) Section 10 of the Food Stamp Act of 1977 is amended by striking "private nonprofit organizations or institutions which serve meals to narcotics addicts or alcoholics in drug addiction or alcoholic treatment and rehabilitation programs," and striking the comma after "children".

EXCLUDED PAYMENTS FROM OTHER PROGRAMS; ENERGY ASSISTANCE PAYMENTS

SEC. 204. Section 5(d) of the Food Stamp Act of 1977 is amended by striking "(10)" and everything that follows through the end of such subsection and inserting in lieu thereof "(10) any income that any other Federal law specifically excludes from consideration as income for purposes of determining eligibility for the food stamp program, and (11) any payments or allowances specifically designated for energy assistance by Federal law.".

SPONSORED ALIENS

SEC. 205. Section 5 of the Food Stamp Act of 1977 is amended by adding a new subsection (i) to read:

"(i)(1) For purposes of determining eligibility for and the amount of benefits under this Act for an individual who is an alien as described in subsection 6(f)(2)(B) of this Act, the income and resources of any person who as a sponsor of such individual's entry into the United States executed an affiadvit of support or similar agreement with respect to such individual, and the income and resources of the sponsor's spouse if such spouse is living with the sponsor, shall be deemed to be the income and resources of such individual for a period of three years after the individual's entry into the United States. Any such income deemed to be income of such individual shall be treated as unearned income of such individual.

"(2)(A) The amount of income of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the unearned income of an alien for any year shall be determined as follows:

"(i) The total yearly rate of earned and unearned income of such sponsor, and such sponsor's spouse if such spouse is living with the sponsor, shall be determined for such year under rules prescribed by the Secretary.

"(ii) The amount determined under clause (i) of this subparagraph shall be reduced by an amount equal to the income eligibility standard as determined under section 5(c) of this Act for a household equal in size to the sponsor, the sponsor's spouse if living with the sponsor, and any persons dependent upon or receiving support from the sponsor or the sponsor's spouse if the spouse is living with the sponsor.

"(iii) The monthly income attributable to such alien shall be one-twelfth of the amount calculated under clause (ii) of this subparagraph.

"(B) The amount of resources of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the resources of an alien for any year shall be determined as follows:

"(i) The total amount of the resources of such sponsor and such sponsor's spouse if such spouse is living with the sponsor shall be determined under rules prescribed by the Secretary.

"(ii) The amount determined under clause (i) of this subparagraph shall be reduced by $1,500.

"(iii) The resources determined under clause (ii) of this subparagraph shall be deemed to be resources of such alien in addition to any resources of such alien.

"(C)(i) Any individual who is an alien shall, during the period of three years after entry into the United States in order to be an eligible individual or eligible spouse for purposes of this Act, be required to provide to the State agency such information and documentation with respect to his sponsor and sponsor's spouse as may be necessary in order for the State agency to make any determination required under this section, and to obtain any cooperation from such sponsor necessary for any such determination. Such alien shall also be required to provide such information and documentation which such alien or the sponsor provided in support of such alien's immigration application as the State agency may request.

"(ii) The Secretary shall enter into agreements with the Secretary of State and the Attorney General whereby any information available to such persons and required in order to make any determination under this section will be provided by such persons to the Secretary, and whereby such persons shall inform any sponsor of an alien, at the time such sponsor executes an affidavit of support or similar agreement, of the requirements imposed by this section.

"(D) Any sponsor of an alien, and such alien, shall be jointly and severally liable for an amount equal to any overpayment made to such alien during the period of three years after such alien's entry into the United States, on account of such sponsor's failure to provide correct information under the provisions of this section, except where such sponsor was without fault, or where good cause for such failure existed. Any such overpayment which is not repaid shall be recovered in accordance with the provisions of section 13(b)(2) of this Act.

"(E) The provisions of this subsection shall not apply with respect to any alien who is a member of the sponsor's household, as defined in section 3(i) of this Act.".

ELIGIBILITY OF STRIKERS

SEC. 206. (a) Section 6(d)(4) of the Food Stamp Act of 1977 is amended by—

(1) inserting before the colon at the end of the first proviso the following: ", however, such household shall not receive an increased allotment as the result of a decrease in the income of the striking member or members of the household";

(2) inserting a period in lieu of the colon at the end of the second proviso; and

(3) striking the third proviso.

(b) Section 6(i) of the Food Stamp Act of 1977 is repealed.

WORK REQUIREMENTS

SEC. 207. Section 6(d) of the Food Stamp Act of 1977 is amended by—

(1) striking "six" and inserting in lieu thereof "twelve" in clause (i) of paragraph (1);

(2) striking ", unless the household was certified for benefits under this Act immediately prior to such unemployment" in clause (iii) of paragraph (1);

(3) striking "sixty days" and inserting "ninety days" in the proviso in clause (iii) of paragraph (1);

(4) inserting before the semicolon at the end of clause (A) of paragraph (2) ", in which case, failure by such person to comply with any work requirement to which such person is subject that is comparable to a requirement of paragraph (1) shall be the same as failure to comply with that requirement of paragraph (1)"; and

(5) striking "twelve" and inserting in lieu thereof "six" in clause (B) of paragraph (2).

WORKFARE PROGRAMS

SEC. 208. (a) Section 6(d) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new paragraph:

"(5) Unless otherwise exempted by the provisions of this paragraph, no individual shall be eligible for assistance under this Act if he or she is a physically and mentally fit person between the ages of eighteen and sixty who refuses without good cause to accept an offer of employment, under a workfare program established under section 11(e)(20) of this Act, made by a State, a political subdivision of a State, a prime sponsor pursuant to the Comprehensive Employment and Training Act of 1973, or any other public employer, the compensation for which employment is provided in the form of the allotment to which the household is otherwise entitled under section 8(a) of this Act. A person who otherwise would be required to comply with the requirements of this paragraph shall be exempt from such requirements if such person is a person described in clause (B), (C), or (E) of paragraph (2) of this subsection, or is within another category of person designated by the State agency as exempt from such requirements.".

(b) Section 11(e) of the Food Stamp Act of 1977 is amended by—

(1) striking the word "and" at the end of paragraph (18);

(2) striking the period at the end of paragraph (19) and inserting in lieu thereof a semicolon; and

(3) adding at the end thereof the following new paragraph:

"(20) that the State agency may establish and carry out a workfare program, in accordance with the provisions of subsection (m) of this section and regulations issued by the Secretary under such subsection, to provide employment to enable households to satisfy the requirements of section 6(d)(5) of this Act; and".

(c) Section 11 of the Food Stamp Act of 1977 is further amended by adding at the end thereof the following new subsection:

(m)(1) Not later than sixty days after enactment of this subsection, the Secretary shall issue regulations regarding the establishment and operation by State and local agencies of a workfare program which makes available public employment described in section 6(d)(5).

"(2) Such regulations shall provide that compensation for employment described in section 6(d)(5) shall consist of the allotment to which the household is entitled pursuant to section 8(a) of this Act, with each hour of such employment entitling the household to which such person belongs to a portion of its allotment equal in value to 100 per centum of the higher of the applicable State minimum wage or the Federal hourly rate under the Fair Labor Standards Act of 1938.

"(3) Regulations issued by the Secretary under this subsection—

"(A) shall allow for the provision of job counseling to ensure that such members are matched with the most suitable employment available, taking into consideration the experience, training, and capabilities of such members;

"(B) shall allow for the provision of assistance to such members to obtain suitable employment outside such program;

"(C) shall not require any such member participating in any such workfare program for any week to work any hours during such week which when added to any other hours worked by such member for compensation in cash or in kind in any other capacity during such week exceed forty hours; and

"(D) shall require that employment described in section 6(d)(5) not be used by any employer to fill a job vacancy created by the action of such employer in laying off or terminating the employment of any regular employee not participating in any such workfare program in anticipation of filling the vacancy so created by hiring any employee participating in any such workfare program.

"(4) Any person who is subject to the workfare requirements of section 6(d)(5) of this Act shall be ineligible to participate in the food stamp program as a member of any household for a period of six months after such person refuses to accept an offer of employment under such program or fails to work the number of hours required under paragraph (2) of this subsection.

"(5) During the period of ineligibility imposed under paragraph (4) of this subsection, no household shall receive increased benefits under this Act as the result of a member of such household having been disqualified under paragraph (4).

"(6)(A) The Secretary shall, to the maximum extent practicable, make it possible for States and political subdivisions to design and operate workfare programs for food stamp recipients that are compatible with similar workfare programs operated by such States and political subdivisions.

"(B) The Secretary shall allow States and political subdivisions to require that food stamp recipients subject to section 6(d)(5) of this Act comply with provisions of workfare programs requiring work or training operated under title IV of the Social Security Act. In such cases, compliance with a workfare program operated under title IV

shall be treated as compliance with food stamp workfare requirements.

"(C) The Secretary may also allow States and political subdivisions to require that food stamp recipients subject to section 6(d)(5) of this Act comply with provisions of workfare programs (other than those operated under title IV of the Social Security Act) operated by States or political subdivisions, if the Secretary determines that such other workfare program meets the provisions and protections provided under this Act. In such cases, compliance with another workfare program shall be treated as compliance with food stamp workfare requirements.".

(d) Section 16 of such Act is amended by adding at the end thereof the following new subsection:

"(j) The Secretary shall pay 50 per centum of all administrative costs involved in operating a workfare program established under section 11(e)(20) of this Act.".

(e) Section 17(c) of such Act is amended—

(1) by striking "and" before "the program's relative fairness"; and

(2) by striking the period at the end thereof and inserting in lieu thereof a comma and the following: "and the operation of a workfare program established under this Act, with particular emphasis upon the extent to which such workfare program reduces the need for food stamp benefits and helps to achieve the purposes of this Act.".

PRORATING FIRST MONTH BENEFITS

SEC. 209. Section 8 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(c) The value of the allotment issued to any eligible household for the initial month or other initial period for which an allotment is issued shall have a value which bears the same ratio to the value of the allotment for a full month or other initial period for which the allotment is issued as the number of days (from the date of application) remaining in the month or other initial period for which the allotment is issued bears to the total number of days in the month or other initial period for which the allotment is issued. As used in this subsection, the term 'initial month' means (1) the first month for which an allotment is issued to a household, and (2) the first month for which an allotment is issued to a household following any period of more than thirty days during which such household was not participating in the food stamp program under this Act after previous participation in such program.".

OUTREACH; BILINGUAL REQUIREMENTS

SEC. 210. (a) Section 11(e)(1) of the Food Stamp Act of 1977 is amended by striking clauses (A), (B), and (C) and inserting in lieu thereof "not conduct food stamp outreach activities with funds provided under this Act;".

(b) Section 16(a) of that Act is amended by—

(1) striking clause (1); and

(2) redesignating clauses (2), (3), (4), and (5) as clauses (1), (2), (3), and (4), respectively.

EXPEDITED BENEFITS

SEC. 211. Section 11(e)(9) of the Food Stamp Act of 1977 is amended to read:

"(9) that any household in immediate need because such household—

"(A) has gross income, as defined in section 5(d) of this Act, which is less than $85 per month or is a destitute migrant or seasonal farmworker household; and

"(A) has liquid assets, as defined under section 5(g) of this Act, which do not exceed $100;

shall receive an allotment on an expedited basis if, so to the extent practicable, the State agency verifies the income and cash resources of such household.".

WAIVING AND OFFSETTING CLAIMS; IMPROVED RECOVERY OF OVERPAYMENTS

SEC. 212. (a) Section 13 of the Food Stamp Act of 1977 is amended by—

(1) inserting "(a)" immediately after the section designation;

(2) inserting before the period at the end of the first sentence ", including the power to waive claims if the Secretary determines that to do so would serve the purposes of this Act";

(3) adding the following new sentence at the end thereof: "The Secretary shall have the power to reduce amounts otherwise due to a State agency under section 16 of this Act to collect unpaid claims assessed against the State agency if the State agency has declined or exhausted its appeal rights under section 14 of this Act."; and

(4) adding the following new subsection at the end thereof:

"(b)(1) In the case of any ineligibility determination under section 6(b) of this Act, the household of which such ineligible individual is a member is required to agree to a reduction in the allotment of the household of which such individual as a member, or payment in cash, in accordance with a schedule determined by the Secretary, that will be sufficient to reimburse the Federal Government for double the value of any overissuance of coupons resulting from the activity that was the basis of the ineligibility determination. If a household refuses to make an election, or elects to make a payment in cash under the provisions of the preceding sentence and fails to do so, the household shall be subject to an allotment reduction.

"(2) State agencies shall collect any claim against a household arising from the overissuance of coupons, other than claims the collection of which is provided for in paragraph (1) of this subsection and claims arising from an error of the State agency by reducing the monthly allotments of the household. These collections shall be limited to 10 per centum of the monthy allotment (or $10 per month whenver that would result in a faster collection rate).".

(b) The heading of section 13 of the Food Stamp Act of 1977 is amended to read "COLLECTION AND DISPOSITION OF CLAIMS".

STATES' SHARE OF COLLECTED CLAIMS

SEC. 213. Section 16(a) of the Food Stamp Act of 1977 is amended by—

(1) striking in the first sentence "through prosecutions" and all that follows down through the end of the sentence and inserting in lieu thereof "pursuant to section 13(b)(1) of this Act and 25 per centum of the value of all funds or allotments recovered or collected pursuant to section 13(b)(2) of this Act."; and

(2) striking in the second sentence, "fraud" and inserting in lieu thereof "ineligibility".

TITLE III—STRENGTHENING PENALTIES FOR FRAUD AND ABUSE; IMPROVING ADMINISTRATIVE PROCEDURES

ELIGIBLE STORES

SEC. 301. Section 3(k) of the Food Stamp Act of 1977 is amended by inserting the following new sentence at the end thereof: "Notwithstanding the preceding sentence, the term 'retail food store' shall not include any establishment that sells alcoholic beverages for consumption on the premises, other than an establishment referred to in subsections (g)(3) and (k)(3) of this section.".

ALASKA'S THRIFTY FOOD PLAN

SEC. 302. Section 3(o) of the Food Stamp Act of 1977 is amended by revising clause (2) to read: "(2) make cost adjustments in the thrifty food plan for Hawaii and the urban and rural parts of Alaska to reflect the cost of food in Hawaii and urban and rural Alaska,".

DISALLOWANCE OF DEDUCTIONS FOR EXPENSES PAID BY THIRD PARTIES

SEC. 303. Section 5(e) of the Food Stamp Act of 1977 is amended by adding in the fourth and fifth sentences after "entitled" the following: ", with respect to expenses other than expenses paid on behalf of the household by a third party,".

RESOURCE LIMITATIONS

SEC. 304. Section 5(g) of the Food Stamp Act of 1977 is amended by striking in the second sentence ", in prescribing inclusions in, and exclusions from, financial resources, follow regulations in force as of June 1, 1977, and shall, in addition, (1)".

DISQUALIFICATION PENALTIES FOR FRAUD AND MISREPRESENTATION

SEC. 305. Section 6(b) of the Food Stamp Act of 1977 is amended to read:

"(b)(1) Any person who has been found by any State or Federal court or administrative agency to have intentionally (A) made a false or misleading statement, or misrepresented, concealed or withheld facts, or (B) committed any act that constitutes a violation of this Act, the regulations issued thereunder, or any State statute, for the purpose of using, presenting, transferring, acquiring, receiving, or possessing coupons or authorization cards shall, immediately upon the rendering of such determination become ineligible for further participation in the program—

"(i) for a period of six months upon the first occasion of any such determination;

"(ii) for a period of one year upon the second occasion of any such determination;

"(iii) permanently, upon the third occasion of any such determination.

During the period of such eligibility, no household shall received increased benefits under this Act as the result of a member of such household having been disqualified under this subsection.

"(2) Each State agency shall proceed against an individual alleged to have engaged in such activity either by way of administrative hearings or by referring such matters to appropriate authorities for civil or criminal action in a court of law.

"(3) Such periods of ineligibility as are provided for in paragraph (1) of this subsection shall remain in effect, without possibility of administrative stay, unless and until the finding upon which the ineligibility is based is subsequently reversed by a court of appropriate jurisdiction, but in no event shall the period of ineligibility be subject to review.

"(4) The Secretary shall prescribe such regulations as the Secretary may deem appropriate to ensure that information concerning any such determination with respect to a specific individual is forwarded to the Office of the Secretary by any appropriate State or Federal entity for the use of the Secretary in administering the provisions of this section. No State shall withhold such information from the Secretary or the Secretary's designee for any reason whatsoever.".

ELIMINATION OF CASH CHANGE

SEC. 306. Section 7(b) of the Food Stamp Act of 1977 is amended by striking the colon at the end of the first proviso and all that follows down through the word "issued".

LIABILITY FOR LOSSES : MAIL ISSUANCE LIMITATIONS

SEC. 307. Section 7(j) of the Food Stamp Act of 1977 is amended to read:

"(f) Notwithstanding any other provision of this Act, the State agency shall be strictly liable to the Secretary for any financial losses involved in the acceptance, storage, and issuance of coupons, except that in the case of losses resulting from the replacement of coupons lost in the mail, the State agency shall be liable to the Secretary to the ex-

tent that such losses exceed 1 per centum of the value of allotments issued by mail during any six-month period in any State or part of a State that issues a significant volume of coupons by mail. In the case of losses resulting from the replacement of authorizations for coupons, the State agency shall be liable to the Secretary to the extent prescribed in the regulations promulgated by the Secretary. The Secretary is authorized to restrict the use of mail coupon issuance in any State or part of a State where the Secretary determines that it jeopardizes program integrity or is not cost effective.".

COUNTING THE VALUE OF ALLOTMENTS AS INCOME OR RESOURCES; REDUCING OTHER PROGRAM BENEFITS

SEC. 308. Section 8(b) of the Food Stamp Act of 1977 is amended to read:

"(b) The value of the allotment provided any eligible household shall not be considered income or resources for the purposes of any Federal, State, or local laws relating to taxation.".

REPORTING OF ABUSES BY THE PUBLIC; NOTICE OF VERIFICATION

SEC. 309. (a) Section 9 of the Food Stamp Act of 1977 is amended by adding at the end thereof a new subsection (e) to read:

"(e) Approved retail food stores shall display a sign providing information on how persons may report abuses they have observed in the operation of the food stamp program.".

(b) Section 11(e)(2) of the Food Stamp Act of 1977 is amended by inserting after the second period the following new sentence: "Each application form shall also contain in understandable terms and in prominent and boldface lettering a statement that the information provided by the applicant in connection with the application for a coupon allotment will be subject to verification by Federal, State, and local officials to determine if such information is factual and that if any part of such information is incorrect, food stamps may be denied to the applicant, and that the applicant may be subjected to criminal prosecution for knowingly providing incorrect information.".

SIXTY-DAY TRANSFER OF CERTIFICATION

SEC. 310. Section 11 of the Food Stamp Act of 1977 is amended by striking subsection (b).

RESTRICTIONS ON REPLACEMENT OF COUPONS

SEC. 311. Section of the Food Stamp Act of 1977 is amended by adding the following new subsection:

"(b) The Secretary shall limit replacements for coupons destroyed after receipt by a household to one month's replacement for any household in any six-month period, and no replacement shall be provided for coupons lost or misplaced after receipt by a household.".

NOTICE OF RECERTIFICATION

SEC. 312. Section 11(e)(4) of the Food Stamp Act of 1977 is amended by striking "immediately".

DISCLOSURE OF INFORMATION ON RECIPIENTS

SEC. 313. Section 11(e)(8) of the Food Stamp Act of 1977 is amended by striking the semicolon at the end and inserting in lieu thereof a comma and the following: "except that, notwithstanding any other provision of law, all information obtained under this Act from an applicant household shall be made available, upon request, to local, State, or Federal law enforcement officials for the purpose of investigating a possible or alleged violation of this Act or any regulation issued under this Act;"

PROMPT ACTION TO REDUCE OR TERMINATE BENEFITS

SEC. 314. Section 11(e)(10) of the Food Stamp Act of 1977 is amended by changing the semicolon at the end thereof to a colon and inserting immediately after the colon the following: "Provided further, That in the event the State agency receives a clear written statement from the household that contains information that, in its totality, requires reduction or termination of that household's benefits, the State agency may act immediately to reduce or terminate the household's benefits and may provide such individual notice of agency action to the household as late as the date on which the action becomes effective;".

LIMITATIONS ON RESTORATION OF LOST BENEFITS

SEC. 315. (a) Section 11(e)(11) of the Food Stamp Act of 1977 is amended to read:

"(11) upon receipt of a request from a household, for the prompt restoration in the form of coupons to a household of any allotment or portion thereof which has been wrongfully denied or terminated, except that allotments for any period of time more than one year prior to the date such request is received by the State agency, or the date the State agency is notified or otherwise discovers the possible loss to a household, shall not be restored;".

(b) Section 15 of the Food Stamp Act of 1977 is amended by adding a new subsection at the end thereof to read:

"(h) In any judicial action arising under this Act any food stamp allotments found to have been wrongfully withheld shall be restored only for periods of not more than one year prior to the date of the commencement of such action, or in the case of an action seeking review of a final State agency determination, not more than one year prior to the date of the filing of a request with the State for the restoration of such allotments, or, in either case, not more than one year prior to the date the State agency is notified or otherwise discovers the possible loss to a household.".

USE AND AVAILABILITY OF UNEMPLOYMENT AND SOCIAL SECURITY INFORMATION

SEC. 316. (a) Section 11(e) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new paragraph:

"(21) that information available from the Social Security Administration under the provisions of section 6103(l)(7) of the Internal Revenue Code of 1954, and information available from agencies administering State unemployment compensation laws under the provisions of section 303(d) of the Social Security Act, shall be requested and utilized by the State agency (described in section 3(n)(1) of this Act) to the extent permitted under the provisions of such sections, except that the State agency shall not be required to request such information from the Social Security Administration if such information is available from the agency administering the State unemployment compensation laws.".

(b) Section 127(b)(3) of the Food Stamp Act Amendments of 1980 is amended by striking "1983" and inserting in lieu thereof "1982".

NUTRITION EDUCATION PROGRAM

SEC. 317. Section 11(f) of the Food Stamp Act of 1977 is amended to read:

"(f) To encourage the purchase of nutritious foods, the Secretary is authorized to extend food and nutrition education to reach food stamp program participants, using the methods and techniques developed in the expanded food and nutrition education and other programs.".

MINIMUM MANDATORY COURT SENTENCE FOR CRIMINAL OFFENSES; WORK RESTITUTION PROGRAM; ADDITIONAL PENALTIES

SEC. 318. Subsections (b) and (c) of section 15 of the Food Stamp Act of 1977 are amended to read:

"(b)(1) Subject to the provisions of paragraph (2) of this subsection, whoever knowingly uses, transfers, acquires, alters, or possesses coupons or authorization cards in any manner not authorized by this Act or the regulations issued pursuant to this Act shall, if such coupons or authorization cards are of a value of $100 or more, be guilty of a felony and shall, upon the first conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than six months nor more than five years and may also be fined not more than $10,000 or, if such coupons or authorization cards are of a value of less than $100, shall be guilty of a misdemeanor, and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.

"(2) In the case of any individual convicted of an offense under paragraph (1) of this subsection, the court may permit such individual to perform work approved by the court for the purpose of providing restitution for losses incurred by the United States and the agency as a result of the offense for which such individual was convicted. If the court permits such individual to perform such work and such individual agrees thereto, the court shall withhold the imposition of the sentence on the condition that such individual perform the assigned work. Upon the successful completion of the assigned work the court may suspend such sentence.

"(c) Whoever presents, or causes to be presented, coupons for payment or redemption of the value of $100 or more, knowing the same to have been received, transferred or used in any manner in violation of the provisions of this Act or the regulations issued pursuant to this Act, shall be guilty of a felony and, upon the first conviction thereof, shall be fined not more than $10,000 or imprisoned for not more than five years or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than one year nor more than five years and may also be fined not more than $10,000, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.".

STAFFING STANDARDS

SEC. 319. Section 16(b)(1) of the Food Stamp Act of 1977 is amended by striking ", including, but not limited to, staffing standards such as caseload per certification worker limitations,".

CORRECTIVE ACTION PLANS

SEC. 320. Section 16 of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence of subsection (c) the following ", and, effective October 1, 1981, which also meets the standard contained in paragraph (1)(B) of this subsection"; and

(2) in subsection (d), striking "October 1, 1978" and inserting in lieu thereof "October 1, 1981", and by inserting "(2)" after "subsection (c)".

SOCIAL SECURITY ACCOUNT NUMBERS

SEC. 321. The first sentence of section 16 (f) of the Food Stamp Act of 1977 is amended by striking "may" and inserting in lieu thereof "shall".

AFDC AND SSI CASH-OUT PILOT PROJECTS

SEC. 322. Section 17(b)(1) of the Food Stamp Act of 1977 is amended by—

(1) inserting "the payment of the value of allotments in the form of cash to eligible households all of whose members are recipients of aid to families with dependent children under part A of title IV of the Social Security Act: *Provided*, That such cash payments shall be in standard monthly amounts varied to reflect the average allotment received by households of similar size, income, and expense characteristics," after "Social Security Act,";

(2) inserting ", other than a project involving the payment of standard monthly allotments to recipients of aid to families with dependent children authorized under this subsection," after "no project"; and

(3) changing the last sentence to read: "Any pilot or experimental project implemented under this paragraph involving the payment of the value of allotments in the form of cash to eligible households all of whose members are either age sixty-five or over or entitled to supplemental security income benefits under title XVI of the Social Security Act shall be continued until October 1, 1985, if the State so requests.".

VARIABLE ALLOTMENT STUDY; REPORTS

SEC. 323. (a) The Secretary is directed to evaluate the feasibility, benefits, and disadvantages of adjusting household allotments with respect to the age and sex of household members, including an evaluation of the individualized allotment issues and conclusions in the General Accounting Office report of June 13, 1978 (Federal Domestic Food Assistance Programs—A Time for Assessment and Change), and submit the results of that study to Congress no later than July 1, 1982.

(b)(1) Section 5(g) of the Food Stamp Act of 1977 is amended by striking everything after "exceeds $4,500" and inserting a period in lieu thereof.

(2) Section 8(a) of that Act is amended by striking the last sentence.

(3) Section 17 of that Act is amended by striking subsections (d) and (e).

PILOT PROJECTS TO SIMPLIFY THE PROCESSING OF APPLICATIONS FOR CERTAIN AFDC AND SSI RECIPIENTS

SEC. 324. Section 17 of the Food Stamp Act of 1977 is amended by inserting a new subsection as follows:

"(d) The Secretary is authorized to conduct two pilot projects in which households that consist entirely of recipients of aid to families with dependent children under part A of title IV of the Social Security Act, and households that consist entirely of recipients of supplemental security income under title XVI of the Social Security Act, whose gross income does not exceed 130 per centum of the nonfarm income poverty guidelines prescribed by the Office of Management and Budget, shall be deemed to satisfy the application requirements prescribed under section 5(a) of this Act and the income and resource requirements prescribed under sections 5(c) through 5(g) of this Act. Allotments provided pursuant to section 8(a) of this Act shall be based upon household size and the benefits paid to such household under part A of title IV, and title XVI, of the Social Security Act, respectively: *Provided*, That the Secretary shall also make such modifications in the value of such allotments as may be necessary to assure that in each pilot project area, average food stamp benefits by household size for households receiving aid to families with dependent children and participating in the pilot project, and for households receiving supplemental security income and participating in the pilot project, are not reduced below what such average benefits would be under this Act for each such category of households, respectively, in each such pilot project area, for the period or periods the pilot project is in operation. The Secretary may conduct such projects on a statewide basis in two States, or in political subdivisions within such States, and shall evaluate the impact on recipient households, administrative costs, and error rates.".

TITLE IV—AUTHORIZATION FOR APPROPRIATIONS; APPROPRIATION ACCOUNTS; EFFECTIVE DATES

SEC. 401. The first sentence of section 18 (a)(1) of the Food Stamp Act of 1977 is amended by—

(1) striking "and" after "September 30, 1980;";

(2) striking "$9,739,276,000" and inserting in lieu thereof "$11,480,000,000"; and

(3) inserting before the period at the end thereof the following: "; not in excess of $10,870,000,000 for the fiscal year ending September 30, 1982; not in excess of $11,290,000,000 for the fiscal year ending September 30, 1983; not in excess of $11,325,000,000 for the fiscal year ending September 30, 1984; and not in excess of $11,840,000,000 for the fiscal year ending September 30, 1985.".

APPROPRIATION ACCOUNTS

SEC. 402. Section 18 of the Food Stamp Act of 1977 is amended by adding a new subsection (e) to read:

"(e) Funds collected from claims against households or State agencies, including claims collected pursuant to sections 7(f), 11(h), and 16(g) of this Act, claims resulting from resolution of audit findings, and claims collected from households receiving overissuances, shall be credited to the food stamp program appropriation account for the fiscal year in which the collection occurs. Funds provided to State agencies under section 16(c) of this Act shall be paid from the appropriation account for the fiscal year in which the funds are provided.".

EFFECTIVE DATES

SEC. 403. Except as otherwise specifically provided, the amendments made by this Act shall be effective and implemented upon such dates as the Secretary may prescribe, taking into account the need for orderly implementation. The amendments made by section 401 of this Act shall be effective upon enactment.

TITLE V—COMMODITY DISTRIBUTION PROGRAMS

EXTENSION OF AUTHORITIES, PENALTIES FOR FRAUD, AND MISCELLANEOUS PROVISIONS

SEC. 501. (a) Effective October 1, 1981, section 4 of the Agriculture and Consumer Protection Act of 1973 is amended by—

(1) striking "1978, 1979, 1980, and 1981", in the first sentence of subsection (a) and inserting in lieu thereof: "1982, 1983, 1984, and 1985"; and

(2) adding a new subsection (c) to read:

"(c) Whoever embezzles, willfully misapplies, steals or obtains by fraud any agricultural commodity or its products (or any funds, assets, or property deriving from donation of such commodities) provided under this section, or under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431), section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), or section 709 of the Food and Agriculture Act of 1965 (7 U.S.C. 1446a–1), whether received directly or indirectly from the United States Department of Agriculture, or whoever receives, conceals, or retains such commodities, products, funds, assets, or property for personal use or gain, knowing such commodities, products, funds, assets, or property have been embezzled, willfully misapplied, stolen, or obtained by fraud shall, if such commodities, products, funds, assets, or property are of a value of $100 or more, be fined not more than $10,000 or imprisoned not more than five years, or both, or if such commodities, products, funds, assets, or property are of value of less than $100, shall be fined not more than $1,000 or imprisoned for not more than one year, or both.".

(b) Effective October 1, 1981, section 5(a) of that Act is amended to read:

"(a) In carrying out the supplemental feeding program (hereinafter referred to as the 'commodity supplemental food program') to which reference is made in section 4 of this Act, the Secretary of Agriculture shall provide to State agencies administering the program, for each of the fiscal years 1982 through 1985, funds appropriated from the general fund of the Treasury in amounts equal to the administrative costs of State and local agencies in operating the program, except that the funds provided to State agencies each fiscal year may not exceed 15 per centum of the amount appropriated for the provision of commodities to State agencies.".

TITLE VI—FOOD STAMP CASH-OUT OF SSI RECIPIENTS

MODIFICATION OF CASH-OUT STATUS

SEC. 601. Effective July 1, 1981, section 8(d) of Public Law 93–233 is amended to read:

"(d) Upon the request of a State, the Secretary shall find, for purposes of the provisions specified in subsection (c), that the level of such State's supplementary payments of the type described in section 1616(a) of the Social Security Act has been specifically increased for any month after June 1976 so as to include the bonus value of food stamps if: (1) the Secretary has found that such State's supplementary payments in June 1976 were increased to include the bonus value of food stamps; and (2) such State continues to meet the requirements of section 1618 of such Act for each month after June 1976 and up to and including the month for which the Secretary is making the determination.".

TITLE VII—PUERTO RICO

REDUCTION OF PUERTO RICO INCOME LIMITS

SEC. 701. Effective October 1, 1981, the proviso in section 5(c) of the Food Stamp Act of 1977 is amended to read: "*Provided*, That in no event shall the standards of eligibility for the Virgin Islands of the United States or Guam exceed those in the forty-eight contiguous States, and such standards for Puerto Rico shall be 55 per centum of those in the forty-eight contiguous States".

BLOCK GRANT

SEC. 702. (a) Effective April 1, 1982, the Food Stamp Act of 1977 is amended by—

(A) striking "Puerto Rico," in section 3 (m), clause (3) of section 3(o), section 5 (b), wherever it appears in section 5(c) before the proviso, and wherever it appears in section 5(e) and striking "$50," and "$40," in section 5(e); and

(B) striking everything in section 5(c) after the first "forty-eight contiguous States" and inserting a period in lieu thereof.

(b) Effective April 1, 1982, that Act is further amended by adding at the end thereof the following new section:

"BLOCK GRANT

"SEC. 19. (a)(1)(A) From the sums appropriated under this Act the Secretary shall, subject to the provisions of this subsection and subsection (b), pay to the Commonwealth of Puerto Rico not to exceed $825,000,000 for each fiscal year to finance 100 per centum of the expenditures for food

assistance provided to needy persons, and 50 per centum of the administrative expenses related to the provision of such assistance.

"(B) The payments to the Commonwealth for any fiscal year shall not exceed the expenditures by that jurisdiction during that year for the provision of the assistance the provision of which is included in the plan of the Commonwealth approved under subsection (b) and 50 per centum of the related administrative expenses.

"(2) The Secretary shall, subject to the provisions of subsection (b), pay to the Commonwealth for the applicable fiscal year, at such times and in such manner as the Secretary may determine, the amount estimated by the Commonwealth pursuant to subsection (b)(1)(A)(iv), reduced or increased to the extent of any prior overpayment or current underpayment which the Secretary determines has been made under this section and with respect to which adjustment has not already been made under this subsection.

"(b)(1)(A) In order to receive payments under this Act for any fiscal year, the Commonwealth shall have a plan for that fiscal year approved by the Secretary under this section. By July 1 of each year, if the Commonwealth wishes to receive payments, it shall submit a plan for the provision of the assistance described in subsection (a)(1)(A) for the following fiscal year which—

"(i) designates a single agency which shall be responsible for the administration, or supervision of the administration, of the program for the provision of such assistance;

"(ii) assesses the food and nutrition needs of needy persons residing in the Commonwealth;

"(iii) describes the program for the provision of such assistance, including the assistance to be provided and the persons to whom such assistance will be provided, and any agencies designated to provide such assistance, which program must meet such requirements as the Secretary may by regulation prescribe for the purpose of assuring that assistance is provided to the most needy persons in the jurisdiction;

"(iv) estimates the amount of expenditures necessary for the provision of the assistance described in the program and related administrative expenses, up to the amount provided for payment by subsection (a)(1)(A); and

"(v) includes such other information as the Secretary may require.

"(B)(i) The Secretary shall approve or disapprove any plan submitted pursuant to subparagraph (A) no later than August 1 of the year in which it is submitted. The Secretary shall approve any plan which complies with the requirements of subparagraph (A). If a plan is disapproved because it does not comply with any of the requirements of that subparagraph the Secretary shall, except as provided in subparagraph (B)(ii), notify the appropriate agency in the Commonwealth that payments will not be made to it under subsection (a) for the fiscal year to which the plan applies until the Secretary is satisfied that there is no longer any such failure to comply, and until the Secretary is so satisfied, the Secretary will make no payments.

"(ii) The Secretary may suspend the denial of payments under subparagraph (B)(i) for such period as the Secretary determines appropriate and instead withhold payments provided for under subsection (a), in whole or in part, for the fiscal year to which the plan applies, until the Secretary is satisfied that there is no longer any failure to comply with the requirements of subparagraph (A), at which time such withheld payments shall be paid.

"(2)(A) The Commonwealth shall provide for a biennial audit of expenditures under its program for the provision of the assistance described in subsection (a)(1)(A), and within one hundred and twenty days of the end of each fiscal year in which the audit is made, shall report to the Secretary the findings of such audit.

"(B) Within one hundred and twenty days of the end of each fiscal year, the Commonwealth shall provide the Secretary with a statement as to whether the payments received under subsection (a) for that fiscal year exceeded the expenditures by it during that year for which payment is authorized under this section, and if so, by how much, and such other information as the Secretary may require.

"(C)(i) If the Secretary finds that there is a substantial failure by the Commonwealth to comply with any of the requirements of subparagraphs (A) and (B), or to comply with the requirements of subsection (b)(1)(A) in the administration of a plan approved under subsection (b)(1)(B), the Secretary shall, except as provided in subpargraph (C)(ii), notify the appropriate agency in the Commonwealth that further payments will not be made to it under subsection (a) until the Secretary is satisfied that there will no longer be any such failure to comply, and until the Secretary is so satisfied, the Secretary shall make no further payment.

"(ii) The Secretary may suspend the termination of payments under subparagraph (c)(i) for such period as the Secretary determines appropriate, and instead withhold payments provided for under subsection (a), in whole or in part, until the Secretary is satisfied that there will no longer be any failure to comply with the requirements of subparagraphs (A) and (B) and subsection (b)(1)(A), at which time such withheld payments shall be paid.

"(iii) Upon a finding under subpargraph (C)(i) of a substantial failure to comply with any of the requirements of subparagraphs (A) and (B) and subsection (b)(1)(A), the Secretary may in addition to or in lieu of any action taken under subpargraphs (C)(i) and (C)(ii), refer the matter to the Attorney General with a request that injunctive relief be sought to require compliance by the Commonwealth of Puerto Rico, and upon suit by the Attorney General in an appropriate district court of the United States and a showing that noncompliance has occurred, appropriate injunctive relief shall issue.

"(c)(1) The Secretary shall provide for the reivew of the programs for the provision of the assitance described in subsection (a)(1)(A) for which payments are made under this Act.

"(2) The Secretary is authorized as the Secretary deems practicable to provide technical assistance with respect to the programs for the provision of the assistance described in subsection (a)(1)(A).

"(d) Whoever knowingly and willfully embezzles, misapplies, steals, or obtains by fraud, false statement, or forgery, any funds, assets, or property provided or financed under this section shall be fined not more than $10,000 or imprisoned for not more than five years, or both, but if the value of the funds, assets, or property involved is not over $200, the penalty shall be a fine of not more than $1,000 or imprisonment for not more than one year, or both.".

(c) Notwithstanding the provisions of section 10 of the Food Stamp Act of 1977, as added by this section, the amount payable to Puerto Rico under section 19 for fiscal year 1982 shall be $413,000,000, and the Secretary is authorized to grant such waivers of the requirements imposed by that section with respect to that fiscal year as the Secretary determines appropriate to carry out the purposes of that section.

Mr. LEAHY. Mr. President, with that, I understand we complete action on this bill.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. LEAHY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LEAHY. Mr. President, that completes action on the food stamp bill. It has been a long and arduous and perhaps somewhat interesting educational thing for a lot of us in this body, myself included. I thank Senator DOLE for the bipartisan effort he made to work with me and others in forming a series of amendments that were included.

I thank the distinguished chairman of the committee (Mr. HELMS) for his unfailing courtesy and for giving us time to bring up the arguments and the amendments and the markup on the bill. Even though I expect there were occasions when he did not agree with the particular thrust of the amendment, there was never a time that any of us could have suggested for one moment that we did not have an adequate chance to be heard. If we had any question over a period of time, our rights were protected and respected.

I also thank very much Rob Fersh, Janet Breslin, and Ken Pierce of my staff, who worked with me on this. I rarely, if ever, have had a time when I have been so thoroughly and adequately briefed by staff. I do thank them.

Lastly, of course, Mr. President, I thank the distinguished ranking member of the Committee on Agriculture (Mr. HUDDLESTON), who helped so long and worked with our distinguished leader (Mr. ROBERT C. BYRD) to try to make sure that we kept our end of the package on track.

I yield the floor.

Mr. HELMS. Mr. President, the Senator from North Carolina was in the happy position of feeling obliged to vote against a bill emanating from the committee which he chairs. I thank Senator LEAHY for his kind comments, and I want him to know that I always enjoy working with him, no matter how much we may disagree. Of course, the same goes for the distinguished Senator from Kansas (Mr. DOLE).

As to this bill which was just passed, the Senate sent a message to the American people today, "Don't look for a balanced budget any time soon." Because, Mr. President, if we did not have the fortitude to reduce this bill further, I very much doubt that Congress is going to have the fortitude to make the necessary reductions in Federal spending that will be essential if we are to move toward the balanced budget which all of us go home and tell all our constituents that we favor from the bottom of our hearts. While we did do some cosmetic things and while we did do some real improvements, this bill still should have been about $1½ billion lower than it was. It is for that reason that I felt obliged to vote against it.

It is for the same reason that I voted in committee against reporting the bill. I think we must do more in terms of tightening up these extravagant welfare programs of all types—as a matter of

fact, all governmental programs across the spectrum—if we are to make good on our promise to the American people to achieve a balanced budget and stop inflation. I thank the Chair.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business in which Senators may speak for not to exceed 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

CHARLES W. YOST

Mr. PELL. Mr. President, Charles W. Yost combined two wonderful qualities. First, he was the most skilled, polished, and professional diplomat with whom I ever had the very good fortune to be associated. Second, he was a man who never permitted his Wilsonian idealism to be throttled by his profession or by his professionalism.

He combined both these qualities of consummate diplomatic ability and Wilsonian idealism throughout his life, starting as a young vice consul in Alexandria, and then working in and out of the Foreign Service and Government until he achieved the rank of Ambassador. As Ambassador, he was accredited to Laos, Syria, and Morocco, and subsequently he was appointed U.S. Ambassador to the United Nations. Moreover, he was one of only 22 people ever appointed to the rank of Career Ambassador in our Foreign Service.

Charles Yost combined these two threads of professional diplomacy and Wilsonian idealism with a singular competence in multilateral diplomacy. He acquired this skill through his work at the Dumbarton Oaks Conference and the San Francisco Conference that created the United Nations, by serving as Secretary of the U.S. delegation at the Potsdam Conference, and through his several tours of duty at the United Nations.

Charles Yost was a dear and close personal friend—he was godfather to my daughter as my wife is godmother to his daughter. We shared a house together while in the Foreign Service, and twice he played an important role in my Foreign Service career, making it possible for me to establish our Consulate General at Bratislava, Czechoslovakia, and later bringing me back to the State Department as his assistant.

A memorial service for Charles Yost was held at the Washington Cathedral on June 1. Mr. President, I ask unanimous consent that the program from that service and the reading and eulogies offered by his children and Arthur Schlesinger, Jr., be printed at this point in the RECORD. I also ask that Philip Geyelin's tribute to Charles Yost in June 6's Washington Post be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A MEMORIAL SERVICE FOR CHARLES W. YOST, 1907–1981

(Monday, June 1, 1981, 4:00 P.M., Washington Cathedral.)

Organ prelude: Toccata and Fugue in E; Johann Sebastian Bach.

Opening sentences: Standing, Reverend Michael P. Hamilton.

The scriptures: Seated, Donald Dunham, Micah 4:1–5 and Matthew 5:1–10.

Hymn: Standing and in unison, "St. Anne."

O God, our help in ages past,
Our hope for years to come,
Our shelter from the stormy blast,
And our eternal home:

Under the shadow of thy throne
Thy saints have dwelt secure;
Sufficient is thine arm alone,
And our defence is sure.

Before the hills in order stood,
Or earth received her frame,
From everlasting thou art God,
To endless years the same.

A thousand ages in thy sight
Are like an evening gone;
Short as the watch that ends the night
Before the rising sun.

Time, like an ever-rolling stream,
Bears all its sons away;
They fly, forgotten, as a dream
Dies at the opening day.

O God, our help in ages past,
Our hope for years to come,
Be thou our guide while life shall last,
And our eternal home. Amen.

(Isaac Watts, 1979; based on Psalm 90.)

Readings: Seated, Felicity O. Yost. Writings by Charles W. Yost.

Prayers: Kneel, Reverend Michael P. Hamilton.

Eulogies: Seated, Nicholas C. Yost, Casimir A. Yost, Arthur M. Schlesinger, Jr.

Prayers and blessing: Kneel, Reverend Michael P. Hamilton.

Recessional: Toccata, Adagio and Fugue in C, Johann Sebastian Bach.

EULOGY BY FELICITY D. YOST

So many times in my life I have called on my father and he has been there with the words I needed. But he is no longer here and I, being a painter, am without the words I need to share my thoughts with you. To talk to you of our friendship I would have to play for you a symphony of Mahler's. To visualize for you our love you would have to watch me paint several portraits of him—

For I see a portrait of a man who said, "Life is questions. When we stop asking them, whether at twenty or eighty, then we are old."

And so he shared with me his curiosity.

I see the portrait of a realist who said, "In these days of ever impending disaster we have no warrant for hope, but in these days of ever impending paradise we have no excuse for despair . . . I strongly incline to hope."

And so he shared with me his optimism.

I see the portrait of my father the poet who said,

"Some have a century to sing
Some have a blessed minute.
So children, scrub your pretty ears
And rinse your prying eyes,
No peeping Tom can ever see
Enough before he dies.
Don't fail to keep the grasses green
And all the waters bright,
Lest other children waking late
Should never see this sight."

And so he shared with me his passion for life.

I see the portrait of a humanist who said, "Every war ends in peace; the object, it seems to my simple mind, ought to be to bring about the peace without the war."

And so he shared with me his abhorrence of war.

I see the portrait of my father who said, "Art, architecture, music, literature often express more powerfully and more poignantly, at least for posterity the quintessences of an age and a civilization than do its politics and its philosophy."

And so he shared with me faith in my work.

And lastly I see a portrait I discovered only a few days after my father's death in a passage of Bertrand Russell's that he had underlined.

"Some old people are oppressed by the fear of death. In the young there is justification for this feeling . . . But in an old man who has known human joys and sorrows, and has achieved whatever work it was in him to do, the fear of death is somewhat abject and ignoble. The best way to overcome it . . . is to make your interests gradually wider and more impersonal, until bit by bit the walls of the ego recede, and your life becomes increasingly merged in the universal life . . . The man who, in old age, can see his life in this way, will not suffer from the fear of death, since the things he cares for will continue. And if, with the decay of vitality, weariness increases, the thought of rest will not be unwelcome. I should wish to die while still at work, knowing that others will carry on what I can no longer do, and content in the thought that what was possible has been done."

EULOGY BY NICHOLAS C. YOST

Thank you for being with Mom and my brother and sister and myself at Dad's memorial service.

Dad wanted to and did remain young until he died. Only a few months ago, knowing he had cancer, Dad quoted to me a letter from Dean Acheson to President Truman. "My seventy-fifth year opened without noticeable pain," wrote Acheson. "I am now getting accustomed to the idea, though it does run counter to an idea of myself which still hovers in my mind—that I am a promising lad and may get somewhere if I work hard and stay sober." Dad shared that outlook, and, as you know, lived his life to the full until the end giving speeches the week before his death and taking a swim the weekend before. He died peacefully, surrounded by his family.

In preparing to talk today about Dad, I wasn't sure where to begin—about Dad who gave Mom and the three of us children love and patience and a deliberately gentle sort of guidance; about Dad who was fascinated by all that people do—by science and the arts and philosophy and history, introducing us children to some of them, exposing us to others.

But I think Dad would have preferred before this gathering of colleagues and friends that I talk about the work he did and the work that is left undone.

Central to Dad's outlook was understanding—understanding and sympathizing with the other person. In a set of dialogues he wrote almost twenty years ago Dad ascribed words to a character which reflect his own views:

"Both waging and ending the cold war come down, in my way of thinking, to what actually is the 'ultimate weapon', that is, understanding and understanding sympathetically, the other man's point of view. That doesn't mean you have to agree with his point of view. On the contrary you may loathe it. But you have to make an effort, a painful effort, to understand why he feels and acts the way he does, why, given his background and circumstances, it's natural that he should feel and act that way, and even to admit to yourself that if you were in his shoes all the way up to your neck one might say, you'd very probably feel and act as he does."

Diplomacy to Dad was not only a craft but a tool—a tool to realize the purposes affirmed in the United Nations charter. You remember those goals, "to promote social progress" and, central to Dad's work, "to save succeeding generations from the scourge of war." He fully recognized the imperfections of the U.N.'s efforts but equally fully recognized the necessity of their success. "If the U.N. did not exist," he was fond of quoting Dag Hammerskjold, "we would have to invent it."

Dad's view was clear. In his words, "There will never be security for nations and people's until there exists some impartial and effective international authority, expressing man's best instincts and common interests, designed and empowered to keep the peace, restrain aggressive governments, control national armaments, negotiate and enforce peaceful settlements, facilitate peaceful change, and assist new states to develop and modernize."

That vision of what must be was always there, guiding Dad's actions. To quote the poet Tennyson:

"For I dipt into the future, far as human eye could see,
Saw the vision of the world, and all the wonder that would be;"

And the poet continues through commerce and through war, and concludes:

"Till the war-drum throbbed no longer, and the battle-flags were furled
In the parliament of man, the Federation of the World."

That day is yet to come, when the United Nations as a whole is stronger than any of its parts. But come it must and come it will. In Dad's words: "The passing of powers from old to new, from parochial to ecumenical, from states separating peoples to institutions uniting them, will not be accomplished quickly or easily. Still it seems high time to begin."

EULOGY BY CASIMIR A. YOST

I want to join my brother in thanking all of you for being with us today in remembering and honoring a man who had the great love of his family and the enormous respect of all who knew him.

My father closed one of his books with a passage which says much about his approach to life and to dying. "When he was over eighty and had retired to a farm in Lorraine, Marshal Lyautey instructed his gardener to set out some fruit trees. But they will not bear fruit for twenty years, protested the gardener. Then we must lose no time, said the Marshal, but plant them tomorrow."

My father lived his life fully to the end. He knew a year ago that he had terminal cancer. Few outside of his family were informed. In the intervening period he had one book published and completed the draft of another. He wrote regular articles, gave numerous speeches, participated in seminars and board meetings, and ran foot races down the halls of his apartment building with his grandchildren whom he loved and who loved him.

My brother, sister and I have each taken different professional routes and yet each of us was enriched through association with this marvelously broad, learned and loving man. My sister drew on his deep appreciation of the arts. My brother tapped his interest in nature and concern for a deteriorating environment.

I spoke with him of history and diplomacy, politics and personalities, of how nations behave and misbehave. His impact on my thinking has been profound. I have cherished, in particular, the opportunity to be together that we had these last few years here in Washington.

Charles Yost was a man steeped in history, who looked continually to the future. He frequently cited Adlai Stevenson's query posed just before his death, "The central question, as I see it, is whether the wonderfully diverse and gifted assemblage of human beings on this earth really knows how to run a civilization."

My father died without finally answering Stevenson's question, believing that man's fate remains uncertain.

"It is worth repeating again and again," he wrote in 1968, "because it has not yet been fully comprehended, not yet felt in our bones, that never before in human history has so much hung in balance. Never before has it been physically possible for men to achieve at least a material utopia in a few decades; never before has it been both physically and psychologically possible for men in a matter of months or days to come so close to destroying life on this planet, at least to setting back civilization a thousand years."

It was to put off this second possibility that he devoted the better part of his professional life—as a diplomat, as an author, lecturer, teacher, and father.

He believed intensely in the concept of service to his country and to mankind. He was proud to call himself a career foreign service officer and saddened only by the failure of successive U.S. presidents to adequately utilize the tremendous human resources of the Department of State.

In his life and work he defined national interest and national security broadly. Perhaps this is why it was easier for him than for many others to see the potential of the United Nations to be a positive factor in global politics.

He feared for our ability to meet the challenges of a world that had changed dramatically in his lifetime. But like the aged Marshal Lyautey he never doubted that we should plant fruit trees toward a better future.

His last book was dedicated, "To my grandchildren and to their generation." I like to think that they and their generation's prospects are better because of the contributions of their grandfather.

EULOGY BY ARTHUR SCHLESINGER, JR.

Quite apart from the profound shock and sorrow we all felt at Charles Yost's death, I think many of us were astonished to discover that he was in his 74th year. He did not look like a man of 73; he did not think like a man of 73; and he preserved to the end of his days a contemporaneity, an understanding of the modern, a sympathy with new generations, a perennial youthfulness of spirit, an unvanquished idealism, that kept him always in vital touch with an implacably turning world.

Yet in fact he entered the Foreign Service half a century ago—another world, another age. After graduating from Princeton in 1928, he had taken off, like many young Americans of the day (and some notable Princetonians), to Paris. This was the last year of the last light-hearted time of the 20th century. Charlie Yost lived in a shabby pension in the Latin Quarter, studied intermittently at the Ecole des Hautes Ecoles Internationales, spent evenings at the Dome and Rotonde, rubbed elbows with Scott Fitzgerald, frequented Sylvia Beach's bookstore, traveled around the continent and spent three memorable weeks in the Soviet Union. It was, as he wrote in the fragrant autobiographical passages of *History and Memory*, the "last untroubled" time "before the storms broke" (22).

History and Memory gives a vivid impression of this ardent, intelligent young man savoring the delights of a Europe that, as he later recalled, "seemed to have recovered from the debacle of World War I and to be resuming once more the triumphant progress it had so stupidly and unnecessarily interrupted by this wholesale fratricide" (19). Yet mankind was only a year away from the most shattering economic crash of modern times, only four years from Hitler's rise to power, only ten years from a new world war. Charles Yost spent much of his later life trying to comprehend what had happened to "the bright dawn of the new age" (23). His became a passionate search for dispassionate understanding. He read omnivorously—not only in politics and diplomacy, but in history, in psychology, in anthropology, in the revelations of poets and novelists. One was always amazed by the range of reference in his conversation and in his books.

Let me, I hope not too parochially, emphasize his concern for history, an area of inquiry considerably neglected by politicians and by diplomats. His own profession, he often felt, did not take "sufficient pains to gain a comprehensive view of the whole situation," looking instead at chosen parts through spectacles distorted by doctrine or by nostalgia (Insecurity of Nations, 4). He believed profoundly in the long view. He knew that the present is the creation of the past and saw every reason not only to remember history "but to reflect upon it most earnestly, to analyze it with the greatest possible objectivity in order to determine . . . where we and our fathers went wrong." True understanding of the past, he fervently hoped, might help our children "escape another revolution of the dreary wheel of human error, needless conflict, and man-made disaster (*H&M*, 11).

He was impressed especially by the acceleration in the rate of historical change. Time and space were contracting; and crises, once "cushioned by oceans and years, now explode in the briefest span of time and are at once echoed almost everywhere" (Conduct and Misconduct of Foreign Affairs, 195). The 20th century, he recognized, had witnessed "a shattering convergence of revolutions in faith, science, politics, and economics, [and] a failure to adjust to the consequences of these revolutions" (Insecurity, 5). The cumulative impact of modern science and technology, he came to believe, had imposed "a qualitative change in the character of human and international relations" (Conduct, 195).

His own experience promoted the quest for understanding. In 1930, the second year of the Hoover administration, he had begun what would be, with interruptions, a lifetime career in the Foreign Service. His first assignment was as vice-consul in Alexandria. In 1932 he was sent on to Warsaw. Bored by consular work, he decided to quit the Foreign Service and write a novel. On a weekend cruise to Stockholm, he saw a pretty Polish girl as she stepped out of a contiguous stateroom. Wasting no time, he asked her whether she spoke English. She said, "Yes." This turned out to be her only English word; but, from Charlie's viewpoint, what word could have been better?—and she learned more words later. He married his lovely Irene in Warsaw in 1934.

He wrote away on his novel in Greenwich Village. His memoirs remain mute about its fate. The excitements of New Deal Washington were evidently too compelling. He joined the march to Washington, worked for Harry Hopkins in the WPA and for Rexford Tugwell in the Resettlement Administration and remained a New Dealer the rest of his life. Then one of his Princeton professors, who had gone to the State Department, invited him to serve as his deputy in the new Office of Arms and Munitions Control. Returning to a diplomatic career, still under 30, he was thrust into the center of the problems raised for American policy by the neutrality legislation of the day—problems that compelled him to attend to wars from Ethiopia and Spain to China. By the end of the decade he was helping to administer the moral embargo against Japan.

Then came Pearl Harbor and the customary

tumult of war jobs. In retrospect, what affected him most were clearly his assignment in 1942 as secretary of the Subcommittee on Security Problems of the State Department's Advisory Committee on Post-War Foreign Policy and his subsequent assignment in 1944 as executive secretary of Cordell Hull's Policy Committee. This second job involved him deeply in the Dumbarton Oaks conference, where he served as secretary of the committee dealing with the security and enforcement powers of the projected United Nations. Here he helped draft the critical security sections, Chapters VI and VII, of the United Nations Charter. Subsequently he assisted in the birth of the UN in San Francisco as assistant to the Secretary of State.

Charles Yost's experience in American arms export policy in the 1930s and in international organization planning in the early 1940s gave him an unusual training in multilateral diplomacy. This came in a day when professional Foreign Service outlook and advancement still firmly resided in the traditional structure of bilateral relations. The tension between bilateral and multilateral approaches to international affairs has been—and remains—a pivotal issue in the conduct of American foreign policy. Among the professionals, Charlie was one of the first to see international relations in the new dimension.

After the war he returned to the bilateral life. But what he called in an engaging phrase "the eternally astonishing roulette of State Department assignments" (*H&M*, 231) sent him, after San Francisco, to Potsdam in 1946, to Vienna in 1947, to Athens in 1950, to Laos in 1954, to Paris in 1956, to Syria in 1958, and then to Morocco—a kaleidoscope of experience that confirmed his conviction that American diplomacy must come to terms with multiple responsibilities in the postwar world.

His quest for an understanding of the breakdown of the old order never stopped. The more he brooded over modern history, the more certain he became that the traditional conception of international affairs as a system effectively ordered by national interest and the balance of power was an illusion; that there had been in the 19th century "really no international system at all," but only "national systems of varying degrees of effectiveness" adding up to "international anarchy" (*H&M*, 29).

National security was indeed the obsession of nations. Charles Yost saw in this obsession the factor that above all obstructed man's capacity to manage the forces of historical change. "The pursuit of security," he wrote, ". . . multiplied and disseminated insecurity" (*Insecurity*, 104). Where others spoke of national security, he spoke of "the insecurity of nations"—the title of his book of 1968—saw that insecurity as chronic and inherent, and traced it to "the very attribute on which nations pride themselves most—their sovereign independence, their 'sacred egoism,' their insubordination to any interest higher or broader than their own" (*Insecurity*, 253). The nation-state, he believed, was becoming obsolescent as a means of international organization, and he wondered how long the human race could stand the exercise of its "fatal charisma" (*Insecurity*, 212).

The way to overcome international anarchy, he concluded, was through the development of international institutions. He did not deceive himself about the difficulty of this undertaking. If the nation-state system had become "too parochial, too clumsy, too competitive and too unscrupulous to serve us safely any longer," still most of mankind remained "subject to its myths," and it was "unlikely to be replaced quickly (*Conduct*, 211). The idea of a "rational organization of human society," he readily agreed, was utopian. But would it seem more utopian in the perspective of history than "the curious endeavors of most of our present leaders, inspired by a passionate and reckless nostalgia, to apply to emerging twenty-first-century circumstances the political, military and economic techniques of the nineteenth and early twentieth centuries"? (*Conduct*, 224). While man's knowledge had expanded, his conduct of international relations "remains almost as primitive, unsophisticated and irrational as it was at the end of the Middle Ages" (*Conduct*, xvii).

Yost's was, as he was never ashamed to confess, a Wilsonian vision of the future. There was, he wrote, "an element of heroic naivete" in that vision (*Conduct*, 75). But "the perils of unbridled nationalism required "international institutions commensurate with the global nature of the challenges we face" (*H&M*, 328). "Wilson," he wrote, "died a broken man; but he will probably be a hero to the twenty-first or twenty-second centuries—if civilization survives until then" (*H&M*, 44).

Possessed by this vision, he renounced in 1961 the normal course of professional advancement, turning down ambassadorships in Yugoslavia, Greece and Austria in order to serve as deputy ambassador to the United Nations. His two chiefs—Adlai Stevenson and Arthur Goldberg—were both men who, each in his own style, shared and pursued the Wilsonian hope. Charles Yost served them with incomparable efficiency and admiring devotion. In 1966 he retired to write a book; but in 1969, to his surprise, he himself became our ambassador to the United Nations, where he strove valiantly, in somewhat adverse circumstances, to keep the vision alive.

His mission in life was to combat what he called "the certifugal forces of chauvinism, parochialism, fanaticism, primitivism, and indifference" (*H&M*, 338) that shadowed the world with violence and war. In a planet consumed by ideological rages, by a nuclear arms race, by a population explosion, by the turbulence of new states, by the depletion of energy resources and by the accelerating velocity of history, he saw no alternative but to seek, frail as the hope might be, for the means of international collaboration. Even those wedded to the harsh truths of *Realpolitik* must acknowledge the desperate necessity of a counterbalancing conception of diplomatic possibility.

Charles Yost's life presents the gallant spectacle of a surpremely rational man trying to make sense of a supremely irrational age. He brought to his vision the tough skills of an exemplary professional diplomat, the stubborn hope of a man of reason and the wisdom of a thoroughly civilized human being. He was a man of gentle strength and of fidelity, humor and patriotism, self-effacing in manner, tenacious in conviction, *suaviter in modo, fortiter in re*. He was blessed by a marriage of singular felicity and children in whom he took the greatest pride. He died, as he lived, quietly and gracefully. He will be cherished by all who encountered him not only as a remarkable staunch and beguiling friend but as a brave pioneer in the hazardous enterprise of building a decent world.

Thinking of Charles Yost, one recalls the great lines of Walt Whitman:

Years of the modern! years of the unperform'd;
Your horizon rises, I see it parting away for more august dramas.
I see not America only, not only Liberty's nation but other nations preparing,
I see tremendous entrances and exits, new combinations, the solidarity of races,
I see that force advancing with irresistible power on the world's stage,
(Have the old forces, the old wars, played their parts? are the acts suitable to them closed?)...
What whispers are these O lands, running ahead of you, passing under the seas?
Are all nations communing? Is there going to be but one heart to the globe? . . .
Unborn deeds, things soon to be, project their shapes around me. . . .
The perform'd America and Europe grow dim, retiring in shadow behind me.
The unperform'd more gigantic than ever, advance, advance upon me.

[From the Washington Post, June 6, 1981]

CHARLES YOST, TROUBLED OPTIMIST

(By Philip Geyelin)

A memorial service was held here this week for Charles W. Yost, a remarkably unassuming hero in the trenches of American diplomacy for most of his 73 years.

He had the slim, wiry look of a long-distance runner, just right for a finely paced career that carried him from diplomatic posts in Austria, Thailand, Poland, Greece, and Paris to ambassadorships in Laos, Syria and Morocco, and finally to the post of U.S. representative to the United Nations. He also had the insatiable curiosity of a scientist, the well-stocked mind of a scholar, and the writing style of an avid reader of good writers.

You can discover all this in a book he published in the last year of his life, misleadingly entitled: "History and Memory: A Statesman's Perceptions of the Twentieth Century." True, it does look back on a long, diverse and distinguished record of service, beginning with Dumbarton Oaks, the San Francisco conference and Potsdam.

But it also looks forward, in a way you can't always expect of a diplomatic memoir. Yost did not just chronicle his experience. He drew on it richly in a final chapter ("The Next Twenty Years; What Is To Be Done?") that ought to be required reading for anybody caught up, one way or another, in the current debate over the proper future course of American foreign policy.

Charley Yost was not easy to summarize. None of the fashionable labels fit—not hawk or dove, Left or Right, conservative or liberal. A Democrat, he worked for Hubert Humphrey's election in 1968, after retiring from the Foreign Service; in 1969 he was summoned back to duty by Richard Nixon to be U.N. ambassador.

He was, in short, a professional. His balanced detachment forced him into that most treacherous of all positions, the center, where most of the world's hardest and most productive diplomatic work is done. It also left him with little use for the sort of single-minded ideology so much in evidence—and vogue—in high places these days.

"The current interdependence of nations means that any substantial action by one nation against essential interests of others rebounds sooner or later to its own disadvantage," he wrote in that summary chapter. The Soviet occupation of Eastern Europe, he cited by way of example, "has not enhanced but placed in constant jeopardy the security of the U.S.S.R."

Similarly, he argued, the vast security network of pacts and commitments that the United States "flung around the world during the Cold War" made it all the more vulnerable to upheavals in Korea, in Vietnam, in the Middle East, in Cuba. "Realism in international affairs today consists less in imposing limits on others than on oneself, less in containing communism or capitalism than containing one's own excessive ambitions and unwarranted fears," he wrote.

But realism, to Yost, also meant recognizing the "engrained and self-righteous disposition to territorial aggrandizement that makes [Russia] such a frightening and dangerous neighbor and that, if the world and the Soviet Union itself are to escape catastrophe, must be curbed either from within or without."

Without illusions, Yost examined the "five factors" that he believed make the human predicament today uniquely precarious: nuclear weapons; the population explosion;

"dangerously diminished" natural resources on which modern societies depend heavily; "a global juxtaposition of peoples . . . created by the revolution in communications" (airplanes, radio and television, satellites, computers); and, finally, "the drastic compression in time of the social strains and transformations that flow from the coincidence of the several revolutions of modern times."

What is to be done? A lot, or very little, was Yost not altogether settling conclusion. It depends on the degree to which mankind "can be persuaded that self-interest now demands much more sophisticated, forbearing, and harmonious accommodations with nature and with our fellow men of all colors and creeds than has been necessary in the past."

Painstakingly and with a clear eye, he explored and identified the pitfalls, limitations and potential of common efforts by allies and adversaries alike to establish some degree of control over nuclear arms, local conflicts, population growth, the ravaging of the environment, the waste of resources and the world economy in a way that might ease the incendiary disparity between rich and poor.

"There is nothing intrinsically insoluble about any of these problems," Yost, a deeply troubled optimist, wrote at the end. "The question is whether human societies as currently organized, nationally and internationally . . . will make the necessary psychological, political, and structural adaptations in time."

How we answer that question, he continued, will determine whether his wise warning leaves us in a mood "of hope or of despair." As for himself, Yost concluded, "I strongly incline to hope."

Mr. PELL. Mr. President, my wife and I join in sending our deepest sympathy and love to his widow, Irena, and to his three children.

A TONY FOR TRINITY

Mr. PELL. Mr. President, at the recent Tony award ceremonies in New York City, a special award for distinguished contribution to the American Theater was presented to Rhode Island's Trinity Square Repertory Co.

For 17 years, Trinity Square has offered professional theater of the very highest quality to the people of Rhode Island and our surrounding communities.

Over the years, Trinity Square's special talents have also been seen and admired by many theatergoers around the country through its visits to New York, Philadelphia, Phoenix, Boston, and Washington. It has developed into a company of national stature with a reputation for presenting the finest theatrical productions.

This distinguished honor, bestowed on Trinity Square by colleagues in the theater community, is an event that all of us who know the company are tremendously proud of.

I want to extend my warmest congratulations to the entire company with a special salute to its founder and continuing director, Adrian Hall, for this impressive and well-deserved award.

I ask unanimous consent that an article from the Providence Journal of June 9, 1981 about Trinity Square's special Tony award be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A TONY FOR TRINITY

Even with their assorted demurrals and sniffs at the commercialism of it all, most of the Trinity Square Repertory Company must have been quietly pleased. The special Tony award they received on Sunday gave added lustre to their growing reputation as a theater ensemble of the first rank. The honor is deserved, as thousands of New England Trinity-goers would attest, and the national attention won't hurt a bit.

There even are likely pluses, beyond the satisfaction of getting another enthusiastic national notice. The Tony's publicity may help at the box office, may bring new television appearances and even could help Trinity Rep withstand pressure for cuts in the grants it depends on from the National Endowment for the Arts. Being justly proud of the award is fine, but the practical benefits could prove of greater value.

Trinity's Tony also underscores the notable achievements of regional theater generally. As devoted playgoers and discerning critics have realized for years, New York has no monopoly on theater of quality. When a regional company such as Trinity Rep can offer brilliant theater in rich diversity, with virtually every production done with imagination and high professionalism, then the whole of the American theater gains. Rhode Island is remarkably fortunate to have such a company in residence, and we're proud to let the rest of the country know it.

MORTGAGE REVENUE BONDS: MAKING HOUSING MORE AFFORDABLE

Mr. PELL. Mr. President, I am pleased to join Senators SASSER, BAKER, BUMPERS, PRYOR, and PACKWOOD in sponsoring S. 1348, a bill to bring about much needed changes in the Mortgage Subsidy Bond Tax Act of 1980.

Homeownership is a much sought after goal for nearly all Americans. Today, however, prospective home buyers find themselves caught in a seemingly endless cycle of high interest rates. Most American families today, seeking to purchase their first homes, are simply priced right out of the market by interest rates, a situation which has had a devastating impact on the homebuilding and real estate industries.

Mortgage revenue bonds have worked well in the past in enabling lower and moderate income citizens to purchase their own homes. Last year, in the Mortgage Subsidy Bond Tax Act, the Congress attempted to place reasonable restrictions on the use of these bonds, to target the limited number of low interest mortgages to those most in need of the subsidy.

Several of the constraints contained in last year's legislation have proved to be unworkable from the standpoint of the State housing agencies which administer the mortgage revenue bond programs.

Consequently, bond issues have dropped dramatically, because of the financial and legal uncertainties created by last year's legislative action.

In enacting the Mortgage Subsidy Bond Tax Act, Congress did not intend to completely shut down this important housing program, although it appears that this could eventually happen unless we act to further clarify the status of these bonds. S. 1348 will remove various technical and legal problems which have prevented the State housing agencies from resuming a full scale mortgage revenue bond program, but this legislation will not undermine or alter the restrictions Congress wisely put on this program last year.

My own State of Rhode Island has been a national leader in the use of mortgage revenue bonds. Since its inception, the Rhode Island Housing and Mortgage Finance Agency has issued over $1.1 billion in bonds, assisting thousands of Rhode Islanders to own their own homes, where they otherwise would have been unable to achieve this goal because of high interest rates.

A sound mortgage revenue bond program is essential in Rhode Island, helping people to purchase their own homes, creating jobs in the construction industry, and expanding the local economy.

The demand for housing in Rhode Island is increasing at an unprecedented rate, as it is nationally, as new households enter the homebuying market each year.

One of the key problems in meeting this demand for new housing is affordability for the first time homebuyer. The modifications contained in S. 1348 will permit the mortgage revenue bond program to continue meeting this need, and I hope that the Finance Committee will schedule early action on this legislation.

WARREN CHRISTOPHER AND THE "LESSONS OF IRAN"

Mr. PELL. Mr. President, this Nation suffered through a terrible ordeal when 53 of our citizens were taken and held hostage in Iran. Such a tragedy must never be allowed to happen again—we must learn from that horrible experience in order to avoid its repetition elsewhere.

Warren Christopher, the former Deputy Secretary of State who negotiated the agreement that brought our people home safely, has recently made an important contribution to that learning process.

In an address to the Los Angeles County Bar Association on May 26, Mr. Christopher set forth very cogently what he believes are the "Lessons of Iran."

Among the lessons Mr. Christopher draws from the hostage crisis is the wisdom of seeking negotiated settlements for international disputes. He emphasizes that, as was the case in this instance, negotiations can sometimes lead to a peaceful resolution of the problem without entailing any concessions on the part of the United States.

Mr. President, I ask unanimous consent that Mr. Christopher's thoughtful and thought-provoking address be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

LESSONS OF IRAN

(By Warren Christopher)

"Bad times have scientific value," Emerson wrote. "These are occasions a good learner would not miss."

All of us, especially the people directly affected, would have preferred to miss the hostage ordeal in Iran. But it is there, sitting squarely astride our collective memory. We had best learn from it what we can.

Perhaps we are now ready to begin that process. The hostages have been home for some four months. The national sense of relief is dispersing; the celebrations have ended. Possibly even our sense of outrage toward the Iranians is beginning to abate. We may be approaching the level of detachment necessary to comprehend the crisis more fully.

There are five broad areas in which I think the Iran crisis holds valuable lessons.

First, the Iran experience should encourage a sense of realism in our dealings with developing countries. For their internal politics are shaped almost wholly by internal forces, and very little by external pressures. A wise nation, however powerful, understands the peril it invites in confronting the will of another people. Outside powers have an affect, if any, only at the margins.

The reasons the late Shah's regime shattered so swiftly are complex and cumulative. While there were impressive economic achievements, deep inequities remained and corruption was rampant. Too little attention was paid to religion and tradition. Political rights were limited so rigidly for so long that people throughout the country—directly or through family or friends—had been personally touched by official repression the Shah was seen to have sponsored. And the gap between the governing group and those governed remained awesome.

Whatever the cause, by 1978 the Shah's collapse had become inexorable. By then there was probably nothing that he or we could do to prevent it.

Some argue that the hostage crisis would never have happened if we had, in the first place, "stood by our friend," the Shah. But there was no way to do that, short of shooting our way in and occupying the country with full military force.

Alternatively, there were suggestions that we should have encouraged repressive action by the Iranian military, in the context of a military coup against the Shah.

Either course would have caused widespread bloodshed. And neither would have worked. For such policies would have meant siding against most of the Iranian people, who then had the idyllic expectation, and not the subsequent reality, of Khomeini's rule.

We should be thankful President Carter had the wisdom to reject such options. They retain some adherents only because they were not selected and we were spared their consequences.

There is also a lesson here for our broader approach in the developing world. We must take care to recall that our relations are with countries, not just with leaders. We need to broaden our contacts, to make sure that all elements of the population understand our purposes. We must guard against the tendency to identify so narrowly with the personalities in power that we neglect cross-currents of opinion taking sway among the people they rule. Unfortunately, there are too many examples of that tendency in U.S. policy around the world today.

In a second broad area, the Iran crisis offers lessons for our international strategy, in similar conditions and also more generally.

I take sharp issue with those who claim our country lost face because we did not somehow "force" Iran to surrender the hostages. The most common formulation is that we should have issued an ultimatum: if the hostages were not released by a date certain, Iran would have been bombed or invaded.

But consider the probable effects:

The murder of the hostages;

Greater internal and international sympathy, even prestige, for Khomeini;

An end to the international condemnation of Iran, and perhaps a shift of international opinion in Iran's favor;

Disruption of petroleum exports from the Middle East;

And to crown all of these, a probable American entanglement in an Iranian civil war.

However satisfying it might have felt to follow our stormier impulses, I fail to see how such results would have served American interests.

Speaking more broadly, I have yet to see a coherent alternative plan or proposal that would have been likely to force the Iranians to release the hostages.

I also take issue with those who contend we should never negotiate over hostages.

It is a mistake to equate talking with making concessions. On the contrary, we can and should refuse, as we did in this case, to make concessions that imply any form of victory for the kidnappers. We must resolutely resist the kind of outcome that could invite similar acts in the future.

But a presentation that shows our resolve can produce an agreement that withholds concessions and still saves lives.

Circumstances will differ from case to case. Sometimes a bold and skillful strike can be successful, as at Entebbe. But there will be other less propitious times as well. We must be prepared to adapt our strategy to suit the circumstances. A rigid "never negotiate" posture limits the government's ability to find an acceptable outcome. Any predetermined strategy, slavishly followed, could draw us to nightmarish results.

I believe we should grasp, as a central lesson of the crisis, the wisdom in seeking negotiated settlements to international disputes.

That principle was sorely tested in Iran. Khomeini had called the United States the "Great Satan" and had forbidden any diplomatic contact with us. We had enormously complex and painful issues, and no one with whom to raise them.

Nevertheless, in the end it was not the force of our arms, but the force of our arguments—and our economic and diplomatic leverage—that ultimately prevailed.

I recall this not to credit any person, least of all myself, but to celebrate the importance of negotiation. To be sure, the Algerian willingness to mediate, the continuing internal turmoil in Iran, the political evolution there, the Iran-Iraq war—these and other factors had a bearing. But the policy of steady, methodical probing for a negotiated result is what brought this crisis to an end.

This is a fact worth recalling when we weigh our national budgets. Most diplomacy is conducted out of the public eye, and is neither glamorous nor sensational. As we build our defenses, we must also maintain the strength of the American Foreign Service where our national policies are designed and placed in effect. In a world where most things are done by persuasion, even the strongest arms cannot substitute for a clear, convincing voice.

Unfortunately, our budgets do not now reflect this truth. As the military threat grows, our defense budget rises accordingly. But as diplomatic challenges multiply, our professional Foreign Service remains the same or declines. In 1960, we had diplomatic relations with 81 countries; now we deal with 53 more—but with the same number of professional diplomats in the State Department that we had two decades ago. And they must deal not only with 53 more countries, but on a wider range of harder issues than ever before.

We also must take care to retain the people—the men and women of the Foreign Service—whose wisdom and experience have been at the heart of our foreign policy successes, including the resolution of the hostage issue. I have never worked with a more capable, devoted and imaginative group of professionals. Therefore, I am concerned by reports that some of our best career officers, who served prominently during the last Administration, have yet to be assigned to new posts commensurate with their abilities and stature. This trend may lead to the early retirement of many of the ablest professionals in the Foreign Service, depriving the country of incomparable experience and intellectual talent.

In short, it is foolish policy and false economy to fail to give strong support to this indispensable national asset.

Along with the worth of diplomacy, the Iran negotiations underscored the importance of persistence and steadiness in foreign policy—of being prepared to wait, if necessary, until an issue is ripe for resolution.

Over the early months of the crisis it became clear that the hostage timetable would depend, in large part, upon the march of events in Iran that were wholly beyond our control. The most important was the emergence of authoritative leaders who could speak for Iran. It was not until August 1980, 10 months after the hostages were seized, that Iran had a Parliament with power to act on the issue, and it was many weeks more before the lines of authority were clear enough for serious talks. During those long, painful months it was crucial not to be goaded by frustration into an unwise course of action.

There are a number of lessons here:

In a turbulent world, there will inevitably be other instances where problems urgently need solving but we can only see the faintest glimmer of how it might be done. It is right to be impatient over such things as human suffering, war, and injustice. But we need to develop a capacity for steadiness, not in the sense that we accept things as they are, but to bring a constancy to the effort to change them.

In difficult specific circumstances, like those in Iran, government should avoid building up expectations of early success—lest the pressure to act quickly, even if improvidently, become irresistible. We must not let the calendar be an ally of the opposite camp.

At the same time the press and public need to understand that a shortage of news does not necessarily signify an absence of progress. The economic and diplomatic sanctions we and others applied on Iran had a cumulative effect. They played a vital role in the growth of a consensus in Iran that a settlement would serve Iran's interests. So on that score we were making headway even when we appeared to be dead in the water.

A wider understanding of such a phenomenon could lead to greater national steadiness, and thus to more realistic and effective diplomacy.

In a third area, the Iran crisis reminded us of the perilous circumstances in which our diplomats often must perform. Are there better ways to protect them, to prevent takeovers like that in Iran?

Certainly there are ways to improve our posture:

Structural improvements and tightened procedures can make embassies more defensible, and a program of that kind is underway.

Marine guard contingents can be reinforced.

We can thin down embassy staffs, or evacuate, in times of crisis. In Iran, our official staff was cut from over 1400 personnel before the revolution to about 70 in November of 1979.

We can work through international institutions for rules that make sanctions automatic when governments either condone terrorism or engage in such conduct themselves.

But we cannot reduce the risks to zero. Under international law, the ultimate responsibility for the security of diplomatic

missions rests with the host country. That is the only practical course. Transforming our embassies into fortresses, or attempting to ring them with massive defenses of our own, would defeat much of their purpose.

So as we do what we can do to improve security, we should also pay special tribute to the gallantry of our Marine guards around the world. And we should recognize that it takes courage—as well as skill—to be a diplomat in today's world.

Fourth, the Iran hostage crisis also brought home—in a very tangible and immediate way—out stake in global institutions and in the structure of international law.

It has become the fashion to belittle the United Nations as a constructive force in world affairs. Indeed, the shortcomings of the UN system were all too apparent in the hostage ordeal. UN sanctions against Iran were thwarted by an opportunistic Soviet veto. There was no effective way to enforce the orders of the World Court that the hostages had been seized illegally and should be released immediately. Missions to Iran by Secretary General Waldheim and by a special five-member UN commission also proved futile.

Yet for all of these failings, the international community still played an indispensable role.

At the practical level, the solutions to complex aspects of the negotiations were found in established international practice, such as the rules of the UN Commission on International Trade Law. The existence of settled, neutral procedures was a great help in expediting the negotiations.

Even more fundamentally, the political influence of the United Nations was felt at crucial times. From the outset, the General Assembly and Security Council resolutions and the International Court of Justice rulings deprived Iran of any pretense that it was pursuing just claims in a legitimate way against the United States. The resulting isolation contributed to the pressure on the Iranian government.

By the same token, our pursuit of the issue through the United Nations legal machinery stirred international sympathy for our cause. Our course strengthened the inclination of scores of countries—some in public, some very quietly—to help us with diplomacy of their own. In addition, when we imposed sanctions in April of 1980, most countries treated those as legitimate steps. By pursuing all lawful means, we built increased respect both for the law and for ourselves.

The United Nations environment ultimately produced a crucial turning point. In mid-October, Prime Minister Rajai visited the United Nations and sought to focus world attention on Iran's grievances in its conflict with Iraq. But he played to a cold house at the UN. He was told repeatedly that Iran could expect no support from the world community as long as the American hostages remained in confinement. Impressed by the UN experience, he took back to Iran a new appreciation of Iran's isolation and its stake in ending the crisis.

These are events to keep in mind as we contemplate the worth of the United Nations and our participation in it. I do not suggest by any means that criticism ought to be silenced. But we also ought to see beyond the dreary sameness of General Assembly debates. We ought to recognize that the United Nations and its affiliated institutions do far more than vent the anger of the developing world. Indeed, they serve our interest in world stability, grounded on the rule of law.

Finally, I believe the crisis in Iran demonstrated the continuing role of our values in our relations with the rest of the world.

It was our system's inherent concern for human life that caused the government to undertake a massive effort in 1979 to evacuate tens of thousands of private Americans from Iran, and to reduce sharply the diplomatic contingent there.

From the beginning, our values at home also helped define the boundaries of the negotiations. For example, our government could not agree simply to seize any of the Shah's assets we could find and turn them over to Iran. On that issue our bottom line was due process of law. It was immovable.

Indeed, it was largely our respect for individual lives that made this a crisis.

Had we cared less about individual human lives, the holding of fifty-three hostages would not have held the entire nation's attention. Had we cared less, we might simply have written off the people and looked for ways to punish their captors. But our concern about the hostages made it unthinkable for us to deal with the crisis in a callous or cynical manner.

Our respect for human life also provides the essential context for any dealing with terrorists in the future.

We must never be overanxious. The hand of terrorists should not be strengthened. We must be prepared to wait for a settlement as long as it takes—making it clear all the while where the responsibility lies for the safety of people held captive.

But beyond that, I do not believe we can, or should, pretend complacency about the lives involved. For such a choice would trade a principle—and a sacred one—for a tactic.

This can be an excruciating issue. Our values make it harder to operate in situations where others are not so constrained, where the adversary is often cruel and inhumane.

But our values also define us. For our own sake, and also to foster the kind of understanding we want among the people of the world, I think we want to keep and protect our unique definition.

There are compensations as well as costs to a foreign policy built on ideals. In Southwest Asia, the world had been presented a striking contrast between our approach and that of the Soviet Union, whose forces continue still to spill the blood of nationalists in Afghanistan. While we have been restrained, the Soviets have inflicted their bloody preference in dictators on a nonaligned neighbor. Where we have abided by the rule of law, the Soviets have attempted to impose the rule of raw power on a weaker state.

That message has not been lost on other countries and peoples. The Soviet star in the Third World plummeted in the months following the invasion, and ours, correspondingly, has risen. Again, the message for us in this surely is not that we should copy the tactics and standards of our rivals, but that we should spotlight and celebrate the difference. From such a comparison, we can only emerge the stronger and more respected.

Using the sharpened vision of hindsight—and the cooling influence of time—I offer these few thoughts as a tentative assessment of the hostage crisis. What is their sum?

The crisis gave us the chance to grow wiser in our dealings with the developing world.

It underscored for us the importance of steady diplomacy in pursuit of our interests, in contrast to the impetuous resort to force where its use would damage our interests.

It drew our attention to the great contributions, and the legitimate needs, of our diplomatic service.

It brought back to us a tangible return from the international community we have supported.

And in more ways than one, for us and others, the hostage crisis displayed and tested American ideals—and they were found worthy.

As I have reflected on that last night in Algiers, remembering the relief and exhilaration as the hostages came down the ramp alive and remarkedly healthy, I have been reinforced in the conviction that the long, difficult, and often frustrating course we followed was the right course for America.

Now I hope we will examine that experience, honestly and carefully, neither to claim credit nor to cast blame. For it holds lessons that will make our society stronger and our foreign policy more successful.

That is the right course for America too. And there could be no better tribute to those who suffered long months of torment in the service of their country than to learn the lessons of Iran.

THE MURDER OF LIDICE

Mr. PROXMIRE. Mr. President, the Writers' War Board, in 1942, eloquently told us why we should stop genocide. Today is the 40th anniversary of the Lidice massacre, and here is what the Writers' War Board wrote in 1942:

On June 10th, 1941, the German Government proudly and formally announced to the world that its picked murderers had razed the tiny village of Lidice, Czechoslovakia, to the ground; destroyed every structure including the ancient Church of St. Margaret's; killed every man (including the priest) and fifty-two women; driven the surviving women off to "concentration-camps"; and herded the children into "educational institutions." Lidice, they proclaimed, was now forever erased from the map and the memory of the world. This deed they did because of an unproved suspicion that the village had transiently harbored the executioners of the Hangman, Heydrich.

The crime of Lidice is but one of a long and horrible list of crimes. In Jugoslavia, Poland, France, Norway, Belgium, Holland, Luxembourg, Greece, China, the Philippines, the Axis joyfully created ten thousand Lidices, murdered, brutalized, tortured, castrated innocent millions. These are not "atrocity stories." They are facts—facts the Axis governments themselves announced with formal pride. The murder of all the innocent Lidices of the world is their religion. It is what they believe in. It is their form of pleasure, as other men take pleasure in nature or play or love or family, life or art. They like murder.

Two days after the news of Lidice reached America, the Writers' War Board at its regular meeting resolved to do all in its power to make sure that Lidice, far from being destroyed, would never be forgotten. It has helped to do many things that this immortalizing of Lidice might be accomplished. One of them was to ask a great poet, Edna St. Vincent Millay, whether she would write a poem about Lidice. Miss Millay answered the call with this long and deeply moving dramatic verse-narrative. Many will think it is one of the finest pieces of true propaganda to come out of the war.

The radio version was given its successful premiere over the National Broadcasting Company network on the evening of October 19th, with a distinguished cast.

Mr. President, I read the first few lines of Edna St. Vincent Millay's poem:

Ye martyred peoples of this maddened planet,
This Earth, which like a moth about the sun
Today does whirl, as if it would itself
Its own destruction wreak, seeking to fall
In flame from out its orbit, and between
Its sister worlds be seen no more at all:
Human disaster on so vast a scale
The mind can not conceive;
Country by country, town by town,
Village by village, the hurt mind reads down
the painful page
In search of symbols—symbols of the proud,
the fearless
Resistance of free men to the tyrannic rage.

The ruthless act, the edict too inhuman, almost, to believe.
Unflinching Freedom, sane and tearless:
Let now your never to be numbered fact-by-fact prodigious glories
Shine forth in one fierce light against this guilty age . . .
And guide our groping children, born in darkness; be their bright
And hopeful heritage.

Mr. President, today, we in the Senate keep the world waiting by refusing to ratify the Genocide Convention. What are we waiting for? It is time we acted.

ISRAEL'S RAID ON IRAQ'S NUCLEAR INSTALLATION

Mr. SPECTER. Mr. President, within hours after Israel's action against Iraq's nuclear installation, many rushed to judgment criticizing Israel. In my opinion, the complicated considerations and counterconsiderations required much analysis before judgment is entered; and beyond that, the critical questions persist on the Middle East and how to deal with emerging nuclear capabilities in the hands of many nations.

Some of the background facts are worthy of special attention:

Iraq stated in its official government newspaper, Al Tawrah, that:

> The Iranian people should not fear the Iraqi nuclear reactor which is not intended to be used against Iran but against "the Zionist enemy."

Iraq has been developing a rapid and massive nuclear program without a concomitant commercial nuclear plan.

Israel had issued repeated warnings against the development of the Iraqi reactor.

U.S. opposition to the nuclear assistance offered to Iraq by France and Italy had gone unheeded.

As noted in yesterday's Washington Post editorial:

> Americans . . . were not prepared to fight the French on that (France's supplying Iraq with a nuclear reactor) and . . . no relief from the West was forthcoming.

As noted in today's Washington Star editorial:

> It constitutes the ultimate terrorism to menace another nation with nuclear attack.

Iraq has declared itself in a constant state of war with Israel since 1948.

Iraq has consistently refused to sign or negotiate any type of agreement with Israel.

Iraq persists in refusing to refer to Israel by name but rather as the "Zionist entity."

Iraq has repeatedly called for the destruction of the State of Israel.

Iraq continues to supply and finance terrorist organizations that act against Israel.

Iraq ignored international law several months ago by attacking Iran without provocation.

In the light of these facts, consider some questions raised by common law, legal doctrines which may be applicable or at least suggest principles of fairness in the international field:

First, did Israel act reasonably on the recognized international law principle of self-help in the face of the danger posed by Iraq's statement of intent to use nuclear force against Israel;

Second, are the law of self-defense, which is a complete defense to a charge of murder in our courts, and the doctrine of "reasonable force" applicable in the international field to this situation, considering the threats and the capability to carry them out;

Third, given Iraq's statement of intent that its nuclear force was designed for use against Israel and the imminent development of an atomic bomb capability, was there not the joinder of "opportunity and inclination" which justified Israel's conclusion that its very existence was jeopardized; and

Fourth, by analogy to its customary application in civil matters, does the established doctrine of "anticipatory breach" have application to this situation where the facts show compelling reason to conclude that devastating action was planned by Iraq, especially where inaction by Israel would be irreversible?

I do not pretend to have the answers to these questions; I am not sure that all are technically relevant; I do believe these questions and others should be raised and considered.

The judgment of world public opinion requires careful consideration of these and other issues including the acts of commission and omission by the world's leaders on the events which preceded Sunday's raid.

While Israel's conduct should not escape judgment, whether to condone or condemn, the future is more important than the past. In order to preclude each nation from making and executing its own judgments, stronger and more effective international accords must be fashioned by agreement among nations on the realization that nuclear holocaust mandates limitations of nuclear capabilities. India's concern for Pakistan's nuclear power and the Soviet Union's concern for China's nuclear power as well as United States-Union of Soviet Socialist Republics relations require appropriate limitations and control with effective inspection.

In the Middle East, it is essential that the security of all nations be guaranteed. It is intolerable that Iraq refers to Israel as the "Zionist entity" unwilling to recognize Israel's existence, let alone renounce the repeated declarations to destroy the State of Israel. The events of the past few days put us all on notice that there may not be too many days left to act effectively on these issues.

Therefore, I suggest the United States take the lead in seeking a summit meeting of all nations supplying nuclear technology to develop a joint plan for halting the spread of nuclear weapons. Agreement among these nuclear powers is needed forthwith. It should be followed soon by adoption of a new international treaty or action to close serious gaps in the existing agreements on nuclear nonproliferation which do not, in fact, fully cover situations in which nations may be developing nuclear weapons capabilities.

Only in this way can we be sure to keep the peace. Only in this way can we prevent the risk of preemptive strikes against nuclear facilities and prevent nuclear terror from being practiced by nations which show extreme hostility to a neighboring state.

COMMANDER MICHAEL K. HEINZ, U.S. NAVY

Mr. DOLE. Mr. President, tomorrow the U.S. Navy will dedicate the headquarters building of the joint services explosive ordnance program in Indian Head, Md., in memory of its former commanding officer, Michael K. Heinz.

Commander Heinz was born in Claflin, Kans., and Mrs. Heinz, Nancy Jane, now lives in Winfield, Kans.

Mr. President, I ask unanimous consent that my dedication remarks be printed in full.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR BOB DOLE—DEDICATION OF THE HEINZ BUILDING

In words that ring tragically true down through the centuries, Plato warned us, "only the dead have seen the end of war." Such words are elevated by the sacrifice and heroism that have been displaced by selfless men who defend their homes and protect the ideals that make life worth living.

Michael K. Heinz, of Claflin, Kansas, was such a man, and his loss is hard to take. America can hardly spare soldiers like Mike Heinz. He loved the Navy, and lavished on it all the ability and imagination that were his hallmarks. In the jungles of Vietnam, he bolstered a reputation for bravery. He won a host of medals and, even more important, he won the respect and affection of every man he dealt with.

Commander Heinz was still in the springtime of his life when named to command the facility whose headquarters hereafter will bear his name. This made his tragic death only a few months later all the harder to accept. Mike Heinz proved again the truth of the old adage that warns us: The good die young. But it is the quality of his life, and not the suddenness of his death, that remains with us, easing the pain and inspiring others who follow in his path. In an age sadly lacking in heroics, Commander Heinz was a genuine hero. At a time when many Americans wonder if we haven't become too self-absorbed to provide the world with the leadership it craves, Commander Heinz sacrificed supremely. He gave his life to the country he loved second only to Nancy Jane, and in doing so, he epitomized the noblest of traditions of America's citizen soldiers.

As a Kansan, I feel honored to have shared a home-land with such a man. As an American, I am stirred to great pride and confidence in the future by the knowledge that this is a land still capable of producing men like Michael Heinz. To those who knew and loved him, the years may seem lonely—but memories never die, and examples such as his only gain luster with time. If we remember and then practice the ideals of his life, then Michael Heinz will always be with us. If we emulate his courage and his devotion to duty, then he will have a monument even greater than the building that bears his name. He gave everything for us and we can do nothing less for his memory.

TARGETING PART OF THE BUSINESS TAX CUT TO SMALL AND INDEPENDENT BUSINESSES

Mr. FORD. Mr. President, I am pleased to join several of my colleagues

in introducing Senate Resolution 151 expressing the sense of the Senate that at least 15 percent of any business tax cut enacted this year be targeted to small and independent businesses.

There has been a lot of talk in recent months about the need to develop new policies in Government to create a healthier climate for business to encourage increased investment and greater growth in productivity.

We have a new President who has pledged to unleash this Nation's competitive forces and restore the economic incentives of capitalism that have made this country so prosperous. But what is the reason for the popularity behind these economic programs—what is the purpose behind these goals?

It is, more than anything else, in my opinion, to raise the general level of prosperity in this country by bringing inflation under control and creating new jobs.

Nobody can argue with these goals—everybody wants an end to inflation and unemployment. But the question is—how? What are the best policies to pursue?

We can look at certain figures and see where economic rejuvenation occurs and then target our tax policies in that direction. I can cite a page full of statistics indicating the major role small business plays in our economy, but one set of statistics is especially telling—the figures showing small business' impact upon job creation.

Somewhere between 80 and 85 percent of all new jobs are created by firms with less than 100 employees.

Around 55 percent of all new jobs are created by independent businesses with less than 20 employees. These figures indicate to me that small business must drive us down the road to economic recovery. If we are to bring inflation under control and end high unemployment through tax policy, that policy should be directed toward small business.

Every year thousands of new businesses are started across this country and every year thousands of small businesses fail. That is, of course, the nature of capitalism, where entrepreneurs assume risk and find economic rewards from those risks. But Government policy should not be a factor contributing to business failure.

Rather, we in Congress, should pursue tax policies that assist small businesses in creating the jobs and technology that will bring the Nation prosperity.

The 1980 White House Conference on Small Business identified capital formation as the single greatest problem confronting small business. Five of the conference's top 10 recommendations dealt with capital formation problems.

In its report of the President, the Commission stated:

> Inflation is also squeezing small companies' cash flows by pushing up costs, inflating the value of inventories, and expanding accounts receivable. Small companies' traditional recourse is to borrow, but current credit policy has pushed interest rates to historic highs that few small companies can afford.
>
> In short, small businesses are being ravaged both by the illness and by the putative cure: By inflation and by the Federal Reserve Board's measures to fight inflation. And small companies have neither the internal resources nor the access to national and international money markets that big companies have to fall back on.

The Tax Reduction Act of 1980, approved almost unanimously last fall by the Senate Finance Committee, attempted to treat these capital formation and retention problems. The bill would have eased cash flow problems by reducing and broadening the corporate tax rates and increasing the maximum accumulated earnings credit and the investment tax credit for used property.

In addition, needed capital would have been attracted to small businesses by provisions in the bill to reduce the capital gains tax, to increase the maximum number of subchapter S shareholders, and to liberalize the employee stock ownership plan tax credits.

The bill would have given small businesses a 13 percent share of the business tax cut in 1982 and that is exactly what must be a part of the tax reduction package Congress will be considering this summer.

The stability of the small business community is a key determinant of the economic health of our Nation. Study after study has documented the superior quality of the innovation, productivity and efficiency of the small business community. The self-reliant spirit of private enterprise has paid our Nation handsome dividends, both in material wealth and national character.

Despite these successes, the climate for new, small and independent businesses has deteriorated badly. The trend has been for the big to get bigger at the expense of the small. The problems small businessmen face in retaining capital are astonishing. The cash flow difficulties are leading increasingly to bankruptcies.

Mr. President, the small business community is the backbone of the free enterprise system as we know it in this country. Small business should be guaranteed a portion of the tax bill which we will soon consider. Not only does this sector need such relief, but small business will return great dividends in the economic growth of the country.

NO MONEY TO WASTE—EVEN IN DEFENSE

Mr. DOLE. Mr. President, yesterday every Senator was given a copy of a little green book. I just happen to have my little green book with me. It contains the familiar story of the little guy going up against the big guy—and as the American people all too commonly have come to expect, the big, bad guy is once again our own Federal Government. Through this booklet Julie Research Labs has attempted to call to the attention of those who have been given the responsibility to monitor our huge bureaucracy, this story of a miscarriage of justice.

Julie designed an advanced equipment calibration system for the Army Missile Command and submitted the lowest bid to a 1974 Army request for proposal soliciting bidders to supply such equipment.

Yet the Army rejected this bid even though the Julie system would be seven times more efficient and save the United States as much as $600 million—and it has apparently been trying to cover up this colossal blunder ever since by using every bureaucratic trick in the book, including drawn-out investigations, delayed response to congressional inquiries, and misrepresentations.

This green book represents a unique approach to try and get someone to listen to Julie and help them "buck city hall." It is written in a quick, lively style, punctuated throughout by humorous cartoons like a comic book. I am not sure whether this is evidence that, after all that has happened, Julie still has a sense of humor or that it is an indication of what they feel is the intellectual level of the people they are trying to deal with.

A GAO investigation was eventually launched that found that Julie's claims were essentially correct—it also reported that information the Army supplied to GAO, Congress, and Julie was inconsistent, dilatory in the extreme in being supplied, and less than candid. Meanwhile the Army's calibration level has allegedly fallen into the totally unacceptable 64 percent range.

We are prepared to launch a much-needed increase in defense spending, after many years of neglect. There have been many critics however who question if the Defense Department can efficiently spend the new money without wasting much of it. The Senator from Kansas has not been one of those critics.

There are desperate needs across the board in our military establishment for more nearly adequate funding of training, supplies, ammunition, compensation, habitation, and repair facilities, not to mention the big ticket items like new ships, aircraft, and advanced weapon systems. The mandate President Reagan received for upgrading our military will vanish if decisions such as the Army's on Julie's calibration equipment become the rule—a rule which in this case represents a loss to the taxpayer in the neighborhood of half a billion dollars.

COVER UP OR SAVE HALF A BILLION

The question here is not whether or not the Army is fallible and could make an incorrect procurement decision. No, the issue is that once having been shown how egregiously and stupidly they erred, the Army still refused to acknowledge the mistake or rectify it, in the process saving millions of dollars. So blatantly has the Pentagon tried to cover up or obscure this episode that it is almost more charitable to abscribe motives of cupidity rather than stupidity to their handling of this matter.

Mr. President, we are going through the process each day on the Senate floor and in our committees of trying to reduce Government spending, and we are finding it necessary to make huge cuts in some social programs, in fact the very one being debated today on this floor, the food stamp program, and others. I just hope while we are in the process of doing so, in an effort to restore the economy, that those who have the responsibility would completely investigate the matters contained in the allegations not only in this pamphlet but in

the GAO report, the media reports and the other allegations which I think are rather widespread.

Those at the top of the Army's structure responsible for oversight may be excused, for the time being, for failing to resolve this matter with the hundreds of great decisions facing them in the first months of a new administration.

It is natural to pass the review on this case down to the military bureaucracy most closely associated with the subject, and expect for it to be resolved there, for there are many able, dedicated civil servants who take their responsibilities seriously. In assigning the investigation of this case, however, it seems as though the bureaucracy has failed and has placed the foxes in charge of the henhouse.

The publicity this book by Julie has achieved now makes it impossible for the Army to claim ignorance at the higher levels. Those of us in the Congress who have been laboring to get the budget and the deficit under control, and who have had to trim many popular domestic programs, will now look to the Pentagon to hold up its end of the bargain, and not make our labors appear foolish or have them result in wasted or mismanaged expenditures.

I just suggest that the Secretary of the Army and others have a responsibility now to look into this matter more fully than has been done in the past at this level. I would suggest that there is probably a great deal of justification for the GAO reports and for the comments by Julie Research Lab notwithstanding the fact that, of course, they will expect to gain in the event this error is corrected.

NOMINATION OF FRED J. VILLELLA AS ASSOCIATE DIRECTOR OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY

Mr. STEVENS. Mr. President, I am pleased to support the nomination of Fred J. Villella as Associate Director for Training and Education of the Federal Emergency Management Agency (FEMA).

FEMA's many training and advisory activities have been a valuable source of support and guidance to Alaskan's in their efforts to prepare themselves for a wide range of possible emergencies.

For example, the Agency has enabled us to undertake a study of the potential loss and damage which could accompany another earthquake in the Anchorage area and is now providing similar assistance in the development of an earthquake contingency plan.

The U.S. Fire Administration, and the National Fire Academy in particular, also play an important role in Alaska where their assistance has made possible the implementation of many fire programs. Their help will be even more important in years to come as State and local governments are called upon to shoulder more of the load of local services.

I am happy to say that Louis Giuffrida, the new Director of the Federal Emergency Management Agency, has assured me that the Fire Academy will preserve its identity and purpose, and that Mr. Villella's own statements show his appreciation of the Academy and its continuing significance.

Organizational changes instituted by President Reagan have greatly enlarged the role which training and education are to play in the mission of FEMA as a whole. The elevation of administrative responsibility in this area to the level of associate director and the selection of a man with Mr. Villella's extensive background in the educational side of Federal and State emergency management reflects this increased importance. I strongly recommend his confirmation.

THE REAL COSTS OF THE MX MISSILE

Mr. HATFIELD. Mr. President, there are few issues of greater importance to both the strategic nuclear policy and future economic vitality of this Nation than the final determination of Congress related to the MX missile controversy.

The vital strategic questions surrounding deployment of the MX missile address the missile's clear first-strike threat against an enormous percentage of the Soviet missile force. I believe that this threat will cause a fundamental destabilization of nuclear policy in times of crisis, and an increase in the risk of accidental or preemptive nuclear war initiated by an edgy Soviet leadership.

It is also critical that Congress consider the ultimate costs of the MX missile and its proposed basing system. The unprecedented commitment this Nation is now making to military expenditures is but a down payment on long-term defense costs.

Particularly in the area of new strategic systems, the out-year costs of the commitments we are now making to upgrade and expand every aspect of the Triad will place enormous strains on the capital available for long-term industrial investment and virtually destroy our efforts to balange the Federal budget.

Recently the Congressional Budget Office (CBO), at my request, completed a cost analysis of the Air Force's linear-grid/loading-dock design for basing the MX missile in the southwestern United States. The CBO indicated in this report that the ultimate constant dollar cost of the MX system could range between $40.7–$79 billion.

In the face of a serious Soviet military buildup the number of missiles might have to be doubled and the number of shelters tripled. The original 200 MX missiles and 4,600 shelters in the proposed system would have to be expanded by 1995 to 410 missiles and 13,510 shelters, or the United States would have to deploy a complex and expensive ABM system to defend the MX site.

Although CBO did not project inflation costs for the 1990's, it is clear that the ultimate cost of the MX, if adjusted for inflation and cost overrun, could easily exceed $100 billion.

It is also of more than passing interest that the Air Force submitted clearly faulty data to Congress on the costs of the system. There can be no excuse for the Air Force to submit such obviously transposed and fabricated data on the largest and most visible project in U.S. history.

I believe that it is vital for Congress to consider more efficient, faster, and less provocative solutions to the problem of our ICBM vulnerability. One solution that I have advocated for nearly 2 years is placing a percentage of our existing Minuteman III missile force on a fleet of new, non-nuclear submarines which could be deployed in 1 to 2 million square miles of the coastal waters of the United States. This alternative system of submarine deployment, the shallow underwater mobile (SUM) system, offers enormous positive features compared with any land-based, multiple aim point deployment of the MX missile. It is my expectation that Congress, and particularly the Senate Appropriations Committee, will review with extreme interest the budgetary and strategic impact of the proposed deployment of the MX missile in the months ahead.

I ask unanimous consent that the text of the letter I received from Alice Rivlin, Director of the CBO, as well as the text of the study on the MX system completed by the CBO be reprinted in full in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C.

Hon. MARK O. HATFIELD,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: At your request, we have assembled and reviewed estimates of the costs of the MX missile and basing system, both for the Air Force's baseline program and for larger systems that could be deployed in response to higher Soviet threats. The attached paper describes those estimates.

All the estimates assume deployment of the so-called "linear-grid/loading-dock" design proposed by the Carter Administration. Under this plan, each MX missile would be covertly shuttled among a cluster of 23 concrete shelters that resemble covered loading docks. The clusters of shelters would be laid out along a linear road. As you know, this design is under review by the new Administration. Depending on its decisions, the estimates of costs discussed here could change substantially.

COSTS OF THE AIR FORCE BASELINE PROGRAM

Constant Dollars:

The Air Force has proposed deploying 200 MX missiles in 4,600 shelters. The Air Force estimates, adjusted using CBO price indices, show that this system—which would be designed and deployed between now and 1989—would cost $40.7 billion in constant 1982 dollars. This estimate includes costs for development, procurement, and military construction.

CBO has not attempted any independent evaluations of the Air Force cost estimates. But independent checks have been made by such groups as the Defense Science Board and the Air Force's independent cost analysis group. These checks suggest that the estimated cost of the MX missile itself, which accounts for about 28 percent of the total, seems about right. Military construction costs, which account for about 31 percent of the total, are more likely to increase. One independent assessment suggested that increases of about 14 percent, or about $1.8 billion, might occur. The remainder of the

costs have been reviewed less thoroughly by these groups, in part because of the frequent changes in design that have been made in recent years.

Current Dollars:

Using CBO assumptions about inflation and likely rates of spending, the current-dollar cost of the Air Force baseline system would amount to $57.2 billion. It should be emphasized that this includes an estimate of anticipated inflation over the next decade and is therefore highly uncertain.

While assembling these estimates, CBO encountered several problems that influence current-dollar estimates. The Air Force costs, even when converted to current dollars using the data and methods employed by DoD, did not match the numbers supplied to the Congress in the Congressional Data Sheets. These data sheets apparently include costs associated with the linear-grid/loading-dock system only for fiscal years 1982 and 1983; estimates for 1984 through 1986 are based on the earlier "racetrack" design. Moreover, the outlay factors used by the Air Force to translate budget authority into outlays in the data sheets differ from official DoD outlay factors. The effect of these two anomalies is to shift about $1.5 billion in budget authority, plus additional outlays, from the 1982–1986 period to later years.

EFFECTS ON COSTS OF INCREASES IN THE SOVIET THREAT

The Air Force baseline program is designed to allow the MX missile system to survive and retaliate after a Soviet first strike, assuming that the Soviet threat is limited in accordance with the SALT II agreement. But the Soviet threat against MX could be increased, either before the system's planned 1989 completion date or afterward. A wide range of increases is, of course, possible. Using Air Force data and methods, CBO has estimated the costs of building larger MX systems to meet two examples of increased threat, and has also identified some major uncertainties in these estimates.

The total acquisition cost of meeting one possible 1990 Soviet threat envisaged by the Office of Technology Assessment (OTA) could range from $53 billion to $59 billion in constant 1982 dollars. This compares to total acquisition costs of $40.7 billion for the Air Force baseline program. The 1990 OTA threat would have the Soviets attacking MX with 7,000 warheads, substantially more than the number anticipated in designing the baseline program. The $53 billion to $59 billion figure would allow expansion of MX so that an average of 1,000 U.S. warheads could survive such an attack. The $53 billion estimate assumes that, in the face of Soviet expansion, the U.S. abrogates the existing ABM treaty and deploys an anti-ballistic missile defense system to protect MX. The higher $59 billion estimate assumes that it does not.

Costs could rise to $65 billion under a still greater threat that OTA suggests might be possible in 1995. In this case, the MX system could be attacked by 12,000 warheads. The $65 billion estimate assumes the building of an anti-ballistic missile defense, which seems plausible in the face of such a substantial Soviet expansion. Without such a defense, costs could total $79 billion.

These cost estimates are subject, of course, to great uncertainty. The threat estimates themselves at best represent informed speculation. Moreover, the model used in making the estimates is a rough planning model that, while judged reasonable by the Air Force, has not been updated for the latest MX design and may not fully reflect higher costs for labor and materials that such an expanded effort might entail. These problems greatly magnify the uncertainties discussed above in connection with the baseline program, particularly the cost estimates. Finally, a major expansion of the Soviet threat could require responses other than expanding MX, which could alter the results in this paper.

We hope this summary and the attached paper fully meet your needs. If you have questions, or if we can be of further help, please have your staff call Robert Hale (5–1962) or Pat Renehan (5–4844) of my staff.

Sincerely,

ALICE M. RIVLIN,
Director.

COSTS OF DEPLOYING THE MX WEAPON SYSTEM

At the request of the Chairman of the Senate Appropriations Committee, CBO has assembled the costs of deploying the MX weapon system. This paper documents those costs. First, the paper examines the constant-dollar costs of the baseline MX system as estimated by the Ballistic Missile Office (BMO), and briefly reviews two independent estimates that were used to check the BMO's cost figures. Next, the paper examines the current-dollar costs of the baseline MX system as presented in the Carter Administration's budget, and shows differences between these figures and those derived from the BMO's constant-dollar costs for the system. Finally, the paper addresses the implications for the size and cost of the MX system of potential future increases in the Soviet ICBM threat.

MX WEAPON SYSTEM ACQUISITION COSTS IN CONSTANT DOLLARS

The Air Force baseline for the MX weapon system consists of 200 MX missiles deployed in 4,600 horizontal shelters in a "linear-grid/loading-dock" configuration.[1] The baseline includes mass simulators to help disguise the locations of the missiles themselves, and a number of features (such as viewing ports in the shelters' roofs) to aid in SALT verification. This system design, ratified by former Secretary of Defense Brown and presented to the Congress in mid-1980, has not been officially revised. It is anticipated, however, that a new system design could be adopted this summer after the civilian panel appointed by Secretary Weinberger to study the MX basing system makes its report.

The Air Force estimates the cost of deploying the baseline MX missile system to be about $28.6 billion in constant fiscal year 1978 dollars. Using CBO inflation estimates, this would represent approximately $40.7 billion in constant fiscal year 1982 dollars. This estimate includes funding for development, procurement, and military construction; it does not, however, reflect any operating and support costs. The total also does not include the cost of military personnel involved in development and production, Department of Energy costs for production of the warheads, community impact assistance funding, or certain overhead costs traditionally not charged to weapons development and procurement programs.

Of this $40.7 billion in fiscal year 1982 dollars, development and procurement of the MX missile itself would account for about $11.4 billion, or 28 percent. Military construction costs would total approximately $12.6 billion, or 31 percent. The remaining $16.7 billion (41 percent) represents other basing-related costs, such as vehicles, support equipment, power, physical security, and command, control, and communications.

VALIDITY OF THE COST ESTIMATES

CBO has not attempted independent cost estimates of the MX weapon system, which would be beyond its resources. A few independent checks of the Air Force's constant-dollar cost figures have already been made, however. CBO's review of two of these studies, and of other Air Force documents, forms the basis of the following remarks.

A consensus appears to exist among both civilian and military analysts that estimates of development and procurement costs for the missile itself will prove to be reasonably accurate. Most of the technological and cost uncertainty in the program involves the basing system, including military construction.

THE ICA REVIEW

This consensus was reflected in the results of an "independent cost analysis" (ICA) of the MX weapon system conducted by the Air Force in late 1979 with the participation of the Army Corps of Engineers. The panel conducting the study was to examine the costs of the Air Force's system design; it was directed not to review the system's requirements or technical adequacy. The ICA panel examined the cost estimates for the MX system in the "racetrack" configuration, which was the preferred design at the time of the review.

The ICA panel produced a cost estimate for the development and procurement of the MX missile itself, and the Army Corps of Engineers developed a separate estimate for the military construction costs of the system. As noted above, these two areas represent approximately 59 percent of the total cost of deploying the current linear-grid/loading-dock system baseline. While the ICA panel did not generate independent estimates for the remainder of the system, consisting of basing-related items, it did review the Ballistic Missile Office's cost estimates in most of these areas for "sufficiency." The panel examined the costing methodology used by the Air Force and, where possible, ran independent spot checks on individual system components.

The ICA panel's estimate of the cost of developing and procuring the MX missile itself was about 5 percent lower than that derived by the BMO. The panel concluded that the BMO estimates of the MX missile costs might even be high, and that there was little risk that the costs associated with this aspect of the program would escalate substantially. In contrast, the Army Corps of Engineers' estimate of military construction costs for the MX weapon system totaled 14 percent higher than that of the BMO.[2] The Corps also expressed its opinion that the shelter construction schedule required by the dates set for initial and full operational capability was shorter than the schedule the Corps would have set. The Corps indicated that the accelerated construction rate required could lead to cost escalation in excess of its own baseline estimate.[3] A 14 percent increase in MX construction costs over those in the current linear-grid/loading-dock baseline could total approximately $1.8 billion in constant fiscal year 1982 dollars.

THE DSB REVIEW

Selected MX military construction costs were also examined as part of a Defense Science Board (DSB) review of the MX system in the spring of 1980. Like the ICA team, the DSB panel examined construction cost estimates for the then-preferred racetrack basing design, rather than for the present linear-grid/loading-dock configuration. The DSB team concluded that the road and shelter construction costs developed by the Ballistic Missile Office were reasonable. The DSB's estimate of shelter construction costs was approximately 10 percent higher than that of the BMO, however. This 10 percent factor refers only to shelter construction, whereas the Corps of Engineers' estimate was 14 percent higher for the total system construction cost.

Both the DSB and the ICA panels briefly reviewed the cost of the missile transporter vehicles, an area of potential cost uncertainty. For lack of historical experience in

---

Footnotes at end of article.

building vehicles of this size, procurement cost estimates for the transporters were derived by applying a cost-per-pound factor to the system design. Neither panel produced an independent cost estimate for the transporters, although the DSB reviewer concluded that the BMO estimate of the transporter costs was credible. Both panels expressed the opinion that the development schedule for transporters was too short, leaving little time for full-scale testing.

Since no significant changes were made to the missile in moving from the racetrack configuration to the linear-grid/loading-dock basing design, the ICA's comments on missile costs presumably retain their validity. The transporter vehicles were redesigned, however, and their estimated costs increased sharply. The change in basing design resulted in a large decrease in military construction costs, primarily because the designated transportation railway network was deleted and because road and shelter door costs were reduced. The decrease in military construction costs was almost totally offset by the addition of mass simulators to the system baseline, and the increase in transporter costs. As a result, the total MX weapon system cost remained constant even though the basing configuration was changed.

Any further changes in the MX baseline design will affect the cost of the system. The addition of new requirements would increase system costs, but this might be offset, at least in part, by further revisions to the baseline. Indeed, the House Appropriations Committee has identified in a recent report a number of elements that might be reduced or eliminated from the MX system, resulting in considerable cost savings.[4]

CONCLUSION

In summary, the Air Force baseline system of 200 MX missiles in 4,600 shelters would cost about $40.7 billion in constant 1982 dollars for development, procurement, and military construction. Costs for the MX missile itself are unlikely to grow substantially, but there is more chance of escalation in the other costs, particularly the military construction costs.

MX acquisition costs in current dollars

CBO obtained the program cost for the linear-grid/loading-dock baseline in constant fiscal year 1978 dollars from the Air Force and converted these constant dollars into the current-year dollars that ultimately appear in budget documents. This conversion reflects both inflation estimates and outlay (or spend-out) rates.

This conversion shows that the total cost of the Air Force MX baseline in current dollars using CBO inflation and outlay assumptions is $57.2 billion. These funds would be spent over the next decade. This is only slightly higher than the $55.4 billion shown on the Congressional Data Sheets and the $55.6 billion if Air Force economic assumptions are used to convert the Air Force baseline into current dollars.

In doing this conversion, CBO found several anomalies:

The most recent Congressional Data Sheets for the MX program combine the costs associated with the linear-grid/loading-dock system for fiscal years 1982 and 1983 with the costs of the outdated racetrack system for fiscal years 1984 through 1986.

The hybrid schedule shifts $1.5 billion in budget authority from fiscal years 1984–1986 to 1987 and beyond.

The hybrid schedule shifts $0.9 billion among the accounts in fiscal years 1983–1986 in a way that would shift outlays from earlier to later years.

The Air Force uses outlay rates for the MX program that differ from those published officially by the Department of Defense (DoD), with the effect that outlays are shifted from the early years of the MX program to the later years.

These and other minor discrepancies made it difficult to reproduce the Congressional Data Sheets.

Calculation of MX costs from the Air Force cost baseline and comparison with the Congressional Data Sheets

In reviewing the DoD MX cost estimates, CBO examined the economic assumptions and methodology that DoD used to create the most recent official statement of MX investment costs—the Congressional Data Sheets published in support of the January 1982 Carter Administration budget.

The Air Force provided CBO with the Air Force cost baseline in 1978 dollars and a set of economic assumptions that the Air Force stated were used to create the Congressional Data Sheets from the constant-dollar baseline. Using these economic assumptions and the Air Force baseline, CBO computed the program by individual appropriation and compared its results with the Congressional Data Sheets. This is summarized in Table 1.

While the results for fiscal years 1982 and 1983 show good agreement, those for the 1984–1986 program do not. From this it appeared that the MX constant-dollar baseline had not been used to create the official DoD MX cost estimate for fiscal years 1984–1986.

CBO was subsequently informed by the Air Force that the costs for fiscal years 1984–1983 did not correspond to the current linear-grid/loading-dock baseline, but were drawn from the earlier racetrack system program. The Air Force representatives stated that the Air Force had attempted in October 1980 to secure from the Office of the Secretary of Defense (OSD) approval of action to incorporate the new (post-April 1980) linear-grid/loading-dock baseline in the Congressional Data Sheets material, and that OSD had approved changes only in the 1982 and 1983 numbers, thus leaving the outdated racetrack program costs for fiscal years 1984 through 1986.

Effects of outlay assumptions on MX program costs

The outlay factors that the Air Force used to prepare its submission for the Congressional Data Sheets appear to differ from the official OSD factors that were published in the Financial Summary Tables of the Department of Defense, January 15, 1981, Tab O. In particular, if the Air Force assumptions for outlay rates for 1981 and beyond are used, the MX program would spend out more slowly over early years, and spending would be extended over a greater number of years than with either the OSD factors or the CBO factors (see Table 2). The net effect of using the Air Force's outlay assumptions, rather than the OSD factors, is to increase slightly the total reported costs in current dollars. This occurs because the slower spend-out means more money must be included to pay for future inflation.[5] Use of Air Force outlay assumptions also reduces the outlays attributable to the MX in the early years of the program.

TABLE 2.—PERCENTAGE OF BUDGET AUTHORITY SPENT IN 1ST 2 YRS

Appropriation	Using OSD factors	Using Air Force factors	Using CBO factors
Missile procurement, Air Force	63	43	68
Military construction, Air Force	50	45	43
Research, development, test and evaluation, Air Force	94	91	92
Aircraft procurement, Air Force	52	47	54

MX baseline costs using CBO economic assumptions

CBO converted the Air Force baseline into current dollars using its own economic assumptions (see Table 3). The CBO estimates are close to the Air Force estimates because much higher CBO inflation rates are partially offset by faster spending due to use of CBO outlay rates.

It should be noted that these estimates, which incorporate assumptions concerning outyear estimates of inflation, are subject to considerable uncertainty because of the difficulty in projecting future patterns of inflation. The most fruitful use that can be made of them is to compare the individual estimates with one another rather than viewing the totals as firm absolute costs.

TABLE 3.—INVESTMENT COST OF MX BY FISCAL YEAR

Effect of increases in anticipated Soviet threat on MX system deployment costs

As indicated in the first section, the baseline MX weapon system consists of 200 MX missiles deployed in a complex of 4,600 horizontal concrete shelters. It is designed so that approximately half (or 100) of the MX missiles might be expected to survive an attack by a Soviet intercontinental ballistic missile (ICBM) threat constrained by SALT II limitations.

The MX system is scheduled for full operational capability in 1989. In the absence of SALT constraints, however, the Soviet Union might possess enough accurate ICBM weapons by 1990 to target at least one on each MX shelter. If, in the face of an increased Soviet threat, the United States still wanted approximately 100 MX missiles to survive an attack, it would have to choose between increasing the number of shelters and missiles in the system, defending the system with a Low Altitude Defense System (LoADS), or both.[6] The United States would have to begin modifying the system in anticipation of the increased Soviet threat so that the expanded or defended MX system would be in place when the threat was deployed.

This section of the paper addresses the effect on MX system deployment costs of threat levels greater than those used in deciding upon the currently proposed system size. It assumes that at any given threat level the United States would plan to deploy a system such that 100 MX missiles would be expected to survive an attack. Deployment of the current baseline MX system configuration, described in the first section of the report, is also assumed. This basing mode is now under review, however, and a new (or modified) basing design could be adopted within a few months. In that case, system acquisition costs could change significantly. Moreover, costs in this section are subject to important uncertainties that are discussed more fully below.

Projection of future Soviet threat levels

Any projection of Soviet ICBM warhead levels 10 to 15 years in the future is necessarily highly speculative. Such a projection involves estimates of Soviet production capability and assumptions about Soviet intentions. It also requires making a critical assumption about the existence or absence of future SALT constraints; such constraints could severely limit the anticipated threat. For this reason, CBO has chosen to examine the general trends in system cost of a function of a range of threat levels. Particular attention is paid, though, to the threat levels projected by the Office of Technology Assessment (OTA).

In a March 10 briefing on MX missile basing options, OTA projected that the Soviet Union might possess enough "counterforce" ICBM warheads by 1990 to allocate about 7,000 against the MX system, even after setting aside two warheads for every Minuteman silo and a number of other unspecified U.S. targets.[7] OTA made a similar projection for the 1995 Soviet threat, indicating that by that time the Soviet Union might be expected to devote as many as 12,000 ICBM warheads to attacking the MX system alone.

Least-cost MX system configurations corresponding to increased Soviet threat levels

In performing this analysis, CBO has employed a methodology developed by the Air Force for determining the least costly mix between shelters and missiles for a particular threat level, using as a data base Air Force estimates for marginal shelter and missile costs.[8] CBO has also examined MX configurations that would include the Army's proposed LoADS ballistic missile defense system, recognizing that testing and deployment of a mobile LoADS system would require abrogation of the 1972 Anti-Ballistic Missile (ABM) Treaty.[9] Cost-estimating relationships used here for the LoADS system were developed by the Army, and have not been independently evaluated by CBO.

It should be noted that the model used to determine the least-cost solutions identifies rough cost levels for the MX system. It does not provide detailed breakdowns of categories of costs (research and development, procurement, etc.). In addition, the data base used by the model was derived from estimates of the previous racetrack system costs. The Air Force has informed CBO, however, that the cost estimates produced by the model are reasonable for use in comparing costs of alternative systems under the current linear-grid/loading-dock concept. Indeed, the estimates fell within 10 percent of the cost of the current version of the MX system on several test runs performed using the Air Force's more detailed model.

If the United States decided to expand the size of the MX system in anticipation of the 1990 OTA-projected threat (7,000 warheads allocated to the MX system), the least costly mix between missiles and shelters to provide 100 expected MX missile survivors would be about 325 missiles and 8,570 shelters. Development, procurement, and construction costs for a system this size could total approximately $59 billion in constant fiscal year 1982 dollars. This is higher than the $40.7 billion in constant 1982 dollars for the Air Force's baseline program of 200 MX missiles and 4,600 shelters.[10] (Costs of the expanded system could, of course, be significantly higher because system construction would have to be accelerated to meet the 1990 threat. The $59 billion estimate does not account for such an acceleration.)

If, on the other hand, the United States deployed LoADS to defend the MX system against the 1990 OTA-projected threat, deployment of 225 missiles and 5,370 shelters along with 225 defense units would represent the least-cost solution. Total acquisition costs for this system would amount to roughly $53 billion, or about 10 percent less than an undefended system for the same threat level.

Designing an undefended MX system in anticipation of the 1995 OTA-projected threat (12,000 warheads dedicated to destruction of the MX system) would require tripling the number of shelters in the baseline. This would result in a least-cost system of about 410 missiles and 13,510 shelters at a cost of $79 billion. It appears more likely, however, that the United States would decide to abrogate the ABM treaty if faced with the prospect of this very high threat level, and would deploy defense units.[11] Given this decision, the least-cost defended system would be 265 missiles and 8,150 shelters with 265 defense units. Such a system would cost approximately $65 billion to deploy, representing an 18 percent saving over the cost of an undefended system.

Figure 1 demonstrates the general relationship between possible threat levels and the price of least-cost MX system configurations for both defended and undefended systems.

Implications of ballistic missile defense deployment

As shown in the figure, deployment of ballistic missile defense units could greatly decrease the total cost of the MX system, especially at high threat levels. The 1972 Anti-Ballistic Missile Treaty specifically prohibits the development, testing, or deployment of

Footnotes at end of article.

ballistic missile defense systems of components that are mobile land-based, however. Testing of LoADS in a mobile mode would constitute a clear violation of the treaty.[12] At some point in the engineering development of LoADS, therefore, it would become necessary to abrogate, modify, or withdraw from the treaty.[13]

Departure from the ABM treaty could have an important impact on the structure of U.S. offensive strategic forces if the Soviet Union in turn decided to deploy ballistic missile defenses on a large scale. In that case, the United States might be faced with the unpleasant choice of either greatly increasing the number of missile warheads in the U.S. land- and sea-based forces—in the hope of "flooding" Soviet defenses with more warheads than they could destroy—or developing and deploying maneuvering warheads that could evade the Soviet defenses. Either path would prove costly.

Uncertainties in system costs and deployment timing

It should be stressed that a great deal of uncertainty surrounds the costs of greatly expanded or defended MX systems. The first section of this report identified areas of uncertainty that are considered to exist even in the costs of the current baseline MX system of 200 missiles and 4,600 shelters. These uncertainties could be magnified greatly in the case of substantial expansion of the size of the system or acceleration of the rate of system deployment, especially if scarcity of critical resources (such as labor, water, concrete, or other materials) resulted in increased construction costs.

It is possible, on the other hand, that longer production runs and economies of scale could tend to lower the costs of some items, but the net effect is likely to be an increase in costs not reflected in the costs in this report. The LoADS ballistic missile defense system is another source of cost uncertainty. Because the system has not entered full-scale engineering development and is quite far from a production decision, the cost of developing and deploying defense units is certainly subject to substantial revision.

The timing of system deployment would also be a critical consideration. In order to maintain the survivability of the MX system, expansion or defense of the system would have to be complete before an increased Soviet threat was in place. In the case of expanded systems, this could require a significant increase in shelter construction rates over that planned for the current baseline system. The current baseline system, for example, assumes construction of 4,600 shelters over a period of five years (1985 through 1989); expansion of the system to respond to the 1990 OTA-projected threat would entail completion of almost 8,600 shelters in just six years. Even if the required acceleration in shelter construction could be achieved, it might cause an increase in average shelter construction costs.

The relative timing of LoADS deployment would be critical as well. If the MX system depended upon LoADS for its survivability and if deployment of the defense units did not keep pace with shelter and missile deployment, the system would be vulnerable until LoADS reached full operational capability. It might then become necessary to field additional shelters and missiles until LoADS was ready. Delays in LoADS deployment relative to the rest of the system could thus erode the savings that would stem from deploying a defended system.

CONCLUSION

Anticipated increases in the Soviet ICBM threat clearly would require either expansion or defense of the MX system if the United States wished to maintain the survivability of the system. Either expansion or defense would significantly increase MX costs. It must be recognized, however, that a major buildup of warheads would also prove quite costly to the Soviet Union. Any such decision would have to be taken in the context of other Soviet military requirements and in view of their domestic economic constraints. Moreover, a major expansion of the Soviet threat would demand that the United States consider alternatives other than a simple expansion of MX, which could alter the results in this paper.

FOOTNOTES

[1] In this configuration, each cluster of 23 shelters would be laid out more or less along a straight-line road. The missile and its launcher would be separate from the transporter vehicle, which would not enter the shelter. This contrasts with the previously considered "racetrack" configuration, under which the shelter clusters would resemble closed loops. In the earlier concept, a transporter-erector-launcher vehicle (TEL) would reside in the shelter, and would travel inside an additional "shield vehicle" to disguise the location of the TEL.

[2] Because of a misunderstanding between the Corps of Engineers and the Air Force about the design of horizontal shelters and their closures and associated roads, the inital Corps of Engineers' estimate was 25 percent higher than the BMO's. This misunderstanding was subsequently reconciled, with a downward revision of the Corps' estimate.

[3] Land withdrawal proceedings might delay the initial operational capability date. Should this occur without revision of the 1989 completion date, further acceleration of the construction rate would be required. In its February 1981 report, the General Accounting Office (GAO) indicated that the anticipated date for land availability had been slipped by eight months to April 1982, and that the Air Force had not yet revised its previous date of January 1982 for beginning MX site preparation. GAO hence considered the July 1986 initial operational capability date as "questionable." General Accounting Office, *The MX Weapon System: Issues and Challenges*, MASAD-81-1 (February 17, 1981), p. 7.

[4] The report recommended deletion of improvements to the MK-12A reentry vehicle's fuse, reduction of the total number of missile transporters, and elimination of special barriers and viewing ports that had been included in the system to aid SALT verification. See *Procurement Practices of the Department of Defense*, Surveys, and Investigations Staff, House Appropriations Committee (March 17, 1981).

[5] More money is needed under the Air Force assumptions, both because the spend-out rate is lower in the early years and because the spend-out occurs over one or two years.

[6] If a *minimum* of 100 missiles is required to survive, a larger system deployment is needed than if the expected value of MX survivors is 100 (meaning that there is approximately an even chance that the actual number of survivors would fall either above or below 100). It is possible that, in the face of an increasing Soviet threat, the United States would be willing to accept far fewer than 100 surviving missiles. Indeed, some MX proponents argue that even if the expected number of survivors would be zero, the Soviet Union would be deterred from attacking the United States if it had to exhaust its entire ICBM arsenal in attacking U.S. land-based missiles. Others, however, argue that the United States might want more than 100 survivors with which to attack Soviet ICBM silos.

[7] These counterforce warheads are assessed to have a combined accuracy, yield, and reliability sufficient to produce an 85 percent chance of destroying a shelter with each warhead. The OTA briefing does not give any estimate of how many other Soviet ICBM warheads—presumably not as well suited for destroying hardened shelters—would be available for other missions.

[8] See the first section of this report for a discussion about uncertainty in the projected costs of the baseline MX missile system. CBO has not attempted an independent evaluation of these costs.

[9] The LoADS concept proposed by the Army would consist of one defense unit deployed near each MX missile. Like the missiles themselves, the defense units would be mobile, and would move among shelters once or twice a year (whenever the MX missiles were moved). The true locations of the defense units, like those of the missiles, would be hidden from the Soviet Union.

[10] This cost does not include any operating and support costs, nor does it comprise Department of Energy costs for warhead development and production. Unless otherwise noted, all costs in this report refer to acquisition costs (development, procurement, and military construction costs), in terms of constant fiscal year 1982 dollars.

[11] In his March 12, 1980, testimony before the Research and Development Subcommittee of the Senate Armed Services Committee, then Under Secretary of Defense William Perry stated that Soviet deployment of more than twice the number of ICBM warheads permitted under SALT II could drive the United States to defending the MX system.

[12] Deployment of LoADS would violate other provisions of the treaty as well. The first violation would come, though, when the developmental LoADS unit or any of its components became demonstrably mobile.

[13] The ABM treaty states that either the United States or the Soviet Union can withdraw from the treaty if "extraordinary events" jeopardize a country's supreme interests. Six months' prior notification is required, however, before withdrawal.

Mr. HATFIELD. Mr. President, given the vast dependency of the United States and the Western world on oil from the Persian Gulf, there are few areas of the world than that volatile region where the threat of war is more imminent. The possibility of a major war breaking out in that region should oil supplies be interrupted is an undeniably frightening fact of life in the modern age.

It is a paramount irony that those who claim to support this unprecedented buildup of conventional and strategic forces in large measure to protect this oil flow, are sacrificing opportunities to completely terminate our dependency on oil from the Persian Gulf.

As I have previously indicated, the CBO estimates that the proposed MX missile system would alone cost $40.7–$79 billion. What if these funds could be instead utilized in a concerted program to end our dependency on Persian Gulf oil?

I submit for the RECORD a study by the Council on Economic Priorities which analyzes what a shift of MX expenditures to energy efficiency and conservation could do to this country's dependency on foreign oil. This study was completed last year and is based on the very low, $34 billion Air Force estimate of the original MX missile costs.

I ask unanimous consent that the study be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

SHIFTING MX EXPENDITURES TO ENERGY EFFICIENCY: MEMO ON THE NATIONAL SECURITY IMPLICATIONS OF ALTERNATIVE ENERGY DEVELOPMENT

(By Robert DeGrasse, Jr.)

How can we best plan for our future security? In this memo, we highlight the substantial security advantages of pursuing steps toward energy independence in comparison with developing a costly new missile system. While we have not done a complete cost-benefit analysis, we estimate the amount of energy saved by a ten year program transferring funds from development of the MX Missile to a major energy-efficiency program.

In 1979, the U.S. imported about 45 percent of all petroleum products consumed domestically; 31 percent—almost one-third—of those imports came from the Persian Gulf. America's total oil import bill in 1979 cost over $50 billion, about $32 billion more than the entire balance of payments deficit that year.[1]

Undoubtedly, these facts weighed heavily on President Carter when he announced during his State of the Union message that any attempts by the Soviet Union to control the Persian Gulf region would be regarded as "an assault on the vital interests of the United States," and would be "repelled by any means necessary, including military force." A spokeswoman for the Air Force went so far as to argue that the Afghanistan crisis shows the need for the MX Missile. However, threats of war have created concern among allies in Western Europe and Japan who would suffer economic chaos if superpower conflict destroyed Persian Gulf oil production (see Chart I). A desire for restraint underlies their unwillingness to strongly support U.S. response to what may amount to the Soviet Union's Vietnam.

The MX Missile cannot add to the energy supplies. To the contrary, it would consume substantial amounts of energy in construction and operation. The proposition that the MX will enhance U.S. ability to control events in the Persian Gulf is dubious, at best. However, the MX will require substantial capital resources that, if used for energy efficiency, could significantly contribute to U.S. energy supplies and overall economic health.

By transferring the proposed $34 billion expenditure (in 1980 dollars) for the MX to funding a ten-year program subsidizing investments in energy saving measures we estimate that the U.S. could cut oil imports by between 23 and 54 percent and provide over 115 thousand jobs. Such a program would also cut the U.S. balance of trade deficit by about 47 to 116 percent, thus stabilizing the U.S. dollar in foreign currency markets.[2] Results are expressed in a range to include a broad variety of efficiency measures and reflect the uncertainty of conservation pricing projections (see footnotes 3 and 4).

CHART I.—*Percent of oil imports purchased from Persian Gulf nations (1979)*

	Percent
United States	31
Western Europe	63
Japan	73
World-wide	63

Source: Testimony of Deputy Secretary of Energy John Sawhill, Senate Foreign Relations Committee, February 20, 1980.

UNITED STATES ENERGY DEMAND

During 1979, the U.S. consumed just over 78 "quads" (quadrillion British Thermal Units) of energy. There are 172 million barrels of oil in a quad. Energy production and use is displayed by sector in Chart II.

In 1979, the U.S. imported about 2.862 billion barrels of oil, producing 16.64 quads of energy, accounting for about 45 percent of total petroleum consumption and 21 percent of total energy use.

CHART II.—1979 U.S. DOMESTIC ENERGY PRODUCTION AND CONSUMPTION (QUADS)

Sector	Petroleum	Natural gas	Coal	Hydroelectric	Nuclear	Electricity distributed and lost	Total
Residential and commercial	6.9	7.9	0.2			14.5	29.5
Industrial	7.4	7.8	[1] 3.6	[2]		9.9	28.7
Transportation	19.2	.6				[2]	19.8
Electrical energy produced	3.5	3.6	11.3	3.2	2.8	[3] 24.4	
Total	37.0	19.9	15.1	3.2	2.8		78.0

[1] Includes coke.
[2] Less than 0.1 of a quad. Energy produced by wood, geothermal, and waste was also less than 0.1 quad.
[3] Total electricity. Electrical energy is tracked by how it is produced and where it is used. Figures for electricity distribution include over ⅔ portion lost through entropy.

Source: Department of Energy, Monthly Energy Review (March 1980).

If the U.S. Government were to pay for energy efficiency measures in oil using homes and factories instead of building the MX, we could save enough oil by 1990 to offset between 23 and 54 percent of U.S. petroleum imports (see Chart III). This energy efficiency program would offset a substantial portion of the 31 percent of our imports derived from the Persian Gulf.

CHART III.—MX FUNDED: ENERGY EFFICIENCY PROGRAM

[Dollar amounts in billions of 1980 dollars]

Sector	Investment	Investment required per quad saved	Total quads saved	Percent of imports offset
Residential and commercial	$17	$5–$10	1.7–3.4	10–20
Industrial	17	3– 8	2.1–5.6	13–34
Total	34		3.8–9.0	23–54

PROGRAM ASSUMPTIONS

We assume that one quad of energy saved by conservation measures could require between $5 and $10 billion of investment by residential users and between $3 and $8 billion by industrial users. These ranges capture the majority of energy efficiency measures according to researchers familiar with energy pricing.[3] Residential measures falling within this range include: insulating walls and ceilings, adding storm windows, caulking window frames, installing automatic thermostats and purchasing more efficient appliances. Industry could achieve greater energy efficiency by using co-generation, improving furnace, air-conditioning, and machinery efficiencies, and insulating facilities.

Footnotes at end of article.

For both residential and industrial conservers, the cost of saving energy will vary based on the state of existing equipment and facilities. For evample, if a home is already heavily insulated, each additional dollar spent on insulation will yield less energy savings.

For the purposes of this memo, we assume that the federal government would directly purchase any investment in energy efficiency which saved oil within the $5 to $10 billion per quad price range. This would be analogous to present targeted federal subsidy programs designed to induce utilities to shift from petroleum to coal. Some $3.4 billion would be expended each year for ten years equalling the MX's $34 billion. For the purposes of comparing this investment with the MX, we did not assume that subsidies could leverage private funds, even though most federal programs are based on the assumption that tax credits or grants will induce private sector investment substantially greater than the subsidy. Also, we simplified this analysis by not discussing a broader energy conservation program that would save natural gas and electricity in addition to petroleum. On average, if one quad of energy is saved in the residential/commercial or industrial sector, only about 30 percent of the savings will be petroleum unless the program is targeted.[4] A more inclusive energy efficiency program would have the same impact if it were coupled with an interfuel transfer program allowing easier trade-offs between natural gas or electricity and petroleum. We did assume that for each quad of petroleum saved, a quad of imports would be foregone through market pressures and proper public policy.

JOBS AND BALANCE OF TRADE

Roughly 117 to 135 thousand jobs could be provided for ten years in the energy efficiency industry (direct employment) and its suppliers (indirect) by this $34 billion program (1980 dollars). Additional jobs would be created by the multiplier effect of employees spending their wages within the economy. This estimate is based on Bureau of Labor Statistics figures for gross product and employment in the durable goods manufacturing and residential construction sectors.[5] This compares favorably with the approximately 105 to 115 thousand direct and indirect jobs that could be created by the MX Missile for the life of that project.[6]

Our balance of trade deficit in 1979 was $28 billion. If this conservation program had been in place in 1979, it would have trimmed $13.8 to $32.4 billion from U.S. net imports, cutting our balance of trade deficit to between a $14.2 billion deficit and a $4.4 billion surplus (a cut of 48 to 116 percent). We assume that these savings would be used to help pay off the initial investment in conservation and create jobs in the U.S. rather than exporting more dollars abroad and weakening our currency in the international marketplace. The percentage of our trade deficit that would be offset by such a program will at least remain constant since the cost of oil is much higher than the $20.96 average price per barrel in 1979. As the cost of oil goes up, the value of oil offset will increase correspondingly.

CONCLUSION

The most effective solution to the security crisis posed by U.S. dependence on oil from the Persian Gulf is the often discussed goal of energy self-sufficiency. Steps toward this goal would begin to defuse the possible super-power confrontation in the area. Such steps would also decrease the concern among oil producing nations like Saudi Arabia that the west is pressuring them to keep oil production high, depleting their most valuable

resource faster than may be economically optimal for them.

The program outlined in this memo indicates the magnitude of the benefits derived from such steps. The health of the economy and our relations with other nations would be greatly enhanced by re-directing the resources which will be poorly used in developing the MX Missile to improving the energy efficiency of the American economy. As Deputy Secretary of Energy Sawhill observed, "only strong additional conservation measures designed to substantially curb demand and an accelerated program of inter-fuel substitution can reduce free world dependence on Persian Gulf Oil."

I would like to thank Dr. Leonard Rodberg of the Public Resource Center, Alan Meier of Lawrence Berkeley Laboratory, Dr. Robert Williams of Princeton University, Charles Komanoff of Komanoff Energy Associates, and Meg Schachter of the Department of Energy for their assistance in developing the methodology for this project and reviewing drafts of the memo.

While this memo was prepared with the advice and assistance of many people, the author is responsible for the estimates made, views expressed, and any errors contained in this project.

FOOTNOTES

[1] Department of Energy, *Monthly Energy Review* (March 1980).

[2] Our analysis is based on the projection of 1979 figures for oil imports and balance of trade deficit to 1990. Deputy Secretary of Energy John Sawhill stated in his testimony to the Senate Foreign Relations Committee on February 20, 1980 that imports will, at best, remain stable through 1985. Inflation in oil prices will bias our numbers downward, making them understate the positive impact of such a program. As oil prices go up, conservation investments are more economical and the negative contribution of oil imports to the balance of trade increases.

[3] The price ranges for conservation energy were chosen to reflect the uncertainty about how much energy each dollar of investment could save in such an ambitious program. Alan Meier of Lawrence Berkeley Laboratory estimates that, at $5 billion a quad, about 28 percent of residential natural gas could be saved by currently cost-effective conservation measures in California. Our program, which seeks to offset a more expensive fuel, petroleum, is projected to save between 27 and 63 percent of residential/commercial and industrial oil use. The government could fully pay for these investments by reallocating the funds earmarked for the MX. Our price ranges for each quad of energy saved are high, underestimating the total import savings, considering the estimates Dr. Leonard Rodberg made in his study *Employment Impact of the Solar Transition* for the Congressional Joint Economic Committee (Washington, 1979). He found that it would cost about $3.8 billion per quad to save 34.7 quads of energy. We would expect that the marginal cost of saving a quad would increase as more conservation measures are employed. Rodberg's program also requires a correspondingly larger investment. Industrial efficiency was priced more cheaply, based on industry's better record in identifying possible savings (see *Energy Future*, Robert Stobaugh and Daniel Yergin, eds. [Random House: New York 1979] Chapter 7, "Conservation: The Key Energy Source," by Daniel Yergin.)

[4] Derived from *Monthly Energy Review* (March 1980) statistics on energy consumption by sector. Petroleum used for electricity production is factored in.

[5] U.S. Department of Labor, Bureau of Labor Statistics, "BLS 1977 Employment Requirements Table," Office of Economic Growth, December 1979. BLS figures indicate that 34.4 thousand employees are required to produce a billion dollars of output (adjusted for 1980 dollars) in household appliance manufacturing. The figure is 39.9 thousand jobs per billion for new residential construction. These sectors provide a range that simulates the energy efficiency industry. We assume that $3.4 billion output is produced every year during this ten year program.

[6] *Ibid*, BLS projections for complete guided missile production indicate that 31 thousand workers are required for a billion dollars of output (adjusted for 1980 dollars). In new highway construction, the figure is 33.8 thousand employees per billion. These industries should simulate the range of employment to develop the MX Missile and its basing mode. We assume, for simplicity, that MX expenditures will be $3.4 billion for ten years.

Mr. HATFIELD. After receiving the CBO estimates of MX missiles costs, I asked the Council to do a new analysis of what such a transfer of between $40 and $80 billion would mean if applied to a 10-year program of energy conservation in this country. The estimate of the Council is based on the following updated chart III which appeared in the 1980 study. The results are, by any analysis, remarkable.

I ask unanimous consent that this chart be printed in the RECORD.

There being no objection, the chart was ordered to be printed in the RECORD, as follows:

CHART III

Residential and commercial	$20–$40	$8	2.5– 5	15%–30%
Industrial	20– 40	$6	3.3– 6.6	20%–40%
Total	40– 80		5.8– 11.6	35%–70%

Note: Save between 35 percent and 70 percent of the 1979 $60 billion oil import bill. Save between $21 and $42 billion, or between 75 percent and 150 percent of our $28 billion 1979 balance of trade deficit. Create about 5,000 more jobs each year for each billion dollars spent on the MX.

Mr. HATFIELD. An investment of $40 to $80 billion would save between 35 and 70 percent of the 1979 $60 billion oil import bill to the United States. Since all imports from the Persian Gulf states constitute 31 percent of our oil import total, a $40 billion investment could completely end in 10 years our dependency on oil from that unstable region of the globe.

An $80 billion investment in conservation even given the conservative assumptions of this study, would save a massive 70 percent of our imported oil bill.

There would be remarkable additional benefits from a commitment of such funds to conservation, instead of a costly and deeply flawed strategic concept such as the MX. A $40 billion commitment, according to the council, would also save 75 percent, or $21 billion, of our $28 billion 1979 balance-of-trade deficit. An $80 billion commitment would save 150 percent of that same deficit and create a trade surplus of $14 billion.

The commitment of our resources in this manner would, therefore, remove a major source of potential world conflict. At the same time it would dramatically reduce our imported oil bill and heavy balance-of-trade deficits, both undeniable causes of severe inflationary spiral which is running rampant through the economies of the Western world. In addition, about 5,000 more jobs would be created each year for each billion spent on conservation in the place of the MX.

This is but a single example of what a shift in resources away from a wasteful weapons system and toward higher national priorities can mean in establishing a foundation for peace and stability in a vastly troubled world.

TRIBUTE TO DAN DREYFUS

Mr. JACKSON. Mr. President, it is with a mixture of pride and regret that I rise to inform the Senate that on Friday, June 12, Dr. Daniel Dreyfus, staff director for the minority of the Committee on Energy and Natural Resources, will end his long and distinguished service on the committee staff.

I deeply regret the fact that Dan is leaving, but I am proud of his accomplishments and our long association.

Dan Dreyfus is a remarkable person. He is a civil engineer who holds a doctorate in public administration. He has been involved on the ground in planning and construction of refineries and large projects for private industry and with the Corps of Engineers. He has planned and coordinated multiple purpose water projects for the Bureau of Reclamation. Since 1968 he has analyzed policy issues and prepared legislation for the Senate on a wide variety of energy and natural resources matters.

Among the dozens of legislative measures to which Dr. Dreyfus has contributed major staff work are the following:

National Environmental Policy Act of 1969.

Alaska Native Claims Settlement Act of 1971.

Measures to establish the first federal programs to assist the development of solar and geothermal energy in 1974.

Federal Non-Nuclear Energy Research and Development Act of 1974.

Reorganization Acts of 1974 establishing the Federal Energy Administration, the Nuclear Regulatory Commission, and the Energy Research and Development Administration.

Approval of the Covenant establishing the Commonwealth of the Northern Mariana Islands in 1976.

The Department of Energy Organization Act of 1977.

The National Energy Acts of 1978.

The Energy Security Act of 1980.

For the last 6 years, Dan Dreyfus also has had very significant supervisory responsibilities. In January 1975 Dr. Dreyfus was appointed deputy staff director for legislation, a position in which he supervised staff work on all legislative matters before the then Committee on Interior and Insular Affairs. In recognition of the expanded role of the Interior Committee in energy policy matters, it was redesignated the Committee on Energy and Natural Resources by the Senate reorganization of 1977. In January 1979 Dr. Dreyfus was appointed staff director. In January 1981, upon the Republican assumption of Senate leadership, he became the staff director for the minority of the committee.

Mr. President, this list of accomplishments does not, indeed cannot, ade-

quately describe the contribution Dan Dreyfus has made to the work of the Senate during the last 13 years. He brought to all his assignments a keen intellect, good humor, a willingness to work hard, objectivity, creativity, and a sharp, sometimes biting, wit. Dan is always ready to try something different. He is a licensed sailplane pilot, a certified scuba diver, and a sometime parachutist. Combined with his varied educational and work background, these traits put him outside the stereotype of the bureaucrat, political hack, or impractical academic.

Mr. President, in recent years it has been popular to denigrate Government service. All of us are, I am sure, painfully aware of the decline in respect for our governmental institutions and the men and women who try to make them work. I hope that we can restore the spirit which 20 years ago President John Kennedy reflected when he said:

Let the public service be a proud and lively career. And let every man and woman who works in any area of our national government, in any branch, at any level, be able to say with pride and honor in future years: "I served the United States Government that hour of our nation's need."

Mr. President, it is in that spirit that I salute Dan Dreyfus today. He has truly been a distinguished public servant. I wish him good luck and Godspeed.

Mr. McCLURE. Mr. President, I am delighted that I was in the Chamber at the time the Senator spoke regarding Mr. Dreyfus.

Mr. President, as chairman of the Senate Committee on Energy and Natural Resources, I, too, rise in deep respect and join the distinguished Senator from Washington and other Members of this Chamber in paying our highest compliments to Dan Dreyfus, minority staff director for the committee.

As a Member in the House, I had occasion to work with Dan when he was the professional staff member under the Water and Power Subcommittee of the Senate Committee on Interior and Insular Affairs. I learned then to value his advice and counsel. When I came to the Senate in 1972, it was my good fortune to become a member of the Senate Interior and Insular Affairs Committee and my association with Dan became even closer.

I know that as elections come and go, the makeup of the Senate may change but the institution continues. Dan Dreyfus, in his 13 years on the Senate staff, has epitomized that continuity. His superb impartial guidance, and I speak from personal experience, has been a steadying influence—first on the committee and then on the entire Senate. Dan is a professional, and his advice has been sought by Senators on both sides of the aisle. He earned the trust of all those who admire professionalism.

Many times over the years I have appreciated his candor and sought his counsel. Often his sharp humor and wit would cut through an atmosphere of impasse in mark up or conference committee. Many times he brought back from the end of the diving board Senators and Congressmen who had gotten off track.

His staff skills are too numerous to enumerate. The significant bills which bear the Dreyfus imprint would encompass virtually every major bill reported by the Senate Energy and Natural Resources Committee for the past 13 years.

Although Dr. Dreyfus is leaving his capacity as staff on June 12, his influence will long remain.

Dan, thank you for your service to me, the committee, the Senate, and the United States.

Mr. JACKSON. Mr. President, I thank the distinguished chairman of the Committee on Energy and Natural Resources for his generous comments.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 94-399, appoints the Senator from New York (Mr. D'AMATO) to the Temporary Commission on Financial Oversight of the District of Columbia, in lieu of the Senator from Vermont (Mr. LEAHY).

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States reported that on May 22, 1981, he had approved and signed the following act:

S. 730. An act to insure necessary funds for the implementation of the Federal Crop Insurance Act of 1980.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MATHIAS, from the Committee on the Judiciary, without amendment:

S. 255. A bill to amend the patent law to restore the term of patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PERCY, from the Committee on Foreign Relations:

J. William Middendorf II, of Virginia, to be the Permanent Representative of the United States to the Organization of American States, with the rank of Ambassador.

Thomas O. Enders, of Connecticut, a Foreign Service officer of the class of Career Minister, to be an Assistant Secretary of State.

(The above nominations reported from the Committee on Foreign Relations with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

William A. Niskanen, Jr., of California, to be a member of the Council of Economic Advisors;

Stephen May, of New York, to be an Assistant Secretary of Housing and Urban Development;

Judith L. Tardy, of Virginia, to be an Assistant Secretary of Housing and Urban Development;

Stephen J. Bollinger, of Ohio, to be an Assistant Secretary of Housing and Urban Development;

Antonio Monroig, of Puerto Rico, to be an Assistant Secretary of Housing and Urban Development; and

Lawrence J. Brady, of New Hampshire, to be an Assistant Secretary of Commerce.

ORDER FOR SEQUENTIAL REFERRAL OF THE NOMINATION OF JUNE GIBBS BROWN

Mr. STEVENS. Mr. President, I ask unanimous consent that if and when the Committee on Commerce, Science, and Transportation reports the nomination of June Gibbs Brown, to be Inspector General of the National Aeronautics and Space Administration, it then be referred to the Committee on Governmental Affairs for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOREIGN CURRENCY REPORTS

In accordance with the appropriate provisions of law, the Secretary of the Senate herewith submits the following report(s) of standing committees of the Senate, certain joint committees of the Congress, delegations and groups, and select and special committees of the Senate, relating to expenses incurred in the performance of authorized foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL BY MEMBERS AND EMPLOYEES OF THE U.S. SENATE, COMMITTEE ON FOREIGN RELATIONS, UNDER AUTHORITY OF SEC. 22, PUBLIC LAW 95-384—22 U.S.C. 1754(b), FOR THE PERIOD JAN. 1 TO MAR. 31, 1981

Name and country	Name of currency	Per diem		Transportation		Miscellaneous		Total

CHARLES H. PERCY,
Chairman, Committee on Foreign Relations.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BUMPERS:

S. 1349. A bill to amend the act of October 9, 1965; to the Committee on Energy and Natural Resources.

By Mr. MATHIAS:

S. 1350. A bill to authorize the establishment of a Senior Cryptologic Executive Service and Merit Pay and Awards System within the National Security Agency and to make necessary amendments to title 5, United States Code; to the Committee on Governmental Affairs.

By Mr. SYMMS (for himself and Mr. MCCLURE):

S. 1351. A bill to amend section 164 of the Water Resources Development Act of 1976; to the Committee on Environment and Public Works.

By Mr. HATFIELD (for himself, Mr. MELCHER, Mr. STEVENS, Mr. LEVIN, Mr. DURENBERGER, Mr. CRANSTON, and Mr. BAUCUS):

S. 1352. A bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for contributions of certain agricultural products to certain tax-exempt organizations; to the Committee on Finance.

By Mr. LONG:

S. 1353. A bill to amend the Internal Revenue Code of 1954 to allow that portion of the investment credit attributable to the employee plan percentage to be taken against 100 percent of the liability for tax; to the Committee on Finance.

By Mr. KENNEDY (for himself, Mr. MOYNIHAN, Mr. DODD, Mr. LEAHY, Mr. EAGLETON, Mr. LEVIN, Mr. CRANSTON, Mr. HART, Mr. INOUYE, Mr. PELL, Mr. TSONGAS, Mr. PROXMIRE, and Mr. WEICKER):

S.J. Res. 89. Joint resolution on the hunger strike in Northern Ireland; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BUMPERS.

S. 1349. A bill to amend the act of October 9, 1965; to the Committee on Energy and Natural Resources.

FRANCHISE FEES

● Mr. BUMPERS. Mr. President, one of the most serious problems currently facing the National Park Service is the deterioration of a number of the parks' physical facilities such as roads, bridges, lodgings, drinking water and sanitation systems, campgrounds, visitor facilities, and so forth. Both the Congress and the past administrations have too long neglected the maintenance and rehabilitation needs of many of the physical facilities in our national parks, monuments, and recreation areas; and it is time we started doing something about it.

To the credit of President Reagan, one of the priorities of the new administration in the area of natural resources has been an effort to address these needs and seek additional funding to correct these health and safety deficiencies.

Unfortunately, as proposed by the administration, this new program would derive its funds—$150 million in fiscal year 1982—from the Land and Water Conservation Fund. At present, the LWCF is the sole source of funding for the acquisition of park lands by Federal land managing agencies. Under the administration's plan, the fund would be opened up to permit the use of these LWFC moneys for park rehabilitation and restoration projects.

According to Secretary of the Interior James Watt, the reason for recommending this particular source of funding for the program is to make less money available for land acquisition by making the agencies choose between acquiring lands mandated for acquisition by the Congress or repairing a deteriorating physical plant. I have indicated on a number of occasions that I find such a choice unfair and not in the public interest; it is especially unfair to those who own property within park units, for many of those people do not know from one day to the next whether their property will be acquired. This transparent attempt to make less money available to Federal agencies for land acquisition under the guise of a "Park Protection Program" disturbs me, and I plan to vigorously oppose it. Nevertheless, I support the effort to make more funds available for the correction of health and safety deficiencies in our parks. Although I feel the funds should come through the normal appropriations accounts, I will support the $150 million increase in the National Park Service budget in fiscal year 1982 recommended by President Reagan.

In this context, Mr. President, I am introducing a bill today which is designed to make additional funds available to the Park Service for these projects. The legislation accomplishes this goal by earmarking franchise fees paid by concessioners operating in park units to be used for these purposes. Currently these fees, totaling some $4.7 million in 1980, are deposited in miscellaneous receipts in the Treasury. Under the legislation I am introducing today, these funds would be earmarked and made available to the Park Service, subject to appropriation, for the correction of health and safety deficiencies in our national parks.

This approach would serve two purposes. First, as I have said, it would make additional funds available for refurbishing our national parks. While the amount of money is not large, it is certainly significant and will contribute to reducing the backlog of rehabilitation and maintenance projects. Second, I would hope that this legislation would encourage the

Park Service to reassess the method by which franchise fees are calculated so that the Federal Government receives a fair return for the privilege of operating in a national park.

During oversight hearings in 1979 before the Subcommittee on Parks, Recreation, and Renewable Resources, it became apparent to me that the franchise fee formula which has been used by the National Park Service since the early 1960's needed to be changed. William J. Whalen, the Director of the National Park Service at the time, concurred in that assessment:

Franchise fees are now set by a formula which was developed in the early 1960's and based on the national industry profitability for each of the industries operating in our national parks. However, we believe this formula today may not be representative of "value of the service offered" as defined in the concession law. In 1978, the NPS completed, with the assistance of a consultant, a study which will enable us to equitably establish rates charged to the public by concessioners. One of the initial findings of the consultant was that because operations were so diverse throughout the park system, a formula approach to rates for services was not feasible. Based on that same kind of thinking we do not believe that the formula approach for franchise fees works well either.

One of the things that concerns me, Mr. President, is that the Park Service has been studying this matter for 10 years and there has been no change. Perhaps this legislation will give the Park Service some incentive to reform the franchise fee system to more accurately reflect the value of operating within a national park. In most cases, I am convinced that the fees the government receives are too low. Perhaps this legislation will help remedy that situation.

I ask unanimous consent that the bill and a listing of fees collected, be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1349

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that Section 3 of the Act of October 9, 1965 (79 Stat. 969) is amended by adding the following new subsection:

"(e) Franchise fees collected pursuant to this Act shall be available for appropriation to the National Park Service, without prejudice to appropriation from other sources for the same purposes, for the restoration and improvement of units of the National Park System including construction and rehabilitation of physical facilities within such units.".

FRANCHISE FEES COLLECTED BY THE NATIONAL PARK SERVICE PURSUANT TO P.L. 89-249

[In millions]

●

By Mr. MATHIAS:

S. 1350. A bill to authorize the establishment of a Senior Cryptologic Executive Service and Merit Pay and Awards System within the National Security Agency and to make necessary amendments to title 5, United States Code; to the Committee on Governmental Affairs.

SENIOR CRYPTOLOGIC EXECUTIVE SERVICE ACT OF 1981

● Mr. MATHIAS. Mr. President, I am today introducing the Senior Cryptologic Executive Service Act of 1981. This legislation would authorize the establishment of a Senior Cryptologic Executive Service and a Merit Pay and Awards System within the National Security Agency by making necessary amendments to title 5, United States Code. The bill that I introduce today is virtually identical to legislation which was favorably reported to the Senate during the 96th Congress by the Governmental Affairs Committee. That bill, S. 2116, could not be acted upon prior to adjournment sine die due to the press of business at the end of the 96th Congress.

When the Civil Service Reform Act of 1978 (P.L. 95-454) was passed, the National Security Agency, together with other intelligence agencies, was exempted from coverage until title IV, Senior Executive Service. NBA was exempted from title IV because of security considerations and problems inherent in the integration of personnel of an intelligence agency with those of other executive agencies. The effect of this exemption, however, has been to deprive the National Security Agency of the many advantages of a Senior Executive Service, a useful administrative tool for the staffing and effective management of senior executive positions.

My proposal would remedy this situation. By allowing NSA to establish its own Senior Cryptologic Executive Service, it will eliminate the adverse impact on the National Security Agency of having an executive personnel system at significant variance with the majority of the executive branch.

The Senior Cryptologic Executive Service Act would provide to the Secretary of Defense, or his or her designee for this purpose, the authority to establish, within necessary security constraints, a Senior Crytologic Executive Service and a Merit Pay and Awards System. Both would be comparable to the Senior Executive Service and merit pay and cash awards system established for other executive agencies by the Civil Service Reform Act of 1978. Such provisions are required to insure that treatment of executive personnel of the National Security Agency is equivalent to that of other executives within the executive branch having comparable responsibilities.

Implementation of this system within the National Security Agency would conform, within appropriate security constraints, to the provisions governing the Senior Executive Service in title 5 of the U.S. Code, including those provisions relating to basing compensation and retention on individual and organizational performance, establishing comparable performance awards and ranks, permitting the granting of sabbaticals, authorizing early retirement and removing the limitation on the accumulation of annual leave. The Agency would provide for an election period, similar to the period provided under section 413(c) of the Civil Service Reform Act, during which any employee serving in a position designated for the Service could decide whether to accept or decline conversion.

The Civil Service Reform Act recognized the benefits of rewarding excellence and discouraging lackluster performance through the use of a merit pay and cash awards system. This act would provide to the Secretary of Defense, or his or her designee for this purpose, the authority to establish a comparable system within the National Security Agency, providing NSA with this effective management tool.

Mr. President, this bill touches on important issues that affect the performance and effectiveness of the National Security Agency. In the weeks ahead, I hope that early hearings and considerations of this bill can be arranged.

Mr. President, I ask unanimous consent that the text of the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Senior Cryptologic Executive Service Act of 1981".

SEC. 2. (a) The Secretary of Defense (or his designee) may establish a Senior Cryptologic Executive Service within the National Security Agency comparable to the Senior Executive Service established under subchapter II of chapter 31 of title 5, United States Code. Under the authority of the Secretary of Defense, the Director, National Security Agency, is authorized to adopt administratively those provisions of title 5, United States Code, that the Director considers necessary to administer the Senior Cryptologic Executive Service and to appoint, without regard to the civil service laws, individuals to positions established within the Senior Cryptologic Executive Service.

(b) The Secretary of Defense or his designee may promulgate regulations establishing a Senior Cryptologic Executive Service which—

(1) meets the requirements set forth in section 3131 of title 5, United States Code, for the Senior Executive Service;

(2) provides that positions in the Senior Cryptologic Executive Service meet requirements which are consistent with those in section 3132(a)(2) of title 5, United States Code;

(3) notwithstanding any limitation on compensation set out in any other law, provides rates of pay for the Senior Cryptologic Executive Service which are not in excess of the maximum rate of less than the minimum rate of basic pay established for the Senior Executive Service under section 5382 of title 5, United States Code, and which are adjusted at the same time and to the same extent as rates of basic pay for the Senior Executive Service are adjusted;

(4) provides a performance appraisal system for the Senior Cryptologic Executive Service that is consistent with the principles of the provisions of subchapter II of chapter 43 of title 5, United States Code:

(5) provides for removal consistent with section 3592 of title 5, United States Code, and removal or suspension consistent with

subsections (a), (b), and (c) of section 7543 of such title 5; except that any hearing or appeal to which an employee is entitled shall be held or decided pursuant to procedures established by regulation of the Secretary of Defense or his designee;

(6) permits the Director, National Security Agency, to pay performance awards to members of the Senior Cryptologic Executive Service consistent with the provisions applicable to the heads of agencies under section 5384 of title 5, United States Code;

(7) provides that members of the Senior Cryptologic Executive Service may be granted sabbatical leave in accordance with the provisions of section 3396(c) of title 5, United States Code; and

(8) provides that annual leave of a member of the Senior Cryptologic Executive Service shall not be subject to the limitation on accumulations imposed by section 6304 of title 5, United States Code.

(c) The President, based on the recommendations of the Secretary of Defense, may award ranks to members of the Senior Cryptologic Executive Service in a manner consistent with the provisions of section 4507 of title 5, United States Code.

(d) Notwithstanding any other provision of this Act, the Director, National Security Agency, may detail or assign individuals appointed to the Senior Cryptologic Executive Service to serve in non-Senior Cryptologic Executive Service positions in which the appointee's expertise and experience may be of benefit to the National Security Agency or another Government agency and the appointee shall not lose thereby any of the entitlements or status associated with the appointment in the Senior Cryptologic Executive Service.

(e) The National Security Agency shall submit to the Permanent Select Committee on Intelligence of the House of Representatives and the Select Committee on Intelligence of the Senate, at the time the budget is submitted by the President to the Congress during each odd-numbered calendar year, a report on the Senior Cryptologic Executive Service. The report shall include—

(1) the percentage of senior executives at each pay rate employed at the end of the preceding fiscal year;

(2) the number, distribution, and amount of performance awards paid during the preceding fiscal year; and

(3) the number of individuals removed from the Senior Cryptologic Executive Service for less than fully successful performance.

SEC. 3. (a) (1) Section 8336 of title 5, United States Code, is amended by redesignating subsection (k) as subsection (l) and inserting immediately after subsection (j) the following new subsection:

"(k) A member of the Senior Cryptologic Executive Service who is removed from the Senior Cryptologic Executive Service for less than fully successful performance after completing twenty-five years of service or after becoming fifty years of age and completing twenty years of service is entitled to an annuity.".

(2) Section 8339(h) of title 5, United States Code, is amended by striking out "section 8336 (d), (h), or (j)" and inserting in lieu thereof "section 8336 (d), (h), (j), or (k)".

(b) Section 2108(3) of title 5, United States Code, is amended by inserting "or Senior Cryptologic Executive Service" after "Senior Executive Service;".

SEC. 4. The Director, National Security Agency, may promulgate regulations establishing a merit pay system for such employees of the National Security Agency as the Director considers appropriate. The merit pay system shall be designed to carry out purposes consistent with those set forth in section 5401(a) of title 5, United States Code.

SEC. 5. The amendments made by this Act shall take effect on the date of the enactment of this Act.●

By Mr. SYMMS (for himself and Mr. MCCLURE):

S. 1351. A bill to amend section 164 of the Water Resources Development Act of 1976; to the Committee on Environment and Public Works.

COMPLETION OF LEWISTON-CLARKSTON BRIDGE

● Mr. SYMMS. Mr. President, I am pleased to introduce legislation on behalf of myself and my senior colleague (Mr. MCCLURE) to assure the completion of a Corps of Engineers project constructing a bridge across the Snake River between Lewiston, Idaho, and Clarkston, Wash.

Due to delays and the impact of inflation, an additional $2.2 million is needed to complete the approach ramps to the bridge on the Idaho side. Passage of this bill will achieve that goal.

The need for this new Lewiston-Clarkston bridge is a result of the completion in the mid-1970's of the Columbia-Snake River waterway as far as Lewiston. Because the waterway project raised the level of the river and attracted new waterway traffic, the existing drawbridge link between Lewiston and Clarkston was no longer adequate to handle traffic between the two cities.

In order to remedy this problem the Congress in the 1976 omnibus water resources legislation included section 164 which authorized a new, high-level bridge a mile upriver from the existing drawbridge. The cost set in that bill was "not to exceed" $21,000,000.

The Corps went to contract on the bridge in January 1980. Because of inflation, however, the Corps was unable to obtain bids low enough to enable it to complete the bridge as had been envisioned by the Congress. In an effort to deal with this situation the Corps divided up the contract, leaving work on the Lewiston ramp to the future.

I am convinced that the change from the 1976 act, proposed by this bill, is necessary, and fully justified in view of the ongoing nature of the project and that earlier commitment by Congress to the people of the area. This bill does not call for the appropriation of additional funds by the Federal Government. It merely authorizes the Corps of Engineers to complete the project with already available funds and thus is consistent with President Reagan's budget objectives.

In addition, I believe this change needs to be achieved as soon as possible, so that the work can be accomplished in harmony with the existing construction, scheduled to be completed in September 1982.

Mr. President, I am particularly pleased that Senator MCCLURE has joined me in sponsoring this legislation. It was his initiative that led to the passage in the Senate of the original provision in 1976. I ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1351

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 164 of the Water Resources Development Act of 1976 (Public Law 94–587) is amended by deleting the figure "$21,000,000" and inserting in lieu thereof "$23,200,000".●

By Mr. HATFIELD (for himself, Mr. MELCHER, Mr. STEVENS, Mr. LEVIN, Mr. DURENBERGER, Mr. CRANSTON, and Mr. BAUCUS):

S. 1352. A bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for contributions of certain agricultural products to certain tax-exempt organizations; to the Committee on Finance.

FARM TAX INCENTIVE FOR DONATED CHARITIES

● Mr. HATFIELD. Mr. President, today, Senators MELCHER, STEVENS, LEVIN, DURENBERGER, CRANSTON, BAUCUS, and I, are introducing legislation that will offer our Nation's farmers a tax incentive for contributions of surplus, unharvested, damaged or otherwise wasted food commodities to various nonprofit, charitable organizations for distribution to the poor and needy. The practice of gleaning dates back to biblical times when the Israelites were required by Mosaic law to open up their fields to the poor.

Our legislation restores a tax incentive that farmers had until 1969, and one that Congress restored for the corporations, but not for individuals, in 1976. Since most farmers are not incorporated, equity demands a similar tax incentive for those farmers who donate their crops to charitable organizations.

A national gleaning bill addresses the paradox of desperate nutritional needs in a land of plenty. GAO has estimated that 20 percent of all produce in the United States is wasted. The rationale behind the present charitable contribution deduction is in the value to society of the gift that is mutually beneficial to the giver and the receiver. A gift can more effectively channel our available resources to the needy without harming the incentives to work and produce that another Government redistribution scheme could create. The rationale behind a tax incentive is even greater when the crops would be abandoned and used by no one. In essence, a gleaning incentive is cost-effective per dollar of tax expenditure and it promotes a sense of self-worth and initiative that is so often lacking in our redistribution programs.

Mr. President, I am pleased that Representative LES AUCOIN of Oregon is introducing similar legislation in the House of Representatives. His efforts on behalf of gleaning programs over the last few years are to be commended and I intend to work closely with him toward achieving the enactment of this legislation in the 97th Congress.

To those of my colleagues unfamiliar with the term "gleaning," it is—strictly defined—the process of gathering grain or produce following a commercial harvest. In ancient societies, gleaning was usually a matter of course, and indeed,

in Biblical times, the Israelites were required by law to open up their land to the poor to enable them to glean. Gleaning is also quite common today in less-developed agrarian societies, and the practice has even been revived in many parts of our own country in recent years. Our bill, very simply, would build on this experience and encourage the further expansion of gleaning throughout the United States by offering our farmers a 10-percent tax credit based on the greater of the wholesale market value or the most recent sale price for the crops contributed to qualified charitable organizations.

An example of a present-day gleaning program is the Senior Gleaners of Sacramento, Calif. The gleaners pick up crops no one else wants, such as onions too big for a fast food company's hamburgers and cherries too small for a packing company's cans. In 1 year, 2,000 senior gleaners collected 700 tons of left-over fruits and vegetables for themselves and 25 other charitable organizations in northern California.

A typical project in Oregon involves a group of adult gleaners who adopt a senior citizen or handicapped individual and share with them the gathered produce that would otherwise go to waste. A statewide distribution center is being developed that involves common carriers, unions, food industries, National Guard, Salvation Army, Red Cross, United Way, Office of Elderly Affairs, local community action centers, the Oregon Department of Agriculture as well as participating farmers. Testimony before the Senate Finance Committee indicated that in its brief 7-year history, organized gleaning projects in Oregon have gleaned more than 1,755,340 pounds of fresh fruit, vegetables, and nuts, directly benefiting 17,000 individuals.

In no way will the gleaning bill be a panacea for our Nation's low-income people's nutritional problems. Instead it provides a self-help alternative to welfare programs and permits these individuals to stretch their buying power while adding fresh fruits and vegetables to their diets. The limitations of the food stamp program are well known and many of our elderly citizens and rural poor do not participate in the program.

The "national gleaning" bill approach to providing food assistance is an effort designed specifically to reach the poor through the private sector. Because of the severity and the dimensions of both the national and international human problem, Federal food assistance programs will necessarily be required if we are to be successful in meeting the challenge before us. Yet, it seems only prudent in these times of budget constraints and appeals for reduced Federal spending that alternatives to meeting the basic food requirements of our citizens—and millions of others in foreign lands—simply through more Government spending be found. The gleaning approach offers one such alternative.

In Oregon, the State legislature approved a few years ago legislation similar to the gleaning bill we are introducing today, including the 10-percent tax credit on State income tax. In 1977 alone, gleaning programs resulted in the distribution of over 125 tons of produce to more than 1,100 households at a revenue loss to the State treasury of $1,500—the estimate had been $5,000 annually over a 2-year period.

In 1978, almost 170 tons of food was donated to 1,600 households, valued at over $92,000, with a revenue loss of only $2,400. California has also provided a tax incentive to farmers to participate with local gleaning and food bank operations—a simple charitable deduction. Of course, gleaning programs do not exist only in States providing tax incentives, but from all available information, it is apparent that such incentives are important factors in gaining farmer participation and expanding ongoing gleaning programs. In spite of the fact that many of these programs are relatively new, the work that has been done in Oregon, California, and other States throughout the country offers profound evidence that relief efforts in the critical area of food sustenance can be accomplished at the local level, with minimal Federal Government involvement.

The need for this legislation is underscored by one of the major paradoxes of our time. On the one hand, millions of Americans in 1981 continue to suffer from the debilitating effects of hunger and malnutrition, and yet, on the other hand, the General Accounting Office estimated in 1977 that about 20 percent of all food produced in the United States is lost or wasted in 1 year—some 137 million tons, valued at $31 billion. Of this total, loss during harvesting—as opposed to such other categories as storage, transportation, processing, wholesale/retail and consumer, was approximately 60 million tons of food valued at $5 billion.

Based on the average daily caloric intake of a U.S. citizen, GAO estimated that the combined loss of U.S.-produced food grains, meat, sugar, oilseeds, vegetables, fruits, and nuts in 1974 could have had fed an estimated 49 million people. The dimensions of this problem are truly staggering, especially when one considers the responsibility we have as the wealthiest Nation on Earth with the capabilities to feed our own people and millions of others around the world.

Mr. President, before continuing on to other aspects of our gleaning legislation, I feel it necessary, and very timely, to point out an additional implication of the food wasted annually in the United States—energy loss. According to GAO, in crop year 1974, U.S. farmers planted 331 million acres of land to produce food. They used 45 million tons of fertilizer as well as a total of 2.3 billion equivalent barrels of oil, considerable amounts of water, and other inputs in the process. Relating all food loss to the farm resources allocated to producing food, the General Accounting Office estimated that 461 million equivalent barrels of oil were consumed on food ultimately lost. In addition, it is estimated that 66 million acres of land and 9 million tons of fertilizer were used to produce food that was ultimately lost. Proper stewardship of our national resources demands that we make every effort possible to eliminate food waste. We can begin at the harvest level by allowing our poor to glean or receive the benefits of food gleaned on their behalf.

As I mentioned earlier in my remarks, legislation is being introduced today in the House of Representatives by Congressman AuCoin, Democrat of Oregon, which provides a similar tax incentive to our Nation's farmers. Perhaps the major difference between our respective approaches to encouraging gleaning is that Congressman AuCoin's bill provides for purposes of the tax credit that food donated must be "uneconomical" for the farmer to harvest. In other words, only those crops which would otherwise be left in the fields following a commercial harvest would constitute a "qualified crop donation." While this is in a technical sense the true meaning of gleaning, and while it is this otherwise unharvested food we primarily seek to secure for the poor, I have chosen to remove the "uneconomical for harvest" provision from the bill so as not to prevent the envisioned tax benefits from accruing to the farmer who desired to contribute from his food stocks to meet a given need at a given time—the idea being that already-harvested food was at one time, anyway, "economical" to harvest.

Because, almost by definition, gleaned food consists of perishable commodities, the gleaning concept—in its strictest sense—could not be practical for the provision of food to the poor in other lands. However, in removing the "uneconomical for harvest" provision, we open up the opportunity for gleaned food to be used to meet the hunger needs of our fellow human beings in impoverished areas of the world because "stored" food is in most cases nonperishable—the major exception being frozen food—and able to be transported over long distances. As some of my colleagues may remember, just such an international relief effort was undertaken in 1978 when a shipload of wheat was sent by Church World Service to meet the needs of Vietnamese citizens who were dying from starvation. The food was in part donated by farmers who arose to meet the very specific need at the time. Whether or not one agrees with the particular merits of this individual relief operation, it does show that certain limited efforts can be accomplished in the private sector to assist in the alleviation of human suffering throughout the world.

Although most gleaning activities have been established only within the last 6 years, the question of the effect of tax policy on channeling food to the needy dates back to the Tax Reform Act of 1969 and beyond. Prior to the act, the general rule was that a taxpayer who contributed crops to charity was able to deduct the fair market value of the property at the time of the gift. Moreover, no tax was imposed on the appreciation. Thus, a farmer who made a charitable contribution of a portion of his crop not only got a deduction or fair market value,

but also escaped tax on the difference between his cost and the fair market value.

According to the congressional tax-writing committees that considered the 1969 Tax Reform Act, this situation created a serious inequity. The charitable deduction offered to some taxpayers in high marginal tax brackets an incentive to donate rather than to sell the crop. If the cost basis was not a substantial portion of the fair market value of the crop, a gift of the appreciated property would be more valuable than a sale of the crop and subsequent taxation of the profit. The Congress concluded that the charitable deduction was not meant to provide an after-tax benefit so close to or even greater than, the after-tax benefit that would be realized if the item were sold for a profit. With such a substantial tax benefit, the Congress concluded that the attractiveness of the tax savings, not charity, was the motive for the contribution.

The 1969 Tax Reform Act allowed the farmer to deduct only the costs incurred in producing the donated crop. The rule enacted in 1969 not only eliminated the abuses that we have mentioned but drastically reduced contributions of appreciated property to charitable organizations, especially those providing food, clothing, and medical products to the needy. The Senate Finance Committee concluded in 1976 that:

> It is desirable to provide a greater tax incentive than in present law for contributions of certain types of ordinary income property which the donee charity uses in the performance of its exempt purposes.

Thus, the Tax Reform Act of 1976 provided corporations more favorable treatment of contributions of inventory—such as food—to charitable organizations.

The act allowed a corporation deduction for up to half of the appreciation on certain types of ordinary income property contributed to a public charity or private operating foundation. The charitable deduction is generally for the sum of first, the taxpayer's basis in property, and second, one-half of the unrealized appreciation. In no event is the deduction allowed for an amount exceeding twice the basis of the property. Furthermore, no deduction is allowed for any part of the unrealized appreciation which would have been ordinary income—if the property had been sold—because of the application of the recapture provisions relating to depreciation. The associated revenue loss attributed to this change in the 1969 Tax Reform Act was given as $19 million in fiscal year 1969, $22 million in fiscal year 1978, and $24 million in fiscal year 1981 according to the Joint Committee on Taxation.

The 1976 Tax Reform Act thereby reinstituted a tax incentive for corporate donors but not for individual farmers who wish to contribute gleaned crops. It has been estimated that on 1.7 percent of all farms are incorporated and therefore significant numbers of farmers are unable to utilize the 1976 act. Since unpaid family farm workers and self-employed farmers constitute over 79 percent of all agricultural labor, it is highly unlikely that the individual farmer will have costs that are reported as an expense of doing business. Unlike his corporate counterparts who can fully deduct their costs and a significant portion of the appreciation in the crop, the individual farmer is left with no incentive to contribute gleaned crops.

Our legislation simply provides a nonincorporated farmer a tax incentive similar to that already provided his corporate counterpart for the donation of foodstuffs to a charitable organization. The Treasury Department has estimated that the revenue loss on a 10- to 20-percent credit would be a maximum of $5 million. The present charitable deduction allowed for corporate farmers would remain unaffected by this bill.

It is clear that this legislation must meet two essential conditions. First, the Congress has expressed concern that any subsidy provided should not make it financially more desirable for a taxpayer to contribute crops than to sell the produce on the market. Second, the legislation should provide a sufficient tax incentive to contribute crops rather than to abandon usable produce.

In a study by Yale Legislative Services at Yale Law School, Morgan Frankel concluded that as long as the tax credit was below 31 percent—with no cost deduction adjustment—we can be assured that all taxpayers will continue to profit more by selling than by charitable contribution. The Yale study also concluded that a 20-percent tax credit would generate rough equivalence with the corporate incentive presently available. A credit could safely be provided in the 10- to 20-percent range without risking the elimination of an incentive to donate agricultural products.

Since corporations are presently allowed a corporate deduction, my colleagues may be interested in why we chose to utilize a tax credit. Briefly, a tax credit seems desirable for the following reasons:

First, a tax credit is more equitable for all taxpayers since only 1.7 percent of all farms are incorporated and approximately 75 percent of all taxpayers do not itemize on their tax returns.

Furthermore, among itemizers, a deduction generates much greater tax benefits to wealthy donors than to middle-income taxpayers. Why should the tax code subsidize the high-income donor at 70 percent and another at 14 percent for the identical amount of donated crops by both individuals? By providing a tax credit, the tax benefit will be available to all taxpayers—rich or poor—equally, dollar for dollar, since the value of the credits does not fluctuate according to the tax bracket of the taxpayer. According to studies done by the Congressional Research Service and Yale Law School, a tax credit would be a more effective tax policy than a deduction in achieving the goal of encouraging gleaning of fields by charitable organizations.

Second, it would be extremely difficult to extend the current tax deduction for corporate crop contributions to individual farmers, The deduction under current law is calculated on a cost basis and most individuals, family and partnership farms rely much more heavily on nonwage labor than do corporate farms. Almost 79 percent of all agricultural laborers report income that does not show up as an expense of someone's doing business and, therefore, the noncorporate farmer does not include in their cost basis of crops the dominant input of labor. The task of designing a deduction for noncorporate taxpayers that would approximate effects of the current provisions for corporate farmers is difficult in light of the inherent disparities built into the duel level taxation of corporations.

In sum, the provision of a 10-percent tax credit substantially addresses the current advantages for the corporate farmer and is not overly generous so as to allow a return to the abuses of the pre-1969 era.

Mr. President, the national gleaning bill would not only provide an effective complement to our present food assistance programs, but also would encourage private initiative where previously some Government programs have led to passivity. The problem of poverty and hunger is everyone's, but many have lost a personal sense of commitment to the alleviation of such poverty and hunger because the Government has assumed the primary responsibility for carrying on the work. The responsibility for the relief of human suffering must originate at the grassroots level if our governmental efforts are to be successful and maintained over the long term.

The gleaning legislation will provide much-needed assistance to the farmer at a time when he is being asked to grow more for a hungry world, but can only do so at the risk of reducing the price he receives for his crops.

In addition, the gleaning bill will enable a number of eligible charitable organizations to be more responsive to the needs they seek to alleviate in this country and potentially around the world. At a time when millions are struggling to maintain an adequate diet, it behooves us to consider positive and innovative means of reconciling the needs of both the producer of food and those who are truly destitute. We believe strongly that the gleaning concept offers one such option.

I urge my colleagues to give this gleaning bill their careful attention and active support.●

By Mr. LONG:

S. 1353. A bill to amend the Internal Revenue Code of 1954 to allow that portion of the investment credit attributable to the employee plan percentage to be taken against 100 percent of the liability for tax; to the Committee on Finance.

LEGISLATION TO ENCOURAGE THE ADOPTION OF EMPLOYEE STOCK OWNERSHIP PLANS

Mr. LONG. Mr. President, the bill I am introducing today would encourage companies to adopt employee stock ownership plans (ESOP's) by permitting those companies to utilize the credit provided for such plans to offset 100 percent of their tax liability.

Under current law, the investment tax credit may generally be used to offset up to 80 percent of tax liability. That percentage will increase to 90 percent for

1982 and thereafter. In the case of certain energy property, the investment tax credit may be used to offset 100 percent of tax liability. This bill provides that the ESOP credit would receive the same treatment as that now provided for energy property.

Tax credit ESOP's—also known as "TRASOPs" due to their origin in the Tax Reduction Act of 1975—have proven to be particularly popular among capital-intensive industries. Pending legislation (S. 1162) would extend the attractiveness of such plans to labor-intensive companies by providing an ESOP credit based on payroll as an alternative to that now based on investment.

Present law has proven to be problematic for certain ESOP companies. Due to the inability to offset 100 percent of tax liability with the ESOP credit, sponsor companies are finding themselves with ESOP credits which may expire before the company can realize the tax benefit of the credit. This is unfair to employees who may be denied stock in the company due to the operation of current law on their employer. It is also inequitable to companies that embrace this idea but that happen to find themselves in an unfortunate tax posture. In addition, existing law frustrates congressional intent to encourage the widespread use of employee stock ownership plans.

By Mr. KENNEDY (for himself, Mr. MOYNIHAN, Mr. DODD, Mr. CRANSTON, Mr. EAGLETON, Mr. HART, Mr. INOUYE, Mr. LEAHY, Mr. LEVIN, Mr. PELL, Mr. PROXMIRE, Mr. TSONGAS, and Mr. WEICKER):

S.J. Res. 89. Joint resolution on the hunger strike in Northern Ireland; to the Committee on Foreign Relations.

HUNGER STRIKE IN NORTHERN IRELAND

Mr. KENNEDY. Mr. President, I send to the desk a joint resolution on the hunger strike in Northern Ireland in behalf of myself, Mr. MOYNIHAN, Mr. DODD, Mr. CRANSTON, Mr. EAGLETON, Mr. HART, Mr. INOUYE, Mr. LEAHY, Mr. LEVIN, Mr. PELL, Mr. PROXMIRE, Mr. TSONGAS, and Mr. WEICKER, and I ask for its appropriate referral.

The death of four hunger strikers in the Maze Prison in Belfast in recent weeks is a sad day for Ireland and for all who seek peace in Northern Ireland and an end to the violence that has claimed so many lives and scarred so many more in the past decade.

The announcement this week that more prisoners will join the hunger strike is a tragic new escalation of the crisis. Now, before additional deaths and bloodshed occur, it is essential for the parties to make an urgent effort to end this lethal stalemate and to achieve a fair and humanitarian resolution of the issues in the strike.

The joint resolution we are introducing today is designed to help the parties reach that goal. It contains five significant provisions:

First, it condemns the violence on all sides in Northern Ireland.

Second, it urges the parties to explore all possible steps to end the hunger strike.

Third, it urges the British Government, which has clear responsibility for prison administration in Northern Ireland, to exercise greater flexibility with respect to prison procedure. Surely it is possible to achieve a reasonable compromise on issues such as clothing, prison work requirements, and the association of the prisoners, without compromising in any way on the basic principle of opposition to violence. This provision of the resolution also calls on Britain to invite the European Commission on Human Rights or other appropriate independent parties to participate in the effort to settle the strike. In the past, Britain has implemented recommendations of the commission with respect to the modification of prison rules, and a similar initiative at this time by the commission could provide the breakthrough needed to end the current strike.

Fourth, the resolution urges political leaders in Britain, Ireland, and Northern Ireland to seek the earliest possible negotiated settlement of the larger conflict in Northern Ireland. That settlement must be achieved with the consent of all the parties. It must recognize the rights of both the Catholic and the Protestant community. And it must secure full respect for the human rights of all the people of Northern Ireland. The hunger strike is a symptom of a deeper crisis—a crisis that will go on and on in Northern Ireland, until all who truly seek an end to the violence care enough to speak and work for peace.

Fifth, the resolution requests the President to express to the Prime Minister of Great Britain the concern of the American people for an immediate end to the hunger strike and a lasting settlement of the conflict in Northern Ireland. The United States has an important role to play in the search for peace, and the administration should not hesitate to exercise it.

Before more hunger strikers die, before more lives are lost in violent demonstrations, before all the hopeful progress of past months toward a negotiated settlement is lost, it is time for Britain to act to break this endless spiral of death in Northern Ireland, so that leaders of good will may resume their effort to create a lasting peace.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 89

Whereas the continuing violence in Northern Ireland has taken the lives of more than two thousand men, women, and children in the past decade;

Whereas an end to the killing and the violence in Northern Ireland can be achieved only through a political settlement with the consent of all the parties;

Whereas Congress is deeply concerned over the hunger strike in Northern Ireland and the deaths resulting from the strike;

Resolved by the Senate and House of Representatives of the United States in Congress assembled, that—

(1) Congress condemns the violence on all sides in Northern Ireland;

(2) Congress urges the parties to explore all possible steps to avoid further deaths in the hunger strike and achieve an immediate and humanitarian resolution of the issues in the strike;

(3) Congress urges the Government of Great Britain, in order to facilitate the resolution of the issues in the hunger strike—

(a) to exercise greater flexibility in the administration of prison rules in Northern Ireland; and

(b) to invite the European Commission on Human Rights or other appropriate independent parties to participate in the effort to settle the strike;

(4) Congress urges the political leaders in Great Britain, Northern Ireland, and the Republic of Ireland to seek the earliest possible settlement of the larger conflict in Northern Ireland through a negotiated agreement that achieves a lasting peace, that has the consent of all the parties, that recognizes the rights of both the Catholic and the Protestant community in Northern Ireland, and that secures full respect for human rights of all the people of that land; and

(5) Congress requests the President of the United States to express to the Prime Minister of Great Britain the concern of the American people for an immediate settlement of the hunger strike and a lasting settlement of the conflict in Northern Ireland.

Mr. DODD. Mr. President, I am pleased to join Senators KENNEDY and MOYNIHAN today in introducing a joint resolution concerning the ongoing hunger strike in Northern Ireland.

The events of the past few months have dramatically demonstrated that the problems of Northern Ireland cannot be solved by further violence. Nor can the problems of Northern Ireland be solved if the Government of Great Britain adopts an inflexible attitude in dealing with the hunger strikers.

Over the past 10 years, more than 2,000 people have died in the sectarian violence in Northern Ireland. The vast majority of these people have been innocent of participating in any violence themselves; they have been the unfortunate victims of indiscriminate bombings and shootings. And although most of the people in both the Catholic and Protestant communities want nothing more than to live in peace and security with each other, the violence continues.

The current hunger strike by imprisoned members of the IRA has exacerbated the existing tensions in the north. The resolution we have introduced today calls on all parties to the conflict to explore every possible step to avoid further deaths in the hunger strike and to seek a quick, humanitarian resolution of the issues involved in the strike. Specifically, we call on the Congress to urge the Government of Great Britain to exercise greater flexibility in the administration of prison rules in Northern Ireland, and to invite responsible, independent parties to participate in an effort to end the hunger strike.

Recognizing that the hunger strike is just a symptom of a larger dispute, our resolution calls on the political leaders

of Great Britain, Northern Ireland, and the Republic of Ireland to pursue a negotiated settlement to the conflict aimed at achieving a lasting peace, and recognizing the rights of both communities in Northern Ireland while, at the same time, securing full respect for the human rights of all the people.

We in the Congress have a responsibility to speak out forcefully in support of a peaceful resolution, not only of the current hunger strike, but also to the entire conflict in Northern Ireland. If we fail to make our voices heard, our silence may be taken as acquiescence to the violence employed by extremists on both sides.

ADDITIONAL COSPONSORS

S. 98

At the request of Mr. DANFORTH, the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 98, a bill to amend the Internal Revenue Code of 1954 to provide a credit against tax for certain research and experimental expenditures, and for other purposes.

S. 255

At the request of Mr. MATHIAS, the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 255, a bill to amend the patent law to restore the term of the patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

S. 293

At the request of Mr. THURMOND, the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 293, a bill to amend the Food Stamp Act of 1977 to prohibit any household from participating in the food stamp program if such household has one or more members on strike as a result of a labor dispute.

S. 395

At the request of Mr. WALLOP, the Senator from Oregon (Mr. PACKWOOD), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of S. 395, a bill to amend the Internal Revenue Code of 1954 to provide estate and gift tax equity for family enterprises, and for other purposes.

S. 517

At the request of Mr. BENTSEN, the Senator from Utah (Mr. HATCH), and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of S. 517, a bill to amend the Clean Air Act to provide for further assessment of the validity of the theory concerning depletion of ozone in the stratosphere by halocarbon compounds before proceeding with any further regulation of such compounds, to provide for periodic review of the status of the theory of ozone depletion, and for other purposes.

S. 603

At the request of Mr. ZORINSKY, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 603, a bill to amend title 17 of the United States Code to exempt nonprofit veterans' organizations and nonprofit fraternal organizations from the requirement that certain performance royalties be paid to copyright holders.

S. 622

At the request of Mr. INOUYE, the Senator from Vermont (Mr. LEAHY) was added as a copsonsor of S. 622, a bill to control the export of hazardous wastes.

S. 635

At the request of Mr. HEINZ, the Senator from Missouri (Mr. DANFORTH), the Senator from Colorado (Mr. HART), the Senator from New York (Mr. MOYNIHAN), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 635, a bill to effect certain reorganization of the Federal Government to strengthen Federal programs and policies for combating international and domestic terrorism.

S. 725

At the request of Mr. WALLOP, the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 725, a bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain shale property for the purposes of the energy investment credit.

S. 777

At the request of Mr. TOWER, the Senator from Georgia (Mr. MATTINGLY), and the Senator from Mississippi (Mr. COCHRAN) were added as cosponsors of S. 777, a bill to amend the Federal Water Pollution Control Act to restrict the jurisdiction of the United States over the discharge of dredged or fill material to those discharges which are into navigable waters, and for other purposes.

S. 829

At the request of Mr. BAUCUS, the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of S. 829, a bill to amend the Internal Revenue Code of 1954 to provide the cost-of-living adjustments in annuities for survivors of Tax Court judges.

S. 1072

At the request of Mr. PROXMIRE, his name was added as a cosponsor of S. 1072, a bill to amend the Internal Revenue Code of 1954 to provide an exclusion from gross income of interest earned on qualified housing savings certificates.

S. 1131

At the request of Mr. DANFORTH, the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1175

At the request of Mr. BOSCHWITZ, the Senator from Georgia (Mr. MATTINGLY) was added as a cosponsor of S. 1175, a bill to amend the Internal Revenue Code of 1954 to exclude fringe benefits from the definition of gross income.

S. 1214

At the request of Mr. BOSCHWITZ, the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of S. 1214, a bill to amend the Internal Revenue Code of 1954 to eliminate the limitation on the interest deduction for interest paid or accrued on investment indebtedness.

S. 1218

At the request of Mr. WALLOP, the Senator from Mississippi (Mr. COCHRAN) was added as a cosponsor of S. 1218, a bill to amend the Internal Revenue Code of 1954 to allow employees a deduction for savings contributions to employer retirement plans.

S. 1249

At the request of Mr. PERCY, the Senator from Oklahoma (Mr. NICKLES), the Senator from Montana (Mr. MELCHER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mr. CHILES), the Senator from Wisconsin (Mr. KASTEN), and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 1249, a bill to increase the efficiency of Government-wide efforts to collect debts owed the United States, to require the Office of Management and Budget to establish regulations for reporting on debts owed the United States, and to provide additional procedures for the collection of debts owed the United States.

S. 1279

At the request of Mr. DANFORTH, the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Arizona (Mr. DECONCINI), and the Senator from Maine (Mr. MITCHELL) were added as cosponsors of S. 1279, a bill to amend the Internal Revenue Code of 1954 to exclude from gross income a certain amount of interest earned on the All Savers Certificate offered only at savings institutions.

S. 1298

At the request of Mr. WALLOP, the Senator from North Dakota (Mr. BURDICK), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 1298, a bill to amend the Internal Revenue Code of 1954 to extend certain tax provisions to Indian tribal governments on the same basis as such provisions apply to States.

S. 1337

At the request of Mr. STEVENS, the Senator from Oregon (Mr. PACKWOOD) was added as a cosponsor of S. 1337, a bill to provide for the temporary exclusion of foreign fishing support vessels from the internal waters of Alaska.

SENATE JOINT RESOLUTION 12

At the request of Mr. INOUYE, the Senator from West Virginia (Mr. RANDOLPH), the Senator from Montana (Mr. MELCHER), the Senator from Connecticut (Mr. WEICKER), the Senator from Maryland (Mr. SARBANES), the Senator from Vermont (Mr. LEAHY), the Senator from New York (Mr. MOYNIHAN), and the Senator from New Hampshire (Mr. RUDMAN) were added as cosponsors of Senate Joint Resolution 12, joint resolution to authorize and request the President to designate November 14 of each year as "Operating Room Nurses Day."

SENATE JOINT RESOLUTION 29

At the request of Mr. HEINZ, the Senator from Missouri (Mr. EAGLETON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Alabama (Mr.

HEFLIN), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of Senate Joint Resolution 29, joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with the first Sunday in June of each year as "National Garden Week".

SENATE RESOLUTION 139

At the request of Mr. ANDREWS, the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of Senate Resolution 139, resolution to assure the access of farmer-owned refining businesses to crude oil at reasonable prices.

AMENDMENT NO. 58

At the request of Mr. CRANSTON, the Senator from Nevada (Mr. CANNON), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of amendment No. 58 intended to be proposed to S. 921, a bill to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes.

AMENDMENT NO. 59

At the request of Mr. CRANSTON, the Senator from Nevada (Mr. CANNON), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of amendment No. 59 intended to be proposed to S. 921, a bill to amend title 38, United States Code, to extend authority to provide contract hospital care and medical services in Puerto Rico and the Virgin Islands, and for other purposes.

SENATE CONCURRENT RESOLUTION 21—CONCURRENT RESOLUTION RELATING TO THE BALTIC STATES QUESTION

Mr. THURMOND submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 21

Resolved by the Senate (the House of Representatives concurring), Whereas the United States since its inception has been committed to the principle of self-determination;

Whereas this essential moral principle is also affirmed in the Charter of the United Nations;

Whereas the Union of Soviet Socialist Republics is, according to its constitution, a voluntary federation of autonomous republics;

Whereas the three Baltic Republics (the Republic of Lithuania, the Republic of Latvia, and the Republic of Estonia) did not become member republics of the Union of Soviet Socialist Republics voluntarily but rather were occupied militarily by the Russian Armed Forces in the early days of World War II and subsequently incorporated by force into the Union of Soviet Socialist Republics and have since been governed by governments approved by, and subservient to, the Government of the Union of Soviet Socialist Republics;

Whereas the ethnic makeup of the Baltic peoples (the Lithuanians, Latvians, and Estonians), is distinctly foreign in language, culture, common traditions, and religion from that of the Russian people:

Whereas, by deportation and dispersion of the native populations of the Baltic States to Siberia and by a massive colonization effort in which Russian colonists replace the displaced native peoples, the Soviet Union threatens complete elimination of the Baltic peoples as a culturally, geographically, and politically distinct and ethnically homogeneous population;

Whereas, despite such treatment, the spirit of the citizens of the Baltic States is not broken and the desire of the citizens of the Baltic States for national independence remains unabated;

Whereas the United States has consistently refused to recognize the unlawful Soviet occupation of the Baltic States and has continued to maintain diplomatic relations with representatives of the independent Republics of Lithuania, Latvia, and Estonia; and

Whereas the United Nations and the United States delegation to the United Nations have consistently upheld the right of self-determination of the people of those countries in Asia and Africa that are, or have been, under foreign imperialist rule: Now, therefore, be it

Resolved by the Senate, That it is the sense of the Congress that—

(1) the President and the Secretary of State should take all necessary steps to bring the Baltic States question before the United Nations and to urge that the United Nations request the Soviet Union—

(A) to withdraw all Russian and other non-native troops, agents, colonists, and controls from the Republics of Lithuania, Latvia, and Estonia, and

(B) to return all Baltic exiles from Siberia and from prisons and labor camps in the Soviet Union;

(2) until the Baltic States become independent, the Secretary of State should, through such channels as the United States Information Agency and other information agencies of the United States Government, do his utmost to bring the matter of the Baltic States to the attention of all nations by means of special radio programs and publications;

(3) the United States should not agree to the recognition by any international conference, of the Soviet Union's unlawful annexation of Lithuania, Latvia, and Estonia, and it should remain the policy of the United States not to recognize in any way the annexation of the Baltic States by the Soviet Union;

(4) the President should require that all government map publishers, and should request that all private map publishers show, on all maps of Europe, the Republics of Lithuania, Latvia, and Estonia as independent states, with a footnote explaining that the military occupation and forced incorporation into the Soviet Union of Lithuania, Latvia, and Estonia has never been recognized by the United States;

(5) the right of self-determination should be returned to the peoples of Lithuania, Latvia, and Estonia through free elections conducted under the auspices of the United Nations after Soviet withdrawal from the Baltic States; and

(6) the right of self-determination should be made a prime political objective of the United Nations and should be accorded through free elections under the auspices of the United Nations to all peoples now involuntarily subjugated to Soviet communism.

THE BALTIC STATES QUESTION

Mr. THURMOND. Mr. President, I rise today to submit a concurrent resolution reaffirming our refusal as a free people to recognize the unlawful incorporation of the Baltic States of Lithuania, Latvia, and Estonia into the U.S.S.R. This resolution is identical to Senate Concurrent Resolution 116, submitted by me in the 96th Congress.

Mr. President, the Baltic Republics of Lithuania, Latvia, and Estonia have endured Soviet occupation for over 40 years. The ruthless manner and suddenness with which these once free and independent nations lost their right to self-determination is alarmingly similar to more recent acts of aggression on the part of the Soviet Union. The military occupation of the Baltic States serves as a Soviet blueprint for the subjugation and domination of a freedom-loving people.

Mr. President, just prior to the outbreak of World War II, all three Baltic States were forced—under the threat of invasion—to sign a mutual assistance treaty with the Soviet Union, under which Soviet military bases were established in strategic locations. The republics soon found themselves at the mercy of the occupying Soviet military forces.

The next step in the incorporation of these nations into the U.S.S.R. was the infiltration of Soviet spies and agents into their social and political institutions. At the demand of the Kremlin, elections were held in July 1940, for the purpose of forming a new government friendly to the Soviet Union. As is the rule in Soviet-occupied nations, the pro-Soviet candidates were declared elected. The newly elected representatives wasted no time in requesting incorporation of their respective countries into the U.S.S.R. Lithuania, Latvia, and Estonia then ceased to exist as independent, sovereign states.

Mr. President, it is clear to me that the Soviet Leadership has not abandoned its aggressive, expansionist policies. The unprovoked December 27, 1979 invasion of Afghanistan, as well as their recent display of readiness to intervene in the internal affairs of Poland, reaffirms my belief. Therefore, I feel it is imperative that we reaffirm to the world our commitment to the principle of true self determination.

Adoption of the concurrent resolution I am offering today will send a clear message to the Kremlin that we do not, and will not recognize, the subjugation of independent states by the Soviet Union. More importantly, it will reassure those brave peoples in nations under Communist domination, who, despite the efforts of the Soviet leaders, refuse to accept incorporation into the Soviet sphere, that we have not forgotten them.

AMENDMENTS SUBMITTED FOR PRINTING

CONTRACT HOSPITAL CARE AND MEDICAL SERVICES IN PUERTO RICO AND THE VIRGIN ISLANDS

AMENDMENT NO. 65

(Ordered to be printed and to lie on the table.)

Mr. PRESSLER submitted an amendment intended to be proposed by him to the bill (S. 921) to amend title 38, United States Code, to extend authority to provide contract hospital care and

medical services in Puerto Rico and the Virgin Islands, and for other purposes.

MEDICAL CARE FOR VETERANS EXPOSED TO AGENT ORANGE

● Mr. PRESSLER. Mr. President, I am today submitting an amendment to S. 921, the veterans health care bill, which seeks to provide treatment for Vietnam veterans who were exposed to certain toxic herbicides and chemical defoliants, including agent orange.

Specifically, my amendment would authorize the Veterans' Administration to provide medical treatment to Vietnam veterans—if VA physicians determine that such care is necessary—for the treatment of conditions that may be associated with exposure to agent orange. This step in addressing the agent orange problem parallels the provisions adopted by the House of Representatives earlier this week in H.R. 3499. The House's action is welcomed because the Senate last year approved legislation to deal with agent orange.

Between 1962 and 1970, well over 2 million veterans who served in Vietnam came in contact with agent orange and other herbicides that could have adverse health consequences. Although we have been aware for several years of the potential connection between such exposure and the development of serious ailments, little has been done to date to deal with the situation.

The VA is currently conducting research on the effects of agent orange. Other, more comprehensive legislation is currently pending in committee, including my bill S. 26 which also deals with other forms of toxic substances such as radiation and would further provide for benefits for offspring of those exposed who may have suffered genetic damage by such contact. I intend to push forward with such legislation during this session.

The present amendment which I am now submitting, however, is a much more limited proposal. Until the VA completes its current research and a consensus can be reached regarding comprehensive legislation to deal with the toxic substance problem, this amendment would provide an immediate form of relief for veterans experiencing ailments which may be related to the exposure to such substances.

Enactment of agent orange legislation would fulfill critical unmet needs and the commitments of the Nation to its veterans. As a Vietnam veteran myself, I am especially concerned about the effects of agent orange, which was widely used as a defoliant in Vietnam, and is believed to cause health problems for veterans exposed to it. Last year Senator HEINZ and I sponsored an amendment which was agreed to in the Senate to deal with this problem, but the House, regrettably, rejected the measure. Now, this year the House has taken action on such a measure, and the Senate must not be left behind.

The registration system used to draft our armed forces in the Vietnam period was unfair at best. When the war was over, Americans tried to remove all reminders of a conflict that had no resolution. The American public has recently become aware of the delayed ailments attributed to agent orange which are now appearing.

Even though the war ended for most veterans over 8 years ago, it is estimated that as many as 2 million veterans exposed to agent orange are now beginning to experience health problems which can be reasonably traced to this dangerous chemical.

Mr. President, I ask unanimous consent that this amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

Insert the following section between line 23, page 9 and line 1, page 10; and renumber subsequent sections accordingly:

MEDICAL CARE FOR VETERANS EXPOSED TO AGENT ORANGE

SEC. 9. Section 610(a) is amended—

(1) by striking out "and" at the end of clause (3);

(2) by redesignating clause (4) as clause (5); and

(3) by inserting after clause (3) the following new clause (4):

"(4) any veteran who served in the Republic of Vietnam during the Vietnam era if a physician employed by the Veterans' Administration (or, in areas where no such physician is available, by a physician carrying out such function under a contract or fee arrangement) determines that such hospital care is necessary for the treatment of a condition that may be associated with exposure while serving in the Republic of Vietnam to phenoxy herbicides and chemicals used as defoliants (including the defoliant commonly known as 'Agent Orange'); and".●

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Budget Committee Business meeting originally scheduled for Friday, June 12, 1981 at 11 a.m. will convene at 10 a.m. on Tuesday, June 16, 1981, in 6202 of the Dirksen Senate Office Building. The committee will meet to compile and report an omnibus reconciliation bill.

SUBCOMMITTEE ON CRIMINAL LAW

Mr. MATHIAS. Mr. President, the Judiciary Subcommittee on Criminal Law will hold a hearing on Friday, June 19, at 10 a.m. in room 5110 of the Dirksen Senate Office Building, to hear testimony on S. 691, a bill to amend titles 18 and 17 of the United States Code to strengthen the laws against record, tape, and film piracy and counterfeiting.

For further information, contact Ralph Oman at 224–9491.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, I would like to announce a hearing on the nominations of James A. Belson, Warren R. King, Richard S. Salzman, and Reggie B. Walton to the Superior Court of the District of Columbia, to be held before the Committee on Governmental Affairs on Wednesday, June 17, 1981, at 9:30 a.m. in room 1224 of the Dirksen Senate Office Building. For further information, please contact Chris Sarcone at 224–4161.

Mr. President, I would like to announce a hearing to be held before the Committee on Governmental Affairs on the Debt Collection Act of 1981, S. 1249, on Wednesday, June 17, 1981, at 10 a.m. in room 3302 of the Dirksen Senate Office Building. For further information, please contact Alan Mertz at 224–9515.

Mr. President, I would like to announce a hearing on Inspectors General legislation to be held before the Committee on Governmental Affairs on Thursday, June 18, 1981, at 10 a.m. in room 3302 of the Dirksen Senate Office Building. For further information, please contact Linda Townsend at 224–4751.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Select Committee on Indian Affairs be authorized to meet during the session of the Senate on Wednesday, June 10, to hold hearings on S. 1088, a bill to promote the goal of economic and self-sufficiency of American Indians, Hawaiian natives and Alaskan natives.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate Thursday, June 11, to hold oversight hearings on Community Development Block Grants.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

A PREPOSTEROUS PROPOSAL

● Mr. BIDEN. Mr. President, the Senate Committee on the Judiciary has ordered reported a constitutional amendment which seeks to assure balanced Federal budgets in the future. The noted columnist James J. Kilpatrick has recently written about this proposal, labeling it "preposterous."

I agree with him. I fear that the amendment, if it became effective, would lead only to efforts to circumvent the amendment, efforts that would be easily successful. But the very efforts to circumvent it would make Federal fiscal policy even less controllable than it is now.

As Mr. Kilpatrick says in his column:

Almost no one questions the desirability, as a general proposition, of balanced budgets. John Randolph of Roanoke long ago proclaimed what he termed "the philosopher's stone" of sound fiscal management: "It is pay as you go, sir! Pay as you go!" But no parliamentary masters ever have devised a mechanism for making Randolph's rule enforceable.

The Senate committee's pending effort follows in this futile tradition.

A more workable approach to achieving fiscal responsibility is to strengthen the processes in Congress that help to control Federal spending. I have been working for some time to provide more effective fiscal tools for Congress. I have introduced sunset legislation calling for

periodic termination and review of Federal spending programs. I am the sponsor of legislation to require annual review of uncontrollable spending programs. I am also sponsoring legislation to bring about more effective review of our tax laws. These things are all part of a continuing effort to achieve true fiscal responsibility in the Federal Government.

I believe that Mr. Kilpatrick's analysis of the so-called "balance the budget" amendment to the Constitution is a good one. I ask that his column entitled "A Preposterous Proposal" be reprinted in the RECORD as it appeared in the Morning News of Wilmington, Del., on Wednesday, June 3, 1981.

The column follows:

A PREPOSTEROUS PROPOSAL

(By James J. Kilpatrick)

WASHINGTON.—The road to hell, the maxim reminds us, is paved with good intentions. The Senate Judiciary Committee has taken off down that road in a cloud of commendable motives. The committee has proposed a constitutional amendment to compel adoption of balanced federal budgets. The proposal is preposterous.

The committee's intention, to repeat, is altogether sound. If there is a prime cause of the inflation that afflicts our economy, it lies in the inability of successive Congresses to control federal spending. Only twice in the past 50 years has Congress achieved a small surplus. The accumulating deficits now approach $1 trillion. Money pours out of the Treasury at the rate of $2 billion a day, or $22,000 a second.

Almost no one questions the desirability, as a general proposition, of balanced budgets. John Randolph of Roanoke long ago proclaimed what he termed "the philosopher's stone" of sound fiscal management: "It is pay as you go, sir! Pay as you go!" But no parliamentary masters ever have devised a mechanism for making Randolph's rule enforceable.

The Senate committee's pending effort follows in this futile tradition. Section One of the proposed amendment directs Congress prior to each fiscal year to adopt "a statement of receipts and outlays for that year in which total outlays are no greater than total receipts." Any schoolboy with a tally stick could run up such a statement in a moment. All that is required is that one conjure up a list of revenues, $700 billion; and in a parallel column a list of outlays, $700 billion. So much for the statement.

The proposed amendment continues by saying that "the Congress may amend such statement." Precisely so. If an invitation to dishonest budgeting were engraved by Tiffany's, it could not convey a clearer meaning. In particular exigencies, by a three-fifths vote in each house, Congress could waive the limitation.

In its second section, the amendment would commend that total receipts for a given fiscal year "shall not increase by a rate greater than the rate of increase in national income in the last calendar year ending before such fiscal year." The provision is gauzier even than "privileges and immunities" or "due process of law." The "national income" is a work of statistical guesswork. The "rate of increase" in this fictional compilation is thus illusory. Whatever these conjectures might be, they would require that anticipated revenues for the fiscal year that ends Sept. 30, 1990, be linked to the "national income" in the calendar year 1988. This is nonsense.

The third section says that Congress may waive the whole idea of a balanced budget whenever a declaration of war is in effect.

Section Four boggles the mind: "The Congress may not require that the states engage in additional activities without compensation equal to the additional costs." What state activities are "additional" activities? And what does this have to do with a balanced federal budget?

A fifth section attempts to define "total receipts." A sixth section would make the amendment effective in the second fiscal year following ratification.

I do not mean to be overly critical, but a constitutional amendment without effective means of enforcement is a nullity. It carries no more weight than a resolution endorsing safe driving. Simply to declare that the budget shall be balanced is to echo Glendower's famous boast that he could summon spirits from the vasty deep. "Why, so can I," says Hotspur, "or so can any man, but will they come when you do call for them?"

Over the years I suppose I have scrutinized 50 versions of a balanced budget amendment. Politically speaking, the effective versions are not feasible, and the feasible versions are not effective. I am impelled to the conclusion that the only remedy of fiscal extravagance is to elect frugal people to the Congress. To paraphrase Justice Stone's famous observation on the Supreme Court, the only check upon the spending power is the members' own sense of self-restraint. That laudable characteristic is a rare and feeble quality in Congress, but it offers a better hope than the flawed proposal now heading for the Senate floor.●

AGRICULTURAL TRADE BARRIERS

● Mr. PRESSLER. Mr. President, recently I presented a paper on barriers to international agricultural trade at the spring 1981 meeting of the North Atlantic Assembly. Because of the interest which others may have in this issue, I ask that the text of that paper be printed in the RECORD.

The paper submitted for printing follows:

AGRICULTURAL TRADE BARRIERS

This Assembly provides us with a unique opportunity for a frank exchange of views on matters which could imperil the close economic cooperation which is an essential pillar of our alliance. I believe we have a collective responsibility to take the steps necessary to strengthen our economies by reducing government intervention in the marketplace and encouraging fair competition. Every country faces temptations to resort to subsidies and protectionist measures, and no country, including my own, has a perfect record of adherence to market principles.

Recognition of our common shortcomings must not obscure our common goal of more open economies. As a United States Senator from South Dakota, which is one of the major grain exporting states, I am particularly concerned about threats to free and fair trade in agricultural commodities and products. In the spirit of open communication between allies, and with the strongest hope that each issue can be resolved amicably in a way that reduces costly, dangerous resort to subsidies and trade protection, I wish to call to the attention of my European friends four matters of growing concern to American farmers and the United States Government. I refer to: (1) The European Community's grain export policy, (2) the Community's future policy toward imports of soybeans and vegetable fats and oils, (3) the Community's future policy toward imports of feed grain substitutes, especially corn gluten feed, and (4) the Community's adherence to the beef import quota granted to the United States.

American concerns are accentuated at this time because we recognize that the EC Commission is seeking ways to reform the Common Agricultural Policy (CAP) in order to reduce agricultural surpluses and increasing budgetary expenditures. EC officials have repeatedly emphasized that a restructuring of the CAP is necessary if the Community budget expenditures are not to exceed revenues. The additional price support expenditures which will be required after Spanish accession will heighten the necessity for overall reform.
